Printed copies of the campus drug-free policy, security policy, athletic gender equity policy, and student right to know are available by contacting: Student Services Office; Minnesota State Community and Technical College; 1414 College Way; Fergus Falls, MN 56537-1000; 218.736.1500.

Minnesota State Community and Technical College is accredited by the Higher Learning Commission; Member of the North Central Association (NCA), with additional program-specific accreditation information found in the M State Catalog. Information about NCA can be found on its website at www.ncahlc.org or by writing to the association at 230 South LaSalle Street, Suite 7-500; Chicago, IL 60604; telephone 800.621.7440.

Information contained in this Catalog is periodically updated from time to time without notice. None of the information contained in this Catalog should be regarded as contractual in nature. Data contained in this Catalog is thought to accurately reflect information available at the time of publication (Fall Semester). However, Minnesota State Community and Technical College reserves the right to make substantial changes in curricula, course content and goals, procedures, policies, program requirements and tuition rates/costs at any time deemed necessary between editions. All revisions will take priority over the contents of this edition.

To reach M State with a TTY, contact the Minnesota Relay Service at 651.297.5353 or 1.800.627.3529 and ask to have a call placed to the college. Upon request this information will be made available in alternate formats.
Welcome to Minnesota State Community and Technical College!

Minnesota State Community and Technical College has campuses in Detroit Lakes, Fergus Falls, Moorhead and Wadena, and an online program that offers numerous opportunities to discover your future. Whether you are interested in career and technical training, academic transfer education, advancing in your existing career or just enriching your life and personal interests, M State can meet your professional and personal learning needs. M State serves nearly 8,000 students each year, so we offer large college advantages with a small college feel.

There is something for everyone at M State, and I invite you to visit any of our campuses or our website at minnesota.edu to explore the many pathways open to you. You will find caring and helpful student services staff ready to assist you — be sure to stop by one of our campus Spartan Centers for help with studying, developing a resume, practicing your interviewing skills, getting a job or transferring to a university. Be sure to engage with our experienced faculty who are experts in their fields of study and discipline — you’ll get extra attention with our smaller class sizes. Everyone on campus is eager to assist you in meeting your educational, career and transfer goals, so be sure to take advantage of that.

Your success is our priority, and we are focusing on realizing what we do extremely well, reconnecting with our stakeholders to determine what we can do better and redesigning what we offer to achieve more for you, for the regional workforce and for our communities.

On behalf of our faculty, staff and administrators, I want to thank you for considering M State as your educational partner and pathway to a bright future. We look forward to meeting and working with you to help you reach your career and transfer goals.

Best wishes for success with your college plans and your personal goals. Remember, your success is our vision!

Peggy D. Kennedy, Ed.D.
President

Vision
A success story for every student and stakeholder.

Mission
Provide dynamic learning for living, working and serving.

*M State’s mission is to provide accessible education with vigor and integrity to diverse learners, preparing them for dynamic living, working and serving.*

Values
M State is focused on excellence, integrity, respect and innovation.

- Excellence in teaching and service
- An environment conducive to learning and working
- A culture of diversity and inclusiveness
- Responsiveness to communities served
- Respect and civility in communications
- Openness to innovation and change
- Accountability and transparency in decision-making

Strategic Goals
Aligned with the Strategic Framework of the Minnesota State Colleges and Universities System

Ensure access to an extraordinary education for all Minnesotans

*M State embraces the challenge to excel in teaching, learning and service so all students — career, transfer and life-long learners — are ensured of opportunities for success.*

Be a partner of choice to meet Minnesota’s workforce and community needs

*M State recognizes its role as partner and leader in preparing our students, the region and the state for current and future economic competitiveness in a global market.*

Deliver to students, employers, communities and taxpayers the highest value and most affordable option for higher education

*M State uses sound financial management practices and continually assesses how to productively meet current and future educational needs through innovation, efficiencies and shared services.*
About the Campus

The Detroit Lakes campus, with a total enrollment of 1075, offers students degrees in a range of fields, including business, design, early childhood education, engineering, health care, information technology, transportation and transfer. The campus offers unique programs including PowerSports Technology and Marine Engine Technology – both fitting for a campus in the heart of Minnesota lakes country. Additional programs prepare students for high demand careers in architectural drafting, CISCO, civil engineering technology, nursing, and radiologic technology. Small class sizes, flexible delivery, and an understanding of your prior learning experience creates a more personal education. A structured, cohort-based transfer program prepares students for an easy transition to a four-year college or university. The Workforce Development Solutions division provides customers with consulting, assessment, education and customized training services. The campus provides food service, child care, student organizations, a veteran’s resource center, and support services to promote academic success. Housing options are available near the campus. Scholarship opportunities available through the M State Foundation and Alumni.

About the Community

Detroit Lakes is located just 40 minutes east of Fargo-Moorhead in beautiful Minnesota lake country. With the combination of adjacent prairie, abundant woodlands, and 412 lakes within a 25-mile radius, it makes an ideal place to live and work. In addition to the wonderful setting, Detroit Lakes features a top-rated school system, excellent medical facilities, and numerous park and recreational facilities. Our economic base has an entrepreneurial spirit that is solid and stable with a good mix of manufacturing, tourism, agriculture and retail. Residents and visitors enjoy Detroit Lakes for Northwest Water Carnival, WE Fest Country Music Festival, the Pine to Palm Golf Tournament and the Polar Fest, averaging one special event per week throughout the year. The Detroit Lakes Cultural & Community Center features opportunities for swimming, physical activities, including two gyms and an 800 seat theatre for cultural events. In addition to the golf courses and our famous mile long City beach, Detroit Mountain Recreation Area offers mountain biking, hiking, downhill and cross-country skiing, and an amazing lodge.

About the Campus

The Fergus Falls campus, with a total enrollment of approximately 750, has been providing high-quality academic programs in the liberal arts and earth sciences for more than 55 years. Degree options include Associate in Arts, Associate in Fine Arts in Music, Theater and Visual Arts, Associate of Science in Environmental Science, Medical Laboratory Technology, Nursing and a diploma and AAS in Equine Science and Business. The college is recognized for its rich tradition in the arts, music and athletics. Varsity athletic teams compete in the National Junior College Athletic Association and the Minnesota College Athletic Conference in eight sports: football, volleyball, men’s and women’s golf and basketball, baseball and softball. Visitors are amazed by the extensive art collection displayed across the campus, making art an everyday part of the student experience. The music program is renowned for both vocal and instrumental excellence, and student musicians enjoy multiple choral and instrumental rehearsal rooms, along with computers and software for music composition. The campus offers food service for on-campus residential program and many scholarship opportunities through Fergus Area College Foundation, which has an endowment of over $5 million.

About the Community

Fergus Falls is located in west central Minnesota, less than three hours from Minneapolis-St. Paul and an hour from the Fargo-Moorhead metropolitan area. The city of 14,000 is home to an active arts community and has a wide array of outdoor recreational opportunities, including the trailhead of the 55-mile Central Lakes Trail for bikers and snowmobilers. With more than 1,000 lakes in Otter Tail County, there is no shortage of outdoor and water activities. A Center for the Arts and the Kaddatz Galleries, both located in downtown Fergus Falls, are venues for theater, concerts, independent films and rotating art exhibits. Otter Tail Power Company has its headquarters in Fergus Falls, and the city is a regionally-recognized health care provider through Lake Region Healthcare and new Cancer Care and Research Center.
About the Campus

The Moorhead campus is a vibrant, comprehensive community and technical college, offering in-demand technical/career programs and liberal arts and sciences to 2,928 enrolled students. Students have the option of completing Associate in Science transfer degrees in Accounting, Biological Sciences, Business, Chemistry, Criminal Justice, Engineering, Environmental Science, Human Resources, Information Technology and Nursing or an Associate in Arts transfer degree with the intent of earning a bachelor’s degree or beyond. Innovative programs allow students to prepare for careers in exciting and expanding sectors including transportation, construction trades, human services, graphic and mechanical design, business and health. Industry sponsorships provide students in the transportation, construction trades and health career areas with the opportunity to combine work and school in a synergistic approach giving students needed skills and industry qualified workers. The Moorhead campus proudly supports one of the area’s most extensive and robust art collections. Food service is created by the Culinary Arts students. Academic and technical skill competitions such as SkillsUSA provide opportunities for students to compete on a national level. M State - Moorhead Campus students have a history of placing in the top 15 regionally and the top 10 nationally. Student services supports students with financing, tutoring, academic advising, counseling and a myriad of opportunities for success. Scholarships abound through Moorhead Community and Technical College Foundation.

About the Community

The Fargo-Moorhead metro area, with a population of 228,300, is a college town, small enough to feel comfortable yet offering all the benefits of a larger metropolitan area with its cultural, sports, recreational and commercial diversity. Arts and culture flourish, where local talent supports a community theater, symphony and civic opera company. The cities boast numerous parks, bike trails, ice facilities, playgrounds, swimming pools, ball diamonds, cross country ski trails and golf courses. The business community is thriving as a center for agribusiness, marketing, technology, research, health and construction in the heart of the Red River Valley. The metropolitan area is a regionally recognized health care provider whose members are in the process of constructing a state-of-the-art hospital complex.

Wadena campus, with a total enrollment of 495, offers degrees in a range of fields, including health care, cosmetology, and electrical line worker. Small class sizes mean a more personal education, and most programs offer the kind of hands-on classroom and real-life experiences that are ideal for preparing students for careers. Strong interest in its highly regarded Electrical Line Worker program recently prompted the college to open a satellite site for the program in Baudette, on the Canadian border. Students also can earn an Associate in Arts degree, a springboard for continuing education at a four-year college or university. The campus provides food service, student organizations and support services to promote academic success. Housing options are available near the campus.

**JULY 2018**
- July 4: Independence Day **COLLEGE CLOSED**
- July 27: Summer term ends

Visit minnesota.edu/calendar for more information.
Minnesota State Community and Technical College is a member of the Minnesota State Colleges and Universities system. M State serves more than 8,400 students in credit courses each year in more than 70 career and liberal arts programs online and at its four campuses in Detroit Lakes, Fergus Falls, Moorhead and Wadena.

M State was created July 1, 2003, by the merger of Fergus Falls Community College and three campuses of Northwest Technical College. This new college was developed to better serve the needs of the communities in west central Minnesota and the Red River Valley through a combination of strong technical programs and comprehensive community college curriculum. M State currently has more than 538 employees across Minnesota.

Each of the campuses has been meeting the educational and workforce needs of its community for a half century or more. The Fergus Falls campus was established in 1960 thanks to the initiative of community leaders determined to create a community college where area students could complete the first two years of a four-year degree. The Detroit Lakes, Moorhead and Wadena campuses were established when state leaders recognized the need to provide technical education and training to meet workforce demands. Wadena was founded in 1959, Moorhead in 1965 and Detroit Lakes in 1966. True to the goal of meeting workforce needs, each campus has added and enhanced programs as demands have changed. All four campuses now offer blends of occupational programming and access to a liberal arts and science curriculum.

Healthy Enrollment

M State has maintained healthy enrollment by expanding online classes and programs and workforce development options. Workforce Development Solutions staff work closely with each of our communities to meet the ever-changing needs of local businesses and industries, which has resulted in the growth of site-based workplace training in business and industry. Through collaborative community efforts and business partnerships, the college provided workforce development services and other responsive training programs to more than 5,400 people in Fiscal Year 2016.
Success of Graduates

Student success is measured by factors including student persistence, program completion, graduation and transfer rates, and pass rates for licensure exams. M State’s student persistence rate for first-time students has risen by 4 percentage points during the most recent three years. In 2014 M State’s Nursing and Radiologic Technology graduates had a combined average pass rate of 92 percent on licensure exams, and in 2015 Nursing licensure pass rates were among the highest in the state and well above the national average. The number of graduates was up slightly in 2016 to 1,355 from 2015’s graduating class of 1,340. Forty-eight percent of M State students either graduated from the college or transferred to continue their education at another institution within three years of their start in the fall of 2013.

Serving a Diverse Student Population

M State is in the business of changing lives, and we have the privilege of serving and educating a diverse student population. Every student who walks in our doors, meets our instructors in their place of employment or logs in to our virtual classrooms has a story. The diversity of their stories is represented in our student demographics. In 2016, 14 percent of our students were of an ethnic background other than Caucasian/white, 36 percent had high financial need and 17 percent were first-generation students.

Affordable Education

We provide a cost-effective higher education option for our stakeholders by focusing on stabilizing tuition rates and aggressively monitoring our spending and assets. Following a two-year tuition freeze that began in 2013, a 1 percent tuition reduction was approved by the Minnesota State Board of Trustees for the 2016-2017 academic year. This appropriation of state funds by the Legislature further enabled M State to strengthen our commitment to provide assessable education for students.

2016-2017 In-State Tuition and Fees Comparison

The Tuition and Fees Comparison chart compares tuition rates for full-time students who are state residents. Source: College Navigator (National Center for Education Statistics)
K-12 Collaborations

M State has a strong history of working collaboratively with high schools and other educational institutions within our region.

- M State has partnered with high schools to offer concurrent courses to high school students since 1985. During the 2015-16 academic year, M State reached more than 1,600 students with over 250 offerings at 37 partner high schools.

- M State was the lead institution in the development of an initiative to bring online dual credit college courses to high school students in rural schools throughout the state and continues to offer this option through eCampus in the High School, which serves more than 100 students each academic term.

Through these combined efforts, M State works collaboratively with more than 60 Minnesota high school partners to provide credit-based offerings and college and career preparation services.

M State Partners with Regional Educators

M State has successful partnerships with other colleges and universities in the region, including membership in the Tri-College University partnership and through the up2U scholarship program for students transferring to Concordia, Minnesota State University Moorhead and St. Cloud State University. M State partners with Central Lakes College and Rural Minnesota CEP for the Bridges, Career Advisor and Technology Mobile programs, which all are designed to provide secondary students with opportunities to learn about college programs and career options. In addition, strong partnerships with our regional educational service cooperatives, Lakes Country Service Cooperative and the National Joint Powers Alliance, help us to work collectively to enhance educational opportunities for diverse stakeholders.

Financial Outlook

Stakeholder support of the college is more critical than ever due to significant changes in revenue and funding sources in the past few years. M State remains committed to informed financial planning and a shared vision for the continued efficient use of financial resources so that it can continue to be an affordable educational option for students.

Accreditation

M State is accredited by the Higher Learning Commission: Member of the North Central Association (1972-present). M State was admitted into the HLC’s Academic Quality Improvement Program (AQIP) in 2009. The college has numerous career/technical programs that are additionally accredited by boards, agencies, commissions or professional organizations in specific fields or disciplines.

Our Mission
Provide dynamic learning for living, working and serving.

Our Vision
A success story for every student and stakeholder.
Points of Pride

Instructors are Recognized for Quality
M State faculty members do an outstanding job of providing our students with a quality education; their accomplishments are recognized in a number of ways each year. Two of the most prestigious teaching awards are given through a peer nomination and portfolio process for the National Institute for Staff and Organizational Development and through the System Office Excellence in Teaching award. Faculty are nominated by students, faculty peers or staff, with their selection based on teaching strategies and materials; content expertise; service to students, their profession, their institution and the system; and assessment of student learning and performance.

Employment of Graduates
Not only is M State committed to educating our communities, we are invested in them! From 2010 to 2015, M State has assisted in educating more than 9,000 graduates available for employment in their fields of study. The college’s career and technical programs options boast vigorous advisory committees, and supportive sponsorships and scholarship opportunities. Last year, a large majority of our graduates successfully transferred to universities or found employment with nearly 400 employers in the M State region.

Federal Grants
M State currently manages two federal grants totaling more than $4.7 million. Over the next three years, the U.S. Department of Labor TAAxCCCT Grant will continue to support the ongoing training of more than 400 west central Minnesota residents for careers in construction and utilities. The U.S. Department of Education Title III Grant supports institutional improvements in business efficiencies, faculty development and student development.
In addition, the college is a state grantee of a federal Partnership for Success grant that focuses on preventing underage drinking and drug use through the implementation of research-based prevention strategies.

Focus on Workforce Development and Industry Partnerships
M State is committed to partnering with business and industry to provide high-quality innovative programs to support the economic needs of the region. More than 500 business and industry representatives serve on our program advisory committees. We have 44 career and technical programs that may be completed in one year or less and offer a variety of ways to deliver programs that prepare students for the workplace, including mobile training labs and classrooms, telepresence offerings, and online and blended courses and programs. The college has developed new programs in direct response to industry needs, including Supervisory Leadership Essentials, Industrial Workplace Readiness, and Business and Banking. M State is proud to have successfully launched a workplace readiness English Language Learner course to assist New Americans in the workplace.

Foundation Scholarships
M State is proud to serve each of its communities and is committed to providing affordable, accessible education. Through the support of the four M State campus foundations, their dedicated boards of directors and donors, 423 M State students were awarded more than $415,000 in scholarships in 2016.

Student Life
Student life opportunities at M State focus on engaging students outside of the classroom in active learning, helping students develop coherent values and ethical standards, communicating high expectations for student learning, effectively using resources to achieve institutional missions and goals, forging educational partnerships which advance student learning, and building supportive and inclusive communities. M State has vocal and performance fine arts opportunities, athletics and a large number of student clubs and organizations.

Full time or part time.

Start M State. Go anywhere.
About WDS
Workforce Development Solutions supports business and industry growth in Minnesota. For more than 25 years we have worked with companies to help them expand and become more efficient and to develop a skilled workforce.

Service Area
WDS provides skills and technology training for individuals and organizations in the communities of Detroit Lakes, Fergus Falls, Moorhead and Wadena, as well as the surrounding areas of west central Minnesota and eastern North Dakota. Training is available on-site, at a campus or online. WDS serves approximately 5,500 students annually, providing more than 97,000 hours of training. We have worked with more than 500 companies in Minnesota and Eastern North Dakota to offer contract training or enrolled their workers in open enrollment classes.

Flexible Hour-Based and Credit Options
WDS offers both hour-based and credit courses. Hour-based training usually focuses on a specific training or production need within a company. To develop the internal workforce for new responsibilities and advancement, companies often use credit courses and degree programs. Credit courses are considered to be a key workforce recruitment and retention tool.

Research and Development
Although our primary focus is the incumbent workforce, WDS also serves as the research and development arm of the college. Because WDS staff members are in daily contact with businesses and economic developers, they are in a position to continuously feed information back to the college. WDS develops new programs for businesses that can be offered on the campuses, secures new equipment through grants and serves as an industry connection to the campuses.

Targeted Products and Services
- Business Technology
- Electrical
- Health and Emergency Services
- Leadership Development
- Mechanical/Technical
- Safety and Compliance
- Transportation
- Training products can be customized to fit a particular business need or, in some cases, new products can be developed to meet a new technology or strategic focus. Products and services offered through each area of expertise include:

Fire and Rescue
- Confined Space Rescue
- Hazardous Materials
- Live Fire Training
- National Fire Academy Courses
- NFPA 1001 Firefighter I and II
- NFPA 1670 Technical Rescue Training
- OSHA Required Courses
- Tactics and Strategies Courses

Health
- Continuing Education for Nurses, Social Workers and Dental Professionals
- CPR and First Aid Training
- LPN Lean Leadership Training
- Medication Administration for School Personnel
- Medication Administration for Unlicensed Personnel (MN)
- Medication Administration II (ND)
- Minnesota Cosmetology Continuing Education 4-hour Renewal Course
- Nursing Assistant Training
- Nursing Assistant/Home Health Aide Testing
- Refresher Courses State Certification Test Review
- RN and LPN Nurse Refresher Courses

Leadership Development
- Behavioral Expectations and Interviewing Skills
- Bullying in the Workplace
- Conducting Performance Appraisals
- Customer Service
- Dealing with Difficult People
- Diversity/Culture Change/Generation Gap
- Facilitating Lean Projects
- Franklin Covey Opportunities
- Human Resources Aids
- Interpersonal Skills
- Leadership Management
- Lean Implementation
- Making the Most of Change in the Workplace
- Sales Effectiveness
- Selling Services in a Product World
- Social Media
• Software Applications (Basic to Advanced)
• Strengths Finder
• Stress in the Workplace
• Train-the-Trainer

Mechanical/Technical
• AutoCAD
• Automation
• Basic and Advanced Manufacturing Technologies
• Basic Technical Skills
• BICSI Installer and Technician Level Training

• Forklift Train-the-Trainer
• HazComm/Right-to-know
• HazMat
• HAZWOPER
• Lanyard/Harness
• Lockout-Tagout
• Machine Guarding
• MSHA Part 46 and 48 – New Miner and Annual Refresher Training
• NFPA 70E Arc Flash
• OSHA 10/30 Construction
• OSHA 10/30 General Industry
• Personal Protective Equipment (PPE)
• Pilot/Escort Driver Certification Training
• Rigging/Hoisting
• Scaffolding
• Trenching and Excavation
• Workplace Violence

Transportation
• CDL Training
• MN Commercial Vehicle Inspection Recertification
• Motorcycle and Moped Safety
• Motorcycle Road Guard Certification

High-Quality Trainers, Instructors and Consultants
WDS uses a network of dozens of full-time, adjunct and contract instructors and consultants. Business and industry experience is considered essential, and instructors have varied practical and instructional experiences.

Convenient On-Site and Campus Delivery
WDS provides training and services primarily at each company’s site. In some cases staff will work with companies to set up training classrooms and labs. If a business is located near a campus, training can be held there.

Partnerships
WDS believes that the best way to serve its customers is to develop working partnerships with industry councils, higher education institutions and economic development organizations. Project partnerships have been formed with a large number of economic development groups, as well as regional higher-education institutions.

Minnesota State Community and Technical College
Course Catalog 2017-2018
General Information

Access to Information

The college will make available the following information to all enrolled and prospective students:

Student Right to Know
(Graduation/Completion Rate)
The student Right to Know data discloses annual student completion and graduation rates and is available at minnesota.edu/righttoknow or in printed format by calling 877.450.3322, or by requesting one in Student Development Services on any M State campus, between 8 am and 4:30 pm, Monday – Friday.

Annual Security and Fire Safety Report
The Annual Security and Fire Safety Report informs the campuses of campus crime prevention programs, crime reporting procedures, emergency responses and a three-year statistical history of criminal activity on the college campuses.
A copy of the Annual Security and Fire Safety Report is distributed annually to students and employees and is available from the Student Development Services office on each campus. The Annual Security and Fire Safety Report also includes the current student housing fire statistics.
Prospective students and employees can obtain this information from the college website at minnesota.edu or by calling 877.450.3322.

Cost of Attendance
Visit the college website for information on tuition and fees, estimated book and supply costs, additional program costs and laptop requirements and costs.

Refunds for Dropped Courses and Withdrawals
Information about the Tuition Refund Policy and the return of Title IV grants and loans can be found on the college website, in the College Catalog and under the “Financial” heading in the Student Handbook.

Drop/Add/Withdraw
Refer to minnesota.edu/policies for the most current Drop/Add/Withdraw policy, which explains the process for making course enrollment changes.

Academic Program Information
A listing of all academic programs and their specific requirements is available on the college website at minnesota.edu/degrees.

Family Education Rights and Privacy Act (FERPA)
The Family Education Rights and Privacy Act affords certain rights to students concerning their education records. Primary rights include the right to inspect and review education records, the right to seek to have the records corrected and the right to have some control over the disclosure of information from the records. The complete FERPA policy is included in the College Catalog, in this Handbook and on the college website.

Financial Assistance
The college website and Student Development Services staff can provide the most current information on the availability of financial aid, including eligibility, determination of award amount, satisfactory academic progress standards, aid disbursement, student work opportunities and loan repayment.

College Policies
M State policies are regularly reviewed, and policy changes may occur during an academic year. Please visit the college website for updates to policies which may include the following topics:
Academics
Admission
Campus Environment
Degree Completion (Graduation)
Financial Aid
Nondiscrimination in Education and Employment
Online Majors
Registration
Student Records
Student Support Services
If you do not have access to the internet, contact a member of the Student Development Services team or call 877.450.3322 to receive the policies in an alternate form.

Admission

Undergraduate Admissions Policy
Minnesota State Community and Technical College hereby adopts Minnesota State 3.4 Board Policy and Procedure 3.4.1 in full:
3.4 Undergraduate Admissions Policy:
www.mnscu.edu/board/policy/304.html
3.4.1 Undergraduate Admission Procedure:
www.mnscu.edu/board/procedure/304p1.html

As an open enrollment institution, M State provides students with the opportunity to advance their education regardless of prior academic preparation. We offer comprehensive academic offerings and student support services to educate and train students with diverse backgrounds, academic and personal experiences and life goals. For specific information about the admission process, visit minnesota.edu/admissions.
**General Information**

**Advanced Standing/Placement**
M State awards credit for previously gained knowledge and skills that are equivalent to coursework at the college. Such credit may be granted through various means such as direct transfer of courses of equivalent nature that were completed at regionally accredited institutions of higher education and through articulation agreements for college credit, Advanced Placement courses, CLEP, credit for prior learning or credit by examination.

The amount of credit granted by the college for an exam or other method will not exceed the credit the college grants for an equivalent course or course sequence. The college will not grant credit for exams that overlap completed coursework or for standardized tests for which the student has already gained credit. Credit granted through AP and CLEP may be used for partial fulfillment of the general education distribution requirements for the AA, AS and AAS degrees. Please contact the college registrar’s office with any questions about advanced standing/placement.

**Assessment for Course Placement**
Assessments in reading and math are required of all new students who enroll in more than eight credits at M State. Testing must be completed before registration. Schedules of test dates and times are available online at minnesota.edu/assessment. Accommodations for students with disabilities who need to complete assessment testing should be arranged in advance through a campus Disability Services Office. More information can be found online at minnesota.edu/disabilityservices.

Students who do not meet minimum test scores in reading and math will be required to enroll in developmental courses in those areas. Students must demonstrate proficiency in those courses by receiving passing grades before enrolling for the next course in the particular discipline. These courses provide the basic skills required for success in all college courses.

Developmental courses are not intended for transfer; credits earned in these courses will not meet distribution or elective requirements for graduation.

**Immunization Requirements**
All students must show proof of immunization against diphtheria, tetanus, measles, mumps and rubella. There are two exceptions: 1) if born prior to 1957, or 2) if graduated from a Minnesota high school in 1997 or after. Immunization forms are available at minnesota.edu/forms.

**Notice to Students Regarding Possible Impact of Criminal Records**
Students who have been arrested, charged or convicted of any criminal offense should investigate the impact that the arrest, charge or conviction may have on employment in a specific field or on access to federal, state or other higher education financial aid.

The following site may provide information regarding the impact of criminal records on future employment: Minn. Stat. Ch.609B COLLATERAL SANCTIONS, revisor.mn.gov.

**Visiting Students**
A student who does not intend to immediately pursue a certificate or degree program and who is not seeking financial aid need not go through the formal admission process. No proof of high school graduation or GED attainment is required of this type of student. Visiting students must provide official college transcripts in order to enroll in courses with prerequisites.

Visit minnesota.edu/admissions for more information or to apply as a visiting student.

**Veterans Benefits**
The majors offered by M State have been approved by the Minnesota State Approving Agency for veterans and their dependents eligible for GI Bill educational benefits. To determine eligibility or for assistance with GI Bill educational benefits, students should visit with one of our veterans assistance coordinators. For more information or to contact a veterans assistance coordinator, please see minnesota.edu/veterans. Veterans may receive credit for appropriate military training. The college transfer specialist will determine the number of credits acceptable to transfer.

**Register**
All students who have completed the requirements for admission and have attended a registration event are eligible to register for courses.

**Independent Study**
In special circumstances, a student may obtain permission to take a regular course on an independent study basis. Students also have the opportunity to expand on an area of special interest by developing an independent study project with an instructor and with the approval of the dean of academic affairs.

**Preparing to Transfer**

**Preparing to Transfer to a Four-Year University**
Colleges and universities are working to make transfer easier. Students must plan ahead, ask questions and use pathways created by transfer and/or articulation agreements.

**Students Currently Enrolled at M State:**
Students should discuss plans with their M State advisor. Call or visit the intended transfer institution. Obtain the following materials and information:

- College catalog
- Transfer brochure
- Information on admissions criteria and on materials required for admission (e.g. portfolio, transcripts, test scores). Note that some majors have limited enrollments or their own special requirements such as a higher grade point average.
- Information on financial aid (how to apply and deadlines for application)

After reviewing these materials, make an appointment to talk with a program advisor or counselor at the transfer institution. Be sure to ask about course transfer and admission criteria.

If not currently enrolled in a college or university, students might begin to plan by meeting with a transfer specialist or admission officer from the intended transfer institution.
Understanding How Transfer of Credit Works:
Completion of the 40-credit Minnesota Transfer Curriculum at M State assures the acceptance of these credits as having satisfied the general education requirements of the Minnesota State system and some colleges within the University of Minnesota system. In addition, the four-year institutions in the state strongly recommend that students complete their associate degrees before transferring. The college has articulation agreements with several of these institutions guaranteeing the acceptance of the associate degree as completing the first two years of a baccalaureate degree. Check with an academic advisor for more information.

For students who transfer without completing an associate degree or the Minnesota Transfer Curriculum, the receiving college or university will decide which credits transfer and whether these credits meet its degree requirements. The accreditation of both sending and receiving institution can affect the transfer of credits earned.

Institutions accept credits from courses and programs like those they offer. They look for similarity in course goals, content and level. Baccalaureate degree programs usually count credits in three categories: general education, major/minor courses, and prerequisites and electives. The key question is whether credits fulfill the requirements of the degree or program. Not everything that transfers will apply toward graduation.

Students who change career goals or majors may not be able to complete all degree requirements within the usual number of graduation credits. Students interested in transfer will find additional resources on which credits may transfer at MnTransfer.org and transferology.com.

Preparing to Transfer to M State
Application for admission is the first step in transferring to M State. Fill out the application prior to the deadline, minnesota.edu/admissions. Pay the application fee. Request that official transcripts be sent from every institution attended. Be prepared to provide a high school transcript or GED test scores as well.

After the college notifies students of acceptance for admission, transcript credits will be evaluated for transfer. How courses specifically meet degree requirements is dependent on the student’s declared program of study/major. Some courses may not meet specific department or major requirements.

Questions about the evaluation may be addressed to the registrar’s office. Transfer credit decisions can be formally appealed.

Your Rights as a Transfer Student:
- A clear, understandable statement of an institution’s transfer policy.
- A fair credit review and an explanation of why credits were or were not accepted.
- A copy of the formal appeals process and the ability to appeal any decision made.

Usual Appeals Steps:
- Student completes the Transfer Review/Appeal form available in their eServices account. Supplemental information, such as a course outline or syllabus, must be uploaded for review.
- Information is reviewed by faculty within the appropriate department/discipline.
- Student receives notification of the outcome of the review/appeal via their M State email account.
- If the initial review/appeal is denied and the student wishes pursue a next level appeal, the student may log into eServices and click the “Appeal” button found next to the denied review/appeal entry. Additional information to support this second level appeal would be uploaded at this time and the appeal will be reviewed by the colleges chief academic officer.

Transfer of Credit to M State
Students wishing to transfer credit from another institution to M State must request an official transcript from each institution previously attended. If the student has taken courses at other institutions that are part of the Minnesota State system, the M State transfer specialist will be able to access this information electronically in most cases. For all other college transcripts or for transcripts from Minnesota State institutions that are not available electronically, it is the student’s responsibility to request that official transcripts be sent to M State. The transfer evaluation process will begin once all transcripts have been received and the student has been accepted to M State with a declared major. Students may be required to provide course descriptions, outlines and/or other information regarding their coursework as part of the transfer evaluation process. Technical courses need to have been completed within the last five years unless this requirement is waived (for more information, refer to the college’s Recency Policy).

Transfer of D Grades
If the student’s overall GPA at another institution is lower than 2.0, courses in which the student earned a grade of D at that institution will not be transferred to M State. These courses are listed on the student’s Degree Audit Reporting System (DARS) audit as NTD (non-transfer D). If the student’s GPA at the sending institution is above 2.0, courses at that institution in which a D grade was earned are transferred to M State for credit and are noted on the student’s DARS audit as TD (transfer D). An exception to this requirement is made for any course taken at another Minnesota State system institution if the course has met any of the Minnesota Transfer Curriculum (MnTC) goal area(s). If the student earned a grade of D in a course that meets any MnTC goal area(s) and was taken at a Minnesota State institution, the course will transfer to M State regardless of the student’s GPA at the sending institution.

Individual programs/departments reserve the right to not accept grades of D in fulfillment of program requirements. In these cases, the requirement is applied to all students in the program and to all courses taken, regardless of whether the course was taken at M State or at another institution.

Change of Major/Program or Campus at M State
Students who wish to change their major or move to another M State campus may make the request by completing a Change of Major/Program form, minnesota.edu/forms. The request will be reviewed and approved based on space availability in the program and/or campus requested by the student. The student will be notified by the college if the request cannot be accommodated.

Students in online majors may request a change of home campus by completing a “Change of Home Campus for Online Students” form at minnesota.edu/forms.
Student Records

Confidentiality of Student Records/FERPA

Notification and Student Directory Data

Under the Minnesota Government Data Practices Act (MGDPA) and the Family Educational Rights and Privacy Act (FERPA), students have the right:

- To inspect and review their educational records.
- To request an amendment of records for the purpose of correcting inaccurate or misleading records, or records that violate student privacy or other rights in some fashion.
- To have a hearing regarding records which the student believes are inaccurate or misleading, if the college does not amend records upon request.
- To place a written statement explaining the disagreement with the college in their records, if the college does not amend records after the opportunity for hearing about whether the records are inaccurate or misleading.
- To consent to disclosures of information that identify the student personally, except to the extent that disclosures are allowed without consent under state and federal law.
- To file a complaint with the United States Department of Education if the student believes the college is not meeting the requirements of the federal law. Written complaints should be sent to: Family Policy Compliance Office, U.S. Department of Education, 600 Independence Avenue, S.W. Washington, DC 20202-4605.
- To obtain a copy of the college’s complete policy regarding education records. The college has policy information available in the College Catalog and on the college website at minnesota.edu/policies.

FERPA and the MGDPA permit disclosures of student information without consent to college officials with legitimate educational interest. A college official is a person employed by the college in an administrative, supervisory, academic support or support staff position, a person or company with whom the college has contracted, a student serving on an official college committee, a person serving on the Board of Trustees or in the system office, a person assisting another college official in performing his or her tasks, and/or contractors, consultants, volunteers and other service providers. A college official has legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

Records Maintained on Students are Categorized as Follows:

- Public Data – Data that has been designated as directory data is considered public. The Student Directory Data policy defines directory data for M State.
- Private Data – Almost all educational data is private. Private data is accessible to the subject of the data and to those who have a business need for access to the data. Students must provide the college with prior written consent for disclosure of private data.
- Confidential Data – Confidential data is not accessible to the subject of the data. Confidential data is accessible only to individuals or agencies authorized by law to have access to the data.

Student Directory Data

(Policy currently under review, please check minnesota.edu/policies for updated policy.)

Student directory data is considered public data, and the college may release it without a student’s written consent. A student may, however, make a written request to prevent the college from releasing directory data without the student’s written consent. M State designates the following information as directory data:

1. Name
2. Items needed to be accepted to the college and/or to a selective admissions program
3. Categories of holds preventing a student from registering for classes (i.e., academic or business office)
4. Major field of study
5. College email address
6. Honors and awards
7. Most recent educational agency or institute attended
8. Dates of attendance
9. Weight and height (used for student athletes only)
10. Dates of graduation, certification and awards

Because directory data is considered public, the college will release such information to anyone upon request except for the directory data of students who have requested suppression. Students who wish to suppress their directory data must submit a written request by using the Release of Information form available on the college’s website and selecting the DO NOT RELEASE option, which will remain in effect until a change is requested in writing.

Restricting your data will result in:

- Name not being listed in commencement publications
- Denial of all student directory information being released to third parties
- The college will not verify enrollment or attendance

Students who wish to override a suppression request for a specific party or purpose may do so by providing a written authorization to the Registrar’s Office providing the specific details of the override.

M State designates the following information as limited directory data:

1. Permanent address
2. Telephone number
3. Student’s personal and/work email address (if supplied by student)

This information will be released with limitations to the college’s foundations and/or its alumni associations. Second-year students’ mailing addresses will be disclosed to Minnesota State universities for recruitment or marketing communications related to degree transfer.

The suppression of directory data also includes a suppression of limited directory data unless the student provides a written authorization to release limited directory data to the Registrar’s Office.

Change in Student Records

The college expects students to report any name, address, intended program/major, telephone number or other record changes on the forms available at minnesota.edu/forms.
Students who have name changes must provide the legal documentation as specified on the form available at minnesota.edu/forms. Degrees are awarded under the name the student has on file at the time the degree requirements are completed. Academic records are maintained under a student’s legal name at the time of enrollment. Academic records and credentials are not modified unless the student has an active registration with the college.

Photography/Video for Publicity
Student images (photo or video) may be used by the college for public relations, marketing and/or publications. If a student does not wish to have his/her image used for these purposes, a written request must be filed with the Marketing and Communications office by contacting Tina Bartels at tina.bartels@minnesota.edu.

Academic

Classification of Students
A student who has earned fewer than 30 credits is classified as a freshman. One who has earned 30 credits or more is classified as a sophomore. Two other terms are used occasionally to refer to a student’s status: “Part-time” refers to students who carry less than 12 credits, and “visiting” refers to occasional students who are not currently pursuing a degree or certificate.

Graduation Policy
M State grants Associate of Arts (AA) degrees, Associate of Science (AS) degrees, Associate of Applied Science (AAS) degrees, Associate of Fine Arts (AFA) degrees, diplomas and certificates. The following general requirements apply to all candidates for each of the degrees.

General Requirements:
• Achieve a minimum cumulative GPA of 2.00.
• Successfully complete all required coursework for the program major(s) according to criteria established by the college. The actual graduation date will be within the semester in which all coursework, transfer credits and related materials required for program completion are finalized.
• Programs may have additional graduation requirements. These requirements are published and available from program faculty and advisors.
• Students must earn 20 semester credits/equivalent or one-third of the credits required for graduation at the granting institution, whichever is less.
• Requirements are established at the time of admission to the program.
• Students must complete an application for graduation. The application can be obtained on the college website at minnesota.edu/forms.

Career Services: Exploration, Counseling and Job Search
The college provides opportunities for students to explore careers and take part in career interest inventories through one-on-one and/or group assistance and counseling. Career resource materials are available for students in the Spartan Center on each campus. In addition, students have access to online job postings from employers specifically seeking M State graduates. While the college does not accept responsibility for a student securing employment, students have the opportunity to participate in services and programs designed to build professional skills and intentionally explore the job search process. Services and programs include on- and off-campus job fairs, development and review of job search materials (such as resume, cover letter and portfolio), and individual support with interview skills and job search strategy. Enrolled students and alumni can access online job boards, events and materials by creating an account at careers.minnesota.edu.

Carl D. Perkins Vocational Career and Technical Education Act
M State partners with Lakes Country Service Cooperative and various education, business and community agencies to carry out services as part of the Carl D. Perkins Vocational Career and Technical Education Act of 2006. The purpose of the Act is to improve career and technical education and create opportunities to enter high-skill, high-wage and high-demand employment in Minnesota for all learners. The Act places special emphasis on improving access and services for special student populations defined by law. These special populations include:
• Individuals with disabilities
• Individuals from economically disadvantaged families, including foster children
• Individuals preparing for non-traditional fields
• Single parents, including single pregnant women
• Displaced homemakers
• Individuals with limited English proficiency

Non-traditional fields also receive special emphasis in the Act. A non-traditional field is defined as a high-skill career field for which students from one gender comprise fewer than 25 percent of the students enrolled in the field. Examples include women in construction electricity or men in dental hygiene. M State encourages students to consider non-traditional fields, and we welcome questions and inquiries from all students and members of the public. For more information about non-traditional fields, please contact an enrollment manager at any M State campus.

For information about how to access Perkins services and programs at any M State campus, contact Associate Vice President of Academics Jill Abbott at jill.abbott@minnesota.edu.

Assessment of Student Learning
The college has developed a comprehensive model for the assessment of student learning. The model includes annual course and program assessment, program outcome assessment and institutional core ability assessment. Additionally, all academic programs conduct a comprehensive program review process every three years.

Assessment of Student Learning serves several important functions, and improving student learning remains at the top of the list of those functions. We encourage students to become familiar with their course competencies, program outcomes and the M State Core Abilities, so you are always well informed about the intended learning outcomes of your chosen program.

In addition to the assessment of student learning that takes place in courses, programs and through clinical, internship or practicum experiences in
Industry, M State encourage students to enhance their demonstration of the M State Core Abilities through involvement in cocurricular activities and student life/student development experiences.

For more information about assessment of student learning, contact Associate Vice President of Academics Jill Abbott at jill.abbott@minnesota.edu.

M State College-wide Core Abilities

A. Demonstrate effective communication
Indicators
1. Learner writes clearly, concisely and accurately in appropriate context and format.
2. Learner speaks clearly, concisely and accurately in a variety of contexts and formats.
3. Learner comprehends written and verbal communication.

B. Demonstrate critical thinking
Indicators
1. Learner draws conclusions based on evidence.
2. Learner distinguishes between facts, fallacies, inferences and judgments.
3. Learner considers multiple perspectives in problem solving.

C. Demonstrate quantitative and logical reasoning
Indicators
1. Learner performs computations using appropriate methods.
2. Learner demonstrates numerical and logical reasoning.

D. Demonstrate personal and social responsibility
Indicators
1. Learner demonstrates personal integrity and professional ethical practices.
2. Learner demonstrates respect for the rights, views and work of others.
3. Learner demonstrates personal accountability.
4. Learner demonstrates multicultural and global awareness.
5. Learner demonstrates the ability to work in a team.

E. Demonstrate effective use of information technology
Indicators
1. Learner applies technology to create solutions.
2. Learner uses technology to communicate.

Academic Support Services
The college provides students with numerous services to support their educational experience. Each campus has tailored its services to meet the needs of its student population and may include:

- Academic advising, counseling and support
- Career counseling, resources and assessment
- Career services
- English Language Learner services
- Free tutoring, study skills assistance and other learning services
- Career counseling and referrals to other agencies

For more information or to obtain any of these services, contact Student Development Services or the Support Center at 877.450.3322

International Students (F-1, M-1 Visa)

International students are required to be enrolled in 12 or more credits each semester (fall and spring). Upon arrival at the college, students must present their visa and passport bio page to the Designated School Official (DSO) on their campus. International students must purchase health insurance through Minnesota State prior to registering for classes.

English Language Learners (ELL)

Enrollment managers and academic advisors offer assistance to English language learners who seek aid in getting admitted and enrolled at M State. M State offers courses and support services to assist ELL students in reaching their educational goals. See an academic advisor, enrollment manager or resource specialist for more information on support services.

Student Credit Load

The maximum number of credits that a student is allowed to take in any one semester is 20. A student may complete the appeal form to petition the academic dean to take more than 20 credits in one semester.

Credit for Prior Learning

Credit for Prior Learning provides students an opportunity to earn college credit through alternative pathways by demonstrating how the student has met course specific outcomes for their program of study at college-level equivalency. The student may demonstrate this through professional life experiences, non-credit training or courses, and/or experiential setting opportunities.

Credit for Prior Learning may be earned through the following opportunities:

- Credit by examination either by faculty assessed course specific examination or standardized exams such as CLEP, AP or DSST.
- Faculty assessed course specific review by demonstration or portfolio.
- Institutional review of transcripts from a third party agency such as the American Council on Education (ACE).

Students requesting Credit for Prior Learning assessment must be actively enrolled and pursuing a degree through M State.

No more than 75 percent of a degree program conferred by Minnesota State Community and Technical College can be earned through Credit for Prior Learning (review Residence Policy regarding requirements).

An assessment fee may be charged for applicable Credit for Prior Learning services.

Financial aid amounts are based in part on the number of credits students register for each semester. Any Credit for Prior Learning credits are not counted toward determining a student’s status of full-time, three-quarter-time, half-time, or less than half-time to determine financial aid awards.

For additional information, please see the Credit for Prior Learning policy at minnesota.edu/policies.
Auditing Courses
Students intending to audit a course (earn no credit) are required to register for the course, pay the course tuition and fees and submit an Audit Grade Request form online. Auditing students may not need to meet regular course requirements but should confer with the instructor as to their privileges and responsibilities in the course. A student may change from credit to audit status or audit to credit status any time during the first five days of the semester. Courses audited are not included in determining the total credits earned toward a major or the cumulative grade point average.

Drop/Add/Withdraw

Full Semester Courses
DROP
- A student may drop a class within the first five (5) business days of a semester to avoid being billed for the course.
- No entry will be made in the student’s academic record if a course is dropped within the first five (5) business days of a semester.
ADD
- A student may add a class within the first three (3) business days of a semester.
WITHDRAW
- A student has the option to withdraw from a course no later than the date on which eighty percent (80 percent) of the days in the academic semester have elapsed.
- A full semester course dropped after five (5) business days and before 80 percent (80 percent) of the semester has elapsed will appear on the student’s record as a Withdraw (W).
- Faculty have the obligation to enter the letter grade of FW (Failure to Withdraw) if a student ceases attending a course for 14 consecutive calendar days.
- If a student is issued a grade of FW as a result of non-attendance in a course, the FW is a final grade and may impact a student’s financial aid eligibility, dependent upon the last date of attendance entered. The FW is not calculated in the term or cumulative grade point average; but is calculated in the student’s completion percentage.
- Tuition and fees will be assessed for all courses for which the student is registered after the first five (5) business days of the semester.
- Courses withdrawn from after the fifth (5th) business day will not reduce the tuition obligation.
- The last day to withdraw for each course can be viewed in the students’ schedule available via eServices, which can be accessed through SpartanNet.

Financial Aid Eligibility
- Financial aid awards are affected by a full college withdraw.
- The College encourages students to speak with a financial aid representative to determine the financial impact if considering a full withdraw from the college.
- The college reserves the right to administratively withdraw or drop a student for non-attendance in special circumstances.

Failure for Non-Attendance (FN)
FN (Failure for Non-Attendance) is a grade designation assigned when a student enrolled but never attended a course. For additional detail, see the Failure for Non-Attendance Policy on the college’s website.

Failure to Withdraw (FW)
FW (Failure to Withdraw) is a grade designation assigned when a student has ceased active participation for 14 consecutive calendar days (including holidays) prior to the end of the term. For additional detail, see the Failure to Withdraw Policy, which can be found on the college’s website.

Short Session Courses
DROP
- Students will have one (1) business day past the first meeting day of the course to drop the course without being billed or having the course appear on the student’s academic record (transcript).
ADD
- Students must add courses no later than one (1) business day after the first meeting day of the course.
WITHDRAW
- A student may withdraw from the course no later than the date on which eighty percent (80 percent) of the instructional days for the course have elapsed.

Withdrawing from the College
Students needing to initiate a withdrawal from all their courses can do so online at minnesota.edu. Please note that tuition and fee refunds do not apply to withdrawing from individual courses.

The college encourages students to visit with their academic advisor prior to making a decision to complete the withdrawal process. Withdrawing may have an impact on student repayment of financial aid, eligibility to receive financial aid and satisfactory academic progress.

The college refunds tuition and fees to students who withdraw in accordance with Minnesota State policy. Students receive a proportionate refund for tuition and fees provided the withdrawal process is completed within the established deadline.

After the fifth day of the semester, the college issues refunds according to the following schedule:
Fall and Spring semesters:

<table>
<thead>
<tr>
<th>Date of Withdrawal</th>
<th>Refund allowed</th>
</tr>
</thead>
<tbody>
<tr>
<td>6th through the 10th day of the term</td>
<td>75 percent</td>
</tr>
<tr>
<td>11th through the 15th day of the term</td>
<td>50 percent</td>
</tr>
<tr>
<td>16th through the 20th day of the term</td>
<td>25 percent</td>
</tr>
<tr>
<td>21st day and after</td>
<td>No refund allowed</td>
</tr>
</tbody>
</table>

Summer sessions and other terms at least three weeks in length but less than 10 weeks in length:

<table>
<thead>

<tbody>
<tr>
<td>6th through the 10th day of the term</td>
<td>50 percent</td>
</tr>
<tr>
<td>11th day and after</td>
<td>No refund allowed</td>
</tr>
</tbody>
</table>

Minnesota Transfer Curriculum (MnTC)

The Minnesota Transfer Curriculum (MnTC) is the result of a collaborative effort by all of the two- and four-year public colleges and universities in Minnesota to define a common philosophy toward general education. The goal of this effort is to help students transfer their work in general education. Completion of a defined transfer curriculum at one institution enables a student to receive credit for all lower-division general education courses upon admission to any other Minnesota State institution.

Students who complete the general education transfer curriculum are certified in 10 areas of competency by faculty at the sending institution. Beginning January 1, 2002, all MnTC courses offered by Minnesota State institutions must transfer within Minnesota State into the goal areas as designated by the original institution. The following are the 10 goal areas of the MnTC:

1. Written and Oral Communication
2. Critical Thinking
3. Natural Sciences
4. Mathematics/Symbolic Systems
5. History and the Social and Behavioral Sciences
6. The Humanities—the Arts, Literature and Philosophy
7. Human Diversity
8. Global Perspective
9. Ethical and Civic Responsibility
10. People and the Environment

The college Catalog contains a complete listing of all the MnTC courses and their corresponding goal areas. The college website also contains this listing.

Degree Requirements

The requirements for the AA, AS, AAS and AFA degrees, diplomas and certificates are detailed in the College Catalog, in addition to being located on the M State website.

Please consult an academic advisor with questions about the course requirements for a specific degree, diploma or certificate.

Academic Advising

It is the college’s philosophy that academic advising is essential to the growth and development of each individual student. Academic advising will be available to all students to assist with scheduling and academic issues. It is the intent of the college to provide the student with personally relevant information and instructional assistance.

Mid-Term Progress

Students should meet with their advisors to review mid-term progress each semester.

Final-Term Grades

Final grades are provided to students upon completion of an academic term.

</tbody>
</table>

Other Designations:

- **AU** Audit of a class for no credit. The AU designation does not impact grade point average or satisfactor academic progress. ** Z Designator to indicate faculty member has not submitted a grade.
- **FN** Failure for non-attendance. Used at the end of the course’s drop/add period when the student has never attended. The FN designation does not impact grade point average but may prevent financial aid from applying for the course (or will force a recalculation of financial aid that may have been applied prior to the posting of the FN). In the event of an FN grade posting, the student no longer has access to any course content, including electronic access to the course.
- **FW** Failure to withdraw. When the student has ceased active participation for 14 consecutive calendar days prior to the end of the term, the instructor may issue a grade of FW. Active participation in an online course is defined as completing an assignment from your instructor. Examples of this may include submitting a discussion post, uploading an assignment to the drop box, taking a quiz, or completing a survey, etc. The type of assignment may vary by course and instructor. Simply logging into the online classroom does not count as active participation. The FW designation does not impact grade point average and may force a recalculation of financial aid applied if the FW represents a total withdrawal from all coursework for the term prior to the 60th percentile date for the term. In the event of an FW grade posting, the student no longer has access to any course content, including electronic access to the course.

** A student auditing a course will pay the normal tuition rate.

*** A student may request faculty to assign the student a grade of incomplete (I). A grade of “I” will convert to an “F” at the end of the subsequent semester (excluding summer semester) unless the faculty member submits a grade change with the earned grade to replace the I. An incomplete grade must be removed by completing course requirements at the end of one semester, excluding summer semester. Any incomplete grade not removed will be changed to an “F.”
Repeating Courses
All courses taken at M State may be repeated. A student may repeat a course an unlimited number of times, unless stated otherwise. Both the original and the repeat grade will appear on the student’s transcript. The highest grade will be used to compute the student’s GPA. Exceptions include choir, music lessons and student newspaper. Because financial aid may not cover the cost of repeated courses, students are advised to consult with the financial aid office.

Grade Point Average
Academic progress will be evaluated in part in terms of grade point average. The following system will be used to establish a student’s grade point average and will be the only grades included in the GPA calculation:

- A = 4 grade points per credit
- B = 3 grade points per credit
- C = 2 grade points per credit
- D = 1 grade points per credit
- F = 0 grade points per credit

A GPA is determined by the sum of all grade points divided by total credits attempted, except those credits that carry grades other than the usual A - F grades.

Academic Forgiveness
Academic forgiveness gives an undergraduate student a one-time opportunity to establish a new grade point average. Academic forgiveness cannot be granted if a student has earned a post-secondary degree following his/her initial M State attendance and has applied M State credits toward that degree. Courses that have been used for completion of certificates, diplomas or degrees are not subject to academic forgiveness.

Please see the college website at minnesota.edu/policies for the complete Academic Forgiveness Policy.

Satisfactory Academic Progress
All students in a program of study must meet satisfactory academic progress standards in order to remain enrolled and maintain eligibility for financial aid. Students must maintain an acceptable grade point average and completion rate for their registered credits to meet M State’s standards for satisfactory academic progress. The acceptable grade point average and completion rate are based on cumulative registered credits and are detailed below:

Qualitative Measure
Grade Point Average (GPA): All students are required to meet the minimum cumulative GPA as shown below.

<table>
<thead>
<tr>
<th>Cumulative Registered Credits</th>
<th>Minimum Required GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 – 5</td>
<td>0.00</td>
</tr>
<tr>
<td>6 – 23</td>
<td>1.75</td>
</tr>
<tr>
<td>24 or more</td>
<td>2.00</td>
</tr>
</tbody>
</table>

Quantitative Measure
Completion Percentage: All students are required to earn a minimum of their cumulative registered/attempted credits. Grades of F, FN, FW, I, NC, W and Z (or blank/missing) are treated as registered credits but NOT earned credits and thus negatively impact the percentage of completion.

Formula:
Percent earned = \[ \frac{\text{cumulative earned credits}}{\text{cumulative registered credits}} \times 100 \]  

Evaluation Period
The college will evaluate satisfactory academic progress after each term which includes fall, spring and summer. All students with registered credits during a term will be evaluated at the end of that term.

Failure to Meet Standards
Warning Status: If at the end of the evaluation period a student has not met either the college’s GPA or completion percentage standard, the student will be placed on warning status for one evaluation period. Students on warning status are eligible to register and receive financial aid.

Reinstatement of Students on Warning Status: If at the end of the academic warning period a student who has been on warning status has met both the cumulative GPA and cumulative completion percentage standards, the warning status is ended and the student is returned to good standing.

Suspension of Students on Warning Status
If at the end of the warning period a student who has been on warning status has not met both the college’s cumulative GPA and completion percentage standards, the student shall be suspended. Students on suspension are not eligible to register or receive financial aid. Without an appeal (see “Appeals and Probation” below), the suspension period is for one calendar year. Students returning after the one-year suspension period must still appeal for potential financial aid reinstatement.

Suspension of Students for Other Reasons
Suspension for Inability to Meet Program Requirements within the Maximum Time Frame: If at the end of the evaluation period the college determines it is not possible for a student to raise his or her GPA or course completion percentage to meet the standards before the student completes his or her program of study at the college, the student shall be suspended from financial aid eligibility.

Suspension for Exceeding the Maximum Time-Frame: If at the end of the evaluation period a student has failed to meet the college’s standard for measurement of maximum time-frame, the student shall be suspended from financial aid eligibility.

Suspension for Extraordinary Circumstances: The college may immediately suspend students in the event of extraordinary circumstances, including but not limited to previously suspended (and reinstated) students whose academic performance falls below acceptable standards during a subsequent term of enrollment; students who register for courses, receive financial aid and do not attend any classes; and students whose attendance patterns appear to abuse the receipt of financial aid.

Suspension at Another Minnesota State Institution: Students who have been suspended from another Minnesota State institution who have an active suspension on their record will not be allowed to enroll at the college. Students whose suspension period has elapsed may enroll at the college but may not be eligible for financial aid until they’ve academically performed at an acceptable term level (75 percent completion and a term GPA of 2.25 or greater). These students will enter the college on probationary status.

Appeals and Probation
Appeals: Students may appeal their suspension based on unusual or extenuating circumstances. Extenuating circumstances include:

- Serious illness or injury to a student or immediate family member (parent, spouse, sibling or child) that required extended recovery time
• Death of an immediate family member (parents, spouse, sibling or child)
• Significant trauma in a student’s life that impaired the student’s emotional and/or physical health
• Other unexpected documented circumstances beyond the control of the student
• Suspension due to an excessive number of credits without completing a degree, diploma or certificate

The student shall submit, as part of the appeal, information as requested regarding why the student failed to make satisfactory academic progress and what has changed in the student’s situation that would allow the student to demonstrate satisfactory academic progress (SAP) at the end of the next evaluation period.

An appeal may be approved only if the college:
1. Has determined that the student should be able to meet SAP standards at the end of the next evaluation period; or
2. Develops an academic plan with the student that, if followed, shall ensure that the student is able to meet SAP standards by a specific point in time; and
3. Maintains a standard of term performance of a minimum of 75 percent completion rate AND a minimum GPA of 2.25 until such time as satisfactory cumulative measures are met.

Probation: A student whose suspension period of one year has passed or who has been granted reinstatement through the appeal process shall be placed on probation. If, at the end of that evaluation period, a student on probation:
• Has met the college’s cumulative grade point average and completion percentage standards, the student shall be returned to good academic standing.
• Has not met the college’s cumulative grade point average and completion percentage standards but has met the conditions specified in his/her academic plan AND a standard of term performance of a minimum of 75 percent completion rate AND a minimum GPA of 2.25, the student shall retain his/her financial aid and registration eligibility under a probationary status for a subsequent evaluation period.
• Has not met the college’s cumulative GPA and completion percentage standards and also has not met the conditions specified in his/her academic plan, the student shall be re-suspended immediately upon completion of the evaluation period. The suspension period is for one calendar year; students must appeal for potential financial aid reinstatement.

Notification of Status and Appeal Results
Status Notification: Students are notified in writing (email or letter) when the evaluation of satisfactory academic progress results in Warning, Suspension or Probation. The notice includes the conditions of the current status and the conditions necessary to regain eligibility for registration and financial aid (where applicable). Notice of suspension also includes the right and process necessary to appeal suspension.

Appeal Result Notification: Students are notified in writing (email or letter) of the results of all appeals. Approved appeals may include specific conditions under which the appeal is approved and any conditions necessary to retain eligibility for registration and financial aid.

Reinstatement
Students who have been suspended from financial aid eligibility may be reinstated after an appeal has been approved or the minimum cumulative GPA and completion percentage standards have been achieved. Students suspended from the college may be reinstated to enroll for classes after an appeal or after the suspension period of one year has passed but may not be eligible for financial aid until they’ve met the conditions of their appeal for financial aid reinstatement.

Definitions
Credits: The unit by which academic work is measured.
Registered (Attempted) Credits: The total number of credits for which a student has officially enrolled at the end of the registration drop/add period each term.
Cumulative Registered Credits: Cumulative registered credits are the total number of credits registered for all terms of enrollment at the college, including summer terms and terms for which the student did not receive financial aid.
Earned Credits: Earned credits include the grades of A, B, C, D, AH, BH, CR and P. They are successfully completed credits that count toward the required percentage of completion (66.6 percent) as defined by the quantitative measure.
Attempted, NOT Earned: Grades of F, FN, FW, I, NC, W, Z (or a blank/missing grade) will be treated as credits attempted but NOT successfully completed (earned).
Academic Forgiveness: Credits for which a student has been granted academic forgiveness WILL be included in all financial aid satisfactory progress measurements.
Audited Courses: Audited courses are not financial aid-eligible courses and are not included in any financial aid satisfactory academic progress measurements.
Consortium Credits: Consortium credits are credits for which a student is registered at another college/university, which are accepted in transfer by this college and are included for purposes of processing financial aid at this college. These credits are included in all satisfactory academic progress measurements.
Developmental Credits: Developmental credits are awarded for remedial course work (below 1000 level). Students may receive financial aid for developmental credits up to a maximum of 30 credits (English Language Learner courses). These credits are included in all satisfactory academic progress measurements. However, up to 30 developmental credits are excluded from the maximum timeframe calculation.
Incompletes: The grade of “I” (incomplete) is a temporary grade which is assigned only in exceptional circumstances. It will be given only to students who cannot complete the work of a course on schedule because of extraordinary circumstances beyond their control. An “I” grade will automatically become an “F” grade at the end of the next term (not including summer sessions) if requirements to complete course work have not been satisfactorily met. Faculty have the option of setting an earlier completion date for the student. A grade of “I” is not included when calculating grade point average or earned credits. Thus, it does not impact GPA but does negatively impact earned credits and, therefore, negatively impacts the student’s percent of completion.
Repeat Credits: Repeat credits are credits awarded when a student repeats a course in order to improve a grade. A student may repeat a class as allowed by the college. The college will determine, based on its Repeating Courses Policy, which grade will become the grade calculated in the GPA. All repeated credits are included in the percent of completion and maximum time frame calculations.
Transfer Credits: Transfer credits are credits earned at another institution which are accepted by this college. Transfer credits which are accepted by M State shall be counted as credits attempted and completed for calculation of completion percentage and maximum time frame. Grades associated with these credits are not included in calculating GPA.
Withdraw: The grade/mark of “W” (withdraw) is assigned when a student withdraws from a class after the drop period. It is not included in calculating grade point average or earned credits. Thus, it does not impact GPA.
but is counted as attempted credits, therefore negatively impacts the student’s percentage of completion.

**Academic Honesty and Integrity**

M State is committed to providing students with the competencies and skills associated with academic honesty and integrity. Students are expected to meet their academic requirements with honesty and integrity pursuant to this policy. Students are expected to be the sole authors of their work and to acknowledge the authorship of others’ work through proper citation and reference. Use of another person’s ideas, including another student’s, without proper reference or citation constitutes plagiarism and academic dishonesty and is prohibited conduct. The college extends the concept of plagiarism to include issues of copyright and trademark infringement. Submission of prior work without self-citation constitutes self-plagiarism and academic dishonesty and is prohibited conduct.

Collaboration in the completion of course work is prohibited unless explicitly permitted by the course instructor. Where such collaboration is permitted by the course instructor, students must acknowledge any collaboration and its extent in all submitted course work.

The consequences of academic dishonesty are determined on a case-by-case basis by each instructor and may include but are not limited to one or more of the following academic consequences: non-acceptance of submitted course work, failing grade on an assignment, lower grade in a course, or failing grade in a course. In severe cases, the student may be referred to the student code of conduct process for possible additional sanctions.

M State students, faculty and staff share the responsibility for promptly reporting any alleged violation of this policy.

**Rationale**

In support of M State’s core values, this policy establishes the standards for academic honesty and enforces the college’s commitment to teaching and learning while maintaining authenticity, ethics and scholarship in one’s work as a student at the college. This policy also establishes the due process procedures for the internal resolution of acts of academic dishonesty.

**Definitions**

**Academic dishonesty:** Academic dishonesty refers to the use of either intellectual property produced by the work of others that has not been given the appropriate recognition or the intentional misuse of quantitative or qualitative data.

**Plagiarism:** Plagiarism is one example of academic dishonesty. Plagiarism is presenting someone else’s ideas or work as your own. Plagiarism also includes copying verbatim or rephrasing ideas without properly acknowledging the source by author, date and publication medium. Students must take great care, whether in a draft or final version of a paper or project, to distinguish their own ideas and language from information acquired from other sources. Sources include published primary and secondary materials, electronic media, unpublished materials, and information and ideas gained through other people.

Consequence: A consequence is an academic decision that may be issued due to committing an act of academic dishonesty. Academic consequences may include but are not limited to one or more of the following: non-acceptance of submitted course work, failing grade on an assignment, lower grade in a course or failing grade in a course. In severe cases, the student may be referred to the student code of conduct process for possible sanctions. This list is not exhaustive.

**Academic Appeals**

Students may appeal any academic issue and discuss it with the appropriate employee(s) and/or administrator(s) as established by college policy or procedure. Students have the right to seek remedy through the college’s designated academic appeal process. Students should use available informal means (direct conversation) to resolve disputes before filing an appeal. There will be no retaliation of any kind against students, faculty or staff who participate in the appeal process. For more information about filing an academic appeal, contact Student Development Services.

**Student Grievances**

Students have the right to file a grievance in writing if they have allegations of improper, unfair, arbitrary or discriminatory action by an employee involving the application of a specific provision of a college rule or regulation. Students should use available informal means to have decisions reconsidered before filing a grievance. No retaliation of any kind shall be taken against a student for participation in a complaint or grievance. These procedures shall also protect data privacy rights. For more information about filing a student grievance, contact Student Development Services. Student Grievance form can be found online at minnesota.edu/forms.

**Disruption-Free Classroom**

The college strives to create a classroom atmosphere that is characterized by respect, openness, and cooperative interactions. Students play a critical role in helping to create a classroom environment where all students can learn without disruption. Students are not allowed to be disruptive in class.

Examples of disruptive behavior include, but are not limited to:

- Making loud and distracting noises.
- Eating in class when it is prohibited.
- Monopolizing classroom discussions to the detriment of student learning or the faculty member’s ability to teach.
- Excessive amounts of emails sent directly to the faculty member that monopolize the faculty member’s time and are detrimental to the faculty member’s ability to teach.
- Repeatedly interrupting when the instructor or others are speaking or persisting in speaking without being recognized.
- Using cell phones or electronic devices when prohibited.
- Behavior that distracts the class from the subject matter or discussion.
- Refusal to comply with faculty direction.
- Repeatedly leaving or entering the classroom during class without authorization.
- Failing to respect the rights of other students to express their viewpoints.
- Electronic conversations that are off-topic or not related to learning materials.

A student who has been notified and/or removed three or more times for disruptive behavior may be referred to the appropriate academic administrator. It is possible that a student who has been notified or removed from a class three or more times will not be allowed to continue to attend or participate in the class in accordance with due process procedures. Removal from a course may result in a student earning a failing grade for the course, and the student will not be eligible for a refund. Any adjustment a failing grade or removal from a course may cause to the student’s financial aid eligibility and/or financial implications is solely the student’s responsibility.

Examples of extreme disruptive behavior include, but are not limited to:

- Verbal abuse such as profanity or derogatory language, hostile
Proctoring services are available to enrolled M State students on each of the four campuses at no cost. Proctoring services are available for a fee to all other students or community members.

M State will only proctor exams during regular business hours and when the identified site proctor, or designee, is available. The college will make reasonable efforts to provide all necessary proctoring needs. If the proctoring request exceed staff/proctor or facility capabilities, the students/examinee will be directed to alternate proctoring options.

A student who has been notified and/or removed for extreme disruptive behavior will be referred to the appropriate academic administrator. A student who has been notified or removed from a class will not be allowed to continue to attend or participate in the class in accordance with due process procedures. Removal from a course may result in a student earning a failing grade for the course, and the student will not be eligible for a refund. When a student earns a failing grade or is removed from a course, it may impact the student’s financial aid eligibility and/or result in financial implications the student would be responsible for addressing. Students in violation of this academic policy may also be in violation of the Student Conduct Code and may be subject to concurrent and or separate sanctions pending the offense.

Program Interruption

The academic calendar of M State is subject to modification or interruption due to occurrences such as fire, flood, labor disputes, interruption of utility services, acts of God, civil disorder and war. In the event of any such occurrences, the college will attempt to accommodate students. The college will not, however, guarantee that courses of instruction, extracurricular activities or other college programs or events will be completed or rescheduled.

Definitions

Class/Classroom - a physical classroom, lab, instructional field space, off-site practicum/clinical space or the online instructional environment.

Notification – a notification can be delivered via the student’s college email account, mailed to the students address on file with the college, delivered in person or a combination of the aforementioned methods.

Financial

Tuition

Tuition for all students is set annually by the Minnesota State system Board of Trustees and charged on a per credit basis. All applicable tuition charges are billed to the student and are payable on or before the tuition and fee due date. Tuition not paid by this date may result in the cancellation of all courses per Board Policy 5.12.3.

Cancellation for Non-Payment

Minnesota State system policy requires that minimum payment criteria must be met fifteen business days prior to the first day of each semester to avoid an administrative drop of all courses a student is enrolled in for the term. To ensure courses are not canceled, a student must have one of the following payment criteria in place.

1. Pay in full using cash, check or credit card.
2. Enroll in a payment plan. The student has made a down payment of 15 percent or $300, whichever is less, and an active payment plan with Nelnet Business Solutions/FACTS in place.
3. Apply for federal financial aid. Once the student has applied for financial aid and M State has received the application (FAFSA) results from the Department of Education, courses will be confirmed. To access the FAFSA application, go to fafsa.ed.gov.
4. Submit a scholarship or third-party authorization. As soon as M State has received payment in the form of scholarships, third-party authorizations or tuition waivers that meet the minimum down payment of 15 percent or $300, courses will be confirmed.
5. Apply for Veteran’s Education Benefits and complete the Veteran’s Benefit Sign-Up form.
6. For international students, an active I-20 or DS2019 is on file.

Create an Active File

Students can manage their account online at SpartanNet by clicking on the eServices link. Once student tuition and fee bills are posted, there will be messages to indicate whether the payment criteria to avoid an administrative drop have been met. If any known payment or financial aid information does not appear on the online screens, students should contact Student Services for resolution as early as possible.

Students who register and later change their plans for attendance should not rely on the cancellation for nonpayment (commonly referred to as drop for non-payment) process to complete administrative drops for them. Students who do not wish to be enrolled must drop their courses via the online registration process and officially withdraw from M State for accurate determination of their financial obligation to the college, if any.

Tuition Reciprocity

Reciprocities agreements exist between the state of Minnesota and the states of North Dakota, South Dakota, Wisconsin, Michigan, Missouri and Nebraska. Students of these states and the province of Manitoba are permitted to pay a special approved tuition rate. Reciprocity application forms are available from high school counselors, online or Student Development Services.

Non-resident Tuition

M State allows students from states other than Minnesota and from states that do not have reciprocity agreements to attend and pay resident tuition rates.
General Fee for Senior Citizens
As defined in Minnesota Statute §135A.51, a senior citizen who is a legal resident of Minnesota who has reached 62 years of age before the beginning of any term in which a course of study is pursued or is a person receiving a railroad retirement annuity who has reached 60 years of age before the beginning of the term, can pay an administrative fee of $20 per semester credit to be enrolled in credit courses on a space-available basis after all students who pay regular fees have been accommodated.

Residency
Students who seek to qualify for in-state tuition must first meet the following threshold requirements:

- Students must have resided in Minnesota for at least one calendar year immediately prior to applying for in-state tuition.
- Residence in Minnesota must not be merely for the purpose of attending the college.

Each of the following additional facts and circumstances will be considered when responding to a petition for in-state tuition. Not one of these factors is either necessary or sufficient to support a claim for in-state tuition.

- Continuous presence in Minnesota during period when not enrolled as a student
- Sources for financial support are generated within Minnesota
- Domicile in Minnesota of family, guardian or other relatives or persons legally responsible for student
- Ownership of a home in Minnesota
- Permanent residence in Minnesota

The following circumstances, standing alone, shall not constitute sufficient evidence of domicile to affect eligibility for in-state tuition under these regulations but may be considered as part of the demonstration of the facts and circumstances listed above.

- Voting or registration for voting
- The lease of living quarters
- A statement of intention to acquire a domicile in Minnesota
- Domicile of student’s spouse in Minnesota
- Automobile registration
- Other public records, e.g. birth and marriage records

College Fees
Various fees will be assessed to students depending upon enrollment status, courses attempted and services offered by the campus attended. The following is a list of the fees that may be assessed. Fees unique to a program or a class offering are detailed in the course requirement list. Fees shall be established annually by the president. A fee schedule is available from the campus business office for the current academic year. Fees may vary based on the campus where the student is enrolled.

Application Fee
All students entering the college will be assessed a one-time, non-refundable application fee.
Nursing Application Deposit
A deposit is required of all students applying for the nursing programs. The deposit is returned to the applicant if he or she is not accepted into one of the college’s nursing programs. If the student is accepted, the deposit is credited toward the student’s first term tuition.

Nursing Fee – ATI Package
Assessment Technologies Institute (ATI) is a comprehensive assessment and review program that is integrated into all Nursing program courses. The package includes access to computer modules, content review, lab skills and a live NCLEX Review Course delivered at each campus at the end of the program.

Parking/Common Area Fee
Parking fees will be assessed on a per credit basis. The proceeds from this fee are used to upgrade and maintain the college parking facilities.

Pottery Clay Fee
Students taking the pottery course will be creating and keeping clay projects throughout the course. Each student will be assessed a fee to pay for the cost of the clay projects.

Private Music Lessons
Students wishing to take private vocal or instrumental music lessons will be assessed a fee for the lessons.

Professional Liability Fee
Professional liability fees will be assessed to students enrolling in courses requiring clinical/internship experience. This fee is used to purchase professional liability insurance on the student’s behalf.

Replacement of Student Identification Card
Each student will receive a student identification card at no charge. In the event the card needs to be replaced, a fee will be assessed to the student.

Technology Fee
Technology fees shall be assessed on a per credit basis as outlined in the technology fee plan. Proceeds from this fee shall be used to upgrade and maintain the technical infrastructure of the college and to assist in the staffing of technology-related positions.

Testing Fee
Assessed to students taking HLTH 2215, RADT and SURT courses.

Student Activity Fee
A student activity fee shall be charged to all students to support Student Life activities.

Student Association Fee
All students shall be assessed a fee which is passed on to the Minnesota State College Student Association for college membership dues. This fee shall be assessed on a per credit basis.

Uniform Deposit Fee
This fee will be assessed to all students who rent a uniform from the college. The deposit is charged to ensure all uniforms are returned to the college in the same condition they were received (less ordinary wear). The fee is refundable at the end of the year if all uniforms are returned undamaged.

Uniform Fee
This fee is assessed to students in the culinary or health programs for the purchase of uniforms required for these programs.

Uniform Rental Fee
This fee is assessed to students in programs that require student uniform rental. The fee is used to pay for the rental of the uniform.

Wellness Fee (Moorhead campus only)
This fee is assessed to students enrolled in courses on the Moorhead campus. The fee is used to operate the M State Fitness Center located on the Moorhead campus.

Student Payments
All tuition and fees are due on the tuition and fee due date which is established annually by the college. All courses will be cancelled unless the student has met the payment definition outlined in the Cancellation for Non-Payment section of the College Catalog or Student Handbook.

In the event that the student does not receive enough financial aid, scholarship or third-party agency payment to cover all charges, the account will be considered delinquent. Also, if the student does not stay current with the agreed-upon payment plan, the account will be considered delinquent.

In the event that the account becomes delinquent, notice will be sent to the student which will make the student aware of the delinquency and notify him or her that payment in full must be received immediately.

Any student who does not make payment after the above notice is received will be sent a State of Minnesota 20-day letter. This letter will inform the student that the account will be turned over to the Minnesota Collection Entity if payment is not received.

In addition, no student with an outstanding account will be allowed to register for future courses, and his or her college transcript will be held until payment in full has been received.

Deferment/Payment Plan
In accordance with Minnesota State Policy 5.12, M State has the ability to grant deferments and payment plans to students demonstrating the need for such arrangements.

A deferment is defined as an agreement between the college and the student to delay payment until financial aid, which is sufficient to cover all student charges, arrives at the college. Financial aid for this purpose is described as grants, loans, scholarships or third-party authorizations. Deferments may be granted from authorized representatives of the financial aid or business offices.

M State has made arrangements with Nelnet Business Solution/FACTS which allow students to pay for their charges throughout the term. To access these services, go to minnesota.edu/spartannet and click on E-Services.

All payment plans must be paid in full before students will be allowed to register for future terms. Failure to stay current with a payment plan will put a student’s account in a delinquent status, and collection efforts will begin.
Tuition Refund

Tuition will be refunded to students canceling their registration at the college through a formal withdrawal process and in accordance with Minnesota State policy. Refunds are applicable only to complete withdrawals from the college. The following refund schedule applies to students who completely withdraw from the college, which requires withdrawal from all courses for which a student is registered in the term.

Refund for fall and spring term courses (at least 10 weeks in length):

- Withdrawal from 1st through 5th business day: 100 percent refund
- Withdrawal from 6th through 10th business day: 75 percent refund
- Withdrawal from 11th through 15th business day: 50 percent refund
- Withdrawal from 16th through 20th business day: 25 percent refund
- Withdrawal after the 20th business day: 0 percent refund

Refund for summer session courses (at least three weeks in length):

- Withdrawal from 1st through 5th business day: 100 percent refund
- Withdrawal from 6th through 10th business day: 50 percent refund
- Withdrawal after 10th business day: 0 percent refund

Courses that start after the fifth instructional day of the term or courses that are less than three weeks in length will have a 100 percent refund of tuition if the student withdraws prior to the end of the first business day following the first class meeting. If the withdrawal request is made on the second or third business day following the first class meeting AND the withdrawal results in 100 percent course withdrawal, the student is entitled to a second or third business day following the first class meeting. If the withdrawal request is made on the second or third business day following the first class meeting AND the withdrawal results in 100 percent course withdrawal, the student is entitled to a second or third business day following the first class meeting. If the withdrawal request is made on the second or third business day following the first class meeting AND the withdrawal results in 100 percent course withdrawal, the student is entitled to a second or third business day following the first class meeting.

Federal pro rata refund will apply to federal financial aid recipients enrolled for the first time at the college.

Return of Title IV Funds for Financial Aid Recipients

Federal regulations require Title IV financial aid funds (Pell Grant, SEOG Grant, Direct Stafford Loans) to be awarded under the assumption that a student will attend the institution for the entire period in which federal assistance was awarded. When a student withdraws from all courses for any reason, including medical withdrawals, he/she may no longer be eligible for the full amount of Title IV funds that he/she originally received. Under this policy, students earn financial aid in proportion to the time they are enrolled up to the 60 percent point of the term. After the 60 percent point in the term, the student will be considered to have earned all of the federal aid that was originally awarded to him/her and they will not be required to return any funds. Students should consult with financial aid office personnel before completely withdrawing from college to accurately determine repayment liability to federal financial aid sources.

Federal regulations require a recalculation of financial aid eligibility if a student:

- Completely withdraws from all courses (Official Withdrawal);
- Stops attending before the end of the semester (Unofficial Withdrawal);
- Does not complete all module classes in which the student is enrolled as of the start date of the semester and/or the start date of the module classes.

The unearned share of the federal financial aid must be returned to the program from which it was paid as prescribed by federal regulation in the following order:

1. Federal Unsubsidized Direct Loan
2. Federal Subsidized Direct Loan
3. Federal Plus Loan
4. Federal Pell Grant
5. Federal SEOG Grant

Official Withdrawal: When the student officially withdraw from all courses after the semester begins, the Financial Aid Office will use the withdrawal date to determine the portion of the Federal Title IV aid earned (or could have earned) to be used to pay institutional charges such as tuition and fees. Any unearned funds will be returned to the appropriate financial aid source.

Unofficial Withdrawal: A student is said to be unofficially withdrawn if they stop attending and do not receive a passing grade in all of their courses. For a student who has been determined to have unofficially withdrawn, the date of withdrawal for purposes of the Return of Title IV refund calculation will be the last date of attendance recorded by the faculty at grading.

Timeframe for R2T4 calculation: Federal regulations require the college to calculate the Return of Title IV refunds within 45 days of determining an official or unofficial withdrawal date.

Post Withdrawal Disbursement: In some cases, a student may withdraw from all courses before aid has been disbursed. If the amount disbursed to the student is less than the amount the student earned, and for which the student is otherwise eligible, he/she is entitled to receive a post-withdrawal disbursement of the earned aid that was not received. The amount earned is determined as part of the required federal Return of Title IV Funds calculation.

Financial Aid and Satisfactory Academic Progress

In addition to meeting and maintaining the standards set forth in the college Satisfactory Academic Progress Policy, student recipients of financial aid must complete their degree, diploma or certificate within a maximum allowable period of time.

Measuring the time period: All students must complete their degree, diploma or certificate within 150 percent of the published length of the program (e.g. 60 credit programs must be completed within 90 attempted credits). When it becomes clear that a student cannot complete the program within the maximum allowable period, the student becomes ineligible for financial aid.

Seeking a second degree, diploma or certificate: The credits a student has earned in the successful completion of a degree, diploma or certificate program shall not be counted in the maximum time period calculation for a subsequent program, excepting for those credits which apply to both programs.

Changing programs prior to completion: Students who change programs (majors) without successfully completing a program shall remain subject to the 150 percent rule.

Appeals: Students may appeal the suspension of financial aid for exceeding the maximum allowable time frame based on special circumstances. The appeal form can be [minnesota.edu/forms](http://minnesota.edu/forms).
Student Information

Academic Advising

Academic advising is a teaching and learning process focused on student success. Students partner with their academic advisor to develop a plan for achieving their academic and career goals. The desired outcome of academic advising is that students learn to make informed and increasingly independent decisions about their educational plans and other academic issues.

Academic planning is a continual process during a student’s enrollment at M State. Current students meet at least once each semester with their academic advisor to review their Degree Audit Reporting System (DARS) audit, discuss educational goals, determine progress toward graduation and receive their access code to register for the next semester. Students should schedule an appointment with their assigned academic advisor and bring a copy of their DARS report and sample schedule to their advising session.

There are two types of academic advisors at M State, program advisors and professional advisors. Each admitted student is assigned an advisor based on his or her program of study.

Program advisors

- Advise students enrolled in technical/career programs

Professional advisors

- Advise all Liberal Arts & Sciences - Associate of Arts (AA) students
- Advise students completing the Minnesota Transfer Curriculum (MnTC)
- Advise candidates for programs with selective admission (e.g., criminal justice, dental assisting, dental hygiene, nursing and radiologic technology)
- Advise Engineering - Associate of Science (AS) students
- Advise students who are undecided or undeclared

Detroit Lakes:
Kristina Seifert, 218.846.3734, kristina.seifert@minnesota.edu
Mark Nelson, 218.846.3670, mark.nelson@minnesota.edu

Fergus Falls:
Jennifer Bieniek, 218.736.1533, jennifer.bieniek@minnesota.edu
Laura Baier, 218.736.1533, laura.baier@minnesota.edu

Moorhead:

Bookstores

M State has a bookstore at each campus location, along with an online bookstore for online courses, where students can purchase textbooks, school-related supplies and M State apparel. Bookstores are usually open Monday through Friday during the academic year, with special hours during the first week of each semester, holidays and Summer Semester. Credit cards and personal checks are accepted.

Textbook Return Information

Textbooks and course-related items purchased in fall and spring semesters may be returned with original receipt within the first five (5) business days of the semester while those items purchased for Summer session and late starting classes may be returned within three (3) business days from the start of the class. Textbooks and course related items purchased after the refund period may only be returned if within 24 hours and with the original receipt and in new condition.

Books, course-related items and non-course related items will be refunded in full if they are in new, salable condition. New books returned that are not in new condition may be refunded at the used book price, or 75 percent off new price if a used price is not listed in the POS System under any campus. Defective items must be exchanged within the same semester of purchase. Non-returnable items include: bundled e-books, software, special orders, seasonal and clearance merchandise. Refunds on credit card purchases will be issued to the credit card used at time of purchase and must present original receipt.

Refunds on cash or check purchases will be issued a check within seven business days or can choose to receive a store gift card. Refunds on purchases charged on account will be refunded to the student’s account.

The bookstore staff reserves the right to access the condition of all returned items and may make exceptions at their sole discretion.

In addition to processing returns, each campus bookstore offers book buybacks at the end of fall and spring semesters.

Please contact your campus bookstore with specific questions:

Detroit Lakes: 218.846.3727
Fergus Falls: 218.736.1556
Moorhead: 218.299.6570
Wadena: 218.631.7825
Online: 218.846.3800

Bulletin Boards

Bulletin boards are specified on each campus for general use, while others are for office or faculty use only. All bulletins are to be placed on regular bulletin boards only.

Campus Dining

Each campus has a dining service and vending machines that offer a variety of snacks, light meals and entrees. Dining services are open Monday through Friday during the regular academic year. Each dining service can provide information about pre-pay options and may be available to cater events on request.

Child Care

Child care resource information may be available from the Student Development Services office at each campus. Contact Child Care Resource and Referral for information about child care options in specific communities. Minnesota Child Care Resource and Referral can be reached at 1.888.291.9811 or parentaware.org. North Dakota Child Care Resource and Referral can be contacted at 800.997.8515 or ndchildcare.org.
Consumer Information

The college, in compliance with Title IV of the Educational Amendments of 1976 to the Higher Education Act and subsequent federal legislation, will provide and disseminate consumer information to all prospective and enrolled students. This information shall include but not be limited to the following: admission requirements, financial aid programs, costs, job placement, probation/suspension policy and refund policy.

College Social Workers

The college social workers assist in the navigation of community and college resources to overcome barriers that are non-academic. College social workers know of available services and benefits and the ability to guide students through the social service systems.

Barriers that students may be assisted with may include, but are not limited to: transportation, housing, finances, legal, health/wellness/food/ nutritional needs and safety.

Social Workers

Detroit Lakes campus: Kayla Simon 218.846.3687
Moorhead campus: Marisa Gonzalez 218.299.6839
Wadena campus: Kayla Simon 218.846.3687

Counseling Services

M State counselors assist in the total development of each student and his or her personal and life-career planning goals. College counselors strive to provide an accepting environment in a confidential setting. They can assist with career guidance, career selection, personal and life-career planning resources, short-term individual counseling and in making referrals.

Campus Counselors

Fergus Falls campus: Steve Lindgren 218.736.1641
Moorhead campus: Tom Dubbels 218.299.6618

Disability Services

M State complies fully with the provisions of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act, which prohibits discrimination in employment and public educational services on the basis of an individual’s disability. An individual with a disability is one who has or is regarded as having a physical or mental impairment which substantially limits one or more major life activities.

All M State campuses are accessible by ramps or doorways. Designated handicapped parking spaces are located near main entrances. Vehicles bearing a state handicapped license, permit or college-issued handicapped parking pass are the only vehicles allowed to park in these spaces. Temporarily disabled students (e.g. broken leg) may obtain handicapped permits for a limited time from the campus director of student services. Students need a letter of verification from a doctor for all temporarily handicapping conditions (this letter must state the approximate length of the handicapping condition) to obtain a campus-issued handicapped parking pass.

Assistive technology devices are available; see Disability Services for specific needs. Tape-recorded books, adapted testing and tutoring are provided. Information is available on note-taking, study skills, time management and developmental courses in math and composition. The college is equipped to serve students with various physical challenges.

In order to ensure equal access to the full range of collegiate experiences in the most integrated setting possible, the college provides a wide range of supplemental services. Students who provide the college with a recent assessment documenting a disability and apply for services may receive the following special services:

- Support, counseling and information about assessment and referral services;
- Academic assistance including testing assistance, note takers, assistive devices and tutoring;
- Advocacy services that may include assistance from a disability services coordinator for students needing services, assistance in working individually with faculty and administrators, intervention procedures and grievance procedures.

Disability Services Coordinators:

Detroit Lakes Campus: Kristina Seifert, 218.846.3734
Fergus Falls Campus: Jon Kragness, 218.736.1595
Moorhead Campus: Claudia Simon, 218.299.6882
Wadena Campus: Christian Breczinski, 218.631.7832

Emergency/Weather Closings and Drills

If a weather emergency situation develops, campus officials will consult with local authorities, including law enforcement officials, to determine whether to cancel classes or to close a campus. Campus closings or class cancellations are announced at minnesota.edu, emergency text messaging service and on local and regional television and radio stations.

Emergency drills are held periodically during the school year. Information regarding emergency evacuation of buildings is posted throughout each campus. In the case of a tornado warning, please go immediately to a designated Safe Area.

The Star Alert emergency notification system alerts students and staff if a campus is closed or if classes are delayed or cancelled. It will be in place at every Minnesota State institution, so students who attend more than one campus may choose to receive Star Alerts from each. Sign up for Star Alert through SpartanNet.

Employment Information

Students seeking part-time employment on campus are urged to contact the financial aid office. Off-campus employers provide information to each campus about local part-time opportunities available for students. The information is posted at careers.minnesota.edu.

Health Services/Insurance

Students are encouraged to carry some type of health coverage while attending school. Group health insurance is available to all M State students. (NOTE: Students should check coverage within their family insurance programs.) Information and applications for student health and dental insurance may be obtained from Student Services. International students are required to purchase a Minnesota State International Student Medical Insurance Policy. Health and accident insurance is the responsibility of the student. Student injuries that occur during class time are the responsibility of the student, not the college.

The college does not assume responsibility for any illness or accident to a student. The student is responsible for making financial arrangements for costs that are incurred at any health care facility.

All accidents are reported. If there is an accident or illness in a classroom or laboratory, an ambulance may be called to transport the student to a local emergency room. All campus laboratories are equipped with first aid kits, eyewash and showers for first aid treatment of minor injuries.

Intercollegiate Athletics

M State offers a variety of athletic program on the Fergus Falls campus. Athletic programs are open to all M State students. M State is a member
of the Minnesota College Athletic Conference (MCAC), whose mission advances intercollegiate athletics by providing an engaging and supportive environment for success of our student athletes and competition among member institutions. For additional information see the Intercollegiate Athletics policy at minnesota.edu/policies.

Laptops
Some M State majors and programs require that students possess adequate computing resources. These requirements can be met with a student-owned laptop or a laptop procured through a lease with a vendor; however, the minimum hardware specifications and general software requirements must be met to accommodate general communication, research and specific program computing activities needed for that program or major. Annually the college Information Technology Services Department identifies minimum hardware requirements for a laptop and required general software to meet all programs and majors. These hardware and software requirements are available from each campus Computer Help Center and available on our college website. Due to the changing nature of curriculum, software and course sequencing, the college will not endorse an alternate specification. Students interested in using alternate specifications are strongly advised to consider the numerous changing variables that may affect their computing needs throughout their program of study prior to leasing or purchasing an alternate specification. Limited IT resources may result in not possessing adequate computer and software resources.

All students are required to:
- On request, produce proof of licensure for all software installed on the computer, and
- Register their computer or mobile device with the Computer Help Center to gain access to campus IT resources.

Information about academic programs requiring laptops can be found at: minnesota.edu/?id=521.

All students using their own laptop computers or campus computer labs are subject to the rights and responsibilities of M State Acceptable Use of Computers and Information Technology Resources Policy. Click here to learn more about laptop information.

Library Services
The four M State libraries located on the Detroit Lakes, Fergus Falls, Moorhead and Wadena campuses contain thousands of books, magazines, journals, videos, DVDs and CDs. The library catalog can help students find books and other resources on all four M State campuses and at all state colleges and universities. Several private college library catalogs and the University of Minnesota library catalog can be accessed using the M State library catalog as well. It also provides access to thousands of full-text reference books online. In addition, the electronic periodical databases on the library page provide access to many full-text periodicals. Both the library catalog and electronic periodical databases can be accessed off campus. The library catalog can also be used to renew library materials and check on accounts.

Lost and Found
Collection points for lost and found items are located in Student Development Services on the Detroit Lakes, Fergus Falls and Wadena campuses and in the library in Moorhead.

M State Official Colors
The official institutional colors for M State are blue, green and gold. The official team colors for M State’s Spartan athletics are blue and gold. Specific guidelines for how and when the institutional and athletic colors may be used can be found in the Branding Guide for Identity and Graphics Standards at minnesota.edu/communications.

Representing the College
Students and student groups should not imply or state that they represent the college unless specifically authorized to do so.

Computer Help Center
Tech Support
For all your IT-related questions, including D2L, please submit a ticket using our IT Help link within the SpartanNet portal. Once you click on Tech Support, you can search our knowledgebase to troubleshoot your own problem, or submit a ticket for assistance from our many tech specialist. The hours for the Computer Help Center on the Detroit Lakes, Fergus Falls and Wadena campus’ are 8 a.m. - 4:30 p.m. and the Moorhead campus hours are Monday, Wednesday, Thursday and Friday 7:30 a.m. to 5 p.m. and Tuesday from 7:30 a.m. to 6 p.m.

Software and Printing
M State participates in the Microsoft Campus Agreement and makes available to all currently enrolled students the free download of Office 365. This free download allows students to install Word, Excel, PowerPoint, Publisher, Access and more on their own personal devices which includes up to five PCs or Macs and five tablets or mobile devices. For more information or how to download the Office 365 software, students can login to their SpartanNet Portal or contact their local CHC.

At the start of each semester, a student’s network account receives a printing balance of $12.50. This equates to about 250 sheets of free printing to the campus networked printers. These free balances are not carried from semester to semester and cannot be transferred. Additional printing can be purchased at the printing kiosks on each campus. Printing costs are 5 cents for black & white and 11 cents for color. NOTE: Additional printing that is purchased does carry over from semester to semester as long as the student is continuously enrolled. However there are no refunds issued for printing balances when a student leaves M State. Student printing balances can be viewed in the SpartanNet portal.

SpartanNet
SpartanNet is the one-stop site where M State students can access all their college resources including D2L Brightspace, email, eServices, tech support, print balances and The Source.

Student Clubs and Activities
M State believes student activities and organizations promote the complete development of students and help motivate students to enroll in and continue in college. Through the number and variety of activities and organizations, all students have the opportunity to participate in extracurricular programs. The student life budget supports the expenses of approved student body activities.

All student club membership and activities are governed by the Student Code of Conduct. Anyone interested in establishing a student organization should contact the director of student engagement/director of student life.

Student Clubs
ADN Organization - Fergus Falls
Supports students in the Associate Degree nursing program

Architectural Technology Student Association - Detroit Lakes
Provides a greater understanding of architectural practice
Auto Tech Club - Moorhead
Encourages student interest in automotive careers

Business Professionals of America - Moorhead
Helps prepare students for careers in business and information technology

Campus Crusade for Christ - Fergus Falls
Explores issues related to faith, spirituality and Christianity

Christian Bible Fellowship - Moorhead
A Christian Bible study for students

Construction Management Student Organization - Moorhead
Provides co-curricular opportunities for students with an interest in construction management

Cosmetology Club - Wadena
Encourages, develops and promotes professionalism and leadership among cosmetology students

Criminal Justice Association - Moorhead
Promotes an interest in the criminal justice program

Dental Assisting - Moorhead
Supports students in the dental assisting program

Diesel Club - Moorhead
Supports diesel students and their interests

Electrical Line Workers Organization - Wadena
Promotes professional growth among electrical line worker students

EquiUs (Equine Club) - Fergus Falls
For students interested in the equine industry for a career or as a hobby

F2CO - Fergus Falls
Encourages interest in chemistry

Fine Arts - Fergus Falls
Chamber Chorale, Concert Band, Jazz Band and Theater

Gaming Club - Fergus Falls
For gaming enthusiasts of all types, especially those interested in strategy games

Intercollegiate athletics - Fergus Falls
Football, volleyball, basketball (men’s and women’s), baseball, softball and golf (men’s and women’s)

Intramural Sports - Fergus Falls, Moorhead
Activities can include basketball, volleyball, flag football, soccer and bowling

Multicultural Student Association - Moorhead
Enhances knowledge and awareness of diverse cultures

Phi Theta Kappa (PTK) - Detroit Lakes, Fergus Falls, Moorhead
Academic honor society

Powersports Technology Club - Detroit Lakes
Lets members share their passion for the power sports industry

Skills USA - Detroit Lakes, Moorhead
Official organization of vocational education with state and national competitions

Student American Dental Hygienists Association - Moorhead
Supports students in the dental hygiene program

Student Government Association - Detroit Lakes, Fergus Falls, Moorhead, Wadena
Provides a student voice in college administration

Student Human Resource Organization - Moorhead
Expands experience in the human relations and business fields

Student Nursing Organization - Moorhead
Supports students in the dental hygiene program

Student American Dental Hygienists Association - Moorhead
Supports students in the dental hygiene program

Student Nursing Organization - Moorhead
Supports students in the dental hygiene program

Technology, Gaming and Robotics - Moorhead
Provides opportunities for hands-on projects related to technology, gaming and robotics

To learn more about opportunities to get involved in student life activities or the clubs offered at M State, visit minnesota.edu/student-life for current information.

Student Email
Email is the official means of communication at M State. All students are automatically issued an email address once their StarID account has been created. Students are expected to check their email on a daily basis or at a minimum have their college email forwarded to an account they do check. M State is not responsible for email lost due to forwarding rules. Student email addresses are in the format of: firstname_lastname@my.minnesota.edu. To access your email, login to SpartanNet and click the email tab. Submit a Tech Support ticket if you have issues.

Student Housing
Housing arrangements are the responsibility of individual students, although each M State campus may maintain information about community and on-campus housing options. Please contact your campus for more information.

M State Fergus Falls Housing
On-campus housing is available on the Fergus Falls campus. Students wishing to live on campus can choose from two apartment-style complexes, College Manor or Williams Hillside Village. Both complexes are furnished and house four students in each apartment. The college recommends on-campus living as a positive collegiate experience. These housing facilities are substance free, including alcohol and tobacco, regardless of the age of residents.
Student Rights and Responsibilities

In accordance with Minnesota State system Board Policy 3.1 Student Rights and Responsibilities, the college shall provide students with the system outlined rights and responsibilities as described below. The college believes these student rights are essential components of academic life. The college asserts that students play a critical role in creating an educational atmosphere that supports these rights for all members of the academic community; thus, we expect students to exercise these freedoms with responsibility.

For complete details, please review the Student Rights and Responsibilities policy at minnesota.edu/policies.

Student Identification Cards

The student identification card is the required form of identification for M State students. The college issues a photo identification card to students attending on-campus courses after students complete their initial registration. Online and concurrent students will receive a non-photo college identification card via mail after registering for classes. Students must show their identification cards for admission to various college events, to vote in student elections, to check out library materials, to conduct transactions in the Business Office and for other purposes as required by the college. If an identification card needs to be replaced for any reason, students may obtain a replacement identification card for a fee.

New identification cards are not needed every year. ID cards can be updated for the current year with a sticker that can be obtained from the libraries on the Detroit Lakes and Wadena campuses. In Fergus Falls, the sticker can be obtained from the Spartan Service Center. If an identification card needs to be replaced for any reason, students may obtain a replacement identification card for a fee.

Student Lockers

A limited number of lockers are available to students on the Detroit Lakes, Moorhead and Wadena campuses. Locker services are extended as a convenience to students. Students must keep lockers in good condition. Students may place any room on the locker at their expense. The college reserves the right to inspect lockers at any time. If the college needs to enter a locker when the student is not available or does not wish to be available, the college reserves the right to remove the lock at the lock owner’s expense. The college is not responsible for lost or stolen articles/items. Contact Student Development Services for questions about locker services.

Student Right To Know

It is the policy of the college to annually prepare and make available to all enrolled and prospective students, statistics on completion or graduation rates, transfer-out rates and employment, pursuant to the Student Rights To Know Act of 1990. This information is made available through appropriate publications, mailings and the college website.

Student Services Appeals

Students may appeal any student services issue and discuss it with the appropriate employee(s) and/or administrator(s) as established by college policy or procedure. Students have the right to seek remedy through the college’s designated student services appeal process. Students should use available informal means (direct conversation) to resolve disputes before filing an appeal. There will be no retaliation of any kind against students, faculty or staff who participate in the appeal process. For more information about filing an student services appeal, contact Student Development Services.

Theatre Productions

Theatre productions are an important part of student life on the Fergus Falls campus. During the academic year, students have the opportunity to participate in two mainstage productions. Student involvement takes place both on the stage and behind the scenes. Productions are chosen to spotlight student talent and to offer a variety of theatrical genres, including musical theatre in conjunction with the Music Department. Smaller productions may occur during the year as well, such as radio plays, madrigals and experimental productions.

Transcript Requests

Official transcript requests are fulfilled at no charge. The Transcript Request form is available at minnesota.edu/forms. For privacy reasons, this form must be completed and electronically signed by the student in order for a transcript request to be processed. Students transferring to or from another Minnesota State system campus do not need to submit a transcript request, unless the student’s records are not available electronically.

Travel Abroad

The college occasionally offers students a study/travel abroad program through which students register for selected spring semester courses that are tied to a trip overseas at the end of spring semester. The credits taken for both the spring semester course work and the field experience apply to the transfer portion of the Associate in Arts degree. The courses and the cost of the program are announced during the fall semester.

Visual Arts

As part of Minnesota’s 1984 “Percent for Art” legislation, M State works to use up to 1 percent of the total construction budget to purchase or commission original art work for building projects costing $500,000 or more. M State campuses strive to select art work that reflects the region’s culture, history and diversity.

The Fergus Falls campus has long been committed to the visual arts through course offerings, exhibits in the Waage Gallery and the Charles Beck Gallery, and a permanent collection of more than 400 works displayed prominently throughout the campus. The collection began when faculty member Charles Beck encouraged students to leave a work of art for the college. Through budgeted funds and gifts to Fergus Area College Foundation, the college also has purchased the work of regional artists for its permanent collection.

The Moorhead campus Art Fund was created in 2006 as part of a State College and University Awards for Excellence faculty award to former M State art instructor Pamela Sund. The focus of the collection on the Moorhead campus is to acquire art works that represent a variety of art traditions from the Western world, especially American traditions, and world traditions that represent diverse cultures, especially those cultures represented by the M State student population and the multicultural populations in our region.
Transfer Articulation Agreements Table 2017-2018
(for students following specified AS, AAS, diploma or certificate programs)

Minnesota State Community and Technical College has formed articulation agreements with a number of public and private institutions to assist students with their transfer goals. These agreements facilitate credit transfer and provide a smooth transition from one related program to another. Please see a transfer specialist for additional information. Additional general education credits will likely be required to complete a degree. The number of credits that transfer may vary depending on the program. Note: Students are free to explore transfer to any college, including colleges not listed in the following table; however, the number of credits that transfer may be more limited. For up-to-date information, view articulation agreements online at www.mntransfer.org. Enter the Student Portal>Transfer Planning>Articulation Agreements.

### Field Focuses

- **Environmental Science**: Focus on the study of the natural world and the conservation and management of natural resources.
- **Equine Science**: Specialization in the care, management, and study of horses.
- **Fundamentals of Culinary Arts**: Introduction to the culinary arts and food preparation.

#### Degrees:

- **Associate of Arts (AA)** degree is designed for transfer to a four-year institution. The AA degree requires students to complete the Minnesota Transfer Curriculum. Ask a college admissions counselor for details about your choice of major.

- **Associate in Science (AS)** degree is awarded for the successful completion of a program which transfers to a baccalaureate major in a scientific or technical field. Program includes a minimum of 30 general education courses.

- **Associate in Applied Science (AAS)** degree is a combination of technical credits and a minimum of 15 general education credits. M State has articulation agreements with some four-year institutions that allow transfer of a wide range of credits.

- **Associate in Fine Arts (AFA)** degree is designed to provide a means for music and visual art students to pursue a path with seamless transition to a four-year music or visual arts degree and to be best prepared for a degree and/or career in music or the visual arts.

- **Diploma** is the vocational degree awarded upon completion of a technical program. Studies include technical credits with 3-9 general education credits.

- **Certificate** is awarded upon completion of a program requiring 30 or fewer credits.

PROGRAM PROFILES

Associate of Arts (AA) Degree:

REQUIREMENTS

The Liberal Arts and Sciences AA degree forms the foundation of a traditional liberal arts education and will satisfy a large portion of the general education course requirements for bachelor's degrees at four-year colleges and universities. The degree is the basic graduation award toward which most students will work if they intend to transfer. It emphasizes a broad general education. In order to obtain an AA degree, students must complete the following requirements:

- Successful completion of a minimum of 60 semester credits numbered 1000 or above.
- Achieve an overall GPA of 2.00 and a GPA of 2.00 within the Minnesota Transfer Curriculum (MnTC).
- Earn at least 20 of the 60 credits at M State.
- Complete a minimum of 40 credits from the MnTC and fulfill individual requirements in each of the ten MnTC goal areas.

Students may satisfy the MnTC requirement with a variety of courses and credits. Some courses will meet more than one of the (10) required goal areas. Fulfilling the minimum requirements in each goal area may not satisfy the 40 credit minimum. Some additional credits beyond the minimum requirements in goals 1-10 could be needed to achieve the overall 40 credit MnTC requirement. Students should carefully review and monitor their progress.

In order to be certified as having met all the requirements of the college's Minnesota Transfer Curriculum (MnTC), a student must successfully complete courses as prescribed in the following Liberal Arts and Sciences education distribution areas with a minimum GPA of 2.00. Transfer courses with grades of A-D will be included in the GPA calculation for the MnTC.

AREA 1: Communication

Complete a minimum of nine credits as prescribed below

COMM 1100 Communication and Effective Human Relations I, 2
COMM 1120 Introduction to Public Speaking 1
COMM 1130 Small Group Communication 1, 2
COMM 1140 Interpersonal Communication 1, 2
ENGL 1215 Professional and Technical Writing 1
ENGL 2321 Women in Literature 1, 2, 6, 7

AREA 2: Critical Thinking

Complete a minimum of six credits from at least two different discipline areas

ART 1123 Global Art History: Asian, Islamic, African, Mesoamerican 2, 6
Biol 1104 Biology of Human Concerns 2, 3
Biol 1107 Environmental Science Issues 2, 3, 10
Biol 1108 Environmental Science Issues Lab 2, 3, 10
Chem 1111 General Inorganic Chemistry I 2, 3
Chem 1112 General Inorganic Chemistry II 2, 3
Chem 1115 Introduction to Organic and Biochemistry 2, 3
Chem 2224 Organic Chemistry I 2, 3
Chem 2225 Organic Chemistry II 2, 3
Comm 1100 Communication and Effective Human Relations 1, 2
Comm 1130 Small Group Communication 1, 2

### PROGRAM PROFILES

**Liberal Arts & Sciences — Associate of Arts Degree (AA) — 60 credits**

The AA and/or the MnTC satisfy the general education requirements of Minnesota State system.

#### Associate in Arts Degree (AA)
- Requires completion of all 10 goal areas below with a minimum of 40 credits from MnTC and elective credits to bring the total to 60. A degree is awarded after successful completion of the 60 required credits.

#### For certification of Minnesota Transfer Curriculum (MnTC)
- Requires completion of all 10 goal areas below with the 40 credit minimum from MnTC. Additional electives are not required. While a degree is not awarded at the completion of the 40 credits, a student’s transcript will indicate completion of the MnTC.

Associate of Arts Degree:
Social Science Emphasis

Associate of Arts (AA) - 60 credits

D F M W O

The Associate of Arts degree with Emphasis in Social Science provides the necessary lower division coursework for transfer to a four-year major in sociology, social work or human services. Transferability of courses from Minnesota State Community and Technical College (M State) to public higher education systems in Minnesota is enhanced by transfer agreements that are in place. Coursework will transfer in its entirety to the Bachelor of Social Work at Minnesota State University Moorhead and may transfer in part or entirety to other programs and/or post-secondary institutions.

Associate of Arts Degree: Social Science Emphasis -

Individualized Studies

Associate of Applied Science (AAS) - 60 credits

D F M W O

The Individualized Studies Associate in Applied Science (AAS) degree is designed for students who intend to update their skills and expand employment opportunities with a customized degree field. This 60-credit degree allows learners to develop a specific education plan to update their skills and gives them the opportunity and flexibility to focus on specialized career interests not offered in the college’s structured degree programs. It integrates a number of subjects into a degree program and builds on a current area of study or expertise. Students work collaboratively with faculty and staff to create a degree plan that meets individualized educational needs. Students who enroll in the Individualized Studies program will complete 45 specialized career technical credits and 15 general education credits (in at least three Minnesota transfer goal areas).

Course # | Course Title | Crds

PSYC1220 | Abnormal Psychology | 3
PSYC2222 | Lifespan Development | 3
PSYC2224 | Social Psychology | 3

Psychology Transfer Pathway

Associate of Arts (AA) - 60 credits

The Psychology Transfer Pathway AA offers students a powerful option: the opportunity to complete an Associate of Arts degree with course credits that directly transfer to designated Psychology bachelor’s degree programs at Minnesota State Universities. The curriculum has been specifically designed so that students completing this pathway degree and transferring to one of the seven Minnesota State universities enter the university with junior-year status. All courses in the Transfer Pathway associate degree will directly transfer and apply to the designated bachelor’s degree programs in a related field.

**Environmental Science**

**Associate of Science (AS) - 60 credits**

**F M**

The Associate of Science in Environmental Science is designed to provide students an avenue to a four-year environmental science degree, preparing them for a career in an environmental field. The program emphasizes a broad background in natural sciences and mathematics, ensuring students are properly prepared for further study at an advanced level.

**Equine Science**

**Associate of Applied Science (AAS) - 60 credits**

**F**

This program will build upon the introductory skills gained in the Equine Science diploma program at M State and Red Horse Ranch. Additional academic theory and general education transfer courses will be taken online while the student works at an approved internship site. This degree and internship experience will give the student the finished skills necessary for careers in stable management, breeding, training, judging, riding instruction and related occupations.

**Fundamentals of Culinary Arts**

**Diploma - 31 credits**

**F**

The mission of the Culinary Arts program is to provide quality education to students who wish to pursue a career of excellence in culinary and hospitality occupations. The program is designed to meet the current and future needs of the food service industry. Demand for employment is high in the industry, which accounts for more than 9 million jobs annually in the United States. Students enrolled in the Culinary Arts program receive hands-on practical lab training paired with traditional academic culinary courses that are aligned with industry needs. The program provides a broad base of education in the culinary field.

American Sign Language Studies

Certificate - 17 credits
M

The American Sign Language (ASL) Studies certificate provides students with a basic knowledge of American Sign Language and Deaf Culture. The curriculum provides a foundation for entrance into a career in a deafness-related field and prepares students for continued educational studies in more advanced preparation for ASL interpreter certification. This program does not prepare students to become interpreters.

Course Title
ASL1111 American Sign Language and Deaf Culture I .............................................. 3

Cisco Networking

Certificate - 12 credits
O

This 12-credit certificate will prepare students to take the Cisco Certified Network Associate (CCNA) certification and also the CompTIA Network+ certification. The coursework includes Cisco semesters 1-4. Skill development covers LAN/WAN networking technology and concepts, networking math, networking media, router configuration, switching, VLANs, routing protocols and WAN links and services. The instructor will evaluate computer skills necessary to enter this certificate program. Students should have good reading and study skills, basic computer literacy and awareness of the Internet. Prior experience with computer hardware, binary math and basic electronics is desired but not required. Background in cabling is beneficial. Upon completion of this certificate the student will be able to take the Cisco CCNA and CompTIA Network+ certification exams offered through VUE or Prometric testing centers.

Computer Programming

Associate of Applied Science (AAS) - 60 credits
M O

This program provides the programming skills needed in computer application development, database management, computer systems and data communications. Students learn to design, write, code, document and implement computer programs for various computer platforms. They learn at least one operating system, one command-level language, one database management system and other high-level programming languages. The program prepares students to design and develop computer software systems as well as design information management systems. It includes the study of languages, software design, information flow and processing. Students study the design of mathematical and simulation models and large-scale programs used for processing and retrieving information.

Graphic Design Technology

Associate of Applied Science (AAS) - 60 credits
M

Graphic design technology is a highly competitive and rewarding career field for those with a talent and/or interest in the graphic arts. Graphic design technology focuses on the integration of digital technology and graphic design to create communication materials for Web, multimedia and print production. Within two years of training, individuals develop creatively and technically as they learn skills in photography, color theory, typography, layout and design, and Web and print production. Students become task-oriented and are trained to meet deadlines, solve problems and work efficiently. Students will have opportunities to interact with and receive feedback from industry professionals outside the program. Students also are trained in the area of self-promotion, job-search and interviewing skills, along with compiling a personal portfolio of their work. Graphic Design Technology graduates are expected to be self-motivated, organized and able to apply the skills they learn in the classroom outside of instruction time to strengthen their abilities. The Graphic Design Technology program prepares students for a vast array of entry-level positions across the graphic design industry.

Graphic Design Technology

Certificate - 30 credits
M

Graphic Design Technology is a highly competitive and rewarding career for those with a talent and/or interest in the graphic arts. Graphic Design Technology does not focus on the fine arts of painting and art history, but on the integration of technology with graphic design to train students to create communication materials (stationery, brochures, annual reports, newspaper layout, etc.) for print production. Students are required to purchase an Apple Macintosh laptop and all necessary graphic software, along with necessary peripherals. The 30-credit Certificate is targeted specifically at advanced students, students possessing an advanced degree or students who have professional experience in a creative field. It is a two-semester “fast track” curriculum, with the intent of building on students’ existing skill set and experience or accommodating the advanced students’ accumulated goals for placement by using stackable credentialing of various GCDC coursework to a total of 30 credits. The Graphic Design Technology program prepares students for entry-level positions in the graphic design technology industry. Students work on their own Macintosh laptops to complete coursework, so there is never a need to wait for an available computer. Owning individual laptops also allows each student to be mobile and work from anywhere at any time. Students begin with foundation-level work that includes learning about Ma-
Information Technology

Associate of Science (AS) - 60 credits

The Information Technology Associate of Science degree prepares students to continue to work toward a bachelor's degree or enter the workforce. Students learn to use various hardware and software systems to solve problems for people and organizations. Students work with networking technologies, applications, web technologies and database technologies. Students focus on the selection, application and administration of information technologies. The degree minimizes the number of credits required at selected institutions to complete a bachelor’s degree. The degree is an ideal mix of practical experience and general education for a field that is constantly evolving.

Information Technology - Database Administration

Associate of Applied Science (AAS) - 60 credits

This program prepares students to work in information technology. Students learn to select appropriate systems, create necessary solutions, apply existing systems, integrate a variety of systems and administer systems. This career program prepares students to fulfill a variety of roles within the information technology field.

Music

Associate of Fine Arts (AFA) - 60 credits

The Associate in Fine Arts in Music is designed to provide a means for music students to pursue a path with seamless transition to a four-year music degree and to be best prepared for a degree and/or career in music. The AFA emphasizes a fine arts focus within a discipline area of study and offers students preparation for fine arts study at the university level. The AFA in Music at M State allows for a choral or instrumental emphasis and ensures that students will have the necessary coursework to prepare for advanced studies in music.

Network Administration and Security

Associate of Applied Science (AAS) - 60 credits

M

This program provides the skills to support and maintain information technology (IT) systems including overall computer knowledge, networking skills, application software and IT security. Students will learn networking concepts that include switching, routing, server operating systems, directory services and security. Students will learn to perform security risk assessments, implement security measures and perform penetration testing. Additional program topics include computer hardware and operating systems as well as software selection, customization and support. Many classes are built around specific industry certification.

Network Security

Certificate - 18 credits

M O

This certificate is designed for those who have industry experience or are currently nearing completion of an Information Technology field degree. Students will learn general skills related to network security and then expand those skills to more focused areas. Throughout the course work, students review and apply network security practices using multiple operating systems. Areas of focus include penetration testing, perimeter defense and Web security. The certificate will prepare students for the CompTIA Security+ certification and prepares them for the job in network security.

Sign Language Interpreter Preparation

Associate of Applied Science (AAS) - 64 credits

The Sign Language Interpreter Preparation program prepares individuals to work as interpreters facilitating and mediating communication between deaf/hard of hearing and hearing people. Students will gain sign language skills, an understanding of deaf culture, knowledge of the interpreter's role and skill development for the profession of sign language interpreting. Students will experience a variety of learning environments including classroom work, laboratory practice and field placement.

Sign Language Interpreter - Medical

Certificate - 18 credits

The Sign Language Interpreting - Medical program provides specialized training for sign language interpreters interested in pursuing the field of medical interpreting. Students will be introduced to medical terminology, human body systems, medical interpreting and ethical decision making. Students will expand their existing interpreting skills and prepare to facilitate communication between patients who use American Sign Language (ASL) and their medical care providers.

Theatre Arts

Associate of Fine Arts (AFA) - 60 credits

The 60-credit Associate in Fine Arts (AFA) degree in Theatre Arts provides students with the skills to help them develop into professional artists. Students will explore multiple areas of technical theatre including set building, design, lighting and sound, and makeup. In addition, students will explore performance and production. The degree ensures that students will have the necessary coursework to prepare for transfer and advanced studies in theatre.

Theatre Transfer Pathway

Associate of Fine Arts (AFA) - 60 credits

The 60-credit Associate in Fine Arts (AFA) degree in Theatre provides students with the skills to help them develop into professional artists. Students will explore multiple areas of technical theatre including set building, design, lighting and sound, and makeup. In addition, students will explore performance and production. The degree ensures that students will have the necessary coursework to prepare for transfer and advanced studies in theatre. The Theatre Transfer Pathway AFA offers students a powerful option: the opportunity to complete an AFA degree with course credits that directly transfer to designated Theatre bachelor's degree programs at Minnesota State universities. The curriculum has been specifically designed so that students completing this pathway degree and transferring to one of the seven Minnesota State universities enter the university with junior-year status. All courses in the Transfer Pathway associate degree will directly transfer and apply to the designated bachelor's degree programs in a related field.

Visual Art

Associate of Fine Arts (AFA) - 60 credits

The 60-credit AFA in Art provides students with the skills to help them develop into professional artists. Students will explore multiple areas in the visual arts including design, painting, drawing, ceramics, mixed media, printmaking and photography. In addition, students will explore artistic intent and exhibition opportunities. The degree ensures that students will have the necessary coursework to prepare for transfer and advanced studies in the visual arts.

Business Transfer Pathways

Associate of Science (AS) - 60 credits

F M O

The Business Transfer Pathway AS offers students a powerful option: the opportunity to complete an Associate of Science degree with course credits that directly transfer to designated Business bachelor’s degree programs at Minnesota State universities. The curriculum has been specifically designed so that students completing this pathway degree and transferring to one of the seven Minnesota State universities enter the university with junior-year status. All courses in the Transfer Pathway associate degree will directly transfer and apply to the designated bachelor’s degree programs in a related field. This is a flexible degree designed for students who want to continue their education or enter the workforce in a business-related career. The degree is 60 credits in length, including 30 credits of general education from six of the 10 goal areas of the Minnesota Transfer Curriculum and 30 technical credits. Emphasis is on contemporary business practices through coursework in management, marketing, economics, accounting, technology and communications.

Business Entrepreneurship

Associate of Applied Science (AAS) - 60 credits

Entrepreneurs create their own path to success and work to make their dreams a reality. This program teaches students the skills and behaviors that contribute to personal and business success. It also prepares students to assess new enterprise opportunities, obtain financial resources, prepare a business plan and market a venture for success. Students will gain the confidence and skills to launch a new venture in an area of expertise, grow an existing business or pursue an advanced degree.

Diploma - 33 credits

The primary purpose of this program is to prepare students for management or ownership of a small business. The program not only will prepare students for business management but also enable them to better manage their own personal affairs. It especially will help individuals who may have some of the skills and competencies needed but lack the organization and understanding of business management that is necessary to be successful. Upon completing the classroom work, students will be assisted in finding jobs with business firms offering employment suited to their individual career objectives or in starting their own businesses. This program will help students cultivate their entrepreneurial spirit: that is, a strong desire to be their own boss and a willingness to expend above-average time and energy toward goal accomplishment.

Architectural Drafting and Design

Associate of Applied Science (AAS) - 72 credits

Students completing this program will be prepared to obtain employment with architectural and engineering firms, contractors and a variety of manufacturing and distributing companies related to the construction industry. Computer-aided drafting is an important tool for the construction industry and the design professions and is an important part of the Architectural Drafting program. This program teaches students the principles of residential and commercial building technology, as well as the drafting skills to apply them.

Minnesota State Community and Technical College
Course Catalog 2017-2018
Civil Engineering Technology

Associate of Applied Science (AAS) - 60 credits

Students completing the Civil Engineering Technology program are prepared for employment in the civil engineering field. Civil engineering technicians plan, design, and monitor construction and maintain public or private works systems with the collaboration and direction of engineers. They gather preliminary data, plan, budget, survey, design, prepare construction documents and administer contracts to provide safe and convenient facilities including highways, bridges, airports, structures, water treatment and distribution systems, and waste water collection and treatment systems. Opportunities are available with state, county and local government public works departments, as well as consulting engineering firms. Students will learn graphic communication skills, advanced surveying techniques and a variety of skills related to engineering technologies. Students also will be enrolled in general education classes selected to build a foundation for their technical courses. This AAS degree can prepare students to continue their education in a number of baccalaureate programs at four-year institutions.

Course # Course Title Cds

Construction Management

Associate of Applied Science (AAS) - 66 credits

The Construction Management program prepares graduates for a variety of careers in construction including management, supervision, estimating, testing and safety. The program focuses on the flow of labor, material, equipment, time and finances from the conception of a project through completion. Students are trained in a combination of skills in construction, business and management. This degree also allows students to continue their education in a baccalaureate program at participating four-year institutions.

Diesel Equipment Technology

Associate of Applied Science (AAS) - 79 credits

The diesel equipment technician works in an exciting and rapidly changing industry. This program prepares individuals to diagnose and repair diesel engines, clutches and transmissions, starting and suspension systems, wheel alignment, air-conditioning and refrigeration systems, drive lines, differentials, hydraulic and air brake systems, electrical systems, electronically controlled fuel systems and transmissions, and involves instruction in the use of a wide variety of tools and diagnostic testing equipment. Students are prepared for careers in the maintenance of trucks and trailers, farm equipment, construction equipment, stationary diesel engines in electrical generators and other related equipment. About two-thirds of the instruction time is spent in the diesel lab working on live work and training models. Students learn to diagnose problems and disassemble, recondition and replace faulty parts, and get hands-on training in all program areas. This program is an Association of Diesel Specialists Techsmart program participant.

Commercial Refrigeration

Diploma - 35 credits

Students in this program will gain the skills and knowledge to be able to service and maintain commercial refrigeration equipment, which includes walk-in coolers and freezers, grocery stores, and ice-makers. Students will gain skills in layout, installation, and repair. Employment exists with manufacturers, engineers, contractors, and specialized service firms. Students learn to research and develop applications of more efficient, cost-effective equipment and procedures. The knowledge to design, install, and maintain these special environments for people, products, and perishables is essential today.

M

The diesel equipment technician works in an exciting and rapidly changing industry. Students in this program receive the diagnostic and service training needed to be successful in their chosen field. Entering students should have good mechanical aptitude, good communication skills and the ability to comprehend service literature. The program prepares individuals to diagnose and repair all components, including diesel engines, transmissions, drive lines, differentials, hydraulic and air brake systems, electrical systems, electronically controlled fuel systems and transmissions. Students receive instruction in the use of a wide variety of tools and diagnostic testing equipment. Students are prepared for careers requiring them to inspect, diagnose, repair and maintain trucks, trailers, farming equipment, diesel and construction equipment, stationary diesel engines in electrical generators and related equipment. Instruction includes diagnosing, disassembling, repairing and adjusting systems and parts, vehicle service, air brake systems, brakes, starting and suspension systems, wheel alignment, fuel systems, differentials, electronic fuel control, clutch and transmissions, air conditioning and refrigeration. About two-thirds of the instruction time is spent in the diesel lab working on live work and training models. Students learn to diagnose problems and disassemble, recondition and replace faulty parts, and they get hands-on training on such components as electrical, transmissions, air conditioning, brakes, fuel systems and engines. This program is an Association of Diesel Specialists TechSmart program participant.

Drafting and 3D Technologies

Associate of Applied Science (AAS) - 66 credits

M

The Drafting and 3D Technologies program prepares students for employment in a wide variety of engineering-related disciplines. Students are trained across multiple two-dimensional and three-dimensional software platforms to generate drawings of parts, assemblies and layouts, as well as other manufacturing and construction-related documentation specifically required by employers. The curriculum incorporates 3D printing, 3D scanning and rapid prototyping as tools for taking student designs from computer models to three-dimensional solids. Graduates of the program enter the workforce as mechanical drafters, designers and engineering technicians. The degree is fully transferable to the Operations Management program at Minnesota State University Moorhead.

Electrical Line Worker Technology

Diploma - 36 credits

The Electrical Line Worker program provides trained personnel for the power industry. Coursework provides both theory and practical hands-on experience in all phases of power line construction and maintenance. Coursework includes electrical math, national electrical safety codes, construction of overhead and underground distribution systems, conductor applications, over-voltage and over-current protection, guying and pole grounding. The 90-acre training field located near the Wadena campus provides a site for hands-on experience in pole setting. The successful graduate is eligible for employment in rural electric and municipal utilities or with private contractors.

Electrical Technology - Electrician

Diploma - 74 credits

This diploma program is designed to prepare the student to build, install, maintain and repair electrical systems that provide heat, light or power for residential, commercial and industrial structures. Courses provide students with a mix of theory and hands-on application in classroom and lab settings and at job sites. This comprehensive program includes maintenance of electrical equipment, wiring methods, blueprint reading, material selection, programmable controllers and National Electric Code.

### Engineering

#### Associate of Science (AS) - 60 credits

**F M**

The Associate of Science in Engineering consists of the sequential math, physics and other science courses which will transfer to either a BS in physics or to diverse engineering programs at many four-year colleges and universities. An AS in Engineering will also open an option for technical jobs in the upcoming new energy sector. In general, a degree in engineering has been and will continue to be an excellent platform for success across a wide range of careers in the private sector, government, schools, colleges and universities.

### Gas Utility Construction and Service

#### Diploma - 32 credits

**W**

The Gas Utility Construction and Service program prepares students to install, maintain and operate both high- and low-pressure natural gas distribution systems that are used to supply residential, commercial and industrial companies. Program graduates will be qualified to enter one of the most technologically intensive industries in today's economy with potential careers in gas construction mechanics, gas meter mechanics, gas service mechanics, gas clerk estimation, gas regulator maintenance mechanics, gas appliance repair and underground facilities location.

### Heating, Ventilation and Air Conditioning/Refrigeration

#### Diploma - 36 credits

**M W**

Students in this program work with both residential and light commercial heating, ventilation, ducting, air conditioning and refrigeration equipment. This extensive background, together with hands-on skills in layout, fabrication, installation and repair, qualifies graduates to enter one of the world's fastest-growing industries. Employment exists with manufacturers, engineers, contractors and specialized service firms. Students learn and develop applications skills of more efficient, cost-effective equipment and their application procedures. Many new, exciting and energy-saving innovations are being developed. Technicians train in this industry to provide the latest technologies to control the environment in any enclosed area, from residential homes to light commercial buildings. This includes controlling indoor air quality by utilizing mechanical means to remove pollutants and maintain desired humidity and temperature settings.

Industrial Workplace Readiness

Certificate - 18 credits

This certificate is designed to ensure that students are workplace-ready for the industrial workplace. This course of study will provide basic communication, computer, technical math and safety skills, as well as elective technical skills needed in the industrial workplace. In addition, students will be introduced to the work habits and attitudes that lead to success in the industrial workplace.

Marine Engine Technology

Associate of Applied Science (AAS) - 69 credits

D

The Marine Engine Technology AAS is designed to train individuals to be competent marine technicians with the skills needed for management and manufacturer technical positions. The primary focus of the program is the diagnosis, service and repair of outboard, stern drive and inboard engines. Propulsion, electrical and trailer systems also will be covered. Students will service modern marine equipment using special tools and test equipment. Along with taking factory certification exams, students learn how to plan and perform repairs according to various manufacturers’ recommended procedures. This program is designed for individuals who are looking toward a goal of management, technical manufacturer service or business ownership.

Marine Engine Technology

Certificate - 30 credits

D

Marine engine technicians work in an exciting, rapidly changing and growing industry. The Marine Engine Technology certificate program is designed to educate individuals to become competent marine technicians. The primary focus of the program is training students to be well-rounded in marine systems, both outboard and stern-drive. Students will perform service on modern marine equipment using special test equipment and tools. Students will learn how to plan and perform repairs according to the various manufacturers’ recommended procedures. The perfect program for the individual to start a marine career as an entry level technician.

Marine Engine Technology

Diploma - 60 credits

D

The Marine Engine Technology diploma program is designed to train individuals to be competent marine technicians. The primary focus of this program is the diagnosis, service and repair of outboard, stern drive and inboard engines. Propulsion, electrical and trailer systems also will be covered. Students will service modern marine equipment using special tools and testing procedures to increase their profitability as trained technicians. As part of the program, students will have the opportunity to earn factory certification from major marine engine manufacturers. Career opportunities include working as a technician in a dealership, with many having opportunities to move into management, self-employment and factory representative positions.

Course # | Course Title | Chrs

TRNS1194 | Fuel Systems II Theory | 2
Marine/Powersports Maintenance Specialist

Certificate - 16 credits
D

The purpose of this certificate is for the student to gain mechanical confidence in marine and powersport products. This will allow the student to attain an entry-level position at a local dealership. This certificate also can be applied to recreational outdoor powersports or boating enthusiasts who want to get a grasp on maintaining their own equipment. This is a beginners certificate to build the mechanical abilities needed when working on recreational products.

Plumbing Technology

Diploma - 36 credits
M

The Plumbing Technology program is designed for apprentice plumbers and others entering a plumbing career. It begins with safety, tools and materials used in the industry with a strong emphasis on the Minnesota Plumbing Code and the North Dakota Plumbing Code, covering both residential and commercial installation practices and standards. An introduction to blueprints and isometric drawings will be presented, as well as backflow prevention theory and devices. Graduates will be eligible for applicable hours on their apprenticeship card.

PowerSports Technology

Certificate - 30 credits
D

Students who wish to become skilled PowerSports mechanics must be capable of diagnosing mechanical failures quickly and accurately if they are to be in a position to repair the job at a fair salary return. Most types of two- and four-cycle small engines that are currently used to power lawn mowers, snow blowers, generators, garden tractors, rototillers, snowmobiles, ATVs and personal watercraft will be covered. Students who perform satisfactorily may find employment as service technicians, sales personnel and factory representatives, or they may wish to enter business for themselves. This program requires a mechanical aptitude and the ability to read and comprehend technical service manuals, understand and perform a variety of diagnostic procedures, and work well with fellow employees and customers. Many industry training opportunities are available.

Survey Technician

Certificate - 30 credits
D

This certificate program provides the student with a basic study of civil engineering surveying including survey equipment setup and training, surveying principles and an introduction to civil engineering survey practices and uses. The Survey Technician program includes knowledge and training in property and land surveys, construction project design, field training in level surveys, total station and global positioning equipment, and road design and construction principles.

## Biological Sciences

### Associate of Science (AS) - 60 credits

**F M**

This degree is designed for students interested in the various fields of biological sciences such as cell biology, bioengineering, environmental science, fish and wildlife management, forestry, genetics and microbiology. Students majoring in biological sciences may also be interested in the following program areas: biochemistry, chemistry, pre-chiropractic, pre-dentistry, pre-medicine, pre-medical technology, pre-optometry, pre-pharmacy and pre-veterinary medicine. The curriculum should be used as a guide since required courses vary considerably among four-year institutions and professional schools. Students planning a degree in biological sciences or one of the above fields should contact the biology department and work with an adviser. A visit to the intended transfer institution by the spring of the first year is highly recommended.

### Cardiovascular Technology - Invasive

#### Associate of Applied Science (AAS) - 60 credits

**M**

The Cardiovascular Technology - Invasive program prepares the graduate to be a competent entry-level cardiovascular technologist in the cognitive (knowledge), psychomotor (skill) and affective (behavior) learning domains for invasive cardiovascular technology. Students will learn to assist physicians in diagnosing and treating cardiac, peripheral vascular, neurovascular and electrophysiological conditions using current technology, physiological and diagnostic equipment, and therapeutic procedures.

### Chemistry

#### Associate of Science (AS) - 60 credits

**F M**

The Associate of Science in Chemistry consists of the sequential chemistry, math, physics and other courses which will transfer to either a BA or BS in chemistry or to diverse chemistry-related programs at many four-year colleges and universities. The career paths for chemistry majors are practically endless, depending on skills and interest. A chemistry major could lead to any of the following possibilities: laboratory research, forensic science, chemical engineering, medicine, health sciences, chemical industry, biotechnology, pharmaceuticals, environmental sciences, food science, law, hazardous waste management, geochemistry, metallurgy, consumer products and teaching. Many career options in chemistry require a bachelor’s or advanced degree. Students planning a degree in chemistry or one of the above fields should contact the chemistry department and work with a counselor or advisor to identify transfer options. A visit to the intended transfer institution by the spring of the first year is highly recommended.

Dental Hygiene

Associate of Applied Science (AAS) - 88 credits

M

The Dental Hygiene program provides knowledge and skills to perform critical dental services that detect, prevent and treat diseases of the mouth while working as part of a dental team. Students who complete the program will leave with the skills to provide current, comprehensive dental hygiene services and may find employment in a variety of settings including private dental offices, schools, hospitals and public health clinics. Students interested in an advanced degree in dental hygiene or a related field have a number of transfer options to four-year colleges and universities. The Minnesota Board of Dentistry requires BCA and FBI criminal background checks and fingerprint analysis prior to initial licensure in the state of Minnesota.

Dental Assisting

Associate of Applied Science (AAS) - 63 credits

M

The Dental Assisting program provides the knowledge necessary for the dental assistant to assist in performing general clinical assisting and support functions, intra-oral clinical procedures, business office procedures and laboratory tasks. The curriculum includes content in general studies; biomedical, dental and clinical sciences; clinical practice; and additional intra-oral clinical functions. Certain biomedical and dental science courses offered in the curriculum are common to both Dental Assisting and Dental Hygiene majors. Graduates are eligible to write the Dental Assisting National Board Certification Exam and the Minnesota State Board of Dentistry Registration Exam.

Health Information Technology/Coding

Associate of Applied Science (AAS) - 64 credits

O

The health information technician is an important member of the health care team who secures, analyzes, integrates and manages health information for patient care, performs diagnostic and procedure coding, utilizes electronic systems for reimbursement, planning and research activities, and maintains a legal patient record. This information steers the health care industry. The program is designed to combine general education and technical courses for a well-rounded and functional education. To further the student’s knowledge, the program utilizes Web-based educational electronic health record systems, and time is spent in health care facilities.
Medical Administrative Assistant

Associate of Applied Science (AAS) - 60 credits

The Medical Administrative Assistant AAS program prepares students to work in a variety of medical settings, handling all types of administrative duties for private practices, hospitals and clinics. This program offers a broad foundation of knowledge and skills, expanding the traditional role of the medical secretary through the addition of liberal arts classes as preparation for leadership roles. Graduates of this program are highly-trained office specialists who are prepared to accept responsibility for the coordination of medical office functions and patient billing processes. Successful medical administrative assistants have excellent communication skills and exhibit a high degree of professionalism. All courses in the program incorporate the skills needed for employment in the medical administrative assistant profession.

Medical Laboratory Technology

Associate of Science (AS) - 60 credits

to work in a clinical laboratory. These techniques emphasize skills in phlebotomy, body fluid analysis, hematology, chemistry, microbiology, immunology and immunohematology. Students learn to correlate test results with patients’ conditions. In addition, students earn credits in general education, including anatomy and physiology, communications, chemistry and the humanities. Program courses are offered in a hybrid format (lectures and lab instruction arranged). After successful completion of didactic courses, students enter a clinical experience at an affiliate health care laboratory performing laboratory testing under supervision. Graduates of the MT program are eligible to take the examination given by the Board of Certification of the American Society for Clinical Pathology. Graduates may articulate to a four-year institution to receive a bachelor of science degree in medical laboratory science. The MLT program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Medical Coding and Insurance

Diploma - 50 credits

The Medical Coding and Insurance diploma program prepares students in many of the procedures associated with billing for medical services. Students receive training in medical billing processes including patient account management, diagnosis and procedure coding and medical insurance claim completion and processing. The program focuses on coding and insurance procedures for the medical office. Medical coding involves using nationally recognized coding systems to classify procedures and diagnoses related to medical treatment. The codes provide information that is used in insurance claims processing. Many different types of insurance programs are handled in the medical office. Students are trained in claims processes of many insurance programs/plans such as Medicare, Medicaid, Tricare, profit and nonprofit third-party payers, workers compensation packages and disability coverage. Graduates of the program may be eligible to take several of the national coding certification exams. Courses in the program incorporate the skills needed for employment in the coding and insurance departments of medical facilities.

Medical Office Assistant

Diploma - 44 credits

Medical office assistants are highly trained office specialists who participate in the coordination of medical office functions including patient appointment scheduling, telephone communications, medical record maintenance, medical transcription and patient billing processes. Successful medical office assistants have excellent communication skills and exhibit a high degree of professionalism. All courses in the program incorporate the skills needed for employment in the medical office assistant profession.

Mental Health Behavioral Aide II

Certificate - 16 credits

This certificate prepares learners to enter the mental health workplace as a Mental Health Behavioral Aide II (MHBAII). It provides foundational knowledge for entry-level workers (beyond the level of Mental Health Behavioral Aide I) under the supervision of psychiatrists, psychologists, nurses and other mental health professionals to provide direct patient care for children with mental illnesses and perform related functions.

Nursing - (Advanced Standing option)

Associate of Science (AS) - 32 credits

The LPN to Associate Degree RN advanced standing option is designed for licensed practical nurses seeking to become registered nurses. This option is offered at the Detroit Lakes, Fergus Falls, Moorhead and Wadena campuses. Accepted students take a two-credit Role Transition course in the semester prior to the start of their program and then join the General Associate Degree nursing students in the second year of the nursing program. The Associate Degree Nursing Program is designed to prepare students to deliver nursing care in a variety of settings as registered nurses. The graduating nurse will be able to provide nursing care in hospitals, long-term care facilities, clinics, community health and other health-related facilities. Upon completion of the nursing program, an Associate in Science degree is awarded by the college. Nursing graduates may apply to take the National Council Licensure Examination (NCLEX-RN) following graduation. Individuals entering the program must pass the background check required by the Minnesota Human Services licensing division and depending upon particular clinical partner expectations may also be required to pass an annual national background check. The Minnesota Board of Nursing has officially approved the Associate Degree Nursing program at M State.

Pharmacy Technology

Associate of Applied Science (AAS) - 60 credits

The pharmacy technician works as an assistant to a registered pharmacist, assisting or relaying the pharmacist in routine technical and clerical duties and functioning in strict accordance with standard written procedures and guidelines under the supervision of the professional pharmacist. AAS graduates have enhanced potential for upward progression in the career of pharmacy, as the general education component gives the student a well-rounded foundation of knowledge. Students, using their own laptop computers, learn how to access patient profiles, input drug orders and print prescription labels. They learn how to fill prescriptions and aseptic technique for intravenous drug admixture in the college's state-of-the-art teaching lab. The work done by pharmacy technicians allows pharmacists to spend more time with patients on medication management. Individuals entering the program must complete a background check required by the Minnesota Human Services licensing division. Individuals who do not receive a clear background check may participate in the program but may not be allowed to participate in clinical and/or field experience courses.

Phlebotomy Technician

Certificate - 16 credits

The Phlebotomy Technician program provides students the training necessary for employment and advancement in the health care field. Upon satisfactory completion of the classroom training at the college, each student is assigned to an affiliating clinical site for five weeks of daytime phlebotomy clinical experience. During this period, the student performs phlebotomy and other related procedures under the direct supervision of a medical laboratory technician or technologist. Graduates of the one-semester Phlebotomy Technician program are eligible to take the Board of Certification examination of the American Society for Clinical Pathology.

Practical Nursing

Diploma - 40 credits

The Practical Nursing program prepares the student to practice within the scope of the practical nurse. The student is taught to use the nursing process in the maintenance of health and prevention of illness, the observation and nursing care of individuals experiencing changes in health status and the administration of prescribed medication and treatments. The student will receive supervised learning experiences in caring for individuals in a variety of health care settings such as hospitals, long-term care facilities and physician clinic settings. Practical Nursing graduates may apply to take the National Council Licensure Examination-PN (NCLEX-PN) following graduation. Individuals entering the program must pass the background check required by the Minnesota Human Services licensing division and an annual national background check. The Practical Nursing program is offered on the Detroit Lakes, Fergus Falls, Moorhead and Wadena campuses. The Minnesota Board of Nursing has officially approved the Practical Nursing program at M State.

Radiologic Technology

Associate of Applied Science (AAS) - 79 credits

The Radiologic Technology program prepares individuals to perform various radiologic procedures. The radiologic technologist instructs and positions patients, manipulates radiographic equipment, adjusts exposure factors, provides radiation protection for patient and self, develops radiographic images, evaluates the quality of finished radiographs and carries out activities associated with quality control. The student radiologic technologist carries out these functions under the supervision or upon the direction of a registered radiologic technologist. Graduates of the Radiologic Technology program are eligible for the national certification exam administered by the American Registry of Radiologic Technologists. Successful completion of this exam qualifies the graduate as a Registered Radiologic Technologist. The selection of students into the Radiologic Technology program is done on a point system using the Application Assessment Sheet to rank applicants comparatively based on course grades and GPA. Individuals entering the program must complete a background check required by the Minnesota Human Services licensing division. Individuals who do not receive a clear background check may participate in the program but may not be allowed to participate in clinical and/or field experience courses. **ECampus students - Please note, incorporated into the ECampus program are on-campus lab and on-site clinical requirements. The amount of days required will vary by course outcomes and individual instructor.**

Surgical Technology

Associate of Applied Science (AAS) - 60 credits

The Surgical Technology program prepares competent entry-level surgical technologists in the cognitive (knowledge), psychomotor (skills) and affective (behavior) learning domains. Graduates will have the entry-level knowledge to assist the physician, anesthesiologist and registered nurse throughout the perioperative experience while demonstrating proficiency with sterile techniques and the preparation and use of surgical equipment, instruments and supplies, and demonstrating an understanding of anatomy, physiology, pathology and microbiology.

Correctional Officer

Certificate - 25 credits

M

Students interested in a criminal justice career other than law enforcement may enroll in the Correctional Officer certificate program. The certificate program is designed to provide pre-employment education for the student who desires a position as a correctional officer. The program also provides continuing education for employed correctional officers. Students complete the certificate program articulate into the two-year Criminal Justice A.S degree for peace officer licensing.

Cosmetology

Diploma - 58 credits

W

Cosmetology is the art, science and business of beauty care and thus offers students a variety of career opportunities. Students completing the program can choose to be general cosmetologists or to excel in an area of expertise such as permimg and cutting, hair care and coloring, or skin and nail care. This program welcomes both men and women. Students of the Cosmetology program will receive a combination of classroom and laboratory work with the opportunity to practice their skills on mannequins and actual customers in the campus clinic/salon. Acquired cosmetology hours or credits earned and documented from other licensed colleges, whether in- or out-of-state, may be accepted upon approval of the Minnesota Board of Cosmetologists. Graduates holding a valid cosmetology license are also eligible for employment on tourist ships and in other unique employment settings. Academically, courses in chemistry, English, math and business are necessary in preparing for a career in cosmetology. The Board of Cosmetologists, which is the cosmetology licensing body, requires 1,550 hours of clinical time in order to become licensed in the State of Minnesota. Upon completion of 1,550 hours and passing of the state exam, a license will be issued. (Note: 33 credits in Salon Practicum is the maximum number of credits which can be applied toward the diploma.)

Criminal Justice

Associate of Science (AS) - 60 credits

M

The Associate of Science degree in Criminal Justice prepares students for careers in law enforcement. M State’s Criminal Justice program has been designated a Professional Peace Officer Education Program by the Minnesota Board of Peace Officer Standards and Training. Students seeking a career in law enforcement will be prepared for and offered the opportunity to complete all educational and practical requirements necessary to apply for peace officer licensing. The internship program provides students with comprehensive training to develop additional skills in critical thinking, communications and practical application. Criminal Justice faculty have extensive academic and practical experience within the field. Students seeking an AS in Criminal Justice are required to declare that intention prior to the second semester of coursework. Acceptance into the program is contingent on the student’s completion of at least 12 credits of required general education courses. Achievement of a cumulative grade point average of 2.5 or higher: Successful completion of a personality assessment provided and evaluated through M State. *Approximate cost = $140. Completion of a criminal background check through the State of Minnesota or applicable state. *Approximate cost = $15. Achievement of at least a C in all Criminal Justice classes. Completion of a required initial advising session with the program coordinator. Note that expenses listed in brackets above and marked by * are not eligible for financial aid. If there are more applicants who meet the above criteria than the program can accommodate, applicants will be selected based on program application date. Registration to some Criminal Justice courses is restricted to AS degree students unless approved by the program coordinator.

Early Childhood and Paraprofessional Education

**Associate of Science (AS) - 60 credits**

This program includes coursework in child development for ages birth through 8, behavior guidance, children with special needs, development of environments and curriculum for infant/toddler, preschool- and primary school-age children, and the role of the paraprofessional, as well as on-site experiences in a variety of programs. Graduates will independently provide a healthy, safe and developmentally appropriate learning environment in support of families. Child development courses in combination with general education courses comprise the 60-credit degree program for students. The program meets the educational requirements for assistant teacher and paraprofessional in an educational setting as well as assistant teacher and teacher in a child care setting and/or family child care provider; and group family child care provider (based on program) as listed in Minnesota Department of Human Services Rule Numbers 9502 and 9503. Work experience, in addition to educational coursework, is required by Rule 3 for teacher positions in licensed child care facilities. Individuals with any prior record of child maltreatment or crime of violence will not be allowed to participate in lab or field experience coursework.

Esthetist

**Certificate - 21 credits**

**W**

Esthetics is the non-medical treatment of the skin, its disorders and its function. Instruction includes the sciences of anatomy, dermatology and chemistry as related to skin care, electricity light therapy; sanitation and safety procedures; Minnesota statutes and laws which pertain to the regulation of the practice of skin care; and elementary service skills. The Board of Cosmetologists, which is the cosmology licensing body, requires 600 hours of clinical time in order to become licensed in the State of Minnesota. Upon completion of 600 hours and passing of the state exam, a license will be issued.

Fire Service Preparation

**Certificate - 30 credits**

**M**

This certificate program provides an opportunity for individuals interested in a career in the fire service with the minimum requirements necessary to meet national and Minnesota state qualifications. This program is designed to meet all National Fire Protection Association standards in the following functions: Standard for Firefighter Professional Qualifications, Standard for Competence of Responders to Hazardous Materials/Warne of Mass Destruction Incidents, Standard for Professional Qualifications for Fire Inspector and Plan Reviewer, Standard for Professional Qualifications for Public Fire and Life Safety Educator, Standard on Operations and Training for Technical Search and Rescue Incidents, and the Standard for Technical Rescue Professional Qualifications. Participants in the Fire Service Preparation program will be actively involved with technical hands-on training to ensure that they are familiar with all entry-level aspects of fire service. Upon completion of the certificate, students will be able to meet the national testing requirements for emergency medical technician, International Fire Service Accreditation Congress and Proboard. Students will also be eligible for the State of Minnesota firefighter license after employment with a career fire department.

Manicurist

**Certificate - 16 credits**

**W**

The Manicurist program is designed to give students a thorough knowledge of dermatology, the structure, growth and health of the nail, and chemistry as it relates to manicuring, as well as sanitation and safety procedures related to the practice of manicuring. Instruction will cover applied studies and skills in cleaning, conditioning, shaping, reinforcing, colorizing and enhancing nails, as well as the application and repair of artificial nails. The Board of Cosmetologists, which is the cosmetology licensing body, requires 350 hours of clinical time in order to become licensed in the State of Minnesota. Upon completion of 350 hours and passing of the state exam, a license will be issued.

Massage Therapy

**Diploma - 34 credits**

**W**

Massage therapists specialize in professional massage treatments designed to support the health and well-being of clients. Skillful massage also assists clients in recovery from physical ailments and reduces the negative effects of stress. Massage therapy students learn the fundamental techniques needed to perform effective massage treatments, as well as the theory behind delivering professional massage.

Paralegal

Associate of Applied Science (AAS) - 60 credits

The Paralegal program provides graduates with a strong legal foundation that prepares them to work under the supervision of an attorney. Students will gain knowledge in the areas of criminal law, civil law, family law, real property law, and estate planning. Communication and critical thinking skills combined with real-world application will provide students with the legal knowledge and technical competencies needed for a successful legal career. Students will gain a strong background in legal research and writing using electronic research programs. Graduates of the program find successful careers in legal firms, corporate offices and in nonprofit and government organizations.

</table>

This course covers the fundamentals of health care documentation and medical record production, legal and ethical issues and responsibilities, text expansion software usage, utilization of medical references, and grammar and punctuation in health care-related communication.

Prerequisite: None
Corequisite: None

This course offers hands-on training in the tasks performed by medical administrative personnel in medical office settings. Topics include the role of the medical administrative professional, exploration of health care careers, legal and ethical responsibilities, medical appointments and calendars, professional communication including telephone techniques, reception and registration of patients, electronic health record responsibilities, introduction to billing and insurance procedures, and an introduction to medical office management.

Prerequisite: None
Corequisite: None

This course provides in-depth exploration of medical terms used in pharmacology, radiology, laboratory and pathology, surgery, psychiatry, oncology, podiatry and physical occupational therapy. Spelling, proofreading and analysis of medical documentation will be reviewed along with a study of a variety of medical documents. A solid foundation of medical terminology is cultivated in this course.

Prerequisite: HLTH1116
Corequisite: None

This course provides information related to medical billing and health insurance. Topics covered include billing and statement preparation in the medical office, introduction to medical coding, types of health insurance coverage, insurance claim processes and related ethical and legal issues.

Prerequisite: None
Corequisite: HLTH1116

This course is an introduction to medical coding and emphasizes coding in medical offices and other outpatient care facilities. Course topics include ICD-9 and ICD-10, CPT and HCPCS procedural coding, and legal and ethical issues related to outpatient coding practices.

Prerequisite: HLTH1116 Medical Terminology OR HLTH1108 Introduction to Anatomy and Physiology
Corequisite: None

This course covers the transcription of basic health care dictation, incorporating skills in the English language, technology, medical knowledge, proofreading, editing and research, while meeting progressively demanding accuracy standards.

Prerequisite: None
Corequisite: HLTH1116 AND ADMM1110

This course is designed to teach the transcription of intermediate original health care dictation using intermediate proofreading, editing and research skills, while meeting progressively demanding accuracy and productivity standards.

Prerequisite: ADMM1160
Corequisite: None

Students will utilize technology that is commonly used in a medical office setting and develop 10-key skills necessary for billing and insurance practices.

Prerequisite: None
Corequisite: None

This course examines many responsibilities of a medical office manager. In addition to the part-time practice or small medical office, a medical office manager must be aware of current regulations in the health care industry and how these regulations affect the operations of a health care organization. Office management, business operations, human resources, financial management and marketing for health care organizations are also explored.

Prerequisite: ADMM1122
Corequisite: None

This course explores topics in the health care industry as they impact the medical administrative professional. Students will have the opportunity to focus on local, regional or national topics in preparation for a medical office career. Students will learn to appropriately present their acquired skills, knowledge and personal attributes to prospective health care employers.

Prerequisite: ADMM1122 OR ADMM1160
Corequisite: None

This course will teach the principles of Medicare coverage, billing, coding and payment for both inpatient and outpatient services. It will provide students with the knowledge and tools for developing the skills needed to submit accurate claims to Medicare, maintain compliance, prevent potential missed revenue and avoid unnecessary claim and coding denials.

Prerequisite: None
Corequisite: ADMM1152

This course is a continuation of ADMM1152 Outpatient Coding. Students will learn to extract coding information from medical records. This course emphasizes correct application of diagnosis and procedure coding guidelines and provides an introduction to computer coding applications.

Prerequisite: ADMM1152
Corequisite: None

This course covers billing processes related to the hospital claim form. Billing for inpatient, ambulatory surgery and hospital-based outpatient services is covered.

Prerequisite: ADMM1150 OR ADMM1152
Corequisite: None

This course covers the development of professional work behaviors and communication, analysis of the dynamics of the health care work environment and exploration of professional development and career opportunities relating to medical administrative/ support staff.

Prerequisite: ADMM1122 Medical Office Procedures or ADMM1152 Medical Billing and Insurance or ADMM1162 Intermediate Medical Transcription
Corequisite: None

This course prepares students to take the Registered Medical Transcriptionist (RMT) examination. Review of medical transcription rules and language will be integral components of this course. Practice examinations will be taken under timed conditions. The course will assist the student in determining a plan of study and continued learning in the area of medical language in preparation for the RMT certification examination.

Prerequisite: ADMM1162 Intermediate Medical Transcription
Corequisite: None

This course prepares students to take the Certified Professional Biller (CPB) examination offered by the American Academy of Professional Coders (AAPC). Practice examinations will be taken under timed conditions. The course assists the student in establishing a personal plan for continued development in preparation for the certification examination.

Prerequisite: ADMM1150
Corequisite: None

This course prepares students to take the Certified Professional Coder (CPC) examination offered by the American Academy of Professional Coders (AAPC). Review of Current Procedural Terminology (CPT), International Classification of Diseases (ICD) and Healthcare Common Procedure Coding System (HCPCS) Level II coding is an integral part of this course. Practice examinations will be taken under timed conditions. The course assists the student in establishing a personal plan for continued development in preparation for the certification examination. This course also prepares students to take other nationally recognized coding examinations.

Prerequisite: ADMM1152
Corequisite: None

This course prepares students to take the Certified Professional Coder - Hospital (CPC-H) examination. Review of CPT, ICD and HCPCS II coding will be an integral part of this course. Practice examinations will be taken under timed conditions. The course assists the student in establishing a personal plan for continued development in preparation for the certification examination.

Prerequisite: ADMM2225
Corequisite: None

This course prepares students to take the Certified Professional Coder - Hospital Examination Review. This project-based course offers a capstone experience for students enrolled in a medical administrative program. Medical office responsibilities such as appointment scheduling, registration, health information management, and billing and financial operations are included in this project-based course. This course should be taken in the last semester prior to graduation as students will employ skills mastered over the course of their program enrollment. Students will develop 10 key skills necessary for billing and insurance practices in a medical facility.

Prerequisite: None
Corequisite: None

</tbody>
</table>
ADMS 1162 Introduction Desktop Publishing 1 0/1/0
This course introduces the concepts, terminology, techniques and applications of desktop publishing software.
Prerequisite: None
Corequisite: None

ADMS 1164 Introduction to Outlook 1 0/1/0
This course will provide an overview of the basic tools and features used in Outlook for sending, receiving and forwarding email. Students will learn to attach files, manage calendars, schedule appointments, create tasks and set up groups.
Prerequisite: None
Corequisite: None

ADMS 1190 Keyboarding II 1 0/1/0
This course covers advanced formatting and text editing techniques that focus on developing enhanced keystroking, editing and formatting skills. Emphasis is on improving speed and increasing accuracy in the operation of the alpha, numeric, symbol and punctuation keys and in developing text editing concepts, critical thinking and decision-making skills.
Prerequisite: ADMS1100
Corequisite: ADMS1100

ADMS 1210 Spreadsheet Essentials 2 1/1/0
This course will provide students who use Excel but have limited experience and skills with the opportunity to improve their skills. Students will learn how to analyze and manage data, enhance charts and use mid-level formulas and functions to enhance their skills to consolidate and present information effectively.
Prerequisite: None
Corequisite: None

ADMS 1242 Career Internship II 2 0/0/2
This is the second-level enrichment course designed to provide students with real-life experience in a professional environment by applying academic business principles. The course will emphasize more in-depth projects and tasks within the workplace. Emphasis will be on interpersonal communication, decision making, problem solving, organizational and project management. Students will be required to accept higher-level responsibilities, tasks and projects as assigned per the site supervisor or faculty member.
Prerequisite: ADMS1142
Corequisite: None

ADMS 1310 Critical Workplace Skills 3 2/1/0
This course will provide students with transferable skills that can be used in any job or position. Students will develop the soft skills and personal qualities that prepare them to make a positive contribution to the daily operations of an organization. These may include communications, decision making, critical thinking and problem solving skills. Students also learn workplace technology creatively, effectively and efficiently with integrity. Students will develop the traits that demonstrate commitment to an organization including reliability, dependability, flexibility and being positive and enthusiastic. Students will develop the workplace skills of accepting responsibility, prioritizing, time management, working well under pressure and showing leadership skills with professionalism.
Prerequisite: None
Corequisite: None

ADMS 2124 Emerging Office Technologies 3 2/1/0
This course introduces the student to emerging office technologies and tasks that increase work efficiency and productivity in changing office environments. Topics include voice recognition, digital transcription, cloud computing (including securing information), editing PDF files and accessing information through the Internet. This course also provides students with a general understanding of computer-based systems in organizations and how information is used to satisfy business needs. The goal of the course is to help students learn how to use and manage information and information systems to revitalize business processes, improve managerial decision making and problem solving, and gain competitive advantage.
Prerequisite: None
Corequisite: None

ADMS 2205 Advanced Word Processing 1 0/1/0
This course provides students with an in-depth understanding of advanced word processing techniques needed to facilitate the production, documentation and storage of business documents. The course will stress increased proficiency in the computer production of a variety of business documents while working with more complicated projects that incorporate many of the upper-level skills required at this level.
Prerequisite: ADMS110
Corequisite: None

ADMS 2212 Advanced Office Software Applications 3 2/1/0
This course is designed to advance, enhance and reinforce software skills for the office professional with extensive integration of applications using word processing, spreadsheets, databases, presentations and basic Web page development. Advanced software features and tools will be used to design and create various documents for all applications. This course will improve the office professional's confidence in software applications and Internet searches by cultivating analytical, critical-thinking and problem-solving skills. Students will use analytical, decision making and technology skills for collaborative and individually written documents and presentations.
Prerequisite: C or higher in ADMS1130 OR per instructor's approval
Corequisite: None

ADMS 2216 Business Communications II 3 2/1/0
This course is designed to enhance the office professional's business communication skills by creating more advanced business documents that may include business plans, managerial reports, manuscripts, budgets, presentations and others. Language elements and writing mechanics will be reviewed, with extensive practice in proofreading, editing and revising, as students learn to effectively and efficiently communicate efficiently and effectively in business environments. Students will use analytical, decision making and technology skills for collaborative and individually written documents and presentations.
Prerequisite: C or higher in ADMS1110 OR per instructor's approval
Corequisite: None

ADMS 2240 Administrative Office Professional Internship II 3 0/0/3
This course provides office support experience for students in their last semester of the ADMS AAS program. Each internship is individualized, and a training plan is created with the training site, providing students the opportunity to demonstrate the skills required in a business setting. The internship experience will demonstrate that students will be better-prepared for positions above the entry level through the higher-level skills, roles and responsibilities learned in the AAS degree program, and responsible for more advanced-level work. Students will develop final job search documents and an individualized professional development plan that sets goals.
Prerequisite: per instructor's approval
Corequisite: None

ADMS 2250 Administrative Office Professional Simulation 4 2/2/0
This capstone course for the Administrative Assistant AAS program provides students with the opportunity to practice and develop professionalism, efficiency and proficiency in using technology, oral and written communication, human relations, organization, critical thinking skills and workforce preparedness. Students will develop final job search documents and an individualized professional development plan that sets goals.
Prerequisite: None
Corequisite: None

ADMT 1173 Microsoft Office Access Certification 1 0/1/0
This course prepares participants to sit for the Microsoft Office Access MCAS (Microsoft Certified Application Specialist) certification. Class outcomes are aligned with certification objectives. Exam objectives are categories of examination tasks identified by subject-matter experts that certify an ability to productively use Microsoft Office programs. These categories are organized into skill sets representing the more basic functions of each Office program.
Prerequisite: None
Corequisite: None

ADMT 1174 Microsoft Office PowerPoint Certification 1 0/1/0
This course prepares participants to sit for the Microsoft Office PowerPoint MCIA (Microsoft Certified Application Specialist) certification. Class outcomes are aligned with certification objectives. Exam objectives are categories of examination tasks identified by subject-matter experts that certify an ability to productively use Microsoft Office programs.
Prerequisite: None
Corequisite: None

ADMT 2110 Topics in Administrative Management Technology 1 0/1/0
The goal of this course is to introduce students to a range of topics in the career field of the administrative professional. Topics will vary each semester and could range from office technology trends to soft skills to employment trends. Course may be repeated for credit with a change in subtitle.
Prerequisite: Permission of Instructor
Corequisite: None

ADMT 2222 Event Planning 2 2/0/0
This course explores the principles and practices involved in planning and administering special business events. Topics will include differentiating the various types of business events, analyzing the process and procedures necessary to plan an event, identifying various resources needed to organize an event and venue selection criteria.
Prerequisite: None
Corequisite: None

ADMT 2224 Applied Event Management 1 0/1/0
Students in this course will apply classroom and textbook principles by collaborating with other students and faculty to plan, promote and execute an authentic event on campus, working with area businesses and organizations. This course is a continuation of ADMT2222.
Prerequisite: ADMT2222
Corequisite: None

ADMT 2236 Administrative Project Management 3 2/1/0
Project management is a powerful set of tools and practices that provides a systematic approach to planning, organizing, controlling and leading a project to successful completion. This course guides students through a step-by-step process for managing projects from the initial planning stage to final completion and evaluation. Successful implementation of project management processes is dependent on developed interpersonal skills. Therefore, this course also compares and contrasts project management and self-management skills by reviewing the discipline of emotional intelligence.
Prerequisite: None
Corequisite: None

ADMT 2300 Office Graphics and Presentations 3 2/1/0
This course is designed to provide the student with the design and layout techniques of various software applications needed to produce business publications and visual presentations. Emphasis is on available software tools, presentation options and design, as well as presentation considerations of the target audience. Upon completion, the student should be able to demonstrate the ability to design and produce business presentations and publications.
Prerequisite: None
Corequisite: None

minnesota.edu
Course Title  CR  Lec/Lab/OJT

**ADMT 2600 Trends in Office Technology**  3  2/1/0  This course is designed to address current trends in the administrative professional industry, with emphasis on the use of office technology. Topics will vary but could include trends in electronic mail, multimedia interaction, presentation hardware and software, and Internet technologies and applications relevant to the business world. Upon completion, the student should be able to demonstrate an awareness of current technological applications for the modern office.

Prerequisite: CPTR1104  Corequisite: None

**ADMT 2900 Administrative Professional Internship**  1-3  None  This course provides students with actual work experience in an administrative professional career. A training plan is created for each student in conjunction with the training site to provide experience related to the skills and knowledge acquired in the program. Each internship is an individualized experience. Therefore, this course offers a flexible, variable credit experience. The student may choose from 1, 2 or 3 credits, depending on the number of hours pre-arranged with the internship site supervisor. Each credit will require 45 hours of on-the-job learning.  

Prerequisite: Instructor Approval  Corequisite: None

**AGRI 1400 Farm Marketing and Management**  3  3/0/0  This course is an introduction to concepts, strategies and technology for farm planning, economic accounting systems and marketing techniques.

Prerequisite: None  Corequisite: None

**AMST 1101 Automotive Equipment Fundamentals**  2  1/1/0  This course is designed to give the student an understanding of an automotive shop environment. They will learn occupational safety, proper use of power and hand tools, shop equipment, fasteners, precision measuring instruments, electronic information, writing electronic repair orders and industry expectations.

Prerequisite: None  Corequisite: None

**AMST 1102 Alignment and Suspension I**  3  1/2/0  This course focuses on the various types of suspension systems currently in use. Systems covered include McPherson strut, leaf spring, coil spring and torsion bar. Also covered will be caster, camber and toe, and other alignment angles; wheel balance using the latest road force technology; and operation, diagnosis and repair of manual and power steering systems.

Prerequisite: None  Corequisite: TRNS1102

**AMST 1105 Brakes I**  3  1/2/0  This course teaches the basic principles of disc and drum brakes, hydraulic system fundamentals, parking brakes and power assist units. Emphasis is placed on operation, diagnosis and repair of various types of brake systems. Basic operation of anti-lock brake systems will also be covered.

Prerequisite: None  Corequisite: TRNS1102

**AMST 1109 Starting and Charging**  3  2/1/0  This course involves the understanding and service of batteries, charging systems and starting systems. The student will perform tests on these items using bench testing and vehicle testing. Repair will involve rebuilding items, as well as weighing the cost of replacement.

Prerequisite: None  Corequisite: TRNS1102

**AMST 1110 Batteries, Starting and Charging Systems**  2  1/1/0  This course involves the understanding and service of batteries, charging systems and starting systems. The student will perform tests on these items using bench testing and vehicle testing. Students will disassemble and reassemble components so they can understand the operation of how those items operate. Students will determine cost of replacement versus repair.

Prerequisite: None  Corequisite: TRNS1102

**AMST 1111 Automotive Electronics**  3  2/1/0  This course involves understanding Ohm’s law, multimeter usage, schematic reading, operation of electrical circuits and electronic components. The student will perform electrical tests and repairs on training boards as well as various vehicles. This course is a prerequisite for all second-year automotive courses.

Prerequisite: None  Corequisite: TRNS1102

**AMST 1114 Basic Maintenance Service**  1  1/0/0  This course will provide the introduction to basic vehicle maintenance. Included will be identification of service points and procedures required for maintenance. Fluid types, brake inspection, tire rotation and service information will be addressed.

Prerequisite: None  Corequisite: None

**AMST 1116 General Automotive Service**  5  3/2/0  This course will involve concepts and hands-on application in multiple areas of auto repair. Included will be small areas of brakes, electrical, starting and charging systems, and tune-up. This course provides basic repair knowledge of service that is performed in a maintenance environment.

Prerequisite: None  Corequisite: None

**AMST 1122 Engines I**  3  2/1/0  This course covers the fundamentals of internal combustion engine operation, repair and maintenance. The procedures for removal, replacement, diagnosing, rebuilding and assembly are presented. Proper tool and equipment application and failure diagnosis are emphasized.

Prerequisite: None  Corequisite: TRNS1102

**AMST 1126 Engines II**  3  1/2/0  This course covers the disassembly, diagnosis, measurement, service, assembly and adjustment of engines and components. Cylinder heads, valve trains, cylinder block assemblies, cooling and lubrication systems are thoroughly covered.

Prerequisite: None  Corequisite: None

**AMST 1132 Drive Trains I**  3  2/1/0  This course covers service and theory of operation with clutch, manual transmission, drive shaft and drive axle systems. Service will involve removal, disassembly, repair, reassembly and adjustment of the mentioned items. Diagnostics and repair of noise vibration and harshness in the drive train system will also be performed.

Prerequisite: None  Corequisite: None

**AMST 1136 Drive Trains II**  3  1/2/0  This course covers drive axles, drive shafts, front and rear wheel bearings and analysis of vehicle noise vibration and harshness. Theory, service skills and diagnosis are covered on bench and in-vehicle units. Drive line phasing, alignment and balance are covered.

Prerequisite: None  Corequisite: None

**AMST 2201 Alignment and Suspension II**  2  1/1/0  This is a continuation course from the Alignment and Suspension I class. The student will perform repairs and adjustments pertaining to wheel alignments and work with electrical sensors and controls affecting a vehicle’s stability control. Diagnostics and repair of steering columns and supplemental restraints also will be covered.

Prerequisite: None  Corequisite: TRNS1102

**AMST 2210 Body Electrical and Mechanical II**  2  1/1/0  This course focuses on computer-controlled body components and safety systems. Diagnostics will involve the use of scan tools, multimeters and lab scopes applied to a variety of body controlled devices. Students will learn how the various controllers communicate with each other through a variety of bussed circuits.

Prerequisite: None  Corequisite: None

**AMST 2211 Exhaust Analysis Fuel Systems**  3  2/1/0  This course will cover the various emission devices used on an automobile as well as the fuel delivery to maintain an efficient operating engine. Items covered will be PCV systems, EGR systems, air injection systems, evaporative systems, catalytic converters and fuel injection controls. Students will diagnose and repair problems using a variety of equipment on project vehicles.

Prerequisite: None  Corequisite: None

**AMST 2224 Electronic Powertrain Control I**  3  2/1/0  This course will cover the introduction to vehicle computer systems and related components that assist in the management of engine fuel, ignition and emission systems. Sensor inputs, management operation and operational commands are addressed.

Prerequisite: None  Corequisite: None

**AMST 2218 Electronic Powertrain Control II**  3  1/2/0  In this course, students will study the many electronic control systems used on today’s passenger cars and light trucks. Second-generation on-board diagnostics strategies will be covered for ignition, fuel and emissions systems. The course will also incorporate hybrid technology, high pressure gas fuel injection, and diesel injection operation and testing.

Prerequisite: TRNS1102 AND AMST1111  Corequisite: None

**AMST 2220 Ignition Systems**  3  2/1/0  This course will cover the operation of the ignition system. Student will learn how various ignition systems work so they will have the understanding to diagnose and repair ignition problems.

Prerequisite: None  Corequisite: None

**AMST 2225 Brakes II**  3  2/1/0  This class is a continuation of AMST 1105 Brakes I. Students will look at a progression of anti-lock brake, traction control, electronic stability control and manufacturer variations...
of these systems. Students will perform scan tool diagnostics, circuit analysis, circuit repair and bleeding procedures involving anti-lock brake systems. The student will perform on-car operations with brake part replacement, machining of drums and rotors, and hydraulics. 
Prerequisite: None
Corequisite: None

AMST 2233 Automatic Transmission I 3 2/1/0
This course involves the principles of the many systems combined into an automatic transmission. The student will understand planetary gear, clutch operation, band application and one-way clutching as it pertains to power flow through the transmission. The student will disassemble and make necessary adjustments and repairs on a variety of transmissions. The student will perform transmission fluid and filter changes where applicable. 
Prerequisite: None
Corequisite: AMST2111 AND TRNS1102

AMST 2237 Automatic Transmissions II 3 1/2/0
The student will practice and many of the procedures used in transmission diagnosis, vehicle repair sequences, scan tool data interpretation and diagnosis, transmission removal, installation and adjustment. Transmission cooling system diagnosis and service are also covered. 
Prerequisite: None
Corequisite: AMST2233

AMST 2240 Heating Ventilation and Air Conditioning 3 1/2/0
This course teaches the principles of heating, air conditioning and ventilation systems. Types and designs, component variations, diagnosis, testing and repair are studied and practiced on functioning units. System performance, recovery, evacuation, recharging and service are also covered. 
Prerequisite: None
Corequisite: TRNS1102

AMST 2292 Internship 1 0/0/1
This course is designed by the student and advisor in cooperation with industry to provide an on-the-job training experience for the student. The student will prepare an internship plan consistent with 45 hours of internship time. The plan should reflect the internship site, student knowledge, prior coursework and skills. This course will provide the student with an opportunity to integrate the skills, knowledge and concepts gained in previous coursework into an occupational experience. 
Prerequisite: None
Corequisite: TRNS1102

ANTH 1100 Introduction to Anthropology 3 3/0/0
Meets MnTC Goal Areas 5 and 8. This course is a survey of human nature through time and around the world. It examines the physical nature of our species, archaeology, the study of cultural behavior and linguistic studies. 
Prerequisite: None
Corequisite: None

ART 1122 Computer Aided Drafting for Architecture 4 2/2/0
This course covers the development of three-dimensional architectural modeling and documentation using AutoCAD for Architecture software. Emphasis is on creating and editing custom component styles. 
Prerequisite: CAD2102 AND ENGT1134
Corequisite: None

ART 1126 Residential Project I 3 1/2/0
This course covers the design development and documentation of single-family living. Students will be introduced to residential design styles as well as proper documentation methods. 
Prerequisite: ENGT1126 AND ENGT1134
Corequisite: None

ARCH 2218 Architectural Internship 3 0/0/3
This course provides the student with an occupational experience in the architectural technology field. Each internship is an individualized experience. 
Prerequisite: ARCH1126
Corequisite: None

ARCH 2220 Specification Writing for Construction 3 1/2/0
This course covers the implementation and inclusion of specifications, construction materials and finishes into a set of construction documents. 
Prerequisite: None
Corequisite: None

ARCH 2226 Residential Project II 4 1/3/0
This course introduces building design and construction requirements for multi-family housing. The course covers the processes for the selection of building materials and their integration into construction documents. 
Prerequisite: ARCH1122 AND ARCH1126
Corequisite: None

ARCH 2230 Mechanical and Electrical Integration 2 1/1/0
This course reviews the examination of mechanical, plumbing and electrical systems in buildings. Content includes analysis of plumbing and heating, ventilation and air conditioning (HVAC) systems, and power and lighting systems. 
Prerequisite: ARCH1122 AND ARCH1126
Corequisite: None

ARCH 2233 Civil and Structural Integration 3 2/1/0
This course will review the incorporation of civil and structural engineering drawings in coordination with building systems. Content will include analysis of civil and structural drawings and their relationship to commercial and residential building types. 
Prerequisite: ARCH2230
Corequisite: None

ARCH 2235 Architectural Presentation 3 0/2/0
This course will teach the student to develop design schematics and a set of presentation drawings for a commercial project. Emphasis is on verbal and visual presentation techniques. 
Prerequisite: ARCH1122 AND ARCH1126
Corequisite: None

ARCH 2242 Mechanical and Electrical Integration 3 1/2/0
This course covers the examination of mechanical, plumbing and electrical systems in both residential and commercial buildings. Content includes analysis of plumbing and heating, ventilation and air conditioning (HVAC) systems, and power and lighting systems. 
Prerequisite: ARCH1122 AND ARCH1126
Corequisite: None

ARCH 2244 Commercial Projects 4 1/3/0
This course covers the construction document process for commercial building design while having the student complete a self-guided capstone project. Content will include final detailing, scheduling and sheet set layout from a given design developed project. 
Prerequisite: ARCH2226 AND ARCH2240
Corequisite: None

ARCH 2250 Project Administration 2 1/1/0
This course provides an understanding of architectural firm structures and legal issues as well as project management procedures used throughout documentation, bidding and construction administration. 
Prerequisite: ARCH2226
Corequisite: None

ARCH 2256 Rendering Architecture 3 1/2/0
This course provides the advanced use of computer-aided drafting and modeling using AutoCAD for Architecture software and its related rendering application. The course will develop CADD configuration skills, advanced modeling techniques and various presentation renderings. 
Prerequisite: ARCH1112
Corequisite: None

ART 1107 Foundations of Art, 2-D 3 2/1/0
Meets MnTC Goal Area 6F. This course is an introduction to creative thinking, interpretation and self-expression. Students will explore two-dimensional elements and principles through the use of various media, tools, materials and processes. Color theory will be introduced. 
Prerequisite: None
Corequisite: None

ART 1108 Foundations of Art, 3-D 3 2/1/0
Meets MnTC Goal Area 6F. This course is an introduction to the elements and principles of visual arts and to the creative process. Students are encouraged to use a variety of media in drawing, painting and sculpture. 
Prerequisite: None
Corequisite: None

ART 1110 Introduction to Art 3 2/1/0
Meets MnTC Goal Area 6F. This course provides an introduction to the elements and principals of visual arts and to the creative process. Students are encouraged to use a variety of media in drawing, painting and sculpture. 
Prerequisite: None
Corequisite: None

ART 1111 Drawing I 3 2/1/0
Meets MnTC Goal Area 6F. This course introduces students to the basic drawing media, techniques and traditions of drawing. Students are exposed to the work of artists, drafters and illustrators and are subsequently guided through a wide variety of drawing experiences and applications. 
Prerequisite: None
Corequisite: None

ART 1112 Painting I 3 2/1/0
Meets MnTC Goal Area 6F. Students examine historical and contemporary painting approaches and directions in their beginning experiences with acrylic and/or oil paint, including the study of basic concepts, techniques, formal issues, technology, imagery, color theory and pigment theory. 
Prerequisite: None
Corequisite: None

ART 1117 Printmaking I 3 2/1/0
Meets MnTC Goal Areas 2 and 6F. Students will create original works in a variety of...

**Course Catalog 2017-2018**

**COURSE DESCRIPTIONS**

- **American Sign Language and Deaf Culture V**: This course focuses on advanced vocabulary, communicative functions and language techniques for effective expression of meaning and context of American Sign Language (ASL). Prerequisite: ASL1114 AND Grade of B or better in ASL1114. Corequisite: None.
- **Advanced Fingerspelling, Numbers and Classifiers**: This course focuses on enhancement of receptive and expressive fingerspelling and number skills. It also includes the fundamentals of American Sign Language (ASL) classifiers. Prerequisite: ASL1115 AND Grade of B or better in ASL1115. Corequisite: None.
- **Linguistics of American Sign Language**: This is an introduction to the linguistic structure of American Sign Language (ASL). This course includes linguistic fields, communication systems, syntax, phonology and grammar. This course also contains other linguistic elements unique to spatially- and visually-based languages such as morphemes, phonemes, semantics and pragmatics. Prerequisite: Grade of B or better in ASL1115 AND Grade of B or better in IPP2112 AND Grade of B or better in IPP2113. Corequisite: None.
- **Introduction to Medical Interpreting**: This course is an introduction to the field of medical interpreting. Students will learn to facilitate communication between patients who use American Sign Language (ASL) and their physicians, nurses, lab technicians and other health care providers. Prerequisite: Graduation from an Interpreter Education Program OR Hold current interpreter certification. Corequisite: None.
- **Medical Decision Making for Medical Interpreters**: Medical interpreting requires interpreters to respond to a wide range of difficult situations in an ethical manner. This course will focus on ethical dilemmas that require interpreters to use decision making processes in a variety of medical settings. Prerequisite: Graduation from an Interpreter Education Program OR Hold current interpreter certification. Corequisite: None.
- **Medical Signs**: This course introduces sign language vocabulary for basic medical settings and exposes interpreters to a variety of human body systems. Prerequisite: LH1110 and LH1116 AND Graduate from an Interpreter Education Program OR LH1110 AND LH1116 AND Hold current interpreter certification. Corequisite: None.
- **Special Topics in the Field of Medical Interpreting**: This course introduces special topics in medical interpreting. Medical interpreters work in a variety of health care settings, including hospitals, clinics, private offices, rehabilitation centers, dental offices, vision centers and nursing homes. Interpreters also confront unique issues related to working in mental health facilities, substance abuse clinics, domestic violence programs or similar types of health care settings. Prerequisite: ASLM110. Corequisite: None.
- **Introduction to Mental Health Interpreting**: Interpreters are needed in a variety of mental health settings including in-patient and out-patient settings, peer-led settings, outreach settings, day programs, private clinic offices, emergency rooms. This course will introduce a variety of mental health settings and the professionals who are present there. Prerequisite: Graduation from an Interpreter Education Program OR Hold current interpreter certification. Corequisite: None.
- **Medical Decision Making for Medical Interpreters**: Medical interpreting requires interpreters to respond to a wide range of difficult situations in an ethical manner. This course will focus on ethical dilemmas that require interpreters to use decision making processes in a variety of medical settings. Prerequisite: Graduation from an Interpreter Education Program OR Hold current interpreter certification. Corequisite: None.
- **Introduction to Horticulture**: The course is an introductory study of green plants and their growth. The course will explore basic plant anatomy, morphology, physiology, taxonomy, pathology, propagation, soil science and plant nutrition, and ethnobotany. This course includes both lecture and lab. Prerequisite: College level reading skills. Corequisite: None.
- **Biotechnology Essentials**: This course is an introduction to the use and function of living systems with an emphasis on cellular and molecular biology. Fundamental concepts include the chemical basis of life, cell structure and function, cell division, metabolism, classical and molecular genetics, and biotechnology. This course includes a laboratory component incorporating experimental design, microscopic work, and cellular and molecular biology techniques. Along with BIOL1122, this course is part of a two-semester sequence of general biology that can be taken in any order. Prerequisite: Assessment into ENGL1101 or college level writing equivalent. Corequisite: None.
- **Basic Immunology**: This course is an introduction to human immunology and microbial disease. Students will learn the mechanisms of immunity, classification and diversity of life, structure and function of organisms, and the interaction of organisms at all levels of an ecosystem. This course includes a laboratory component incorporating field activity, microscopic work, dissection and plant systems. Along with BIOL1122, this course is part of a two-semester sequence of general biology that can be taken in any order. Prerequisite: Assessment into ENGL1101 or college level writing equivalent. Corequisite: None.
- **Food Science**: This course addresses the use of public policy and food technology to reduce or control risks in our food supply. An overview of microbiological, chemical and environmental risks will be presented, as well as government and industry controls used to ensure food safety. This course includes laboratory-like components. Students will use common laboratory techniques to identify select food-borne pathogens and utilize principles of risk assessment and hazard analysis to perform a disease outbreak investigation. Prerequisite: None. Corequisite: None.
- **Introduction to Freshwater Biology**: This course introduces students to basic principles of freshwater biology. Topics include the origins and features of basins and channels, the aquatic environment, basic water chemistry, aquatic organisms and aquatic ecology. Class includes a lab. Prerequisite: Completion of ENGL0050 and ENGL0040 with a grade of C or higher OR ENGL0095 with a grade of C or higher OR Placement in ENGL1101. Corequisite: None.
- **Essentials of Human Anatomy and Physiology**: This course introduces the student to the structure and function of the human body using an organ system approach. Beginning with the levels of biological organization, the study will proceed through the following organ systems: integumentary, skeletal, muscular, nervous, sensory, endocrine, cardiovascular, lymphatic and immune, respiratory, digestive, urinary, and reproductive systems. This course is open to all students desiring a greater understanding of human anatomy and physiology; however, it is specifically designed for students pursuing health care-related programs such as Pharmacy Technology and Massage Therapy. This course is a health science elective. Prerequisite: Successful completion of or assessment into ENGL1101. Corequisite: None.

minnesota.edu
species interactions and factors that influence and regulate population numbers) and linkages among species and ecosystem functions. Lecture is accompanied by laboratory and field experiences.

**Prerequisite:** Completion of MATH 1020 or placement into MATH 1114 AND BIOL1122 AND BIOL1123

**Corequisite:** None

**BIOL 2202 Principles of Nutrition**

Meets MnTC Goal Area 2 and 3. This course is a study of the fundamental principles of nutrition. This course will cover food composition, diet planning, utilization of food nutrients in the body and the requirements for nutrients in infancy, childhood, teen years, adults and the elderly. Also included are discussions about current trends in nutrition, the relationship of diet and disease, and cultural differences in dietary practices. Using the basic principles of nutrition, students will have a lab-like experience tracking, measuring, calculating and analyzing their diet and presenting the results in a written analytical report.

**Prerequisite:** CHEM1100 OR CHEM1111 OR BIOL2260 OR BIOL2262 OR Instructor permission

**Corequisite:** None

**BIOL 2211 Principles of Chemistry**

Meets MnTC Goal Area 3. This course covers the topics related to chemistry that includes basic fundamental concepts of chemistry, including stoichiometry, nuclear chemistry, thermodynamics, periodicity, acid-base chemistry, and organic chemistry. Laboratory experiences include experimental design, data collection, and analysis.

**Prerequisite:** CHEM1100 OR CHEM1111 OR BIOL2260 OR BIOL2262 OR Instructor permission

**Corequisite:** None

**BIOL 2220 General Microbiology**

Meets MnTC Goal Area 3. This course provides an overview of the structure and function of microorganisms, including archaea, bacteria, viruses, fungi and parasites. Students will examine the molecular diversity, genetics, physiology and ecology of these organisms in relation to microbial evolution, industrial and applied applications, and biosafety. Lecture experiences include aseptic technique, differential staining procedures, cultural and physical characteristics, biochemical testing, microbial control, microbiology of water and soil, and identification of unknown cultures.

**Prerequisite:** BIOL1122

**Corequisite:** None

**BIOL 2221 Human Anatomy and Physiology I Lab**

Meets MnTC Goal Area 3 when taken with BIOL 2261. This course is the laboratory component of a comprehensive introductory overview of human anatomy and physiology that includes basic fundamental concepts of cell biology, tissues and organs including the integumentary, skeletal, muscular and nervous systems. This course is the first of a two-semester sequence in which anatomy and physiology are studied with an emphasis on structure and functions of systems. This course contains a lab-like component.

**Prerequisite:** Assessment into ENGL 1101 or college level writing equivalent.

**Corequisite:** None

**BIOL 2222 Human Anatomy and Physiology II Lab**

Meets MnTC Goal Area 3 when taken with BIOL 2262. This course is the laboratory component of a comprehensive introductory overview of human anatomy and physiology that includes basic fundamental concepts of cells, tissues and organs making up the endocrine, cardiovascular, respiratory, digestive, and reproductive systems. Emphasis is on the structure and function of included systems. This course contains a lab-like component.

**Prerequisite:** Assessment into ENGL 1101 or college level writing equivalent. AND BIOL2260

**Corequisite:** None

**BIOL 2223 Human Anatomy and Physiology II Lab**

Meets MnTC Goal Area 3 when taken with BIOL 2263. This course is the laboratory component of a comprehensive introductory overview of human anatomy and physiology that includes basic fundamental concepts of cells, tissues and organs making up the endocrine, cardiovascular, respiratory, digestive, and reproductive systems. Emphasis is on the structure and function of included systems. This course contains a lab-like component.

**Prerequisite:** Assessment into ENGL 1101 or college level writing equivalent. AND BIOL2260

**Corequisite:** None

**BIOL 2225 Medical Microbiology**

Meets MnTC Goal Area 3. This course is the study of the structure and the classification of bacteria, viruses, parasites and fungi of medical importance. It emphasizes the transmission of disease agents, signs and symptoms, immunology, immunization, control of microbial growth, specimen collection/transport, methods of identification and antimicrobial resistance. This lecture course includes lab-like components.

**Prerequisite:** Assessment into ENGL 1101.

**Corequisite:** None

**BIOL 2268 Medical Microbiology Lab**

Meets MnTC Goal Area 3. This laboratory course includes the fundamental techniques of isolation, staining, biochemical analysis and identification of known and unknown bacterial isolates, and antimicrobial susceptibility testing. Morphological examination and pathogenesis of fungi, protozoans and helminths are also addressed.

**Prerequisite:** Assessment into ENGL1101 or college level writing equivalent.

**Corequisite:** BIOL2267

**BIOL 2270 Internship Experience**

None

This course is designed to provide students with a monitored meaningful work experience related to their field of interest. This experience will increase their employability and enhance their life skills. Completion of this course requires a written report and an evaluation from the student’s supervisor. Each internship is an individually arranged experience, therefore this course is offered with variable credits. The student may choose from 1, 2, or 3 credits as prearranged with the internship site supervisor and corresponding faculty. Each credit will require a minimum of 45 hours of on-the-job learning. This course will be graded pass/fail only.

**Prerequisite:** Instructor approval

**Corequisite:** None

**BLDG 1000 Introduction to the Construction Trades**

This course is designed to give students a hands-on introduction to the construction building trades. Students will construct building systems related to carpentry, plumbing, heating, refrigeration, electrical and construction management.

**Prerequisite:** None

**Corequisite:** None

**BLDG 1110 Principles of Residential and Commercial Construction**

Students work in small groups with industry specialists and education professionals. Students will attend multiple classroom and lab sessions that cover the construction requirements for construction environments, proper use of a variety of hand tools, applications of shop equipment, the residential and commercial building process, and safety requirements. Students will participate in a speed interviewing exercise with industry experts and learn about occupations in the construction trades profession.

**Prerequisite:** Instructor Approval

**Corequisite:** None

**BLDG 1114 Blueprint Reading I**

This course provides the student with a working knowledge of blueprints and specifications. The student gains an understanding of blueprints, then interprets and applies this knowledge to job situations.

**Prerequisite:** None

**Corequisite:** None

**BUS 1120 Spreadsheet and Database Concepts**

This course provides the student with in-depth coverage of a spreadsheet and a database management system as used in a business setting. Students should be familiar with Windows and word processing.

**Prerequisite:** None

**Corequisite:** None

**BUS 1130 Introduction to Inventory Control and Purchasing**

This course provides a basic understanding of inventory management including purchasing, inventory, production and distribution processes. The course will cover cost concepts, inventory planning, ordering methods, receiving acceptable goods, establishing requirements and quantities, and managing inventory levels.

**Prerequisite:** None

**Corequisite:** None

**BUS 1141 Introduction to Business**

This course is designed to give the student an overview of the business and economic factors that sustain our American enterprise system. Topics include are economic systems and the foundations of American business, international business, fundamentals, management, forms of a business enterprise including franchises, human resources management, marketing and consumer behavior, accounting, securities markets and the ethical and social responsibilities of business.

**Prerequisite:** None

**Corequisite:** None

**BUS 1143 Office Procedures**

This is a capstone course in office organization, business ethics and responsibilities of office workers. Emphasis is placed on decision-making ability and the exercise of good human behavior. The course will cover all aspects of the office, from behavior to technologies used. The course will also cover what it means to be a professional in any...

**BUS 2206 Principles of Marketing**

This course examines the business function of marketing and will enhance students' decision-making skills in a global market. The course focuses on how marketers create value by satisfying customer needs and wants by analyzing which target markets the organization can best serve, and the appropriate strategies to serve these markets. This course also will discuss the implications of the environmental factors that can impact the marketing strategies of a business. Topics include business and consumer markets, branding and product strategies, marketing research, pricing, promotion and supply chain management.

**Corequisite:** None

**Prerequisite:** None

**BUS 2220 Global Business**

This course will introduce the student to business operations surrounding global trade and identify interconnection issues. Businesses are increasingly challenged by multinational corporations, international trade policies, cultural and religious differences, environmental movements and human rights groups, which often play a leading role in defining and framing the global agenda. Understanding why nations do business with each other, how communication plays a vital role, what cultural features influence business practices, how competitive dynamics affect organizations and what legal considerations must be followed will prepare students for a rapidly-changing global economy.

**Corequisite:** None

**Prerequisite:** None

**BUS 2275 Money and Banking**

This course is an in-depth study of the role and function of money, the Federal Reserve System and the United States banking system. Specific subjects to be covered will include monetary standards, financial instruments, monetary theory, capital and money markets, rationale for interest rates, fiscal and monetary policy, inflation, sources and uses of credit, and the role of financial institutions.

**Corequisite:** None

**Prerequisite:** None

**CADD 1000 AutoCAD Basics**

This course provides the fundamentals of computer-aided drafting (CAD) using the latest version of the AutoCAD drafting software. The course develops the CAD skills necessary to design and print complex two-dimensional drawings and sheet sets.

**Corequisite:** None

**Prerequisite:** None

**CADD 1100 Solid Modeling with AutoCAD**

This course will cover the solid modeling tools and functions in AutoCAD. Students will learn to create and manipulate primitive solids, extrusions, sweeps and lofts. They will learn to utilize the Boolean functions, solid editing commands and derived viewing tools required to generate complex solid models and create industry-standard drawing layouts based on the designed geometry.

**Corequisite:** None

**Prerequisite:** None

**CADD 1102 Fundamentals of CADD**

This course provides the fundamentals of computer-aided drafting using the latest version of AutoCAD drafting software. The course develops the fundamental CADD skills necessary to produce and print complex drawings and sheet sets.

**Corequisite:** None

**Prerequisite:** None

**CADD 1114 Introduction to Solids and Parametric Modeling**

This course is an introduction to solid modeling and model derived drawing layouts using the latest versions of the AutoCAD, Inventor and Solidworks drafting software.

**Corequisite:** None

**Prerequisite:** CADD1102 AND MCD1102

**CADD 1200 Introduction to SolidWorks**

This course will introduce students to the part modeling and drawing layout tools in SolidWorks software. Students will learn the concepts of parametric sketching and modeling, feature creation and editing, and model derived bidirectionally associative drawing layouts.

**Corequisite:** None

**Prerequisite:** None

**CADD 1210 Introduction to Autodesk Inventor**

This course will introduce students to the part modeling and drawing layout tools in Autodesk Inventor software. Students will learn the concepts of parametric sketching and modeling, feature creation and editing, and model derived bidirectionally associative drawing layouts.

**Corequisite:** None

**Prerequisite:** None

**CADD 2214 Advanced Solids and Parametric Modeling**

This course covers advanced part modeling, assembly modeling, sheet metal and presentation files in the latest versions of the Inventor and Solidworks drafting software.

**Corequisite:** None

**Prerequisite:** CADD1114

**CARP 1108 Interior Finish I**

This course focuses on materials used for interior finishing, plus hands-on experience in the application of these materials.

**Corequisite:** None

**Prerequisite:** CARP1104

This course provides an overview of childhood development from conception through age 6, with emphasis in the following areas: physical, cognitive, language, creative, and social-emotional. It integrates theory with developmentally appropriate practice in home, center-based, and school settings. In addition, this course gives the student an introduction to positive child rearing techniques for infant and toddler groups. This course will help students to understand behavior problems and identify strategies to prevent and resolve problem behaviors.

Corequisite: None

Prerequisite: None

CHEM 0095 Essential Chemistry Skills              | 1  | 1/0/0      |

This course covers basic chemistry concepts and elementary mathematical and problem-solving skills necessary for success. It is strongly encouraged for students who are apprehensive about taking chemistry and are enrolled in CHEM1100 or CHEM1111. Concurrent enrollment with CHEM1100 or CHEM1111 is recommended.

Corequisite: None

Prerequisite: None

CHEM 1100 Fundamental Concepts of Chemistry       | 3  | 2/1/0      |

Meets MnTC Goal Areas 2 and 3. This course deals with substances, their structures and properties, the changes they undergo and the laws that govern those changes. Intended for prospective elementary teachers, non-science majors and those who need background for General Chemistry. This course includes a lab.

Prerequisite: None

Corequisite: None

CHEM 1101 Principles of General Chemistry         | 4  | 3/1/0      |

Meets MnTC Goal Areas 2 and 3. This course will provide the student with a basic understanding of the general principles of inorganic and organic chemistry. Other topics included in the course are instrumentation, calculations, preparations of reagents, quality assurance and quality control, specimen collection, transportation, analysis and result reporting.

Prerequisite: CHEM1100 OR CHEM1111

Corequisite: None

CHEM 1105 Medical Chemistry                       | 3  | 2/1/0      |

This an introductory course for Medical Laboratory Technician students covering the analytical principles, techniques and correlation of results in the science of body chemistry. Other topics included in the course are instrumentation, calculations, preparations of reagents, quality assurance and quality control, specimen collection, transportation, analysis and result reporting.

Prerequisite: CHEM1100 OR CHEM1111

Corequisite: None

CHEM 1111 General Inorganic Chemistry I           | 5  | 4/1/0      |

Meets MnTC Goal Areas 2 and 3. This course is the first of a two-course series (CHEM1111 and CHEM1112). Students will learn the general chemistry principles: atomic structure, stoichiometry, solutions, bonding, thermochromy, synthetic organic structure, periodic properties of the elements, intermolecular forces and properties of solids, liquids and gases. The course includes a lab.

Prerequisite: CHEM1100 OR CHEM1111

Corequisite: None

CHEM 1112 General Inorganic Chemistry II          | 5  | 4/1/0      |

Meets MnTC Goal Areas 2 and 3. This is the course the second course of a two-course series (CHEM1111 and CHEM1112). Students will learn the general chemistry principles: solution chemistry, kinetics, chemical equilibrium, acid-base chemistry, solubility equilibrium, thermodynamics, oxidation-reduction, electrochemistry, coordination chemistry, nuclear chemistry and introductory environmental chemistry. The course includes a lab.

Prerequisite: CHEM1111

Corequisite: None

CHEM 1115 Introduction to Organic and Biochemistry| 4  | 3/1/0      |

Meets MnTC Goal Areas 2 and 3. This course consists of both lab and lecture sessions. Students will learn the fundamental concepts in organic and biochemistry: properties, classification and nomenclature of hydrocarbons and compounds containing various functional groups; basic organic reaction mechanisms; and structure and metabolism of carbohydrates, lipids, proteins and nucleic acids.

Prerequisite: CHEM1100

Corequisite: None

CHEM 2224 Organic Chemistry I                      | 5  | 4/1/0      |

Meets MnTC Goal Areas 2 and 3. This course is the first course of a two-course series (CHEM2224 and CHEM2225). Students will learn organic chemistry principles including introduction to the classification, structure, reactions and reaction mechanisms of carbon compounds. The following topics will be included: structures and properties of organic compounds, methane and the alkane, stereo chemistry, substitution and elimination reactions, electrophilic and free radical addition, alkenes, alkenes, and various functional groups, conjugation and resonance, benzene and the aromatics.
aromatic-aliphatic compounds, alcohols and ethers. The course includes a lab which will include techniques for the purification, synthesis and characterization of organic compounds and the study of organic reactions. Green chemistry techniques will be practiced whenever possible.

Prerequisite: CHEM1112
Corequisite: None

CHEM 2225 Organic Chemistry II

Meets MnTC Goal Areas 2 and 3. This course is the second course of a two-course series (CHEM222 and CHEM2225). Students will learn the reactions and characteristics of various organic chemistry groups. The following topics will be included: aldehydes and ketones, carboxylic acids, amines, amides, phenols, carbamions, esters, aromatics, heterocyclic compounds, macromolecules and the possible addition of selected topics such as carbohydrates, fats, amino acids and proteins. The course includes a lab which will include purification, synthesis, and characterization of organic compounds and the study of organic reactions. Green chemistry techniques will be practiced whenever possible.

Prerequisite: CHEM2224
Corequisite: None

CHEM 2970 Internship Experience

None This course is designed to provide students with a meaningful work experience related to their field of interest. This experience will increase their employability and enhance their life skills. Completion of this course requires a written report and an evaluation from the student’s supervisor. Each internship is an individual experience, therefore this course is offered with variable credits. The student may choose from 1, 2 or 3 credits as prearranged with the internship site supervisor and corresponding faculty. Each credit will require a minimum of 45 hours of on-the-job learning. This course will be graded pass/fail only.

Prerequisite: Instructor approval
Corequisite: None

CIVL 1000 Introduction to Civil Engineering Technology

This course provides an overview of the fields of civil engineering technology. It includes a historical background, present practices and future challenges of the civil engineering profession. Topics discussed include ethics, professional responsibility, written and oral communications, concepts of analysis, design, interpretation of results and decision making.

Prerequisite: None
Corequisite: None

CIVL 1100 Survey I: Fundamentals of Surveying

The student will learn the principles of vertical distance measurement, as well as construction staking and the compiling of field notes typical of the civil engineering field. This course will focus on the use of various surveying equipment and procedures including an introduction to global positioning system (GPS) concepts and methods.

Prerequisite: None
Corequisite: None

CIVL 1102 Survey II: Fundamentals

The student will learn the principles of vertical distance measurement, as well as construction staking and the compiling of field notes typical of the civil engineering field. This course will focus on the use of various surveying equipment and procedures.

Prerequisite: None
Corequisite: None

CIVL 1119 Survey II: Land Surveys

Students will learn civil engineering technology land surveying principles including topographic surveys, utilities, drainage and roadway alignment. This course emphasizes the use of Total Station and Global Positioning Systems (GPS) for collecting data as well as civil engineering software for processing data. Additionally, students will utilize GPS functionality on the Trimble TSC3 data collector and Trimble Business Center software.

Prerequisite: CIVL1100
Corequisite: None

CIVL 1138 CADD II: Plan Layout

This course introduces students to industry-specific civil design software. Students will learn concepts relating to civil engineering drawings including topography, site planning, mapping and downloading survey data to create digital terrain models.

Prerequisite: CADD1102
Corequisite: None

CIVL 2209 Construction Inspection

This course involves the study and performance of procedures necessary in the inspection and documentation of general construction of public works projects. Topics include inspector responsibilities, project management, aggregate base, concrete and bituminous inspection.

Prerequisite: CIVL1102 OR CIVL1102
Corequisite: None

CIVL 2210 Road Design

The student will complete drawings and computations typical of those used in the design of roadways. These may include control line, location maps, topographic drawings, cross sections, plan and profile earthwork computations.

Prerequisite: CIVL1119 AND CIVL1138
Corequisite: None

CIVL 2230 Civil Engineering Technology Internship

The civil engineering technology internship provides the student with an opportunity to apply skills and knowledge acquired in prior courses in the occupational setting. Students will develop a plan for the internship with the cooperation of the employer and the instructor.

Prerequisite: CIVL1138
Corequisite: None

CIVL 2232 Survey III: Legal Surveys

The student will apply history, principles, rules and laws pertaining to land surveying. The student will research land survey records, identify property boundaries, reconstruct land surveys and draft legal descriptions. Students will also participate in boundary survey projects.

Prerequisite: CIVL1119
Corequisite: None

CIVL 2234 Utility Design

The student will learn principles of sanitary, storm and water system layouts, design and construction. Design criteria and standards, plan and profile principles, cost estimating, construction staking and inspection of the different systems will be emphasized.

Prerequisite: CIVL1119 AND CIVL1138
Corequisite: None

CIVL 2238 CADD III: Project Design

This course will focus on the application of civil design computer-aided drafting software for the completion of a project, where students apply principles of civil engineering drawing.

Prerequisite: CIVL1138
Corequisite: None

CIVL 2240 Introduction to Geographic Information Systems

This course is an introduction to different types of geographic information systems (GIS) and their capabilities, with the main focus on ESRI ArcMap software. Topics will include GIS data collection and input, GIS data types and basic mapping concepts.

Prerequisite: None
Corequisite: None

CIVL 2242 Survey III: Global Positioning System

This course covers the instruction and application of Global Positioning System (GPS) technology and GPS equipment for surveying. Students will learn surveying principles, equipment and software used in GPS to meet current-day technological practices.

Prerequisite: CIVL1119
Corequisite: None

CIVL 2244 Survey IV: Equipment Software

This course covers the application of TDS Survey Pro software as it applies to the TDS Ranger and Recco total stations data collectors. Students will learn these various software routines to make them more efficient with their day-to-day surveying.

Prerequisite: CIVL1102
Corequisite: None

CIVL 2246 Introduction to Hydrology

This course will include introduction to hydraulic principles, hydrology, pipe and open channel flow, watershed analysis and storm water regulations.

Prerequisite: CIVL2234 AND CIVL2240
Corequisite: None

COMM 1100 Communication and Effective Human Relations

Meets MnTC Goal Areas 1 and 2. This course is designed to provide individuals with basic communication principles for positive relationships in career settings. This is accomplished through oral, written and intra/interpersonal communication skills which are valued for life and work experiences. Changes in the life/work environment are characterized by greater cultural diversity, the performance of more work by more people and the need for greater ability to cope effectively with life/work issues and problems that require extensive knowledge of human relationships.

Prerequisite: ENGL0096 OR ENGL0040 AND ENGL0050 OR By Assessment
Corequisite: None

COMM 1120 Introduction to Public Speaking

Meets MnTC Goal Area 1. This course clarifies the process of oral communication and clarifies the basic principles of public speaking and allows the student to increase the application of these principles while both speaking and listening.

Prerequisite: Assessment into ENGL 1101
Corequisite: None

COMM 1130 Small Group Communication

Meets MnTC Goal Areas 1 and 2. This course focuses on communication issues in small groups and the importance of small group work in business today. An emphasis will be placed on improving communication skills for successful teamwork, group cohesion and the responsibility to group goals and tasks. Students will be provided with opportunities to build their group communication skills through practice.

Prerequisite: Assessment into ENGL 1101
Corequisite: None
Course #

Course Title

CR Lec/Lab/OJT

COMM 1140

Interpersonal Communication

3 3/0/0

Meets MnTC Goal Area 1. This course will focus on improving students' abilities to communicate effectively in one-to-one dyadic encounters by providing experience-based instruction. Extensive in-class and out-of-class analyses allow the student to examine his/her own and others' informal social interactions. The long-term goal is for the student to apply interpersonal communication theories to daily life and draw his/her own conclusions about the effectiveness of interpersonal communication.

Prerequisite: None

Corequisite: None

COMM 2220

Oral Interpretation

3 3/0/0

Meets MnTC Goal Area 6. This course is intended to introduce students to the principles and techniques of selecting and analyzing appropriate literary selections and the interpretation of literature through vocal and nonverbal delivery.

Prerequisite: SPCH1114

Corequisite: None

COMM 2230

Intercultural Communication

3 3/0/0

Meets MnTC Goal Area 2. This course explores the nature of communication within and between cultures and co-cultures. This class will challenge students to think about their own cultural assumptions and explore ways in which these assumptions differ from those held by people in other cultures. Students will review theories of communication and culture and will examine how culture is evident in languages, behaviors, rituals, norms and worldviews. Students will observe and describe their own cultural background and learn to respectfully communicate with members of other cultures.

Prerequisite: None

Corequisite: None

COMM 2240

Family Communication

3 3/0/0

Meets MnTC Goal Area 2. This course provides an introduction to communication functions in various families. The course will include theoretical and practical applications of family communication in our everyday lives, with an emphasis on how effective communication may enhance family relationships and how destructive communication may harm family relationships.

Prerequisite: None

Corequisite: None

COMM 2250

Gender Communication

3 3/0/0

Meets MnTC Goal Area 7. This course examines communication as it relates to our gendered lives. The course explores how societal views on gender are formed, maintained and transformed through various communication patterns and practices. Practical and theoretical knowledge of gendered communication and its influences on personal and professional relationships will be incorporated and analyzed.

Prerequisite: None

Corequisite: None

COMM 2260

Computer-Mediated Communication

3 3/0/0

Meets MnTC Goal Area 1. This course is designed to analyze the relational and social dynamics of computer-based communication in a global society. Using a variety of contemporary technologies, students will identify strategies to communicate messages to diverse audiences for multiple purposes, thus learning to use mediated communication more effectively.

Prerequisite: None

Corequisite: None

CONM 1101

Construction Documents and Codes

3 2/1/0

This course provides an introduction to understanding construction drawings, specifications, processes and building codes.

Prerequisite: None

Corequisite: None

CONM 1102

Site/Building Layout

2 1/1/0

This course provides the student with the basic knowledge and hands-on skills necessary to lay out a building site and establish elevations for construction.

Prerequisite: None

Corequisite: None

CONM 1104

Construction Management Principles

2 2/0/2

This course provides an overview of the construction management industry and introduces the students to the duties and responsibilities of the construction professional. The emphasis of this course will be on the importance of the industry, the industry's impact and responsibilities to society, and career opportunities for successful students.

Prerequisite: None

Corequisite: None

CONM 1108

Principles of Estimating

4 2/2/0

This course focuses on the basics of material, labor and equipment estimating. Students will learn to calculate the quantities of material comprising a project. These quantities will determine the primary portion of the direct costs used in a construction bid. This process will be the first step in completing accurate bids for construction projects of all sizes.

Prerequisite: None

Corequisite: None

CONM 1124

Building Systems

3 3/0/0

This course is a comprehensive treatment of the various techniques, systems and methodologies utilized in the construction industry and will help the student prepare for the responsibilities of supervision on a modern construction project.

Prerequisite: None

Corequisite: None

CONM 2204

Materials Testing

3 1/2/0

This course covers inspection techniques, methods of material measurement, documentation, material sampling and testing methods for soils and concrete.

Prerequisite: None

Corequisite: None

CONM 2206

Building Codes

2 2/0/0

This course is designed to introduce the Uniform Building Code to students in the construction field, where a basic knowledge of the code's requirements is needed. Emphasis will be placed on the development and proper use of the code.

Prerequisite: None

Corequisite: None

CONM 2208

Construction Bidding

2 1/1/0

This course will explore standard construction contract documents and project estimating procedures and their use in building a competitive bid.

Prerequisite: None

Corequisite: None

CONM 2210

Construction Scheduling

3 2/1/0

Planning and scheduling are important management tools. In this course students will learn construction scheduling techniques commonly used in the construction industry to bring projects to timely and economically successful completion.

Prerequisite: None

Corequisite: None

CONM 2212

Site Management

3 3/0/0

This course covers construction site management from the standpoint of best utilization of site, facilities and services in a safe and efficient manner to complete construction projects.

Prerequisite: None

Corequisite: None

CONM 2213

Safety Management

2 2/0/0

This course includes construction management applications in the areas of safety and health. Students will have an opportunity to earn OSHA 30-hour authorization for successful course completion.

Prerequisite: None

Corequisite: None

CONM 2217

Computer Estimating and Bidding

3 2/1/0

This course is designed to utilize computer estimating software such as spreadsheets, databases and industry-leading software to produce competitive, timely and complete construction bids.

Prerequisite: None

Corequisite: None

CONM 2222

Construction Management Internship

2 0/0/2

This course will provide construction management students with an opportunity to apply and extend their knowledge, practice their skills, integrate behaviors and explore areas of employment within the construction industry. Students will perform activities consistent with program outcomes in an industry setting with the supervision of the site employer.

Prerequisite: None

Corequisite: None

COSM 1000

Principles and Practices

3 3/0/0

This course is intended for manicurists, estheticians and some transfer students. In a condensed form, this course will include the topics of chemistry, electricity, salon business, professional image, anatomy and infection control.

Prerequisite: None

Corequisite: None

COSM 1001

Introduction to Cosmetology

3 0/3/0

In this course students will learn some of the basic techniques pertaining to hair, skin and nails and set a portion of the required hours toward the State Board of Cosmetology. The course content will provide a brief overview of all the cosmetology topics that are required by the State Board of Cosmetology for licensure. Upon completion of this course, students attending one year will earn 90 hours toward their cosmetology license. Students who elect to take the course a second time will earn 180 hours toward their cosmetology license.

Prerequisite: None

Corequisite: None

COSM 1117

Shampooing and Rinsing

1 1/0/0

This course covers shampooing and draining. Students will learn the importance of selecting the correct shampoo for various hair types.

Prerequisite: None

Corequisite: None

COSM 1119

Haircutting

1 1/0/0

This course will help students develop a strong foundation in haircutting. Students will learn basic sectioning and cutting techniques, along with correct use of scissors, razors and clippers to achieve a strong foundation in haircutting.

Prerequisite: None

Corequisite: None

COSM 1129

Hair Styling

1 1/0/0

This course will instruct students in conducting services in a safe environment. Students

will learn the styling and finishing techniques to complete a hairstyle to the satisfaction of the client. Prerequisite: None Corequisite: None

Corequisite: None

In this course students will learn the basic structure of the skin and its function. Students will learn how to conduct services in a safe environment and how to take measures to prevent spreading infectious and contagious diseases. Corequisite: None

In this course students will learn the uses of various skin care products and how to apply them to different skin types. Students will learn basic make-up application, including artificial lashes, and basic massage movements to assist in providing basic skin care services. Prerequisite: None Corequisite: None

In this course this course students will learn the structure of the nail, how to recognize various disorders and which disorders can be serviced in the salon. Prerequisite: None Corequisite: None

In this course this course students will learn how to conduct a color service in accordance with a client’s needs and the importance of using a variety of salon products and techniques to achieve the appropriate color outcome. Prerequisite: None Corequisite: None

In this course students will learn the two types of electricity, how they are measured and how to incorporate design into creating a pleasing hairstyle for each client’s facial features. Prerequisite: None Corequisite: None

In this course students will learn about the importance of physical presentation, beauty and wellness, and ergonomics in the salon. Prerequisite: None Corequisite: None

This course covers the operation of personal computer operating system and word processing, spreadsheet, presentation, email, scheduling, Internet and database management. This course provides a general overview of the frequently used functions of a personal computer. Computer hardware, operating systems, electronic mail, Internet and a brief introduction to an office software package will be covered. Prerequisite: None Corequisite: None

This course will allow students to become familiar with the various types of non-surgical hair additions. Students will learn about the care and styling of wigs and basic braiding procedures to create hairstyles that are pleasing to clients. Prerequisite: None Corequisite: None

Students will learn about hair relaxation and wave formation techniques in accordance with manufacturers’ directions. Other topics in the course include consultation with clients to determine their needs and preferences and the importance of conducting chemical services in a safe environment. Prerequisite: None Corequisite: None

In this course students will learn basic manicuring and pedicuring procedures. Students will understand the importance of providing services in a safe environment. Prerequisite: None Corequisite: None

In this course students will learn basic anatomy of the head, face and neck so they can perform the services for which they are trained and qualified. Prerequisite: None Corequisite: None

In this course students will learn the basic structure of the skin and its function. Students will learn how to conduct services in a safe environment and how to take measures to prevent spreading infectious and contagious diseases. Corequisite: None

This course prepares students for the North Dakota Laws and Rules portion of their state license examination. Prerequisite: Graduate from a Minnesota cosmetology program or hold a valid Mn license.

In this course students will learn how to remove hair using the Alexandria Professional Image. Students will learn how to conduct a client consultation to determine client needs and preferences. Students will learn about a variety of salon products that will enable them to provide nail services to clients. Prerequisite: None Corequisite: None

In this course students will learn how to manage their time to provide efficient client services. Students will learn the necessary steps to retain clients and how to market salon products and maintain business records. Prerequisite: None Corequisite: None

In this course students will learn about the importance of physical presentation, beauty and wellness, and ergonomics in the salon. Prerequisite: None Corequisite: None

In this course students will perform various forms of nail art techniques and designs on natural and artificial nails. This course will include client consultation, safety and sanitation. Prerequisite: None Corequisite: None

In this course students will learn how to remove hair using the Alexandria Professional Body Sugaring advanced system. The course includes theory and thorough knowledge of the correct techniques employed in the practice of body sugaring. Prerequisite: None Corequisite: None

This course covers the operation of Macintosh computer hardware and software, the Macintosh operating system and an introduction to Microsoft Office Suite software. Prerequisite: None Corequisite: None

This course covers the operation of personal computer hardware and software. It provides an overview of a personal computer operating system and word processing, spreadsheet, presentation, email, scheduling, Internet and database management software. Prerequisite: None Corequisite: None

This course covers database concepts, design and construction using the latest database software. Topics include database normalization and table relationships, database objects, file creation, file manipulation, macros, form development and report generation. Database programming concepts will also be introduced. Prerequisite: None Corequisite: None

<tr>
<td></td>
<td>This is an introduction to RPG programming and AS400 system operations. The student will learn the basics of operating the AS400 and begin writing RPG programs. These programs will include building physical files, writing RPG code, compiling, error finding and producing reports. There will be a strong emphasis on developing logic to program more intermediate RPG programs. A high concentration will be on the structure of the student's calculation specifications. Students will learn how to add, delete and update data to physical files through their RPG programs. Students also will be developing screen programs where users can enter data.</td>

This course covers the basics of SQL (Structured Query Language) programming. SQL is a popular computer language that is used by small and large business organizations and computer programmers. The primary purpose of SQL is in working with databases and relational database management systems to store, retrieve, edit, manipulate and format data for end users and decision makers.

Corequisite: CPTR1106

Prerequisite: CPTR2224

The primary focus of this course is Linux networking, security, ethics and privacy.

Corequisite: None

This course deals with the understanding of basic network security. Students learn how to manage systems to guard against various security threats.

Corequisite: None

This course covers the integration of data from multiple databases with strategies for development of integrated database applications. In working with these databases the student will store, organize and analyze data. Students will be responsible for setting up new databases and maintaining existing databases.

Corequisite: None

Students in this course will identify core database concepts and create database models. Installation, configuration and maintenance of a database management system (DBMS) will be covered. Students will analyze and administer a database's performance optimization. Additional topics will include user administration within the database, backup and restoration, and database normalization.

Corequisite: None

In this course the student utilizes the Java programming language to create both Internet applications and applications. Student training will be placed on the individual student's skills. This experiential learning allows the student to gain insights into one or more careers through job shadowing, service learning, volunteering, externships, work experience or a combination of these options. This class will provide career exploration information as well as work experience to help students identify their career goals and personal interests.

Corequisite: Instructor Approval

Students utilizing in previous courses to design and implement solutions to a business need. Activities include learning about current business practices and preparation for employment.

Corequisite: None

This course teaches the management of systems using Internet Protocol Version 6. The emphasis is protocol management on networking devices.

Corequisite: CPTR1108

This course teaches functions of a network operating system so the student can effectively manage and monitor a network. The student learns how to establish and oversee the operations of a network, create logins, design and establish directory structures and implement security.

Corequisite: CPTR1148 OR CPTR1138 OR CPTR1125 OR CPTR2224

Corequisite: None

This course is an Introduction to data analytics. The student will explore historical roots and reasons for business intelligence. The student will be introduced to big data, data mining and data warehousing and how they help businesses. Database scalability and optimization also will be covered.

Corequisite: None

This course provides students with the skill sets to design, install, troubleshoot, secure and perform daily administration for a directory services integrated email system. Students learn how to use cryptographic authentication techniques along with learning how to analyze email server system performance and support email client packages.

Corequisite: None

This course deals with the understanding of basic network security. Students learn how to manage systems to guard against various security threats.

Corequisite: None

This course takes on more advanced but common operations such as joins and views and appropriate use of these features, proper indexing of data, joins and views and appropriate use of these features, proper indexing of data.

Corequisite: None

This course will introduce information technologies used in an enterprise network environment. Possible technologies the course will cover are SANs, virtualization, clustering, enterprise wireless, VPN connectivity, structured cabling and network management. The course will discuss how these technologies provide 24/7 availability and introduce the concept of green technologies.

Corequisite: None

This course provides students with the opportunity to apply knowledge and skill sets learned in concurrent coursework. Students will perform activities in an employer-supervised industry setting that is consistent with program outcomes. Students also will utilize interpersonal communication skills within the context of applying knowledge and skill sets.

Corequisite: Instructor Approval

Corequisite: None

This course is devoted primarily to Minnesota Police Officer Standards and Training objectives.

Corequisite: CPTR2272

This course will introduce topics related to computer security. The focus will be on the design and implementation of computer security policies and systems. Students will learn how to use cryptographic authentication techniques along with learning how to analyze email server system performance and support email client packages.

Corequisite: None

The goal of this course is to introduce students to a computer topic chosen from a wide range of classic and state-of-the-art research techniques, systems and technologies in the field of computer programming or networking. Topics will vary each semester.

Corequisite: None

This course covers the study of juvenile delinquency, the theories of causation and the methods of corrections. It also examines the juvenile court and correctional systems. Minnesota juvenile law will be explored as it relates to the Minnesota Police Officer Standards and Training Board objectives.

Corequisite: None

This course includes an introduction into the development of American policing and an understanding of the modern roles and functions of police in a democratic society. These roles and functions include responsibilities in peacekeeping, law enforcement, community policing and customer service. Minnesota Police Officer Standards and Training Board learning objectives are also covered.

Corequisite: None

This course covers the study of juvenile delinquency, the theories of causation and the methods of corrections. It also examines the juvenile court and correctional systems. Minnesota juvenile law will be explored as it relates to the Minnesota Police Officer Standards and Training Board objectives.

Corequisite: None

This course examines the historical and contemporary correctional theories and programs with emphasis on the current organizational structure. Probation, parole and correctional alternatives are also explored.

Corequisite: None

This course will deal with use of force issues relating to correctional officers, defensive tactics and control techniques, proper restraint techniques and less-than-lethal weapons training. Lecture and practical applications are included in the course. Minnesota Police Officer Standards and Training Board learning objectives relating to physical control and less-than-lethal weapons are also covered.

Corequisite: None

This course is devoted primarily to Minnesota Police Officer Standards and Training objectives including but not limited to the following areas: cultural awareness, stress management, domestic abuse, crisis intervention, communication, bias-motivated

</table>

This course introduces students to the various methodologies for defending the information technology network infrastructure. Students will be introduced to the concepts, principles, type and topologies of firewalls to include packet filtering, proxy firewalls, application gateways, circuit gateways and stateful inspection.

This course emphasizes advanced technical support topics such as project management, personnel development, software evaluation and selection, technical writing and end-user training. Students will apply their technical knowledge and experience to actual case studies.

This is a hands-on course in a computer industry setting. The student will apply skills, knowledge and behaviors acquired in prior courses to the computer business situation. The student will provide phone and/or direct support to computer customers and gain a working knowledge of the technical analyst position.

This course covers terminology, equipment, basic food products and cooking techniques and kitchen safety.

This course introduces the student to the basic knowledge and techniques for making soups, stocks and sauces used in a commercial food operation.

This course covers the hands-on application and practice of the basic skills required to prepare a variety of salads, cold sauces, cold sandwiches, breads and rolls, and dessert and pastry items commonly used in food service operations.

This course covers the basics of safe food handling, hazards that threaten food safety and sanitation. This course introduces the student to line cooking by preparing a variety of hot and cold dishes in a fast-paced kitchen environment. The course covers the fundamentals of pantry production and covers the fundamentals of food fabrication and production.

This course introduces the student to the basic concepts and common practices associated with preparing quantity foods in the professional kitchen. The course will cover the fundamental culinary theories when preparing stocks, soups, vegetables, stews and sauces, as well as proper cutting and cooking of various meats, poultry, fish and seafood.

This course covers the hands-on application of the skills required to prepare a variety of salads, cold sauces, cold sandwiches, breads and rolls, and dessert and pastry items commonly used in food service operations.

This course covers the basic principles of cooking and food science, industry terminology, mise en place and food product identification.

This course covers the hands-on application of the skills required in various stations worked by a line cook in the preparation of menu items typical of a commercial food service operation.

This course covers the fundamentals of kitchen math, formulas and spreadsheets used by commercial food operations.

This course covers food safe basics through handling procedures, food storage, cleaning, sanitizing, purchasing and receiving. This course follows the Food and Drug Administration (FDA) Model Food Code, and students will test for the National Restaurant Association (NRA) ServSafe Certification exam at the conclusion of the class.

This course covers the function of nutrients, examine menus and recipes to optimize nutritional content and ingredients used in the bakeshop area of a commercial kitchen.

This course covers the identification of meat cuts from beef, pork, lamb and veal and proper cooking and usage for fabricated cuts. It includes USDA inspection, quality and yield standards of meats as used in the food service industry.

This course provides the opportunity for hands-on application of the skills required in the baking and pastry area in food service. The course provides the student with practical hands-on applications and skills commonly found in the baking and pastry area of a commercial kitchen.

This course covers the fundamentals of pantry production and covers the fundamentals of food fabrication and production.
CULN 2214 Culinary Foundations Lab II 6 0/6/0
This course covers hands-on application and continued practice of cooking concepts and techniques. Students are required to prepare a variety of soups, meats and poultry, starches, vegetables and sauces served in the cafe. This course also covers hands-on application of raw and cooked meat, poultry and fish cutting and processing for items prepared in the cafe.
Prerequisite: None
Corequisite: None

CULN 2222 Supervision Lab 6 2/4/0
This course requires application of the practical skills and principles needed to manage and oversee production in a commercial food operation. It includes application of learned skills in the areas of production, supervising, menu writing, purchasing, storeroom operation and merchandising.
Prerequisite: CULN1102 AND CULN1120 AND CULN1104
Corequisite: None

CULN 2228 Food Cost Control 3 3/0/0
This course covers the cost structure of food service operations and provides methods and applications to monitor and control food and labor costs.
Prerequisite: None
Corequisite: None

CULN 2236 Ethnic Foods 2 1/1/0
This course covers the history, origin and preparation methods of food products of various countries and ethnic groups.
Prerequisite: CULN1102 AND CULN1122
Corequisite: None

CULN 2238 Advanced Baking, Pastry and Confections 2 0/2/0
This class provides students with a broad understanding of skills and techniques of baking, pastry and confections used in the industry today. The student will be introduced to cake and pastry formulations, cake decoration, sugar and chocolate confections.
Prerequisite: CULN1102 AND CULN1122 AND CULN1106
Corequisite: None

CULN 2240 Internship 2 0/0/2
This course provides the student with an internship experience to apply what has been learned in the classroom and practiced in the lab. The internship will take place in a commercial food service establishment under the supervision of the employer/designee.
Prerequisite: CULN1102 AND instructor permission needed
Corequisite: None

CUST 1010 Wood Properties: Strength and Quality 3 3/0/0
This course introduces students to the properties of wood as a manufacturing material. The course will focus on the physical, mechanical and chemical aspects of wood and wood products in the manufacturing environment. Participants will learn quality specifications and requirements which are standard for the needs of today's wood-based products.
Prerequisite: None
Corequisite: None

CUST 1060 Occupational Safety and Risk Management 2 2/0/0
This course is an introduction to occupational safety and health in business and industry. It includes studying the Occupational Safety and Health Act, accident prevention techniques, job safety and health design including ergonomics, job and system safety, empowering employees, and training employees for safe practices. Participants will discuss best practices to gain management and employee commitment to the development of a safety culture.
Prerequisite: None
Corequisite: None

CVRI 1100 Cardiovascular Technology Survey 2 1/1/0
This course introduces the student to the history and emerging role of cardiovascular technologist. Students will learn medical terminology and have opportunities to observe the role of the cardiovascular technologist in various settings. Students in this course will incur the cost of and be required to receive clear national and Minnesota Department of Health background checks and be listed in the North Dakota Board of Nursing Unlicensed Assistive Personnel Directory.
Prerequisite: None
Corequisite: North Dakota Board of Nursing Unlicensed Assistive Personnel Registration AND clear Minnesota Department of Health background check AND clear national background check

CVRI 1105 Introduction to Cardiovascular Technology 2 2/0/0
In this introductory course, students will explore ethical and legal issues related to patient safety, documentation, informed consent, patient identification and confidentiality. Students will use appropriate medical terminology, abbreviations and symbols. Students will practice professional communication strategies with other health professionals and explore team dynamics.
Prerequisite: Clear Minnesota Department of Health background check AND clear national background check AND current American Heart Association Health Care Provider CPR AND North Dakota Board of Nursing Unlicensed Assistive Personnel Registration AND successful completion (C or better) of general education prerequisite courses AND BIOL1260 AND BIOL1261 AND MATH1114 AND BIOL2267 AND BIOL2268 AND COMM1130 AND acceptance into the Cardiovascular Technology Program AND CVRI1100
Corequisite: BIOL2262 AND BIOL2263

CVRI 1110 Cardiovascular Anatomy and Physiology 3 3/0/0
This course provides the cardiovascular technology student an in-depth review of normal anatomy and physiology of the heart, cardiovascular, peripheral vascular and neurovascular systems, and renal regulation of blood pressure. The pathophysiology of these systems is examined in order to understand and apply treatment modalities in the cardiovascular catheterization laboratory.
Prerequisite: None
Corequisite: CVRI1100 AND BIOL2262 AND BIOL2263

CVRI 1120 Principles of Patient Care 4 2/2/0
This course introduces the cardiovascular technology student to basic patient care principles. Students will learn basic intracardiac catheterization care including patient assessment, interpretation of laboratory values and diagnostic tests.
Prerequisite: None
Corequisite: CVRI1100 AND CVRI1110

CVRI 1123 Cardiovascular Technology I 3 2/1/0
This course prepares students to participate in cardiovascular diagnostic and interventional procedures with adult patients. Students will differentiate cardiovascular complications and emergencies, prepare and position patients for various procedures, and set up and maintain sterile fields. Students will learn concepts related to hemodynamics including cardiac output, performance of hemodynamic calculations and recognition of blood flow determinants.
Prerequisite: BIOL2260 AND BIOL2261 AND BIOL2267 AND BIOL2268 AND CVRI1100
Corequisite: CVRI1105 AND CVRI1110 AND CVRI1120

CVRI 1136 Cardiovascular Technology Clinical 2 0/0/2
In this course, students will participate as part of the cardiovascular, neurovascular, peripheral vascular and electrophysiology teams during diagnostic and interventional procedures.
Prerequisite: None
Corequisite: CVRI1105 AND CVRI1110 AND CVRI1120 AND CVRI1130

CVRI 1230 Cardiovascular Technology II 5 3/2/0
This course builds on the knowledge and skills gained in Cardiovascular Technology I. Students will learn diagnostic and interventional procedures related to peripheral vascular, neurovascular, congenital and pediatric conditions, and complications and emergencies.
Prerequisite: CVRI1130 AND CVRI1120
Corequisite: None

CVRI 2141 Pharmacology for Cardiovascular Technology 2 2/0/0
This course develops the student's awareness of basic pharmacological concepts, drug classifications, indications and contraindications, therapeutic effects, side effects, and other considerations related to use of medications. Students will learn dosage calculations.
Prerequisite: None
Corequisite: CVRI2140 AND CVRI2130

CVRI 2250 Radiation Safety 2 1/1/0
Students in this course will demonstrate safety related to the use of radiation during catheterization procedures. Students will learn x-ray tube components, x-ray protection characteristics and physics. Students will learn to position patients, perform venous access and learn to manage complications. Students will demonstrate initiation and maintenance of fluids and secondary administration techniques, and perform intravenous dosage calculations.
Prerequisite: None
Corequisite: None

CVRI 2251 Intravenous Therapy 1 0/1/0
This course provides students with the knowledge and skills used to initiate and maintain an intravenous site. Students will learn basic complications of fluid and electrolyte imbalance and acid/base imbalance, and differentiate intravenous fluids. Students will perform venous access and learn to manage complications. Students will demonstrate maintenance and adjustment of fluids and secondary administration techniques, and perform intravenous dosage calculations.
Prerequisite: None
Corequisite: None

CVRI 2262 Cardiovascular Technology Practicum I 5 0/0/5
In part one of this capstone course, students will apply the knowledge and skills gained throughout the Cardiovascular Technology program. Students will become certified in Advanced Cardiovascular Support (ACLS) before being assigned to various cardiovascular catheterization laboratory opportunities. Students will function as a part of the cardiovascular team under the supervision of a preceptor. Students will participate in experiences Monday through Friday for the duration of the academic term. Shifts may rotate between day, evening, night and on-call shifts.
Prerequisite: Successful completion (C or better) of all Cardiovascular Technology Program requirements AND current American Heart Association Health Care Provider CPR AND current Advanced Cardiovascular Life Support certification AND current, clear Minnesota Department of Health criminal background check AND current, clear national background check AND up-to-date immunizations and health form
Corequisite: None

CVRI 2263 Cardiovascular Technology Practicum II 5 0/0/5
In part two of this capstone course, students will apply the knowledge and skills gained throughout the Cardiovascular Technology program. Students will function as a part of the cardiovascular team under the supervision of a preceptor. Students will participate in experiences Monday through Friday for the duration of the academic term. Shifts may rotate between day, evening, night and on-call shifts.

Dentistry allowable procedures for dental hygienists.

Prerequisite: DNHY1123
Corequisite: None

This course introduces dental hygiene students to basic drug categories, pharmacological pain control principles and various anesthesia techniques, with special emphasis on a succinct accounting of drugs as they relate to dentistry.

Prerequisite: None
Corequisite: None

This course is a continuation of DNHY 1130 and introduces the student to dietary counseling, with special emphasis on advanced dental hygiene techniques including periodontal assessment and debridement, power instrumentation and implant maintenance.

Prerequisite: None
Corequisite: None

This course is a continuation of DNHY 1132 with emphasis on the treatment of moderate to advanced periodontal disease, the development of speed and an introduction to several advanced dental hygiene techniques.

Prerequisite: DNHY1132 AND The student must be accepted into the dental hygiene program and comply with the Dental Program Student/Faculty Handbook.
Corequisite: DNHY2240

This course covers the pathogenesis, diagnosis and treatment of periodontal disease. Emphasis will include the progression of periodontal disease, diagnostic methods, treatment modalities, advanced instrumentation and the role of the dental hygienist as a periodontal co-therapist.

Prerequisite: None
Corequisite: None

This course is a continuation of DNHY 2210 and dental hygiene patient oral risk assessments. Special focus includes topics of interest to the graduating hygienist including smoking cessation, extraoral/ intraoral self exam, resume writing, interview skills, professional development, service to the community and involvement in the professional association.

Prerequisite: DNHY2210
Corequisite: None

This course covers the pathogenesis, diagnosis and treatment of periodontal disease. Emphasis will include the progression of periodontal disease, diagnostic methods, treatment modalities, advanced instrumentation and the role of the dental hygienist as a periodontal co-therapist.

Prerequisite: None
Corequisite: None

This course is a continuation of DNHY 2213 with emphasis on the treatment of moderate to advanced periodontal disease, the development of speed and an introduction to several advanced dental hygiene techniques.

Prerequisite: DNHY2213 AND The student must be accepted into the dental hygiene program and comply with the Dental Program Student/Faculty Handbook.
Corequisite: DNHY2246

This lecture portion of this course introduces the student to the disciplines and basic principles of dental public health, epidemiological methods and biostatistical measurement and analysis. The lab portion of this course enables the student to plan, implement and evaluate a community dental hygiene research project and participate in a community dental service project and screening.

Prerequisite: None
Corequisite: None

This course is designed to assist students in reviewing content in preparation to write the National Board Dental Hygiene Examination.

Prerequisite: DNHY2213
Corequisite: None

This course consists of clinical rotations off campus in public health facilities to enhance dental hygiene clinical experience. The student will be introduced to a variety of dental hygiene experiences.

Prerequisite: None
Corequisite: DNHY2213

This course consists of clinical rotations off campus in public health facilities to enhance dental hygiene clinical experience. The student will be introduced to a variety of dental hygiene experiences.

Prerequisite: None
Corequisite: DNHY2223

This course is designed to give the student an understanding of a diesel shop environment. Personal and shop safety will be emphasized. Hand tool, pneumatic tool, precision measuring tool and hardware identification, usage and safety will also be areas of study.

Prerequisite: None
Corequisite: None

This course introduces students to proprietary software used in the diesel technology industry. Students will become familiar with various software from industry-leading manufacturers.

Prerequisite: None
Corequisite: None

This course covers the fundamentals of diesel engine fuel systems. Identification, minor repair, testing and troubleshooting. Mechanical governor operation, fuel system operation, fuel system/governor adjustments and related engine operation are studied.

Prerequisite: None
Corequisite: None

This course covers the operating principles, diagnosis and repair of drive train components. Components included will be clutches, mechanical transmissions, drive lines and drive axles.

Prerequisite: TRNS1102 OR DSET1100
Corequisite: None

This course covers the fundamentals of hydraulic systems. It is an introduction to hydraulic component operation, maintenance, repair and testing. These systems may be used in agricultural, industrial heavy equipment and trucks.

Prerequisite: None
Corequisite: None

This course covers hydraulic and air brake system operation, service and diagnosis. Anti-lock braking systems will also be covered.

Prerequisite: None
Corequisite: None

Students will apply skill sets previously learned specific to their sponsoring dealer’s equipment and will also be introduced to curriculum skill sets to be delivered in future semesters. Skill sets will be identified in a training plan developed by industry and instructor.

Prerequisite: None
Corequisite: None

This course provides students an opportunity to visit John Deere, Case New Holland or general shops and work with on-site instructors as it relates to management procedures including parts, ordering inventory, repair order writing, payroll, employee-employer relations, customer relations and communication skills.

Prerequisite: None
Corequisite: None

This course provides students an opportunity to visit John Deere, Case New Holland or general shops and work with on-site instructors as it relates to management procedures including parts, ordering inventory, repair order writing, payroll, employee-employer relations, customer relations and communication skills.

Prerequisite: None
Corequisite: None

This course introduces the theory of today’s diesel engines, including operation, repair and maintenance. Students will learn the proper industry procedures for removing, replacing, diagnosing, troubleshooting, rebuilding and assembling diesel engines.

Prerequisite: None
Corequisite: None

This course introduces the theory of today’s diesel engines, including operation, repair and maintenance. Students will learn the proper industry procedures for removing, replacing, diagnosing, troubleshooting, rebuilding and assembling diesel engines.

Prerequisite: None
Corequisite: None

This course teaches students how to disassemble, analyze, rebuild, measure and adjust diesel engines and their components.

Prerequisite: None
Corequisite: None

Students will apply skill sets previously related to truck and/or other mechanized powered equipment and may be introduced to curriculum skill sets to be delivered in future semesters. Skill sets will be identified in a training plan developed by industry and instructor.

Prerequisite: None
Corequisite: None

This course is a hands-on troubleshooting course that allows students to apply knowledge of DSET 1130. Students will be required to troubleshoot and repair a variety of equipment and vehicles.

Prerequisite: DSET1130
Corequisite: None

</table>

This course covers failure analysis of electrical systems, the recognition of causes of failures and how to perform a wiring diagram. Lab activities include the troubleshooting of heavy-duty electrical and emission components, testing, inspecting and repairing. Electrical meters will be used to diagnose, locate and repair failures. Lab work may include diagnosis, disassembly, inspection, repair, assembly and testing of program and customer-owned equipment.

Prerequisite: DSET1100 AND DSET1130
Corequisite: None

| DSET 2206 | Electronic Controls                             | 3  | 1/2/0      |

This course covers electronic components used to control engine, transmissions, brakes and hydraulics on heavy equipment. The coursework will include system analysis, testing, troubleshooting and replacement of components used in electronic control systems.

Prerequisite: DSET1130 AND TRNS11102 AND DSET1100 AND DSET1130
Corequisite: None

| DSET 2210 | Mobile Hydraulics                               | 4  | 1/3/0      |

This course covers the hydraulic components used in farm and heavy-haul equipment and trucks. This will include hydrostatic transmission, electric over hydraulic control valves and electronic control components. It will also include troubleshooting of live units with proper testing equipment used in up-to-date service centers.

Prerequisite: DSET1112 AND DSET1100
Corequisite: None

| DSET 2214 | Suspension and Alignment                        | 3  | 1/2/0      |

This course will cover the procedures used in repair, inspection, rebuilding and alignment of steering and suspension systems. Vehicle Department of Transportation inspections will also be covered.

Prerequisite: DSET1100
Corequisite: None

| DSET 2218 | Advanced Fuels                                  | 3  | 1/2/0      |

This course covers the application of the electronic fuel systems used on today’s diesel engines. Coursework covers fuel systems used on engines manufactured by Caterpillar, Cummins, Detroit, John Deere, CNH and others.

Prerequisite: DSET1106
Corequisite: None

| DSET 2220 | Internship                                      | 3  | 0/0/3      |

This course is designed by the student and advisor in cooperation with industry to provide a job site training experience. The student will prepare an internship training plan reflecting skills to be developed on the internship site.

Prerequisite: TRNS1102 AND DSET1106 AND TRNS1110 OR DSET1100
Corequisite: None

| DSET 2230 | Advanced Engines & Fuel Systems I               | 3  | 1/2/0      |

This course is designed to give the student an understanding of the theory, operation, troubleshooting and repair of diesel engine intake, exhaust and fuel systems including, but not limited to Caterpillar, Cummins and Detroit diesel engines.

Prerequisite: None
Corequisite: None

| DSET 2238 | Transmissions & Drive Systems                   | 4  | 1/3/0      |

This course covers procedures to test, troubleshoot and rebuild power shift and other specialized transmissions used on agricultural, industrial and off-highway trucks. This course also includes final drives and related components including repair, installation and adjustment of major units and components.

Prerequisite: DSET1110
Corequisite: None

| DSET 2240 | Supervised Occupational Experience II           | 3  | 0/0/3      |

Students will apply skill sets previously learned related to truck and/or other diesel-powered equipment. Skill sets will be identified in a training plan developed by industry and instructor.

Prerequisite: None
Corequisite: None

| DSET 2242 | Advanced Engines and Fuel Systems               | 6  | 2/4/0      |

This course is designed to give students an understanding of medium- and heavy-duty diesel engines manufactured by, but not limited to, Caterpillar, Cummins, Detroit Diesel, Navistar, Volvo and Mercedes Benz. Areas of study include base engine components, intake and exhaust systems, emission control devices, lubrication systems, cooling systems and fuel systems.

Prerequisite: DSET1134 AND DSET1132
Corequisite: None

| DTRK 1140 | Supervised Occupational Experience I            | 7  | 0/0/7      |

Students will apply skill sets previously learned related to medium- and heavy-duty trucks at a sponsoring dealer or fleet shop. Students may be introduced to curriculum skill sets to be delivered in future semesters. Skill sets will be identified in a training plan developed by industry and instructor.

Prerequisite: None
Corequisite: None

| DTRK 2214 | Suspension and Alignment                        | 3  | 1/2/0      |

This course will cover the procedures used in repair, inspection, rebuilding and alignment of steering and suspension systems. Vehicle Department of Transportation inspections will also be covered.

Prerequisite: TRNS1102 OR DSET1100
Corequisite: None

| DTRK 2230 | Advanced Engines I                              | 3  | 1/2/0      |

This course is designed to give the student an understanding of the theory, operation, troubleshooting and repair of modern medium- and heavy-duty truck diesel engines. Areas of study include intake and exhaust systems, emission control devices and fuel systems on but not limited to the following manufactures: Caterpillar, Cummins, Detroit, Navistar, Mack and Volvo truck diesel engines.

Prerequisite: None
Corequisite: None

| DTRK 2238 | Transmissions and Drive Systems                 | 4  | 1/3/0      |

This course is designed to give the student an understanding of the theory, operation, troubleshooting and repair of modern medium- and heavy-duty truck diesel engines. Areas of study include base engine components, intake and exhaust systems, emission control devices, lubrication systems, cooling systems and fuel systems on but not limited to the following manufactures: Caterpillar, Cummins, Detroit, Navistar, Mack and Volvo truck diesel engines.

Prerequisite: DSET1132 AND DSET1134
Corequisite: None

| EAP 0095 | Editing Strategies I                           | 2  | 2/0/0      |

This course is for students in their first semester of study in the English for Academic Purposes (EAP) cohort and enrolled in ENGL097: Express English. The course will focus on helping students identify specific patterns of error in their writing and apply strategies for increasing sentence-level accuracy.

Prerequisite: Course placement is determined by assessment
Corequisite: ENGL097

| EAP 0096 | Reading Strategies I                           | 2  | 2/0/0      |

This course is for students in their first semester of study in the English for Academic Purposes (EAP) cohort and pairs with an academic content course. Students will learn specific strategies for building vocabulary, taking notes and analyzing texts from a specific field.

Prerequisite: Course placement is determined by assessment
Corequisite: Enrollment in paired MnTC course is required for students registering for this course

| EAP 0097 | Reading Strategies II                          | 2  | 2/0/0      |

This course is for students in their second semester of study in the English for Academic Purposes (EAP) cohort and pairs with a content course. Students will continue to develop language skills necessary to read and understand field-specific texts. Students will learn specific strategies for reading, analyzing and responding to texts from a specific field.

Prerequisite: EAP0096 AND Course placement is determined by assessment
Corequisite: Enrollment in paired MnTC course is required for students registering for this course

| EAP 0098 | Editing Strategies II                          | 2  | 2/0/0      |

This course is for students in their second semester of study in the English for Academic Purposes (EAP) cohort and enrolled in ENGL1101: College Writing. The course will continue student development of editing skills as well as build a strong foundation of research skills, including the critical analysis of sources. Students will write responses to sources: summarizing, paraphrasing and quoting material responsibly.

Prerequisite: EAP0095
Corequisite: ENGL1101

| ECON 1150 | Essentials of Economics                       | 3  | 3/0/0      |

Meets MnTC Goal Areas 2 and 5. This course is an introductory study of economics and exposes the student to a variety of economic concepts. In order to enjoy a successful career, people need to understand how economic issues impact the way they live and work. This course helps satisfy those needs by exploring the principles of microeconomics, macroeconomics and international economics. At the microeconomic level, students will learn how the choices they make affect particular markets. They will examine resource allocation and pricing structures by analyzing demand and supply applications. Students will survey the competitive environment by exploring the market structures of perfect competition, monopolistic competition, monopoly and oligopoly. At the macroeconomic level, students will learn about the business cycle by analyzing the gross domestic product (GDP), the inflation rate, the unemployment rate, deficit spending, the national debt and other economic indicators. They will also investigate the debate over activism and non-activism in monetary and fiscal policies. The student will examine international issues including tariffs/quotas, foreign exchange, the concept of comparative advantage and trends in globalization. This course is not intended for business or economics majors.

Prerequisite: None
Corequisite: None

respiratory conditions. Students will use basic life support skills for airway management and learn advanced techniques to establish and maintain a patent airway. **Prerequisite:** None, **Corequisite:** EMST1000 AND EMST1020

**EMST 1040** Special Populations 2 1/0/0 Students in this course will explore labor, delivery, and postpartum and newborn care in the prehospital setting. Students will learn to care for patients who are at different developmental stages, from different cultural backgrounds and experiencing mental health issues, and also how to both safely care for and transport bariatric patients. **Prerequisite:** None, **Corequisite:** None

**EMST 1050** Paramedic Clinical I 1 0/0/1 In this course, students will provide quality and safe care to patients from diverse groups. Students will demonstrate therapeutic communication and maintain professionalism. **Prerequisite:** EMST1000 AND EMST1010 AND EMST1020 AND EMST1030, **Corequisite:** None

**EMST 1060** Emergency Medical System Operations 2 2/0/0 In this course the paramedic student will learn standards and guidelines ensuring safe and effective medical transport by ground and air. Students will learn incident management techniques; develop an awareness of safe operations while working crime scenes, emergencies and rescue scenarios; and learn how to evaluate hazardous material emergencies, call for appropriate resources and work in a cold zone. **Prerequisite:** None, **Corequisite:** None

**EMST 2000** Paramedic Medical I 2 2/0/0 This course is designed to integrate pathophysiological principles and assessment findings to formulate a field impression and implement field treatment plans for patients with neurological problems, endocrine problems, allergic and anaphylactic reactions, and gastro-enterological and urological problems. **Prerequisite:** BIOL2262 AND BIOL2263 AND EMST1030, **Corequisite:** None

**EMST 2010** Traumatic Emergencies 2 1/1/0 In this course the paramedic student will learn physics of motion to predict the likelihood of injury. Assessment findings will be used to formulate a field impression and implement a field treatment plan. **Prerequisite:** BIOL2262 AND BIOL2263 AND EMST1030, **Corequisite:** None

**EMST 2020** Paramedic Medical II 2 2/0/0 Students will learn to safely treat patients with environmental conditions, infectious and communicable diseases, and mental health or behavioral emergencies. **Prerequisite:** None, **Corequisite:** EMST2000

**EMST 2040** Paramedic Lab I 2 0/2/0 In this laboratory course, students will learn how to apply electrocardiogram (EKG) leads, interpret EKGs and administer medications. **Prerequisite:** None, **Corequisite:** EMST2040

**EMST 2050** Paramedic Lab II 2 0/2/0 Students in this laboratory course will participate as a team member and a team leader in the efficient care of patients with advanced needs who are experiencing medical and/or traumatic conditions. Students will learn to predict future pathology from patient and family histories. **Prerequisite:** None, **Corequisite:** EMST2050

**EMST 2200** Paramedic Clinical II 4 0/0/4 The paramedic student will continue the clinical experience utilizing advanced skills, modeling professional behavior and recognizing personal weaknesses in order to continue to promote self-improvement. **Prerequisite:** None, **Corequisite:** EMST2280 AND EMST2270 AND EMST2211 AND EMST2261

**EMST 2211** Advanced Cardiac Life Support 2 1/1/0 This course is designed for healthcare providers who direct or participate in the management of cardiopulmonary arrest or other cardiovascular emergencies. Students will enhance their skills in recognition and treatment of cardiopulmonary arrest, immediate post-cardiac arrest, acute arrhythmia, acute coronary syndrome (ACS) and stroke. **Prerequisite:** None, **Corequisite:** None

**EMST 2261** Pediatric Advanced Life Support 2 1/1/0 In this course, students will reinforce skills in the care of pediatric patients experiencing cardiopulmonary arrest including a systematic approach to pediatric assessment, basic life support, pediatric advanced life support (PALS) treatment algorithms and effective resuscitation team dynamics. **Prerequisite:** None, **Corequisite:** None

**EMST 2271** Prehospital Trauma Life Support 2 1/1/0 This course is designed to prepare the emergency medical services provider with an organized approach to providing care to a trauma patient. This course is designed to give the student the knowledge to obtain the best possible patient outcome in a traumatic emergency. This course uses the latest methods provided by the National Association of Emergency Medical Technicians in cooperation with the American College of Surgeons. **Prerequisite:** None, **Corequisite:** None

**EMST 2280** Advanced Medical Life Support 2 1/1/0 This advanced life support course provides students an in-depth study of caring for people experiencing medical emergencies. **Prerequisite:** None, **Corequisite:** None

**EMST 2292** Paramedic Capstone Experience 2–5 NoneStudents in this course will demonstrate entry-level competence as paramedics in supervised internship experiences. **Prerequisite:** EMST2010 AND EMST2050, **Corequisite:** EMST2280 AND EMST2211 AND EMST2261 AND EMST2201 AND EMST2271

**ENG 1101** Ethics and the Engineering Profession 3 3/0/0 This course covers ethical theories, professional responsibilities and social impacts as they relate to engineering teamwork skills, design and engineering careers. **Prerequisite:** There are no prerequisites for this course. **Corequisite:** None

**ENG 1096** Reading and Writing Strategies 6 6/0/0 This hybrid course integrates college-level reading and writing. Students will practice various reading strategies and develop proficiency in comprehending, summarizing, analyzing and interpreting college-level texts as well as practice strategies designed to strengthen their writing skills, including grammar, usage and mechanics. Students also will practice all stages of the writing process, from invention and drafting to revising and editing, as they create well-structured sentences, paragraphs, essays and other types of writings. **Prerequisite:** Placement by assessment. **Corequisite:** None

**ENG 1097** Express English Strategies 3 3/0/0 This course is designed to prepare students for college-level reading and writing tasks across the disciplines. Students will practice strategies in order to develop reading proficiency and writing skills. They also will engage in all stages of the writing process, from invention and drafting to revising and editing, as they respond to texts and specific writing situations. **Prerequisite:** Course placement is determined by assessment **Corequisite:** None

**ENG 1098** Accelerated English 3 3/0/0 This course must be taken in conjunction with a linked section of College Writing (ENG1101) taught by the same instructor. It is designed to prepare students for college-level reading and writing tasks across the disciplines. Students will practice strategies in order to develop reading proficiency and writing skills. They also will engage in all stages of the writing process, from invention and drafting to revising and editing, as they respond to texts and specific writing situations. **Prerequisite:** Course placement is determined by assessment **Corequisite:** None

**ENG 1101** College Writing 3 3/0/0 Meets MnTC Goal Area 1. This is an introductory writing course designed to prepare students for later college and career writing. The course focuses on developing fluency through a process approach, with particular emphasis on revision. Students will consider purpose and audience, read and discuss writing and further develop their own writing processes through successive revisions to produce polished drafts. Course work will include an introduction to argumentative writing, writing from academic sources and a short research project. **Prerequisite:** Completion of EL11080, ENGL0096, or ENGL0097 with a grade of C or higher OR placement into college-level English. **Corequisite:** None

**ENG 1205** Writing About Literature 3 3/0/0 Meets MnTC Goal Area 1. This course builds on the foundations of College Writing and provides students with additional opportunities to develop fluency in their writing through a process approach. Students will read critically from a variety of literary genres, explore meaning through academic research and respond through discussion and writing. **Prerequisite:** ENGL1101 **Corequisite:** None

**ENG 1210** Writing About Current Issues 3 3/0/0 Meets MnTC Goal Area 1. This course builds on the foundations of College Writing and provides students with additional opportunities to develop and refine their writing through a process approach. Students will explore current issues by critically reading a variety of texts, conducting academic research and responding through discussion and writing. **Prerequisite:** ENGL1101 **Corequisite:** None

**ENG 1215** Professional and Technical Writing 3 3/0/0 Meets MnTC Goal Area 1. This course provides instruction in writing and designing professional and technical documents, including print and non-print correspondence, descriptions, instructions, reports and proposals, along with promotional material.

But part of the lectures, discussions and student responses will address the topic of censorship. Students will read from a variety of genres.

This course meets MnTC Goal Areas 2 and 6. This course is an in-depth study of literary texts that fall under the category of horror and/or supernatural fiction. While the focus is on this genre, the course may also address sub-categories of detective fiction, science fiction and fantasy.

This course meets Goal Areas 2, 6 and 10. This course is an in-depth study of travel literature. This course will, but some readings of early explorers will establish context for the changes within the genre, for example, from medieval pilgrimages and the Victorian Grand Tour to travelogues and road narratives. The course will also address various purposes for travel such as adventure, exploration and spirituality, as well as trends in modern travel writing such as blogs and eco-tourism.

This course introduces the theory and application of dynamics of particles and rigid bodies. The course introduces students an opportunity to read, discuss and analyze contemporary literature from around the world. The focus of the course is on fiction, although students may also be introduced to other contemporary world literature such as poetry, non-fiction and drama.

This course meets MnTC Goal Areas 2, 6 and 7. This course introduces students to children's literature. Students will read and respond to diverse, traditional and contemporary texts. Emphasis will be placed on reading, analyzing, interpreting and evaluating children's literature from various contextual frameworks, such as the development of the genre, cognitive development, censorship and depictions of family, race and gender.

This course meets MnTC Goal Areas 2 and 6. This course focuses on the study of poetry and poetic techniques through the lyrics of rock music. Specifically, the course will include studies of artists from the rock 'n' roll era (1950s through today).

This course provides an overview of the construction industry and introduces the student to the duties and responsibilities of the construction professional. The emphasis of this course will be on the importance of the industry and career possibilities for successful students.

This course introduces and develops basic skills in drawing, lettering, orthographic projection, sections and dimensioning. This course will also apply the basic fundamentals of pictorial drawing, including isometric, oblique, perspective, shade and shadow, and freehand sketching.

This course covers the application of Windows software systems in coordination with AutoCAD software as well as general office equipment set-up and use.

This course provides an introduction to the principles of mechanics, including equilibrium of particles and rigid bodies; distributed forces, centroids and centers of gravity; moments of inertia of areas; analysis of simple structures and machines; and various types of friction.

This course introduces the theory and application of dynamics of particles and rigid bodies. Topics include the kinematics and kinetics of particles and rigid bodies (translational and rotational), principles of work and energy, and principles of impulse and momentum.

This course provides an introduction to the study of stress, strain, deformation and failure of elastic bodies subjected to external forces. Topics include the relationships between the applied loads and the resulting stresses and deformations in an elastic body, stress-strain relations and the design of structural members subjected to known loads.

students to evaluate an entrepreneurial career for themselves. In doing so, it provides aspiring entrepreneurs with a framework for selecting, funding and starting their own new ventures.

Prerequisite: None
Corequisite: None

This course is designed to provide the student with a purposeful occupational experience in a business environment related to his or her program of study. A training plan is created for each student in conjunction with the training site to provide experience related to the skills and knowledge acquired in the program. Each internship is an individualized experience. Therefore, this course offers a flexible, variable credit experience. The student may choose from 1, 2 or 3 credits, depending on the number of hours pre-arranged with the internship site supervisor. Each credit will require 45 hours of on-the-job learning.

Prerequisite: advisor consent
Corequisite: None

This course exposes students to business owners and practicing entrepreneurs currently managing ongoing entrepreneurial enterprises. The purpose of the course is to develop mentor relationships with successful practicing business owners and to gain first-hand experience about the knowledge, skills and abilities necessary to be a successful entrepreneur. Students will submit reports throughout the semester addressing questions that integrate entrepreneurship and other business coursework with their work experience.

Prerequisite: None
Corequisite: None

This course examines issues related to ethics in business and their impact upon society, the economy and the environment. Students will increase their awareness in making decisions based on ethical judgments. Students will examine the roles, responsibilities and conflicts of business management in the context of organizational ethics. Students will analyze case studies of workplace behavior and define appropriate professional conduct in various workplace scenarios including dress, language and other emerging trends.

Prerequisite: None
Corequisite: None

This course covers the steps in creating a business plan. Areas that will be addressed and developed are industry analysis, strategic positioning, marketing and sales strategy, operations, management and organization, and financials.

Prerequisite: None
Corequisite: None

This course introduces the student to the basics of equine breeds, types of horses, including the characteristics and uses, and husbandry practices. It will also cover aspects of the equine industry such as career paths and necessary job skills.

Prerequisite: None
Corequisite: None

This course provides an overview of equine anatomy, physiology and disease management. This course allows students to learn basic anatomy and physiology using a systems approach specific to the equine. The student will apply this knowledge to the subjects relevant to equine health management such as equine diseases, disease prevention (vaccinations and husbandry), lameness, performance and parasite control.

Prerequisite: None
Corequisite: None

This course introduces the student to the management of the breeding stallion, reproducing mare and newborn foal. It will discuss the anatomy and endocrinology of the reproductive system, the mare estrus cycle, spermagnotism and cooled and frozen semen insemination techniques. Fundamentals of equine nutrition, feed selection, digestive anatomy and ration evaluation will also be covered.

Prerequisite: None
Corequisite: None

This course will cover the practical aspects of recognizing and managing equine infectious and metabolic disease, lameness and performance problems and breeding issues. Vaccination protocols and parasite prevention will be included. This course will build on the knowledge gained in EQSC 1050 and 1060 and be custom fitted to each student’s specific discipline relevant to his or her internship site.

Prerequisite: EQSC1050 AND EQSC1060
Corequisite: None

This course will build on the knowledge from EQSC 1130 and 1131. Caring for horses, their environment, nutrition including feeds and feeding, behavior and disease management within a holistic stable/farm/ranch environment will be explored and analyzed. The course will be customized to be relevant to the student’s internship experience and will include a capstone project consisting of an in-depth analysis and evaluation of the student’s internship facility and business.

Prerequisite: EQSC1130 AND EQSC1131
Corequisite: None

This course will provide the student practical experience and on-the-job training relevant to the equine industry. The internships will take place at sites throughout the country or

collateral releases and other supporting credit documentation. Topics include mortgage types, FHA/VA/conventional financing, second mortgages, loan documentation, title insurance, foreclosure and appraisals.

Prerequisite: None
Corequisite: None

FYE 1000 Student Success Seminar 1 1/0/0
This course is designed as an introductory seminar in which students will have the opportunity to explore the overall building blocks for success in college and in life. This seminar seeks to promote understanding that the journey of college is a time of personal growth and change and begins with the identification and clarification of values and goals. This course is available to students in their first term.

Prerequisite: Instructor approval required.
Corequisite: None

FYE 1101 First Year Experience 3 3/0/0
This course is designed to help M State students strengthen and develop critical and creative thinking skills associated with a college academic experience, make social adaptations to a new environment and make connections with faculty, staff and resource offices. Topics include an understanding of individual risks and barriers, multiculturalism, life and career planning and personal responsibility. This course is also designed to help students develop the basic skills necessary for academic success in college. Additional topics to be discussed may include but are not limited to time management, study skills, note- and test-taking skills, motivation, and community and campus resources.

Prerequisite: None
Corequisite: None

GAS 1000 Gas Utility Field Training I 4 2/2/0
This is an introductory laboratory course that prepares students for basic field utility work, including safety procedures and equipment operation. This course focuses on hands-on application and is intended to help students become confident in safely operating basic gas utility equipment.

Prerequisite: None
Corequisite: None

GAS 1001 Underground Utility Locating 2 0/2/0
This course provides the skills and procedures necessary to locate and accurately mark underground utilities.

Prerequisite: None
Corequisite: None

GAS 1002 Gas Service Welding I 3 1/2/0
This course provides an opportunity for students to develop the knowledge, skills and understanding required for employment in this field. Students will learn how to weld pipe utilizing oxyacetylene and gas metal arc welding, welding safety, weld faults and causes, weld joint design and fit-up.

Prerequisite: None
Corequisite: None

GAS 1003 Gas Utility Equipment Training 5 1/4/0
This is an introductory course that prepares students for basic field utility work. The course includes safety procedures, equipment operations and maintenance.

Prerequisite: None
Corequisite: None

GAS 1004 Gas Utility Field Training II 4 2/2/0
This course provides practice in applied gas utilities tasks with a focus on installation. Students have theory and applied training with the installation of gas meters, valves, regulators and plastic pipe.

Prerequisite: GAS1000
Corequisite: None

GAS 1005 Gas Service Welding II 3 1/2/0
This course provides an opportunity for students to develop the knowledge, skills and understanding required for employment in this field. Students will understand how to position pipe welding utilizing gas metal arc welding and shielded metal arc welding processes, pipe fit-up and pipe weld testing according to American Petroleum Institute (API) Standard 1104 code.

Prerequisite: GAS1002
Corequisite: None

GAS 1500 Metallurgy 1 1/0/0
This course provides students with knowledge of the manufacturing of iron and steel, mechanical and physical properties of metals, metal identification, macro and microscopic grain structures, welding metallurgy, applied heat treating processes, and weld failures and fractures.

Prerequisite: None
Corequisite: None

GAS 2001 Forklift Certification 1 0/1/0
This course offers an Occupational Safety and Health Administration-compliant program consisting of field training, a knowledge test and a hands-on evaluation for all forklift operations.

Prerequisite: None
Corequisite: None

GAS 2002 Gas Utility Field Training III 5 1/4/0
This course provides practice in gas utility tasks with a focus on gas mains. The students have theory and applied training with the installation and repair of steel gas mains and services, line testing and leak detection procedures.

Prerequisite: None
Corequisite: None

GAS 2003 Gasless Leak Detection 3 1/2/0
This course will provide hands-on training for responding to gas emergencies and conducting hazardous leak investigations.

Prerequisite: None
Corequisite: None

GAS 2600 Electric and Gas Appliances 4 2/2/0
This course provides the student with the skills necessary for the installation, maintenance and repair of residential electric/gas appliances.

Prerequisite: None
Corequisite: None

GDTC 1100 Macintosh Production Processes 3 2/1/0
This course covers general processes, workflow methods and utilization of the Macintosh Operating System features in a graphic design or production environment.

Prerequisite: None
Corequisite: None

GDTC 1105 Adobe Photoshop I 3 2/1/0
This course covers the fundamental functions of Adobe Photoshop to manipulate and combine digital images.

Prerequisite: None
Corequisite: None

GDTC 1113 Design and Layout I 3 2/1/0
As the first of three layout courses in a series, this course introduces students to the basic elements and principles of design. Students will produce a variety of projects that will familiarize them with basic design theories, branding philosophies and production techniques. In addition to hand-rendered projects, students will also begin to learn technical layout skills in Adobe InDesign.

Prerequisite: None
Corequisite: None

GDTC 1115 Design and Layout II 3 2/1/0
As the second of three layout courses in a series, students will expand upon their basic design knowledge by learning advanced methods of style, typography, layout grids, identity development and branding. Increasingly complex projects will require students to employ more sophisticated methods of research, concept development, design strategy and assessment. Students will create a variety of projects in Adobe software.

Prerequisite: None
Corequisite: None

GDTC 1117 Interactive Design I 3 2/1/0
This course focuses on design principles and technical specifications for interface design using digital imaging software, hypertext markup language and cascading style sheets to create and edit interactive and multimedia projects.

Prerequisite: GDTC2278 AND GDTC2244
Corequisite: None

GDTC 1126 Digital Photography 3 2/1/0
In this course students will develop basic photographic skills and knowledge using a digital camera for a variety of assignments.

Prerequisite: None
Corequisite: None

GDTC 1134 Electronic Drawing I 3 2/1/0
This course covers fundamental functions of Adobe Illustrator or other vector-based equivalent instructor-designated software to create basic illustrations and layout.

Prerequisite: None
Corequisite: None

GDTC 1135 Adobe Illustrator I 3 2/1/0
This course covers fundamental functions of Adobe Illustrator to create basic illustrations and layout.

Prerequisite: None
Corequisite: None

GDTC 1144 Electronic Drawing II 3 2/1/0
This course covers the use of Adobe Illustrator or equivalent instructor-designated vector-based software using the Macintosh computer to create and manipulate electronic illustrations, logos and artwork.

Prerequisite: GDTC1134
Corequisite: None

GDTC 1150 Process Printing Theory 3 3/0/0
This course provides foundational theory on print process as well as printing terminology. Focus is on theory and not on application of technology, using books, lectures and industry tours, if available.

Prerequisite: None
Corequisite: None

GDTC 2203 Electronic Image Manipulation 3 2/1/0
This course covers the fundamental functions of Adobe Photoshop or other raster-based equivalent software to manipulate and combine digital images.

Prerequisite: None
Corequisite: None
Course #:  Course Title  CR  Lec/Lab/OJT

GDTC 2205  Adobe Photoshop II  3  2/1/0
This course covers digital image creation, manipulation and preparation for output using a variety of advanced functionality Adobe Photoshop.
Prerequisite: GDTC2203
Corequisite: None

GDTC 2212  Design and Layout III  3  2/1/0
As the third of three layout courses in a series, this course focuses on brand and identity development. Students continue to develop their own or their own fictitious company that will include a visual identity and supporting brand materials. Additional applications of these concepts are explored in the form of self-promotional projects. Special emphasis is placed on research, marketing techniques, rationale and presentation.
Prerequisite: GDTC1113 AND GDTC1115
Corequisite: None

GDTC 2214  Integrated Graphic Design  3  2/1/0
This course focuses on the advanced integration of Adobe software technology and graphic design application. Coursework will include a continuation of brand development and design of grid systems, advanced typography application, color theory application and development of written and verbal design rationale.
Prerequisite: GDTC2278 AND GDTC2244
Corequisite: None

GDTC 2238  Design Studio  3  2/1/0
Students will produce design projects with content and media of their particular interest. Work will be completed on a contractual basis between the student and instructor. Additional projects and activities will be assigned to gain experience in industry and client processes. Specific emphasis will be placed on refining skills and producing professional-level projects for student portfolios.
Prerequisite: GDTC2203 AND GDTC2242 AND GDTC2212
Corequisite: None

GDTC 2240  Lighting Techniques  2  1/1/0
In this course students will develop an understanding of natural and indoor lighting. They will also demonstrate the capabilities of flash-mount lighting; demonstrate their ability to effectively use multiple flash functions, settings and techniques; and demonstrate proper use and settings of strobe lighting components. Students will also learn how to use settings for box and umbrella lighting techniques, critique lighting methods used in various venues and demonstrate soft box lighting techniques for product photography.
Prerequisite: None
Corequisite: None

GDTC 2242  Electronic Publishing  3  2/1/0
Students will learn in-depth technical skills necessary for page layout design. A variety of design projects will be assigned that will teach students to effectively incorporate type and imagery in single- and multiple-page documents. These projects will involve simple to complex tasks that will reinforce students’ basic design skills.
Prerequisite: GDTC1113
Corequisite: None

GDTC 2244  Advanced Electronic Imaging  3  2/1/0
This course covers digital image creation, manipulation and preparation for output using a variety of advanced functionality Adobe Photoshop or equivalent instructor designated raster-based software.
Prerequisite: GDTC2203
Corequisite: None

GDTC 2245  Adobe Illustrator II  3  2/1/0
This course covers the use of Adobe Illustrator to create and manipulate electronic illustrations, logos and artwork.
Prerequisite: GDTC1134
Corequisite: None

GDTC 2246  Advanced Photography and Imaging  4  2/2/0
In this course students will learn how to photograph in Raw File Format and develop a clear understanding of the different computer file formats, file sizes, resolution, pixels per inch (PPi) and megapixels. They will also demonstrate color correction; red, green, blue (RGB), cyan, magenta, yellow and black (CMYK). Students will identify CMYK profiles, develop a high degree of competency in manipulating photographs using Photoshop, and understand the importance of computer monitor calibration for color quality. Additionally, students will demonstrate advanced photography framing techniques and focus on how various lenses, aperture settings and film speeds work together.
Prerequisite: GDTC1126
Corequisite: None

GDTC 2258  Graphic Design Professional Practices  3  2/1/0
This course addresses the professional practice of graphic design technology. The course will cover interviewing skills, presentation techniques, freelance business operation, proposals and management, resume and cover-letter writing, job research/job offer and portfolio preparation.
Prerequisite: GDTC2212 AND GDTC2278
Corequisite: None

GDTC 2276  Graphic Design Internship  3  0/0/0
Students are placed temporarily in a partnering graphic industry establishment where they are able to utilize their graphic design technology skills in a real-world experience.
Prerequisite: GDTC2203 AND GDTC2212
Corequisite: None

GDTC 2278  Digital Preflight  3  2/1/0
Students will create and analyze electronic files to identify and resolve potential conflicts that may arise in different production processes. A variety of design projects will be produced using Adobe applications, with an emphasis on file construction and production preparation.
Prerequisite: GDTC2242
Corequisite: None

GEOG 1110  World Geography  3  3/0/0
Meets MnTC Goal Areas 5 and 8. Students will gain an understanding and appreciation of the spatial relationship of the physical and human elements of our world with an emphasis on the interdependence of nations and peoples. Geography describes the earth’s environments and gives character to places through words, maps and graphics, and this course will explore these elements and their contributions to the diversity of world geographies. Students will become aware of how the world and the earth’s people interact in local regions and in patterns around the globe.
Prerequisite: None
Corequisite: None

GEOG 1160  Global Physical Geography  3  3/0/0
Meets MnTC Goal Areas 8 and 10. This course emphasizes the interactions of biological, geographical and climactic systems in the development of the patterns of regional environments on the surface of the earth and their interactions with human activities.
Prerequisite: None
Corequisite: None

GLST 1510  Global Studies: Natural Science  3  3/0/0
Meets MnTC Goal Areas 3 and 8. This travel-abroad course combines a classroom component with a travel experience which includes scheduled academic activities in international locations as determined by the instructor. Students will study and experience unique ecosystems and biodiversity, as well as cultural and societal differences of the travel abroad location. This course includes field and lab-like activities, including a field notebook and ecosystem analysis.
Prerequisite: Permission of the instructor is required.
Corequisite: None

GOLF 1100  Rules of Golf  1  1/0/0
This course reviews the rules of golf in detail. Students develop a clear understanding of how to navigate the rule book by studying The Rules of Golf and The Decisions on the Rules of Golf. Emphasis is placed on practical hands-on application of the rules and decisions on the golf course. Proper course set-up and marking a golf course for an official USGA event are also discussed. The course prepares students to take the USGA Rules Exam.
Prerequisite: None
Corequisite: None

GOLF 1101  Golf Club Repair  1  0/1/0
This course introduces students to the art of golf club design and repair. Focus is on the technology and techniques involved, the correct processes by which clubs are properly designed and repaired, and the equipment currently available to custom design and repair in today’s industry. Custom design and repair lab setup and establishing a successful design and repair business are also discussed.
Prerequisite: None
Corequisite: None

GOLF 1102  Tournament Operations  1  1/0/0
This course provides an overview of golf tournament operations. Students establish, facilitate, design and operate a golf tournament. Emphasis is on the checklist required to operate a successful golf tournament. Calligraphy, tournament types and tournament marketing are also discussed.
Prerequisite: None
Corequisite: None

GOLF 1200  Introduction to Golf Fundamentals and Methods  3  2/1/0
This course discusses the fundamentals of golf necessary to play at the beginning recreational level. It includes discussion of rules, etiquette, equipment and terminology. The course will be a combination of classroom lecture and golf course experience.
Prerequisite: None
Corequisite: None

GOLF 2100  Pro Shop Operations and Management  3  3/0/0
This course introduces students to the role of management in golf facility operations. Emphasis is on the administration of course procedures, tee times and retail space. Pro shop operations and the impact on customer and player relations are analyzed. Player performance analysis and instructional methodology are also discussed.
Prerequisite: None
Corequisite: None

GOLF 2220  Turf Management  3  3/0/0
This course introduces students to the management of golf course turfgrass and landscaping. Focus is on the ecology of turf, maintenance operations, irrigation and the equipment necessary for course care. Pest and weed control management, chemical handling and the environmental impact of golf are also discussed.
Prerequisite: None
Corequisite: None

GOLF 2221  Soils and Fertilizers  3  2/1/0
This course is a study of soils and plant nutrition as related to golf course maintenance. Emphasis is on physical and chemical properties, water, organic matter and life of golf course soils. Process and methods of supplying nutrients to plants will be discussed.
Prerequisite: None
Corequisite: None

<td>This course introduces students to the industry of golf management, golf course landscape and horticulture. Students will also be introduced to the use, production and maintenance of ornamental plants. The course exposes students to regional golf landscape and garden center industries through lectures, field trips and guest speakers.</td>
<td></td>
<td></td>
<td></td>
<td>Meets MnTc Goal Areas 5 and 8. This course combines an on-campus component with a trip to Europe. During the on-campus portion of the course students will learn about major events in British and French history such as the French Revolution, the Napoleonic era, the War of the Roses and the reign of Henry VIII. After the on-campus component is completed, students embark on a 10-day trip to Paris and London, where they visit historical sites they studied during the on-campus portion of the course.</td>

**Course Descriptions**

**Tabular List for Diagnosis Code Assignment**

This course provides an introduction to the concepts of infection control, safe and clean environment, communication, lifespan issues, basic human care needs, home care services, goals and responsibilities of a nursing assistant/home health aide, food and meal management, nutrition, basic emergency care procedures, documentation and reporting, ethics and confidentiality, and homemaking skills. The primary focus is basic nursing care and the skills needed to safely and competently perform personal holistic care. This course meets the requirements for the Minnesota Department of Health Nursing Assistant/Home Health Aide course, and students who successfully complete the course are eligible to take the State Registry Exam for Nursing Assistant/Home Health Aide.

reading course which will emphasize critical thinking but be directed toward the academic interests of faculty and students. Each student will present a proposal for a capstone honors project at the end of the course.

Prerequisite: None
Corequisite: None

HONS 2900 Honors Capstone Seminar 1 1/0/0
Meets MnTC Goal Area 2. This course is intended to be taken by students within the Honors Program during the final semester of the program. The course is a variable content reading course which will emphasize critical thinking but be directed toward the academic interests of faculty and students. Each student will present a capstone honors project at the end of the course.

Prerequisite: None
Corequisite: None

HRES 1122 Human Resource Management 3 3/0/0
This course covers an introduction to the basic principles of human resource functions and services. It provides a background and understanding for further human resource courses.

Prerequisite: None
Corequisite: None

HRES 1126 Employee Processes 3 3/0/0
This course covers basic knowledge of the factors to be considered and the strategies used in the employment process. Topics included in this course include job analysis, job description, job postings, employment ads and interviewing.

Prerequisite: None
Corequisite: None

HRES 1130 Benefits Administration 3 3/0/0
This course covers basic knowledge and information about the various types of benefits that are typically offered by employers for their employees.

Prerequisite: None
Corequisite: None

HRES 1134 Training and Development 3 3/0/0
This course covers basic information about the characteristics of effective orientation programs and the scope of organizations, training and continuing development programs in building an effective work force.

Prerequisite: None
Corequisite: None

HRES 2204 Policy Administration 3 3/0/0
This course covers basic information and understanding of the need for human resources policies in an organization, types of policies, the process of policy formulation and how policies are used.

Prerequisite: None
Corequisite: None

HRES 2211 Wage/Salary Administration 3 3/0/0
This course covers basic knowledge and understanding of employee compensation and related federal laws.

Prerequisite: None
Corequisite: None

HRES 2224 Employee/Labor Relations 3 3/0/0
This course covers basic information about the history of labor unions, current labor laws, the current role of labor unions, workers compensation laws and the rights of employees.

Prerequisite: None
Corequisite: None

HRES 2245 Human Resources Internship 1–4 None
This course is designed to provide the student with a purposeful occupational experience in the human resources field. Each internship is an individualized experience. A training plan is created for each student in conjunction with the training site to provide experience related to the skills and knowledge acquired in the program. One credit of internship is equal to 45 hours of internship.

Prerequisite: None
Corequisite: None

HRES 2252 Human Resources Competency and Portfolio Evaluation 2 1/1/0
This course reviews and reinforces the principles covered in the Human Resource program through the development of a comprehensive student portfolio and simulated activities related to program outcomes. The course also develops knowledge of career processes and the skills needed in conducting an effective job search.

Prerequisite: None
Corequisite: None

HRES 2254 Human Resource Systems and Portfolio Evaluation 3 2/1/0
This course reviews and reinforces the principles covered in the Human Resource program through the development of a comprehensive student portfolio and simulated activities related to program outcomes and systems found in Human Resources. Students will apply basic concepts, terminology, functions and outputs needed to maintain and utilize human resource information systems in operations and strategic planning. The course also develops knowledge of career processes and the skills needed in conducting an effective job search.

Prerequisite: None
Corequisite: None

HUM 1101 Introduction to the Humanities 3 3/0/0
Meets MnTC Goal Areas 2 and 6. This course serves as a general introduction to the role that humanities such as the arts, literature and philosophy play in shaping humanity's conception of itself and society. This course serves to expand the student's knowledge of the human condition and human cultures, especially the values expressed in works of human imagination and thought.

Prerequisite: None
Corequisite: None

HUM 1105 Religion in the Humanities 3 3/0/0
Meets MnTC Goal Areas 6 and 8. This course is an exploration and study of religious expression and experience as well as an introduction to the world's major religions. The focus of the course will be on human expression of religious belief and philosophy in literature, film, music and art, and it will cover a variety of world religions including Buddhism, Hinduism, Islam, Judaism and Christianity. Throughout the course, students will explore diversity and human religious expression as a way of enhancing their global perspective.

Prerequisite: None
Corequisite: None

HUM 1110 Native American Culture 3 3/0/0
Meets MnTC Goal Areas 2, 6 and 7. This course is an interdisciplinary study of the social and cultural life of Native Americans, primarily the Plains Indians. Students consider traditional and contemporary expressions of Native peoples as well as the history from which these expressions spring, especially the impact that contact with European peoples had and continues to have on Native American ways of life.

Prerequisite: None
Corequisite: None

HUM 1120 Culture of Italy 3 3/0/0
Meets MnTC Goal Areas 6 and 8. This multidisciplinary course will introduce students to a close study of the art, drama and music of Italy. Students will develop an appreciation of the Italian culture and an understanding of the integration of the arts within the culture. Upon completion of HUM 1120, students will be eligible for GLST 1121 Humanities Italy.

Prerequisite: None
Corequisite: None

HUM 1132 Women in the Humanities 3 3/0/0
Meets MnTC Goal Areas 6 and 7. This course is a study of the contributions of women in the humanities as writers, artists and social reformers with emphasis on 20th century women. The course will incorporate individual studies of Quaker women, frontier women, African American women and Native American women.

Prerequisite: None
Corequisite: None

HUM 1134 Global Perspectives for Women 3 3/0/0
Meets MnTC Goal Areas 6 and 8. This course is a multi-disciplinary study designed to enhance international perspective on women in the humanities with emphasis on 21st century women's cultural contributions as composers, artists and social reformers. The course will incorporate studies on women of China, Latin America and Europe.

Prerequisite: None
Corequisite: None

HUM 1201 Religion and the American Experience 3 3/0/0
Meets MnTC Goal Areas 6 and 7. This course will explore the relationship between religion and the ongoing development of American culture, especially as it relates to the role diversity plays in American history, arts, entertainment and institutions. Students will explore the variety of religious traditions that have been a part of the American experience and how they impacted and adapted to a changing national identity. Topics may include Native American thought and colonialism, the part played by Protestantism in the development of American ideals, the role of race and immigration in American religious identity, and the contemporary struggle among traditional Christian thought, secularism, reclaimed primal religions and modern world religions.

Prerequisite: None
Corequisite: None

HUM 2210 Introduction to Film 3 3/0/0
Meets MnTC Goal Areas 2 and 6. This course offers students an overview of the elements that comprise telling stories on film. Students will study shot, angle, lighting, color, scene, movement, editing, sound, etc. The course will also consider how film elements work to present various ideologies. Students will become familiar with open and closed forms and the distinctions between realism, classicism and formalism. Students will participate in film analysis using the concepts above.

Prerequisite: None
Corequisite: None

HUM 2230 World Cinema 3 3/0/0
Meets MnTC Goal Areas 6 and 8. This course will introduce students to films from non-English speaking countries around the globe. The course will study stories and societies through cinema, readings and lecture. Students will consider their own worldview while they screen films and analyze multiple themes and ideas as a means of enriching their global perspective.

Prerequisite: None
Corequisite: None

HUM 2236 Technology in the Humanities 3 3/0/0
Meets MnTC Goal Areas 2, 6 and 8. Developments in the arts, architecture, science, philosophy and education and studies in human interaction are often provoked by changes in technology. Early changes in military technology made it possible for civilizations to take charge of various places on the world's stage. However, over

- HVAC 1224 Gas and Oil Heating 3 1/2/0
  This course covers residential gas and oil heating units, primarily forced air furnaces. Emphasis is on understanding the sequence of operation, proper adjustment, efficiency measurement and safety. Diagnosis and repair of malfunctioning furnaces is part of this course.
  Prerequisite: None
  Corequisite: None

- HVAC 2201 Air Handling 2 1/1/0
  The dynamics of handling fluid mass of air will be studied. The focus will be on moving and replacing air at given velocities, quantities and temperatures.
  Prerequisite: None
  Corequisite: None

- HVAC 2211 Hot Water Heating 3 2/1/0
  This course covers both hot water baseboard and in-floor heating, with emphasis on calculations involved in hydronic heating.
  Prerequisite: None
  Corequisite: None

- HVAC 2221 Heat Pump Theory and Operation 3 2/1/0
  This course will cover the various methods by which mechanical processes are used to extract heat from different sources into residential housing. Some attention to commercial methods will be offered. An example of this would be use of the compression cycle of refrigeration to extract heat from the outside air.
  Prerequisite: None
  Corequisite: None

- HVAC 2290 Heating, Ventilating, and Air Conditioning Internship 1 0/0/1
  This course will add to the student’s electrical knowledge regarding circuits and schematics.
  Prerequisite: None
  Corequisite: None

- IHS 1293 OSHA 10-Hour General Industry Safety 1 1/0/0
  This course is designed for general industry workers under the Occupational Safety and Health Administration (OSHA) 29 CFR 1910 who need to receive additional training on job site-specific hazards. Students will learn the entry-level safety training required for OSHA 10-Hour General Industry course authorization. In addition to the 10-hour mandatory requirements, students will also be trained in five hours of additional OSHA elective material.
  Prerequisite: None
  Corequisite: None

- IHS 1296 OSHA 10-Hour Construction Safety 1 1/0/0
  This course is designed for construction workers under Occupational Safety and Health Administration (OSHA) 29 CFR 1926 who need to receive additional training on job site-specific hazards. Students will learn the entry-level safety training required for OSHA 10-Hour Construction course authorization. In addition to the 10-hour mandatory requirements, students will also be trained in five hours of additional OSHA elective material.
  Prerequisite: None
  Corequisite: None

- IHS 2292 OSHA 30-Hour General Industry Safety 2 2/0/0
  This course is designed for workers under Occupational Safety and Health Administration (OSHA) 29 CFR 1910 who need to receive additional training on job site-specific hazards related to their place of employment. Students will learn the skills necessary for OSHA 30-Hour General Industry course authorization.
  Prerequisite: None
  Corequisite: None

- IHS 2297 OSHA 30-Hour Construction Safety 2 2/0/0
  This course is designed for construction workers under the Occupational Safety and Health Administration (OSHA) 29 CFR 1926 who need to receive additional training on job site-specific hazards. Students will learn the skills necessary for OSHA 30-Hour Construction course authorization.
  Prerequisite: None
  Corequisite: None

- ILS 1100 Integrative Learning Seminar I 1 1/0/0
  This course meets MnTC Goal Area 2. Students will begin to develop collegiate-level, transferable skills as they are introduced to the M State core abilities and liberal arts and sciences shared values. Students will begin to learn how to critically evaluate information and ideas, how to determine the ethical implications that come with decision making, and how to communicate effectively as they develop an understanding of course materials through written and oral exercises. Students will establish a digital folio, which will allow them to demonstrate their growing understanding and mastery of the shared values and core abilities.
  Prerequisite: Assessment into ENGL1101
  Corequisite: None

- ILS 2100 Integrative Learning Seminar II 2 2/0/0
  Meets MnTC Goal Area 2. This course provides a cohesive, integrative learning experience for liberal arts and sciences student. The student will integrate skills and knowledge developed and acquired throughout his or her course of study in the disciplines. The course requires the student to embark on a comprehensive inter-disciplinary academic quest designed to demonstrate research, oral and written communication, and critical thinking skills.
  Prerequisite: Completion of 40 credits AND ILS1100
  Corequisite: None
IMMA 1110 Introduction to Power and Mechanical Systems  3  1/2/0  
This course will provide an overview of the design, operation and maintenance principles of basic mechanical system components. The terminology, theory, application and construction of mechanical components dealing with power transfer found within the typical factory will be discussed. The course is designed to provide an understanding of the basic physics principles that govern mechanical power transmission through the use of belt, chain and gear drives, clutch and braking mechanisms, coupling devices, linear actuators and bearings.
Prerequisite: None
Corequisite: None

IMMA 1112 Mechanical Blueprint Reading  2  2/0/0  
This course will teach the fundamentals of blueprint reading and will include the interpretation of geometric construction, multi-view projection, dimensioning, auxiliary and sectional views. The course will also include the identification of drafting symbols and conventional methods of presentation.
Prerequisite: None
Corequisite: None

IMMA 2223 Fluid Power Lab  2  1/1/0  
This class teaches the skills of construction, control and operation of hydraulic and pneumatic systems coupled with electrical/electronic controls. Participants will perform hands-on experiments to construct circuits that teach the operation of individual components as well as complete systems used in real-world applications. Assemblies involving fluid power and the modern control components used to regulate it will be emphasized.
Prerequisite: MATH0052 AND An accuplacer arithmetic score of 57 or completion of Math 0052
Corequisite: None

IND 1110 Introduction to the Industrial Workplace  3  3/0/0  
This course provides an introduction to the industrial workplace focusing on the work ethic, workplace costs, project management, workplace training and problem solving.
Prerequisite: None
Corequisite: None

IND 1160 Food Manufacturing Science  3  3/0/0  
This course provides students with an introduction to the science of food manufacturing. The course will cover the cleaning and sanitizing processes involved in safe food handling. Students will learn how to identify food safety hazards and will gain an understanding of the chemical, regulatory agencies and sampling processes involved in food manufacturing.
Prerequisite: None
Corequisite: None

IND 1500 Introduction to Steel Welding  2  1/1/0  
This course will educate the student in the basic welding and cutting processes used in the welding industry. The skills developed in the lab include gas metal, gas tungsten and shielded metal arc welding processes and the oxy/fuel and plasma arc cutting processes on mild steel in the flat position. Safety in welding and cutting will be covered relating to the welding and cutting processes being used in class.
Prerequisite: None
Corequisite: None

IND 1501 Basic Steel Welding  4  1/3/0  
This course will educate the student in basic welding and cutting processes used in the welding industry. The skills developed in the lab include gas metal, gas tungsten and shielded metal arc welding processes and the oxy/fuel and plasma arc cutting processes on mild steel in the flat and horizontal positions. Safety in welding and cutting will be covered relating to the welding and cutting processes being used in class.
Prerequisite: None
Corequisite: None

IND 1502 Basic Print Reading for Welders  3  3/0/0  
In this course students will learn how to read basic engineered drawings for welders and interpret the welding symbols system. The students’ knowledge can then be applied to manufacturing, construction and repair industries.
Prerequisite: None
Corequisite: None

INTE 1100 Industry Internship Experience  3  0/0/3  
This is a three-credit internship experience designed to acquaint students with an industrial environment. This experience is designed to integrate the coursework taken and contribute to the student’s personal and/or professional career goals. The internship is a training and mentoring period in actual service or employment.
Prerequisite: None
Corequisite: None

IPP 1111 Introduction to Interpreting  3  3/0/0  
This course introduces the field of interpreting and the role of a sign language interpreter. It covers interpreting as a field of professional practice, the current nature of the field, the variety of employment opportunities, interpreter training, interpreter certification and professional ethical standards.
Prerequisite: ASL1114 AND Grade of B or better in ASL1114
Corequisite: None

IPP 1112 Beginning American Sign Language to English  3  3/0/0  
This course focuses on the process of interpreting, provides practice of necessary skills and procedures and applies aptitude and theory to the translation process. This course focuses on lexical development, syntactical language comparisons, voice production techniques, interpreting process analysis and diagnostic assessment. The course content centers on techniques for sign-to-voice interpreting.
Prerequisite: ASL1114 AND Grade of B or better in ASL1114
Corequisite: None

IPP 1113 Beginning English to American Sign Language  3  3/0/0  
This course focuses on the development of consecutive and simultaneous interpreting skills from English to American Sign Language. This course will initiate language analysis along with theoretical and practical skills related to the interpreting process. The course content centers on techniques for voice-to-sign interpreting.
Prerequisite: ASL1114 AND Grade of B or better in ASL1114
Corequisite: None

IPP 2112 Advanced American Sign Language to English  3  3/0/0  
This course provides additional practice in specific skill areas related to voice-to-sign interpreting. This course focuses on advanced lexical development, syntactical language comparisons, voice production techniques, interpreting process analysis and diagnostic assessment. The course content is at an intermediate to advanced level of speed and complexity along with voice production techniques for simultaneous sign-to-voice interpreting for increasingly complex language exchanges.
Prerequisite: IPP1112 AND Grade of B or better in IPP1112
Corequisite: None

IPP 2113 Advanced English to American Sign Language  3  3/0/0  
This course provides additional practice in specific skill areas related to voice-to-sign interpreting. This course focuses on advanced development of simultaneous interpreting skills. This course focuses on critical thinking and processing skills at an intermediate level with determining language needs within a variety of interpreting settings. The course content is at an intermediate to advanced level of speed and accuracy along with translation techniques for simultaneous English-to-American Sign Language interpreting.
Prerequisite: IPP1113 AND Grade of B or better in IPP1113
Corequisite: None

IPP 2114 Educational Interpreting  2  2/0/0  
This course introduces the role and responsibilities of an interpreter in a mainstream educational environment. This course focuses on increasing the awareness of current techniques, issues and ethics in mainstreaming education practices.
Prerequisite: IPP1111 AND Grade of B or better in IPP1111
Corequisite: None

IPP 2216 Practicum  1  0/0/1  
This course is designed to introduce various models and experiences of interpreting and to prepare for the tasks required for functioning as a professional interpreter. This course includes practical work experience observation and limited work. Students are expected to observe working interpreters in a variety of field settings.
Prerequisite: IPP1111 AND Grade of B or better in IPP1111
Corequisite: None

IPP 2217 Interpreting Internship  6  0/0/6  
This course is a supervised interpreting opportunity in an educational, community, service agency or other setting. This course includes completion of documentation, assignments for portfolio, problem solving, site orientation, student performance evaluations, observation of certified interpreters, collaboration with certified interpreters, professional job expectations and actual interpreting experience. This internship abides by the National Association of the Deaf (NAD)-Registry of Interpreter for the Deaf (RID) Code of Professional Conduct.
Prerequisite: IPP2216 AND Instructor approval
Corequisite: ASL2100 AND Grade of B or better in ASL2100

IPP 2218 Internship Seminar  1  1/0/0  
This course provides an open forum to discuss situations arising from interpreter assignments during the internship. This course focuses on final preparations for entering the interpreting field.
Prerequisite: IPP2216
Corequisite: None

ITSS 1100 Information Technology Help Desk  3  2/1/0  
This course is an introduction to information technology user support. Important skill sets involving customer service, troubleshooting, user support management, product evaluation, user support management and user training are introduced. This course also emphasizes teamwork and technical writing.
Prerequisite: None
Corequisite: None

ITSS 1120 Information Technology Research and Documentation  3  1/2/0  
Using the World Wide Web, students will research current trends and technical issues in information technology. Research topics will include software applications, hardware products, security issues, and technical problems and solutions. Students will develop technical documentation and training materials for the purpose of supporting end users. Emphasis will also be placed on refining Web searching skills to locate vendor

- **Corequisite:** None
- **Prerequisite:** None

**LEAD 1000**

This course is designed to develop self-assessment and goal-setting skills, utilizing resources and gaining an understanding of the level of commitment necessary to succeed in an academic or real-world setting.

- **Course Title:** Foundational Mathematics
- **CR:** 2/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None
- **Prerequisite:** None

**MATH 0095**

This course presents basic mathematical operations. The course concepts cover operations on whole numbers, integers, fractions and decimals, as well as the applications of percents, ratios, proportions, measurements and basic geometry.

- **Course Title:** Elementary Algebra II
- **CR:** 2/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None
- **Prerequisite:** MATH 0095

**MATH 1000**

This course presents basic mathematical topics as they are applied in a technical program. The course includes a review of basic mathematical operations and continues the development of algebraic and trigonometric skills in a technical setting. Most concepts will be applied through course-specific problems. This course is not an MnTC Goal Area 3 mathematics course, nor does it prepare students for taking an MnTC Goal Area 3 mathematics course.

- **Course Title:** Intermediate Algebra
- **CR:** 3/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** MATH 0095

**MATH 1100**

This course presents basic mathematical topics as they are applied in a technical program. The course includes a review of basic mathematical operations and continues the development of algebraic and trigonometric skills in a technical setting. Most concepts will be applied through course-specific problems. This course is not an MnTC Goal Area 4 mathematics course, nor does it prepare students for taking an MnTC Goal Area 4 mathematics course.

- **Course Title:** World of Math
- **CR:** 3/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1102**

This course is an introduction to systems of linear equations and inequalities, matrices, linear programming, mathematics of finance and elementary probability and statistics. This course is intended for all liberal arts and science students, but is highly recommended for students in areas of management, health sciences and other applied technologies.

- **Course Title:** Finite Math
- **CR:** 3/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1114**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Professional Standards and Practices
- **CR:** 3/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** ITSS 1100

**ITSS 2200**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Supporting End-User Applications
- **CR:** 3/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** ITSS 1100

**MATH 1118**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Precalculus
- **CR:** 5/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1122**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Calculus I
- **CR:** 5/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1207**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Elementary Statistics
- **CR:** 3/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1213**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Introduction to Statistics
- **CR:** 4/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 2200**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Principles of Arithmetic
- **CR:** 3/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1115**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Functions/Trigonometry
- **CR:** 4/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1116**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** College Trigonometry
- **CR:** 3/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1118**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Precalculus
- **CR:** 5/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1122**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Calculus I
- **CR:** 5/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1207**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Elementary Statistics
- **CR:** 3/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 1213**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

- **Course Title:** Introduction to Statistics
- **CR:** 4/0/0
- **Lec/Lab/OJT:** None
- **Corequisite:** None

**MATH 2200**

This course is designed to explore ethical issues, procedural matters and policy concerns that impact how information technology professionals can apply when considering the best options for dealing with such issues as privacy, intellectual property, data use and the ethical and legal obligations of IT specialists. Students will learn how good business practices and strong ethical decision-making can have a positive impact on an organization and society in general.

</table>
METH 1150 Pathophysiology, Pharmacology and Nutrition 4 4/0/0
This course covers pathophysiology, pharmacology and nutrition as related to body systems. This will include designs, symptoms and etiology of pathology as well as appropriate drug uses, effects, dangers and precautions as well as routes of administration, dilutions and calculations, management and control. Students will review common prescription abbreviations, forms of medications and basic drug categories.
Prerequisite: None
Corequisite: None
METH 1240 Clinical Procedures I 4 2/2/0
This course develops basic clinical and laboratory skills. Emphasis will be placed on lab safety and proper usage of personal protective equipment. Course topics include patient preparation and care, managing diagnostic testing, electrocardiography and pulmonary function testing.
Prerequisite: American Heart Association Health Care Provider CPR
Corequisite: None
METH 1260 Clinical Procedures II 4 2/2/0
This course further develops clinical skills for the medical assistant. Students will perform venipunctures and capillary punctures and perform medication administration techniques. Additionally, students will collect and test specimens using proper specimen-handling procedures as dictated by the Clinical and Laboratory Standards Institute (CLSI).
Prerequisite: MEDA1150
Corequisite: None
METH 1600 Medical Assisting externship 5 1/0/4
Students will complete a practicum in a health care facility. Students will function as a member of a health care team, applying skills learned throughout the program.
Prerequisite: MEDA1620
Corequisite: None
METC 1112 Manufacturing Processes 4 2/2/0
This course teaches the fundamentals of traditional and non-traditional manufacturing processes including mass reducing, mass conserving, joining, material treatment and surface treatment processes. Hands-on experiences in laboratories provides class participants with basic skills in machining, welding and wood processing technologies.
Prerequisite: None
Corequisite: None
METC 1152 Safety and Accident Prevent 3 3/0/0
This course is designed to explore the principles and practices of health and safety in the industrial environment. Topics covered include regulations of the Environmental Protection Agency (EPA), Occupational Safety and Health Act (OSHA and MNOSHA), legal considerations, current legislation, product safety, hazard materials, infection control and employee protection.
Prerequisite: None
Corequisite: None
METC 2208 Basic Electricity and Electronics 3 2/1/0
This course surveys the fundamentals of electricity and electronics including electrical/electronic components, AC/DC circuits, electronic devices and applications, basic electronic circuits, and electronic communication and data systems.
Prerequisite: None
Corequisite: None
MIS 1100 Business Computers 3 2/1/0
Students will utilize business computer software applications including word processing, spreadsheets, databases and presentation software to solve business problems emphasizing professional design and organization. Additional topics include basic computer hardware, computer security and ethics, privacy concerns and professional communication standards.
Prerequisite: None
Corequisite: None
MKTG 1050 Direct Selling 3 3/0/0
The success of an entrepreneurial venture is directly related to entrepreneur’s ability to constantly and consistently sell. The student will learn the three vital aspects of small-business selling, including one-on-one selling, presentation selling and creating win/win negotiations. Even if the student has never sold before, he or she will become proficient at all aspects of the sales, presentation and negotiation process. Students will have the opportunity to practice multiple aspects of direct selling in a safe classroom environment. In addition, the student will develop specific sales strategies with other members of the class.
Prerequisite: None
Corequisite: None
MKTG 1106 Professional Selling 3 3/0/0
This course covers a foundations sales approach that can be used as a foundation for future sales courses. The content covers steps used to plan a sales presentation and methods of determining and filling prospect needs or wants.
Prerequisite: None
Corequisite: None
MKTG 1110 Customer Service 3 3/0/0
Customer service can determine both a company’s and an employee’s success or failure. This course covers the skills necessary for an individual to build and maintain customer loyalty. Strategies needed to sustain a positive work environment will be identified. Evaluating and improving customer service systems, from traditional customer satisfaction measurement tools to technology-based customer relationship management systems (CRM), will be explored.
Prerequisite: None
Corequisite: None
MKTG 1116 Advertising and Promotion 3 3/0/0
This course focuses on the role of promotion within the marketing plan of an organization. Students will study advertising trends that influence an organization’s promotional strategy. Emphasis will be placed on current advertising media, costs, budgeting, ad development and evaluation. This course will have an active learning environment. Students will create and present a promotional campaign.
Prerequisite: None
Corequisite: None
MKTG 1120 Supervisory Leadership 3 3/0/0
The methods and techniques of leadership and supervision and their applications are emphasized in this course. The content covers such topics as delegation, motivation, training, orienting, evaluating and effectively increasing productivity.
Prerequisite: None
Corequisite: None
MKTG 1128 Business Insights 1 1/0/0
Examination of the marketing industry from manufacturing to the final product is covered in this course. Students analyze the impact of current trends, the economy and technology in the marketplace.
Prerequisite: None
Corequisite: None
MKTG 1130 Leadership Ethics 3 3/0/0
This course is designed to help the individual determine what constitutes ethical issues and gain insight into how an individual can cope with conflicts between personal values and those of the organization where he or she works.
Prerequisite: None
Corequisite: None
MKTG 1138 Leadership Development I 1 1/0/0
This course encourages the personal and professional growth of the student. Emphasis is placed on the development of skills in decision making, problem solving, communications, professionalism and leadership.
Prerequisite: None
Corequisite: None
MKTG 1200 Introduction to Social Media 3 3/0/0
This course provides students with an introduction to several popular social media sites. Emphasis is on how to use social media platforms to successfully market your business and/or products. Special attention will be paid to when this type of marketing is most effective, how to select the most effective social media outlet for your particular target demographic and tracking results.
Prerequisite: None
Corequisite: CPTR1104
MKTG 1210 InDesign 3 3/0/0
This course introduces students to digital page layout using Adobe InDesign. This course is for anyone who has to prepare professional business publications. Students will learn how to set type and use digital images to produce effective printed business publications including newsletters, advertising flyers, business forms, brochures, manuals and catalogs. Students will learn how to create and modify pdf files for electronic distribution of publications.
Prerequisite: CPTR1104
Corequisite: None
MKTG 1280 Search Engine Optimization 3 3/0/0
This introductory class will focus on the Internet marketing strategy of Search Engine Optimization (SEO). It will cover how search engines work, what people search for, the actual search terms or keywords typed into search engines and which search engines are preferred by their targeted audience. Optimizing a website may involve editing its content and HTML and associated coding to both increase its relevance to specific keywords and to remove barriers to the indexing activities of search engines.
Prerequisite: INTD1108 AND CPTR1104
Corequisite: INTD1108 AND CPTR1104
MKTG 2204 Advanced Professional Selling 3 2/1/0
This course provides opportunity for the student to apply the steps of a sales presentation by planning and performing sales presentations in role-playing situations. The student applies strategies in sales communications, customer-oriented selling and sales management.
Prerequisite: MKTG1106
Corequisite: None
MKTG 2206 Sales Management 3 2/1/0
This is an advanced management course that focuses on sales force planning, implementation and control. This course covers the managerial topics of sales planning, staffing, training and directing, as well as analyzing and evaluating the sales force.
Prerequisite: MKTG1106
Corequisite: None
MKTG 2214 E-Marketing 3 3/0/0
This course examines emerging electronic technologies and their impact on a firm’s marketing strategy. Emphasis is placed on trends in e-marketing as well as the unique...
opportunities and challenges faced in the electronic environment. Students will apply the principles of traditional marketing mix to an electronic marketing strategy.  
Prerequisite: MKTG1100 OR MKTG2206  
Corequisite: None

MKTG 2218 Retail Management 3 3/0/0  
Class emphasis is on the strategic decisions made by retailers and how those decisions impact how, when, where and in what quantities customers will buy. Emphasis is also on hands-on application of the theories and principles introduced in class. Topics include using professional retailing terminology, analyzing environmental influences and identifying how retailers can appropriately respond to those influences as they make operational decisions such as site selection, determining merchandising practices, managing inventory and determining pricing strategies.  
Prerequisite: None  
Corequisite: None

MKTG 2222 Human Resource Management 3 3/0/0  
The purpose of this course is to acquaint the student with the importance of human resource management in contributing to the achievement of an organization's objectives. The content addresses techniques and legal aspects of recruiting, hiring, firing, promotion, documentation, evaluation and other aspects essential to the personnel function.  
Prerequisite: None  
Corequisite: None

MKTG 2230 Marketing Research 3 2/1/0  
This course covers market research principles and procedures that are necessary for marketing professionals to be successful. Topics covered include survey methods and techniques, problem identification, data collection techniques, sample type and size, presentation of findings and using the Internet as a source.  
Prerequisite: None  
Corequisite: None

MKTG 2232 Marketing Management 3 2/1/0  
This is a capstone course designed to be taken near the completion of the required marketing courses and is designed to integrate learning acquired in prior marketing courses with an emphasis on strategic marketing planning. This class will involve all aspects of developing a comprehensive marketing plan for a product or service. Students will work in teams to research, develop and present a marketing strategy for a new product.  
Prerequisite: BUS2206  
Corequisite: None

MKTG 2234 Computer Marketing Applications 3 2/1/0  
This course challenges students to produce computer projects using spreadsheets, databases and graphics word processing. The emphasis is on documents produced by marketing departments and marketing firms. The student plan, creates, prints and evaluates projects individually and with a team.  
Prerequisite: None  
Corequisite: None

MKTG 2236 Small Business Management 3 3/0/0  
This course provides a summary of many of the major issues faced by anyone starting a small business. The course teaches the fundamentals of small business management by blending basic management principles with tested and proven real world techniques for planning, organizing, operating a small business successfully. The course utilizes a variety of learning tools including the textbook, PowerPoint, lectures, written assignments, cases, websites and hands-on activities.  
Prerequisite: ACCT1012 OR ACCT2211  
Corequisite: None

MKTG 2250 Strategic Selling and Account Management 3 2/1/0  
This is an advanced sales course designed to explore and apply proven business practices that are currently being used in the field by sales professionals. Its focus is business-to-business, face-to-face personal selling. Key elements include strategic planning to prepare for sales calls, making sales calls, communicating proposed solutions, overcoming objections and closing sales. Other elements include understanding organizational structure, business-to-business buying behavior, and understanding and influencing multiple decision makers.  
Prerequisite: MKTG1106 AND MKTG2204  
Corequisite: None

MKTG 2290 Management, Marketing and Sales Internship 3 0/0/3  
This course is designed to provide students with valuable work experience within a business environment. This career enrichment course is designed to integrate the coursework taken and contribute to the student's personal and/or professional career goals. Each internship is a faculty-approved, individualized experience designed with a training plan to meet the professional goals of the student. Emphasis is on providing a relevant work experience that is meaningful for the student and a benefit for the participating organization.  
Prerequisite: Program Faculty Consent.  
Corequisite: None

MKTG 2292 Supervised Occupational Experience 3 0/0/3  
This course is designed to provide students with an opportunity to explore career paths in the business field while gaining practical work experience. Emphasis will be placed on tailoring the experience to enhance an individual student's professional and personal skills. This class is designed for maximum flexibility so the experience is meaningful for the student and of benefit to the participating business or organization. This experiential learning allows students to gain insight into one or more careers through job shadowing, service learning, volunteering, externships, event planning, work experience or a combination of these options. This class will include career exploration information as well as work experience to help students clarify their values, personal goals and career interests.  
Prerequisite: Instructor Approval  
Corequisite: None

MKTG 2298 Small Business Plan Development 2 1/1/0  
This course covers the steps in preparing a business plan. Each student creates a business plan based on a personal business selection.  
Prerequisite: None  
Corequisite: None

MKTG 2400 Marketing Management 4 3/1/0  
This capstone course is designed to be taken near the completion of the required marketing courses. This course is designed to integrate learning acquired in prior marketing courses with an emphasis on strategic marketing planning. This class will involve all aspects of developing a comprehensive marketing plan for a product or service. Students will work in teams to research, develop and present a marketing strategy for a new product.  
Prerequisite: BUS2206  
Corequisite: None

MKTG 2404 Management Strategy 3 3/0/0  
From a management perspective, students will study strategic management concepts and analytical techniques. Students will learn how to improve managerial decision making by using a case study format to assess business opportunities and formulate effective strategies which will enhance the long-term performance of the organization. The class is intended to integrate previous program coursework. This capstone course should be taken during the student's final semester.  
Prerequisite: ACCT1012 AND MKTG1100 AND MKTG2200 OR ACCT2211 AND MKTG1100 AND MKTG2200 OR ACCT1012 AND MKTG1100 AND MKTG2200 OR ACCT1012 AND BUS2204 AND BUS2206 OR ACCT2211 AND BUS2204 AND MKTG2200 OR ACCT2211 AND BUS2204 AND BUS2206  
Corequisite: None

MKTG 2410 Marketing, Management, and Sales Capstone 3 3/0/0  
The primary role of this capstone course is to provide students an opportunity to integrate the knowledge that they have acquired in program coursework into business situations. Emphasis will be on the integration of key concepts covered in marketing, management, business and communication courses. Students will apply managerial decision making by assessing a business opportunity and formulating strategies to improve the performance of an organization. This class requires students to make connections between ideas and experiences and to synthesize and transfer learning to new, complex business situations.  
Prerequisite: BUS2204 AND BUS2206 AND MKTG2204  
Corequisite: None

MLT 1110 Phlebotomy Skills 2 1/1/0  
This course is designed for phlebotomy and medical laboratory technician students. The course covers knowledge and performance of venipuncture, capillary and arterial blood draws. It also emphasizes other body fluid collection, specimen processing, point-of-care analysis and specimen storage.  
Prerequisite: Admission to either the Medical Laboratory Technician or the Phlebotomy Technician program.  
Corequisite: None

MLT 1112 Clinical Phlebotomy 3 0/3/0  
This course provides clinical phlebotomy experience for phlebotomy technician students in an affiliate hospital/clinic laboratory under the supervision of qualified technicians and technologists. Training includes blood and body fluid collection, processing and storage.  
Prerequisite: None  
Corequisite: MLT1110

MLT 1115 Basic Laboratory Techniques 2 1/1/0  
This is an introductory course to phlebotomy and medical laboratory professions. Emphasis of this course includes safety, universal precautions, infection control, first aid and OSHA requirements. A discussion of the role of the phlebotomist, medical laboratory technician and other health care personnel is presented. Other topics include chemical and water quality, laboratory glassware, basic laboratory equipment, quality assurance, quality control, ordering laboratory supplies, laboratory information systems and laboratory math. This course is a corequisite or prerequisite to all other MLT courses.  
Prerequisite: Admission to either the Medical Laboratory Technician or the Phlebotomy Technician program.  
Corequisite: None

MLT 1123 Immunohematology 4 3/1/0  
This course is an introduction to the clinical area of blood banking. The course covers compatibility theory, principles of antigens on red blood cells and antibodies in serum of blood. The course also includes blood typing and other basic immunohematological procedures.  
Prerequisite: MLT1115 AND Admission to MLT program.  
Corequisite: None

MLT 1215 Hematology 3 2/1/0  
This is an introductory course for Medical Laboratory Technician students covering the production, maturation, function and abnormalities of blood cells and coagulation.

To maintain body homeostasis, the course covers routine hematology procedures to identify normal, abnormal and immature cells. The course also covers coagulation procedures to detect deficiencies and abnormal conditions of blood clotting.

- **Prerequisite:** MLT1115 OR MLT1113 AND MLT1114
- **Corequisite:** None

This is an introductory course for Medical Laboratory Technician students. The course is an overview of the urinary system including abnormalities and diseases. The course also covers collection, handling, storage and analysis of urine. The course also includes study of other body fluids including cerebral spinal fluid, amniotic fluid, serous fluid, synovial fluid, sputum, semen and feces.

- **Prerequisite:** Admission to the MLT program AND MLT1115 OR MLT1114 AND MLT1113 AND Admission to the MLT program
- **Corequisite:** None

This is an introductory course for Medical Laboratory Technician students which covers the analytical principles, techniques and correlation of results in the science of body chemistry. Other topics included in the course are instrumentation, calculations, preparation of reagents, quality assurance and quality control, specimen collection, transportation, analysis and result reporting.

- **Prerequisite:** MLT1115 AND CHEM1100 AND Admission to MLT program. AND Or Chem 1101 Or Chem 1111
- **Corequisite:** None

This is a clinical experience at an affiliate hospital laboratory under the supervision of qualified laboratory personnel. Students perform tests on cells in the blood and body fluids. The course also covers principles and procedures for coagulation studies.

- **Prerequisite:** ZOO1122
- **Corequisite:** None

This course provides a clinical experience in the chemistry laboratory at an affiliate hospital. Students learn to perform body chemistry methods on automated and semi-automated instruments under the supervision of qualified laboratory personnel. The course also includes clinical experience in special chemistry testing including hormones, vitamins, therapeutic drug monitoring and drugs of abuse.

- **Prerequisite:** CHEM1105
- **Corequisite:** None

This course provides a clinical experience at an affiliate hospital that covers bacterial identification methods with laboratory personnel supervision. The course also covers immunological and serological testing of body fluids.

- **Prerequisite:** CHEM1104 AND ZOO1122 AND ZOO1123 AND ZOO1126 AND BIOL2268 AND BIOL2267
- **Corequisite:** None

This course is a clinical experience in the chemistry department of an affiliate hospital under the supervision of qualified laboratory personnel. Students will learn to perform body fluid chemistry methods on automated and semi-automated instruments. The course also includes clinical experience in special chemistry testing including hormones, vitamins, therapeutic drug monitoring and drugs of abuse.

- **Prerequisite:** BIOL2265
- **Corequisite:** None

This course provides instruction and study in the areas of bacteriology, mycology and parasitology. It provides the opportunity to integrate theory with practice since it is part of a supervised student experience at a health care facility.

- **Prerequisite:** BIOL2265
- **Corequisite:** None

This course is intended to broaden the learner’s knowledge and skills and procedures performed in a health care facility laboratory. The MLT student will also develop a career plan, exploring the clinical laboratory field and relating these findings to the development of a financial plan.

- **Prerequisite:** MLT1110 AND ZOO1122 AND ZOO1123
- **Corequisite:** None

This course is intended for Medical Laboratory Technician students and other health professionals. Topics covered include principles of antigens, antibodies and their application in health, disease and serological laboratory procedures. The course emphasizes testing and disease diagnosis of disorders such as hepatitis, acquired immune deficiency syndrome, lupus, rheumatoid arthritis, Lyme disease, syphilis, infectious mononucleosis and streptococcal infections.

- **Prerequisite:** MLT1215 AND MLT1115 OR ZOO1122 AND MLT1113 AND MLT1114
- **Corequisite:** None

This is an introductory course for Medical Laboratory Technician students which covers the analytical principles, techniques and correlation of results in the science of body chemistry. Other topics included in the course are instrumentation, calculations, preparation of reagents, quality assurance and quality control, specimen collection, transportation, analysis and result reporting.

- **Prerequisite:** MLT1115 AND CHEM1100 AND MLT1125 AND MLT1114 OR CHEM101 OR CHEM1111
- **Corequisite:** None

</table>

MUSC 1131 | Civic Orchestra | 1 | 1/0/0 |
| Meets MnTC Goal Area 6F. This Civic Orchestra is a community orchestra that performs one concert each semester. The group meets one evening per week on a regularly scheduled basis. May be repeated for credit. |    |             |
| Corequisite: None |    |             |

MUSC 1135 | Voice Ensemble | 1 | 1/0/0 |
| Meets MnTC Goal Area 6F. The voice ensemble is an auditioned choir (from the M State Concert Choir) meeting two hours per week on a regularly scheduled basis. This group will study and prepare music from various musical periods and geographic regions and performs a minimum of one concert each semester. This group also participates in campus life venues as they arise, MCC Fine Arts Festival and occasional area tours. May be repeated for credit. |    |             |
| Corequisite: None |    |             |

MUSC 1141 | Concert Choir | 1 | 1/0/0 |
| Meets MnTC Goal Area 6F. The M State choir is a non-auditioned group that meets four times per week on a regularly scheduled basis. The group will study and prepare music from various musical periods and geographic regions and performs a minimum of one concert each semester. The group will also participate in campus life venues as they arise, the MCC Fine Arts Festival and occasional area tours. |    |             |
| Corequisite: None |    |             |

MUSC 1150 | History of Jazz | 3 | 3/0/0 |
| Meets MnTC Goal Area 6. This survey of jazz music itself, students will learn about the styles within jazz and the prominent performers from the birth of the blues and ragtime through jazz-rock fusion to the new age, smooth, acid and hip-hop jazz styles of today. Jazz music is uniquely American in origin, and the effects that society and jazz music have had on each other will be explored. |    |             |
| Prerequisite: None |    |             |
| Corequisite: None |    |             |

MUSC 1151 | Individual Voice Lessons | 1 | 1/0/0 |
| Meets MnTC Goal Area 6F. Students interested in individual voice lessons should contact the music department so that instruction can be arranged. There is an additional fee. May be repeated for credit. |    |             |
| Prerequisite: None |    |             |
| Corequisite: None |    |             |

MUSC 1160 | Music Business: Creating and Promoting Music | 3 | 3/0/0 |
| Meets MnTC Goal Area 6. Students study and prepare music in various contemporary music styles. Special emphasis will be given to jazz improvisation as an integral part of this music. |    |             |
| Enrollment open to any instrumentalist at the discretion of the instructor. May be repeated for credit. |    |             |
| Prerequisite: None |    |             |
| Corequisite: None |    |             |

MUSC 1162 | Jazz Ensemble | 1 | 1/0/0 |
| Meets MnTC Goal Area 6. The Jazz Ensemble meets on a weekly basis, studies and prepares music in the various styles of jazz and performs one concert each semester. The group will study and prepare music from a wide range of composers and styles and performs a minimum of one concert each semester. The group will also participate in campus life venues, festivals and occasional area tours. Small ensemble performances will also be included in this experience. May be repeated for credit. |    |             |
| Prerequisite: None |    |             |
| Corequisite: None |    |             |

MUSC 1164 | Concert Band | 1 | 1/0/0 |
| Meets MnTC Goal Area 6F. The M State Concert Band is an instrumental group that meets three times per week on a regularly scheduled basis. The group will study and prepare music from a wide range of composers and styles and performs a minimum of one concert each semester. This ensemble will participate in sporting events, campus life venues and other events. May be repeated for credit. |    |             |
| Prerequisite: None |    |             |
| Corequisite: None |    |             |

MUSC 1168 | Pep Band | 1 | 1/0/0 |
| Meets MnTC Goal Area 6F. The M State Pep Band is an instrumental group that meets two times per week on a regularly scheduled basis. The group will study and prepare music from a wide range of composers and styles and performs a minimum of one concert each semester. |    |             |
| Prerequisite: None |    |             |
| Corequisite: None |    |             |

Minnesota State Community and Technical College
Course Catalog 2017-2018
877.450.3322
Course # | Course Title | CR | Lec/Lab/OJT
--- | --- | --- | ---
NURS 2437 | Nursing Clinical II | 4 | 0/0/0

This course introduces the basic knowledge and skills required of paralegals. Students will learn the basics of the American legal system along with skills such as researching legal issues, interviewing clients and witnesses, and drafting motions and pleadings. By the end of this course, students will have a clear understanding of what a paralegal does, the skills needed to be a successful paralegal and what it will take to begin a career as a paralegal.

Prerequisite: NURS1415 AND NURS1416 AND NURS1426 AND BIOL2262 AND BIOL2263 AND CHEM1100 OR LPN AND NURS2410

Corequisite: None

PARA 1101 | Introduction to Paralegal | 3 | 0/0/0

This course provides an in-depth study of the practice of law, regulation of paralegals, ethical codes and rules.

Prerequisite: None

Corequisite: None

PARA 2202 | Legal Research and Writing II | 3 | 0/0/0

This course will examine the law dealing with interest in, ownership of and title to real estate. Emphasis will be placed on legal descriptions, recording systems, procedures and documents for real property transfer and zoning of real property.

Prerequisite: None

Corequisite: None

PARA 2210 | Advanced Paralegal Practices | 3 | 0/0/0

This course prepares the paralegal for working with civil litigation and its associated processes. Included in the study are rules for civil procedure, court and non-court processes, applicable appellate procedures, mediation, arbitration and the role of the paralegal as it relates to civil law.

Prerequisite: None

Corequisite: None

PARA 1105 | Criminal Law for Paralegals | 3 | 0/0/0

This course provides the professional paralegal with opportunities to manage information for diverse patient populations including care planning delegation, supervision, prioritization of care and decision making. Students will learn the principles of law related to nursing practice and legal issues. Students will also learn the basics of the American legal system along with skills such as researching legal issues, interviewing clients and witnesses, and drafting motions and pleadings. By the end of this course, students will have a clear understanding of what a paralegal does, the skills needed to be a successful paralegal and what it will take to begin a career as a paralegal.

Prerequisite: None

Corequisite: None

PARA 1112 | Legal Ethics for the Paralegal | 3 | 0/0/0

This course examines the law dealing with interest in, ownership of and title to real estate. Emphasis will be placed on legal descriptions, recording systems, procedures and documents for real property transfer and zoning of real property.

Prerequisite: None

Corequisite: None

PARA 2204 | Real Property | 3 | 0/0/0

This course prepares the paralegal for working with civil litigation and its associated processes. Included in the study are rules for civil procedure, court and non-court processes, applicable appellate procedures, mediation, arbitration and the role of the paralegal as it relates to civil law.

Prerequisite: None

Corequisite: None

PARA 2212 | Family Law | 3 | 0/0/0

This course explores the legal issues related to the practice of law, regulation of paralegals, ethical codes and rules.

Prerequisite: None

Corequisite: None

PARA 2216 | Paralegal Internship | 3 | 0/0/0

This course explores the legal issues related to the practice of law, regulation of paralegals, ethical codes and rules.

Prerequisite: None

Corequisite: None

OPT 1100 | Introduction to Fiber Optics | 3 | 0/0/0

This course introduces the student to industry standards governing fiber to the desk (FTTD), fiber to the home (FTTH) and local wide area network (LAN/WAN) fiber networks, and further introduces the student to basic fusion and mechanical splicing. Students will learn the basics of how to identify fiber types, recognize various connectors used in fiber installation and install, terminate, splice and properly test installed fiber cable to existing standards.

Prerequisite: None

Corequisite: None

NURS 2438 | Restorative Nursing I | 4 | 0/0/0

Restorative Nursing I is designed to prepare students to plan nursing care for diverse patients experiencing disorders of the neurological, sensory, musculoskeletal, endocrine, immunological, hematological and gastrointestinal systems. Emphasis is placed on patient-centered care, nursing judgment/evidence-based care, safety and pharmacology.

Prerequisite: NURS1415 AND NURS1416 AND NURS1426 AND BIOL2262 AND BIOL2263 AND CHEM1100 OR LPN AND NURS2410

Corequisite: None

NURS 2440 | Restorative Nursing II | 3 | 0/0/0

This course prepares students to plan nursing care for diverse patients experiencing disorders of the cardiovascular, respiratory, renal, fluids/electrolytes/acid/base and integumentary systems. Emphasis is placed on patient-centered care, nursing judgment/evidence-based care, safety and pharmacology.

Prerequisite: NURS2437 AND NURS2426 AND NURS2438 AND NURS2455 AND BIOL2202 AND current American Heart Association Basic Life Support AND current, clear Minnesota Department of Health criminal background check AND current, clear national background check AND up-to-date immunizations and health form.

Corequisite: None

NURS 2447 | Restorative Nursing II | 4 | 0/0/0

This course prepares students to plan nursing care for diverse patients experiencing disorders of the cardiovascular, respiratory, renal, fluids/electrolytes/acid/base and integumentary systems. Emphasis is placed on patient-centered care, nursing judgment/evidence-based care, safety and pharmacology.

Prerequisite: NURS1415 AND NURS1416 AND NURS1426 AND BIOL2262 AND BIOL2263 AND CHEM1100 OR LPN AND NURS2410

Corequisite: None

NURS 2448 | Restorative Nursing II | 3 | 0/0/0

This course prepares students to plan nursing care for diverse patients experiencing disorders of the cardiovascular, respiratory, renal, fluids/electrolytes/acid/base and integumentary systems. Emphasis is placed on patient-centered care, nursing judgment/evidence-based care, safety and pharmacology.

Prerequisite: NURS2438 AND NURS2437 AND NURS2426 AND NURS2455 AND BIOL2202

Corequisite: None

NURS 2455 | Advanced Intravenous Therapy | 0/1/0

This course prepares the student to industry standards governing fiber to the desk (FTTD), fiber to the home (FTTH) and local wide area network (LAN/WAN) fiber networks, and further introduces the student to basic fusion and mechanical splicing. Students will learn the basics of how to identify fiber types, recognize various connectors used in fiber installation and install, terminate, splice and properly test installed fiber cable to existing standards.

Prerequisite: NURS1415 AND NURS1416 AND NURS1426 AND BIOL2262 AND BIOL2263 AND CHEM1100 OR LPN AND NURS2410

Corequisite: None

NURS 2464 | Nursing Leadership | 1 | 0/0/0

This course is designed to prepare leaders for the role of nurse leaders. Areas of focus include knowledge and skills necessary to make decisions regarding setting priorities, delegation, supervision, management, supervision, teaching, continuity of care, legal parameters of nursing practice and ethical issues in nursing.

Prerequisite: NURS2437

Corequisite: None

NURS 2466 | Mental Health Nursing | 2 | 0/0/0

This course is designed to prepare leaders for the role of nurse leaders. Areas of focus include knowledge and skills necessary to make decisions regarding setting priorities, delegation, supervision, management, supervision, teaching, continuity of care, legal parameters of nursing practice and ethical issues in nursing.

Prerequisite: NURS2437

Corequisite: None

OPT 1100 | Introduction to Fiber Optics | 3 | 2/0/0

This course introduces the student to industry standards governing fiber to the desk (FTTD), fiber to the home (FTTH) and local wide area network (LAN/WAN) fiber networks, and further introduces the student to basic fusion and mechanical splicing. Students will learn the basics of how to identify fiber types, recognize various connectors used in fiber installation and install, terminate, splice and properly test installed fiber cable to existing standards.

Prerequisite: None

Corequisite: None

This course is designed to help first-year M State students transition into college life. Topics include, but are not limited to, accessing college resources, understanding college guidelines, expectations and demands of being a college student, and community awareness. The class also will cover money management, proper nutrition and stress management. Students will participate in on-campus activities and community tours, and be exposed to expert guest speakers from the college and community. Students will set goals, examine learning styles and put in place a strategy for collegiate success.

**Prerequisite:** None

**Corequisite:** None

This course is designed to help M State students strengthen and develop critical and creative thinking skills associated with a college academic experience, make social adaptations to a new environment and make connections with faculty, staff and resource offices. Topics include an understanding of individual risks and barriers, time management and personal responsibility. This class is also designed to develop student awareness of how to live a healthy, holistic lifestyle. Students will be able to deepen their understanding with regards to social, emotional, intellectual, vocational and physical elements of self-development. Students will also participate in physical activities that promote a healthy, drug-free on-campus environment. Additional topics to be discussed may include but are not limited to goal setting, stress management, and drug and alcohol use.

**Prerequisite:** None

**Corequisite:** None

This course provides the student with the knowledge to teach the fundamentals of baseball. The purposes of this course is for students who want to compete in varsity baseball at the collegiate level. The course presents students with numerous opportunities in a variety of situations to learn and develop characteristics of high achievement and physical skills in a competitive environment. This class may be repeated once for credit.

**Prerequisite:** None

**Corequisite:** None

This course presents students with numerous opportunities in a variety of situations to learn and develop their self-image, characteristics of high achievement and physical skills in a competitive basketball environment. This class may be repeated once for credit.

**Prerequisite:** None

**Corequisite:** None

This course presents students with numerous opportunities in a variety of situations to learn and develop characteristics of high achievement and physical skills in a competitive environment. May be repeated once for credit.

**Prerequisite:** None

**Corequisite:** None

Prerequisite: Approval by Instructor

Corequisite: None
**Course #** | **Course Title** | **CR** | **Lec/Lab/OJT**
--- | --- | --- | ---
PE 2192 | Varsity Basketball I | 1 | 0/1/0

This course is for student athletes who are in their second year of varsity basketball eligibility. Student athletes will be provided with an expanded experience that comes with being a second-season participant. The student athlete will have an expanded leadership and mentoring role.

**Prerequisite:** The participants of this class must be approved by the head basketball coach.

**Corequisite:** None

PE 2193 | Varsity Baseball II | 1 | 0/1/0

This course is for student athletes who are in their second year of baseball athletic eligibility. This course will provide the student athletes with an expanded experience that comes with being a second-year participant. The student athletes may have an expanded leadership role, mentoring opportunities for freshman students and an opportunity to promote themselves for recruitment to a different institution.

**Prerequisite:** Approval by instructor is required.

**Corequisite:** None

PE 2194 | Varsity Golf II | 1 | 0/1/0

This course is for student athletes who are in their second year of varsity golf eligibility. Student athletes will be provided with an enhanced experience that comes with being a second-season participant. The student athlete may have an expanded leadership and mentoring role.

**Prerequisite:** The participants of this class must be approved by the head golf coach.

**Corequisite:** None

PE 2197 | Varsity Volleyball II | 1 | 0/1/0

This course is for student athletes who are in their second year of varsity volleyball eligibility. Student athletes will be provided with an enhanced experience that comes with being a second-season participant. The student athlete may have an expanded leadership and mentoring role.

**Prerequisite:** The participants of this class must be approved by the head volleyball coach.

**Corequisite:** None

PE 2199 | Varsity Softball II | 1 | 0/1/0

This course is for student athletes who are in their second year of varsity softball eligibility. Student athletes will be provided with an enhanced experience that comes with being a second-season participant. The student athlete may have an expanded leadership and mentoring role.

**Prerequisite:** The participants of this class must be approved by the head softball coach.

**Corequisite:** None

PE 2201 | Lifeguard Water Safety | 2 | 1/1/0

This course focuses on lifeguarding skills, first aid, cardiopulmonary resuscitation (CPR) and automated external defibrillator (AED) skills. This course has no prerequisites, but students will be required to demonstrate strong swimming skills within the first week of the course, based on Red Cross definitions. Students who complete this course will be eligible to take the Red Cross lifeguard exam.

**Prerequisite:** None

**Corequisite:** None

PE 2211 | Water Safety Instructor | 2 | 1/1/0

This course prepares students to become water safety instructors and to teach Red Cross swimming lessons to all levels and ages. Students must be at least 16 years old by the last day of the course.

**Prerequisite:** Students must be at least 16 years old by the last day of the course.

**Corequisite:** None

PE 2240 | Athletic Injury, Care and Prevention | 2 | 2/0/0

This course is offered to coaches interested in sports medicine and students interested in coaching and/or athletic training. It is designed to enhance the student’s knowledge and performance in sports medicine. The course will cover athletic injury prevention measures, injury care and management, basic injury assessment, nutrition and specific athletic injuries and related problems.

**Prerequisite:** None

**Corequisite:** None

PE 2241 | Principles of Coaching | 3 | 3/0/0

This course is designed to introduce students to athletic coaching philosophies, basic coaching principles in team and individual sports and theories involved in coaching. Emphasis will be on legal issues surrounding coaching, developing coaching philosophies, exploring diversity in coaching, and rules and regulations associated with coaching at different levels.

**Prerequisite:** None

**Corequisite:** None

PE 2254 | Sports in Society | 3 | 3/0/0

This course involves a discussion of the impact of sports in society and the values we place on sports. The course will explore the values, virtues, consequences, rights and responsibilities of sports in our culture. The course is designed to improve the understanding of legal, racial, academic and moral issues of sports and athletics.

**Prerequisite:** None

**Corequisite:** None

PE 2255 | Aquatic Outdoor Recreation | 2 | 1/1/0

During this course, four to six days are spent on a wilderness field trip. Major topics covered are camping and camping equipment, camp food and nutrition, canoeing, fishing, nature study and woodland, safety, map and compass, and outdoor philosophy.

**Prerequisite:** None

**Corequisite:** None

PE 2999 | Athletic Leadership | 1 | 0/1/0

This course is designed primarily for second-year student athletes to enhance leadership and mentoring skills and to promote community relations while participating in athletics. Students will have expanded leadership roles within their respective sports by mentoring first-year student athletes in academics and life skills, key components to college success, community adaptation and leadership, time management skills and the importance of seeking help at an early stage of personal or academic struggle. Students will also be required to participate in a community-based service learning activity designed by the instructor to positively enhance and market the Spartan Athletics image and brand.

**Prerequisite:** This course requires the approval of the instructor prior to enrollment.

**Corequisite:** None

PHIL 1130 | Critical Thinking | 3 | 3/0/0

Meets MnTC Goal Area 2. This course focuses on studying the structure of argument, the detection of common argument fallacies, the creation of cogent arguments and the acquisition of skills needed to translate clearly constructed arguments into argumentative essays on contemporary topics. Students will study inductive and deductive styles of thinking, valid and invalid argument forms, the differences between facts and values, judgment and belief, and the importance linguistic definition plays in strong arguments.

**Prerequisite:** None

**Corequisite:** None

PHIL 1200 | Applied and Professional Ethics | 3 | 3/0/0

Meets MnTC Goal Areas 2 and 9. In this course students will explore ethical issues that arise in professional settings including business, medical and technical sales. The course will also look at the philosophical underpinnings of current professional policies and how philosophy can offer insights that can enhance and deepen such policies.

**Prerequisite:** None

**Corequisite:** None

PHIL 1201 | Ethics | 3 | 3/0/0

Meets MnTC Goal Areas 2, 6 and 9. This course is an introduction to the topic of ethics. In this course, the following questions are examined: What is ethics? How do we make ethical decisions? Are things that are legally right necessarily right? Should we consider our own interests when making ethical decisions? Are things ethically right simply because God says they are right? If our culture says something is ethically right, does that mean it is ethically right? The course also examines numerous topical ethical issues such as racism, terrorism and censorship.

**Prerequisite:** None

**Corequisite:** None

PHIL 1211 | Introduction to Philosophy | 3 | 3/0/0

Meets MnTC Goal Areas 2 and 6. This course is an introduction to the basic branches of philosophy including metaphysics (the study of existence and what existence means), epistemology (the study of knowledge and how we come to understand), ethics (the study of what we should do), politics (the study of how societies should exercise force) and aesthetics (the study of beauty and art). Students can expect to explore their own understanding of the world and test it against the classical works of Western philosophy.

**Prerequisite:** None

**Corequisite:** None

PHIL 2220 | Environmental Ethics | 3 | 3/0/0

Meets MnTC Goal Areas 9 and 10. This course examines the basic positions and concepts within the field of environmental philosophy. A primary emphasis will be placed upon understanding our moral obligations toward the natural environment. Representative course topics may include the following: What is nature? Do humans have direct duties toward the natural world? What is deep ecology? Should we conserve or preserve our natural environment? Do intrinsic values exist in nature? Is a land ethic possible? What is environmentalism?

**Prerequisite:** None

**Corequisite:** None

PHIL 2244 | Philosophy of Religion | 3 | 3/0/0

Meets MnTC Goal Areas 2, 6 and 8. This course explores proposed answers to the question: What role can religion play when considering questions about the meaning of life? The course will consider the traditional arguments for the existence of God as expressed by Western thinkers as well as non-Western efforts to reconcile order and disorder in the universe. The course will focus on the relationship between faith and reason and will reflect on the nature of religious experience and how diverse cultures express various ways of knowing about the divine.

**Prerequisite:** None

**Corequisite:** None

PHIL 2225 | Bioethics | 3 | 3/0/0

Meets MnTC Goal Areas 2 and 9. This course explores ethical issues that arise from advancements in science and technology (e.g. genetic engineering, cloning, patent rights) as well as look at the philosophical underpinnings of current scientific research and how philosophy is different from science and the law.

**Prerequisite:** None

**Corequisite:** None

### Course Notes:
- **PHRM 2230** Uses MNTC Goal Area 6. This course provides an introduction to existential philosophy, explorations of key existentialist ideas and discussions of how existential thought might be applied to such themes as freedom, existence, despair, authenticity, alienation and death. Existentialism, as the name implies, emphasizes existence (that one is over essence, what one is). The most famous definition of existentialism was articulated by Jean-Paul Sartre, who called it the theory that existence precedes essence. In other words, you are what you make yourself to be - you create your essence as you go along. The course will look at influential existentialists from Kierkegaard to Sartre and Camus.
- **PHRM 2235** Uses MNTC Goal Area 4. This course is designed as an introduction to symbolic logic, as well as the nature of language and multiple methodologies for proving arguments. This course will focus on formal systems of logic and deductive validity and will include proofs, methods and translation in sentential and predicate logic. The course will also have an introduction to meta-theory and the extensions of logic and will explore inductive logic.
- **PHRM 2240** Uses MNTC Goal Areas 6 and 8. This course explores the standard introduction to philosophy and examines questions (e.g. does God exist; are humans completely physical beings; can we have knowledge; how can we differentiate between right and wrong; do we have free will; etc.) mainly from the standpoint of non-Western thinkers. We will consider how these questions have been pursued and answered in historically and non-dominant cultures (i.e. Asian, Africana, Latin American and indigenous) and compare and contrast our findings with the dominant Western philosophies. After taking this course, students should be better able to place contemporary philosophical issues in a global context and be better able to interact with and understand members of a diverse society.
- **PHIL 2300** Uses MNTC Goal Areas 5 and 7. This course addresses issues with regards to a critical examination of some philosophical problems including ethics, social and evaluation of social and political organizations over the course of human history. The course will explore a detailed philosophical analysis of the writings (both classical and contemporary) about social and political concepts such as freedom, democracy, social justice, feminism and anarchism with a particular interest in the similarities and differences of these concepts. Questions concerning the nature, justification and limits of political power will be explored. In addition to this, theories of distributive justice, culpability, causality and responsibility will be examined in connection with the study of important political and social positions.
- **PHLM 1001** Uses MNTC Goal Area 6. This course introduces the student to the organization and function of the institutional, ambulatory and retail pharmacy. Emphasis is on the duties and responsibilities of the pharmacist and the calculations required to accurately prepare patient medications for distribution.
- **PHLM 2001** Uses MNTC Goal Area 6. This course covers drug names, classifications and mechanisms of action, the use of computers in pharmacy and their practical applications. The student will be introduced to hospital and retail dispensing techniques as well as basic customer service.
- **PHLM 2002** Uses MNTC Goal Area 6. This course covers intravenous drug admixture, TPN compounding, critical care intravenous admixture and unit dose medication dispensing to nursing units. Emphasis is placed upon medication storage and stability, diabetic supplies, and chemotherapy storage and admixture.
- **PHLM 2004** Uses MNTC Goal Area 6. This course provides the student with basic physical and chemical drug properties and the functions related to purchasing and inventory control in the pharmacy. Emphasis is placed upon the theory, stability and safety of drug products, and the procedures required to develop and maintain inventory controls.
- **PHLM 2010** Uses MNTC Goal Area 6. This supervised experiential activity in the clinical setting introduces the student to tasks performed by the pharmacy technologist.
- **PHLM 2120** Uses MNTC Goal Area 6. This supervised professional experience in the clinical setting introduces the student to tasks performed by the pharmacy technologist.

**COURSE DESCRIPTIONS**

minnesota.edu

Minnesota State Community and Technical College
Course Catalog 2017-2018

157
**Course #** | **Course Title** | **CR** | **Lec/Lab/OJT**
---|---|---|---
PNSG 1221 | Psychosocial Nursing | 2 | 2/0/0
This course focuses on nursing care that assists with promotion and support of the physical, mental, and emotional well-being of diverse clients within the scope of practice. The student utilizes resources and critical thinking to solve problems and deliver nursing care. The practical nurse. Curriculum threads of coping mechanisms, stress and crisis management, therapeutic communication, mental health and illness, grief and loss, and end-of-life concepts and care challenges are integrated throughout the course.
Prerequisite: PSYC2222
Corequisite: PNSG1200

PNSG 1223 | Health Promotion III | 4 | 4/0/0
This course expands on the foundations of health promotion, maintenance and restoration of diverse populations. The curriculum threads include pathophysiology, data collection, pharmaceutical and medical concepts, and the role of the practical nurse in intravenous therapy, and are integrated throughout the course.
Prerequisite: PNSG1209 AND PNSG1216 AND PNSG1217
Corequisite: None

PNSG 1226 | Practical Nursing Clinical II | 4 | 0/4/0
This course builds on patient-centered care values while integrating critical thinking, safety, quality and evidence-based practice to prioritize care of two patients. Curriculum threads including data collection, dosage calculations, pharmaceutical concepts, reinforcing patient teaching and documentation are integrated throughout the course.
Prerequisite: PNSG1216 AND PNSG1217
Corequisite: None

PNSG 1232 | Principles of IntraVenous Therapy | 1 | 0/1/0
This course builds on basic intravenous theory and skills. Curriculum threads include fluid and electrolytes, acid/base balance, intravenous fluids and equipment, venous access, and complications in intravenous therapy. The nurse identifies and prioritizes patient needs, initiates and maintains primary and secondary fluids, intravenous push medications, central line dressing changes, central line cap changes, dosage calculations and successful venipuncture. The role of the practical nurse in intravenous therapy is integrated throughout the course.
Prerequisite: PNSG1216
Corequisite: None

PNSG 1234 | Nursing Roles | 1 | 1/0/0
This course is an overview of practical nursing within health care. Curriculum threads including pathophysiology, pharmacology, health care delivery systems, health care trends, legal aspects, ethical issues and role transition are integrated throughout the course.
Prerequisite: PNSG1216
Corequisite: None

PNSG 1236 | Practical Nursing Practicum | 2 | 0/2/0
This course builds on the knowledge and concepts learned throughout the practical nursing curriculum. The student builds professional relationships by participating within the multidisciplinary health care team with minimal supervision. The student utilizes resources and critical thinking to solve problems and deliver nursing care to multiple patients with excellence and improvements.
Prerequisite: PNSG1217 AND PNSG1214 AND PNSG1220 AND PNSG1223 AND PNSG1226 AND PNSG1232 AND PNSG1234
Corequisite: None

PNSG 1500 | Nursing Care of Adults I | 3 | 2/1/0
This course introduces students to the care of the adult patient with a focus on health promotion and safety. Emphasis is on common health problems of the adult as well as chronic illness and end-of-life care. Application of pathophysiology, nutrition and pharmacology are applied to common diseases within each topic area. Additional emphasis is included on physiology and psychology of human development, illness, stress, satisfying growth and development, and evidence-based care. Concepts related to career development options that enhance career mobility are reviewed. Skills and knowledge explored are integrated and addressed within the scope of practice for the practical nurse.
Prerequisite: Acceptance into the Practical Nursing Program
Corequisite: None

PNSG 1508 | Foundations of Adult Nursing Care | 8 | 5/3/0
This course introduces concepts of teamwork and collaboration, safety, quality improvement, professional identity and behavior, patient-centered and relationship-centered care, nursing judgment, evidence-based practice, managing care of complex and comorbid health disorders. Principles of pathophysiology, nutrition and pharmacology are applied. A lab component includes focused assessments and advanced nursing skills that support course concepts.
Prerequisite: Acceptance into the Practical Nursing Program AND experience as a Certified Nursing Assistant AND current American Heart Association Basic Life Support Certification AND current, clear Minnesota Department of Health criminal background check AND current, clear national background check AND up-to-date immunizations and health form.
Corequisite: None

PNSG 1512 | Practical Nursing Pharmacology | 2 | 0/2/0
This course incorporates the concepts of pharmacokinetics, pharmacodynamics, common adverse side effects and contraindications to medication administration. Emphasis is placed on drug classifications and the role of the practical nurse in providing nursing care related to the safe administration of medications to individual patients across the age span.
Prerequisite: Acceptance into the Practical Nursing Program
Corequisite: None

PNSG 1514 | Clinical I Practical Nurse Foundations | 4 | 0/4/0
This clinical course provides the student an opportunity to apply nursing judgment using the nursing process to implement safe, patient-centered and relationship-centered care in selected settings. The student demonstrates focused assessments, data collection and implementation of skills learned in lab settings. The student documents findings and reinforces teaching plans for individual patients with common problems. The student develops communication and customer service skills while working with individual patients and team members.
Prerequisite: Acceptance into the Practical Nursing Program AND experience as a Certified Nursing Assistant AND current American Heart Association Basic Life Support Certification AND current, clear Minnesota Department of Health criminal background check AND current, clear national background check AND up-to-date immunizations and health form.
Corequisite: None

PNSG 1515 | Foundations of Adult Nursing Care II | 5 | 3/2/0
This course incorporates the nursing process, teamwork and collaboration, safety, academic and clinical excellence in health care. Principles of pathophysiology, nutrition and pharmacology are applied. A lab component includes focused assessments and advanced nursing skills that support course concepts.
Prerequisite: Current Practical Nursing Licensure
Corequisite: None

PNSG 1520 | Nursing Care of Women, Newborns, and Children | 2 | 2/0/0
This course provides an integrative approach to care of childbearing women, newborns and children. Emphasis is placed on normal pregnancies, normal growth and development, and common pediatric disorders. Principles of pathophysiology, nutrition and pharmacology are applied.
Prerequisite: BIOL2260 AND BIOL2261 AND PSYC2222 AND PNSG1508 AND PNSG1514
Corequisite: None

PNSG 1522 | Transition to Practical Nursing Practice | 1 | 1/0/0
This course prepares the student for transition into practical nursing practice. Concepts related to career development options that enhance career mobility are explored. Skills and knowledge explored are integrated and addressed within the scope of practice for the practical nurse.
Prerequisite: Acceptance into the Practical Nursing Program
Corequisite: None

PNSG 1524 | Practical Nursing Mental Health | 2 | 0/2/0
This course focuses on the care of individual patients with psychiatric and behavioral disorders. Emphasis is placed on common psychiatric and behavioral disorders as well as promoting and maintaining the mental health of individual patients. Principles of pathophysiology, nutrition and pharmacology are applied.
Prerequisite: PSYC2222 AND BIOL2260 AND PSYC2222 AND PNSG1508 AND PNSG1514
Corequisite: None

PNSG 1526 | Clinical II Practical Nursing | 5 | 1/4/0
This course provides the student the opportunity to apply nursing judgment using evidence-based care, critical thinking and clinical judgment to implement safe, patient-centered and relationship-centered care to individual patients across the lifespan. The clinical student reflects on the value of patient-centered care, teamwork and collaboration, informatics, quality improvement, safety, managing care of the individual patient, nursing judgment and evidence-based care. Concepts related to career development options that enhance career mobility are reviewed. Standards of practical nursing and the importance of practicing according to state regulations and statutes that are within the scope of practice for the practical nurse are reviewed.
Prerequisite: BIOL2260 AND PSYC2222 AND PSYC2222 AND PNSG1508 AND PNSG1510 AND PNSG1512 AND PNSG1514
Corequisite: None

PNSG 1528 | Clinical II Practical Nursing | 4 | 0/4/0
This course provides the student the opportunity to apply nursing judgment using evidence-based care, critical thinking and clinical judgment to implement safe, patient-centered and relationship-centered care to individual patients across the lifespan. The clinical student reflects on the value of patient-centered care, teamwork and collaboration, informatics, quality improvement, safety, managing care of the individual patient, nursing judgment and evidence-based care. Concepts related to career development options that enhance career mobility are reviewed. Standards of practical nursing and the importance of practicing according to state regulations and statutes that are within the scope of practice for the practical nurse are reviewed.

**COURSE DESCRIPTIONS**

**PSYC 1101 Human Interaction**
Meets MnTC Goal Areas 2 and 5. This is an introductory course emphasizing practical applications of psycho-social concepts, with specific emphasis on personality development, human relations and motivation. This course is applicable for students in occupational and health-related fields or general education.

**PSYC 1200 General Psychology**
Meets MnTC Goal Areas 5 and 9. This is a comprehensive introductory overview of psychology that studies human behavior and mental processes. Topics include (but are not limited to) research methods, the history of psychology, neuroscience and behavior, developmental psychology, sensation and perception, motivation and emotion, health psychology, learning and memory, personality, social psychology, psychopathology and treatments, and states of consciousness such as sleep and dreams.

**PSYC 1500 Positive Psychology**
Meets MnTC Goal Areas 5 and 9. This course includes different aspects of health psychology, humanistic psychology and positive psychology with emphasis on the integration of psychological, biological and physical factors and the consequences for health and well-being. The course starts with the body’s systems, psychological theories behind well-being, and positive emotions which are followed up by work methods and interventions to improve public health, well-being and a healthy work life. Gender and cultural perspectives will be considered throughout the course. Scientific methodology and the design for the study of positive psychology are also included in the course.

**PSYC 1550 Abnormal Psychology**
Meets MnTC Goal Areas 5 and 9. This course is an exploration of the scientific study of human behavior and its interrelatedness with the environment. This course describes and explains the acquisition, maintenance and change of behavior with an emphasis on human application within a variety of environmental contexts. This course uses critical thinking on the principles and procedures used to understand and change the environment and human behavior.

**PSYC 2222 Lifespan Development**
Meets MnTC Goal Areas 5 and 9. This course is a study of human development from the lifespan perspective, including theories, stages and influences of development. The course views the individual from conception to death through physical, cognitive, social and emotional development.

**PSYC 2226 Behavior and Environmental Management**
Meets MnTC Goal Areas 2, 5 and 10. This course is an exploration of the scientific study of human behavior and its interrelatedness with the environment. This course describes and explains the acquisition, maintenance and change of behavior with an emphasis on human application within a variety of environmental contexts. This course uses critical thinking on the principles and procedures used to understand and change the environment and human behavior.

**PSYC 2320 Personality Psychology**
Meets MnTC Goal Area 5. This course examines historical and current theoretical perspectives of personality including psychoanalytic, humanistic, behavioral/social-learning, cognitive, biological and trait theories. This course is designed to examine the methods involved in personality psychology research, the ways in which humans differ with regard to personality, the variables that influence personality and how personality might influence behavior, as well as the development and assessment of personality.

**PSYC 2302 Cross-Cultural Psychology**
Meets MnTC Goal Areas 5 and 7. This course is designed to cover the issues and themes current in the field of cross-cultural psychology. Examples of such issues include cultural variation along the lines of collectivism and individualism; psychological principles that might be universal compared to those that are culturally specific; and how context and culture affect psychological function within a society. Between cultures, range of substantive areas within psychology will be examined and compared across multiple cultures, including cognitive, social, health and developmental psychology.
### Prerequisite:
- POLS 1000
- SOC 2950
- PSY 2000
- Introduction to Social Research

This course focuses on the study of two-cycle engine technology. The importance of occupational safety, the use of shop equipment, measuring instruments and service literature, along with appropriate service department etiquette will be addressed. Two-cycle engine theory along with proper lubricants will be covered. All these will be taught and expressed with the Powersports and Marine industry shop experience as a basis for study.

**Corequisite:** None

### PWST 1010 Introduction to PowerSports I

This course focuses on the study of two-cycle engine technology. The importance of occupational safety, the use of shop equipment, measuring instruments and service literature will be addressed. Two-cycle engine theory along with proper lubricants will be covered. Students will compare the advantages and disadvantages of two-cycle and four-cycle engines. All these will be taught and expressed with the Powersports and Marine industry shop experience as a basis for study.

**Corequisite:** None

### PWST 1012 Introduction to PowerSports II

This course focuses on the study of four-cycle engine technology. The importance of occupational safety, the use of shop equipment, measuring instruments and service literature will be addressed. Four-cycle engine theory along with proper lubricants will be covered. Students will compare the advantages and disadvantages of two-cycle and four-cycle engines. All these will be taught and expressed with the Powersports and Marine industry shop experience as a basis for study.

**Corequisite:** None

### PWST 1302 Snowmobile I

This course covers snowmobile engine designs, component identification and engine service procedures. This course also covers snowmobile fuel systems and service.

**Corequisite:** None

### PWST 1304 Snowmobile Clutching

This course identifies major components of constant variable transmission systems and discusses maintenance, routine adjustment and tuning of variable transmission clutch systems.

**Corequisite:** None

### PWST 1310 Personal Watercraft and Jet Pumps

This course offers a comprehensive view of maintenance, overhaul techniques, diagnostics and post-repair inspections for jet pump drive systems used in the watercraft industry.

**Corequisite:** None

### PWST 1402 Chainsaws

Students will learn various manufacturers' repair and testing techniques. Students will learn to diagnose and repair chainsaws. Students will be evaluated according to industry standards. Stihl bronze certification is available upon successful completion of the Stihl training portion of the class.

**Corequisite:** None

### PWST 1404 Generators

This course covers generator components and test procedures. Students will test generator voltages and learn how to diagnose and repair generators. Students should have a basic understanding of electricity and electrical meter usage.

**Corequisite:** None

### PWST 1406 Chainsaws and Generators

This course offers a comprehensive view of overhaul techniques, diagnostics and post-repair inspections of modern chainsaws. This course also covers generator components and testing procedures. Students will test generator voltages and learn how to diagnose and repair generators. Students must have an understanding of electricity and electrical meter usage prior to taking this class.

### RADT 1132 Principles of Radiobiology  
4  3/1/0  
This course is designed to establish a basic knowledge of atomic structure and terminology and provide an overview of the principles of radiation protection and interaction with living systems. Also presented are the nature and characteristics of radiation (i.e., its effects on molecules, cells, tissues, and the body as a whole). X-ray production and the fundamentals of photon interactions with matter. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies, health care organizations and the responsibilities of the radiographer for patients, personnel and the public are also included. Factors affecting biological response are presented, including acute and chronic effects of radiation.  
Prerequisite:  
Corequisite:  

### RADT 1140 Radiographic Imaging  
4  2/2/0  
This course is designed to establish a knowledge base of factors that govern and influence the production and recording of radiographic images as well as provide a basis for analyzing those images. Film and electronic imaging with related accessories will be emphasized. Included is the importance of minimum imaging standards, discussion of problem-solving techniques, and the factors that can affect image quality. Class demonstrations/labs are used to demonstrate application. Actual images will be included for analysis.  
Prerequisite:  
Corequisite:  

### RADT 1146 Radiographic Procedures III  
4  2/2/0  
This course will provide the student with the knowledge necessary to perform routine and mobile radiographic procedures relative to skull (including sensory organs), traumatic injury, and surgical radiography. Pathological conditions of these anatomical structures will also be discussed as well. In addition, the student will be introduced to specialized studies of the central nervous system, cardiovascular, lymphatic system and cross-sectional imaging. Special imaging equipment, physical settings and techniques used in these highly specialized studies will also be included.  
Prerequisite:  
Corequisite:  

### RADT 1180 Radiographic Clinical I  
5  0/0/0  
The emphasis of this clinical rotation will be on radiographic positioning and manipulation of radiographic equipment and accessories related to radiography of the thoracic and abdominal viscera, upper and lower extremities, shoulder girdle and pelvis.  
Prerequisite:  
Corequisite:  

### RADT 1190 Radiographic Clinical II  
5  0/0/0  
This clinical course emphasizes the basic radiographic procedures and positioning related to the upper and lower gastrointestinal tract and the biliary system. The student also continues to develop skills in performing radiographic procedures and positioning related to the thoracic and abdominal cavities and the upper and lower extremities including the shoulder girdle and the pelvis.  
Prerequisite:  
Corequisite:  

### RADT 2100 Radiographic Clinical III  
5  0/0/0  
This clinical course emphasizes the basic radiographic procedures and positioning related to the urinary system, the bony thorax and the vertebral column. The student is also introduced to radiographic exposure factors and off-peak (e.g., evening and weekend) clinical hours.  
Prerequisite:  
Corequisite:  

### RADT 2110 Radiographic Clinical IV  
5  0/0/0  
This clinical course emphasizes the basic radiographic procedures and positioning related to the skull, facial bones, paranasal sinuses and detailed areas of the skull. This clinical experience provides the student with the opportunity to work with increased independence.  
Prerequisite:  
Corequisite:  

### RADT 2120 Radiographic Clinical V  
5  0/0/0  
This clinical course provides the student with the opportunity to function more independently in all areas of basic radiography and to develop clinical skills in regular radiographic areas and procedures, with continuing experience in trauma and surgical procedures. The student will be exposed to special procedures and will begin rotations through the specialized areas of nuclear medicine, radiation therapy, computerized tomography, ultrasonography and magnetic resonance imaging.  
Prerequisite:  
Corequisite:  

### RADT 2130 Radiographic Clinical VI  
5  0/0/0  
This clinical course emphasizes the development of independence, discretion and judgment while performing basic radiographic procedures. It provides the student with the opportunity to function as a nearly registry-eligible radiographer. The student is expected to correlate all clinical and didactic experiences while demonstrating a high degree of proficiency and efficiency.  
Prerequisite:  
Corequisite:  

### RADT 2224 Imaging Equipment  
4  2/2/0  
This course is designed to establish a knowledge base in radiographic, fluoroscopic, mobile and tomographic equipment (including computed tomography) requirements and design including circuitry of the x-ray machine. The content will also provide a basic knowledge of quality control. Computer applications in the radiologic sciences related to image capture, display, storage and distribution are presented as well.  
Prerequisite:  
Corequisite:  

### RADT 2268 Mammography Clinical  
4  0/0/4  
The emphasis of this clinical rotation will be on positioning and manipulation of mammographic equipment and accessories during imaging procedures of the breasts. This course will also address quality improvement procedures specific to mammography equipment and procedures.  
Prerequisite:  
Corequisite:  

### RADT 2280 Radiologic Technology Registry Review  
2  2/0/0  
This course is designed to prepare the student to write the national board exam administered by the American Registry of Radiologic Technologists (ARRT). A review of all course work presented in the program with an emphasis on the ARRT exam specifications will be presented.  
Prerequisite:  
Corequisite:  

### REFR 1110 Refrigeration, Air Conditioning and Heating Principles  
3  3/0/0  
This course covers refrigeration theory of domestic refrigeration and introduction theory to commercial refrigeration and residential heating and air conditioning equipment including controls and accessories.  
Prerequisite:  
Corequisite:  

### REFR 1112 Refrigeration, Air Conditioning and Heating Lab  
3  0/3/0  
This course covers the operation and service procedures of domestic refrigeration and an introduction to residential heating and air conditioning and commercial refrigeration equipment.  
Prerequisite:  
Corequisite:  

### REFR 2202 Commercial Refrigeration and Air Conditioning Principles  
4  0/0/0  
This course covers the principles of basic heat theory and gas laws as they apply to refrigeration systems. The operation of commercial walk-in coolers and freezers, commercial ice machines, air conditioners and heat pumps will be discussed, along with accessory components and piping methods used to install and maintain these systems. Safety is emphasized.  
Prerequisite:  
Corequisite:  

### REFR 2204 Commercial Refrigeration and Air Conditioning Lab  
3  0/3/0  
This course covers practical applications related to commercial refrigeration and air conditioning equipment. The commercial refrigeration and air conditioning lab learning experience includes sequence of operation, troubleshooting, repair, maintenance and installation. Safety is emphasized throughout the course.  
Prerequisite:  
Corequisite:  

### REFR 2206 Commercial Electrical Principles  
3  3/0/0  
This course covers the fundamentals of electrical components used in commercial refrigeration and air conditioning equipment. Reading and understanding electrical schematics will be employed to comprehend the sequence of operations and in troubleshooting. Students also will develop their own wiring diagrams by applying Ohm’s law and how it relates to series and parallel circuits. Safety is emphasized.  
Prerequisite:  
Corequisite:  

### REFR 2208 Commercial Electrical Lab  
3  0/3/0  
This course covers the practical applications of electrical components used to operate commercial refrigeration and air conditioning equipment. Included are troubleshooting, repairing and installing electrical devices common in larger systems. Students will use schematics they have developed to build control systems to operate refrigeration and air conditioning systems. Safety is emphasized.  
Prerequisite:  
Corequisite:  

### REFR 2211 Advanced Refrigeration Principles  
4  4/0/0  
This course prepares students for more advanced labs on commercial refrigeration and electrical systems. Students need to have a very good understanding of commercial refrigeration and electrical systems. Safety is emphasized.  
Prerequisite:  
Corequisite:  

### REFR 2212 Advanced Refrigeration Lab  
3  0/3/0  
This course gives students the opportunity to work on more complicated refrigeration systems through individual or paired groups on field trips, off-site meetings and hands-on projects. Safety is emphasized.  
Prerequisite:  
Corequisite:  

### REFR 2213 Advanced Electrical Theory  
3  3/0/0  
This course covers the electrical principles and schematics used in commercial, industrial, hospital and supermarket refrigeration systems. Safety is emphasized.  
Prerequisite:  
Corequisite:

Minnesota State Community and Technical College  
Course Catalog 2017-2018  

161
COURSE DESCRIPTIONS

COURSES

REFR 2215 Advanced Electrical Applications 3 0/3/0
This course covers the application of electrical principles used in commercial, industrial, hospital and supermarket refrigeration systems. Safety is emphasized.
Prerequisite: Completion of HVAC/R diploma.
Corequisite: None

REFR 2216 Refrigeration Internship 3 0/0/3
In this course, projects, reports and discussions are coordinated to relate to the student’s employment situation, which must be in an approved refrigeration or air conditioning occupation. A training agreement and an evaluation are required of each student.
Prerequisite: Completion of HVAC/R diploma.
Corequisite: None

REFR 2217 Commercial Grocery Store Refrigeration 3 3/0/0
This course is designed to cover the refrigeration piping and oil return in a grocery store setting. Students will learn about case controllers and temperature controls.
Prerequisite: Completion of HVAC/R diploma.
Corequisite: None

SOC 111 Introduction to Sociology 3 3/0/0
Meets MnTC Goal Areas 2, 5 and 7. This course is an introduction to the study of social issues and prospects for improving them. Students will investigate social trends and factors affecting social problems, contrast sociological perspectives of social problems, deal constructively with information and ideas associated with social issues, and define personal and public responsibilities in relation to select social issues.
Prerequisite: None
Corequisite: None

SOC 1113 Social Problems 3 3/0/0
Meets MnTC Goal Areas 5 and 9. This course stresses acquiring an enriched understanding of social issues and prospects for improving them. Students will investigate social trends and factors affecting social problems, contrast sociological perspectives of social problems, deal constructively with information and ideas associated with social issues, examine the ethical dimensions inherent in problem definition and intervention design, and define personal and public responsibilities in relation to select social issues. Social issues covered may include parenting and family issues; crime, delinquency and violence; aging, health and health care issues; poverty and inequality; cultural pluralism; urban growth and population; environmental issues; sexual issues; and global issues.
Prerequisite: None
Corequisite: None

SOC 1114 Sociology Service Learning 1 1/0/0
Meets MnTC Goal Area 5. This course emphasizes an enriched understanding of social issues and prospects for improving them through direct work/research in a sociological setting. In an actual community setting, students will participate in and make observations of social intervention. These observations will be critically processed in relation to key sociological concepts. The nature of service learning usually necessitates that students be prepared to be off-campus and to participate outside of regular class hours (20-25 hours). Students may need transportation to field sites. Additional expenses may be incurred. Course may be repeated for credit.
Prerequisite: SOC1111 OR SOC1113 OR SOC2211 OR SOC2215 OR SOC2216 OR SOC2217 OR WMS1130
Corequisite: None

SOC 2210 Social Deviance 3 3/0/0
This course is a sociological examination of significant rule-making and rule-breaking that surveys explanations/explanations of non-conformity relevant to juvenile delinquency, crime, health and environmental welfare, mental illness, sexual violence, substance abuse and other non-normative lifestyles.
Prerequisite: SOC1111
Corequisite: None

SOC 2213 Sociology of the Family 3 3/0/0
Meets MnTC Goal Areas 5 and 7. Families will be examined from the sociological perspective and will be compared across time and cultures. Family relationships, family structure and the effects of race, class, gender, age, social institutions and social policies will be explored in this course. Integral to this course are comprehensive discussions on topics such as dating, cohabitation, marriage/partnering, employment, domestic violence, parenting, divorce, remarriage/re-partnering and elder care. This course provides understanding of the family, family roles and the impact on the individual. Understanding public and private, platonic and intimate relationships can assist in the development of tolerance toward others.
Prerequisite: None
Corequisite: None

SOC 2215 Criminology 3 3/0/0
Meets MnTC Goal Areas 2 and 5. This course will provide a thorough overview of the field of criminology: the study of the theories which attempt to define and explain crime, criminal behavior and society’s reactions to crime, including a focus on juvenile delinquency, the judiciary process and penology.
Prerequisite: None
Corequisite: None

SOC 2216 Minority Group Relations 3 3/0/0
Meets MnTC Goal Areas 5 and 7. This course stresses acquiring an enriched understanding of social issues and prospects for improving them. Students will investigate social trends and factors affecting social problems, contrast sociological perspectives of social problems, deal constructively with information and ideas associated with social issues, examine the ethical dimensions inherent in problem definition and intervention design, and define personal and public responsibilities in relation to select social issues.
Prerequisite: None
Corequisite: None

SOC 2222 Sociology of Agriculture 3 3/0/0
Meets MnTC Goal Area 5. The central theme of this course is to understand the institutions and processes critical to farm success. Students will utilize sociological perspectives to study the many aspects of a local food system.
Prerequisite: None
Corequisite: None

SOC 2290 Introduction to Social Research 3 3/0/0
Meets MnTC Goals 2 and 5. This course introduces methods and concepts used in the application of the scientific method to social and behavioral research, definitions and measurements of variables, research design, experiential methods and survey techniques. The use of literature reviews and the importance of critically evaluating research will be emphasized. Common descriptive and inferential statistics used in social science disciplines will also be introduced. This course is identical to POLS 2950 and PSYC 2950 and is cross-listed with both of those courses. Students may choose to enroll in the course with the prefix most appropriate to their transfer and career goals.
Prerequisite: MATH1020 AND ENGL1101 AND Completion of six (6) credits in SOC, PSYC, or POLS
Corequisite: None

SOMM 1400 Social Media Visual Methods 3 2/1/0
In this course, students will learn introductory-level skills that will prepare them to create visual content relevant for today’s most widespread social media platforms. Various visual methods and media will be taught, such as static graphic design layout, still photography and videography. Throughout this course, students will be instructed to create visual content that will focus on technical proficiency, core design principles, brand consistency, user experience and user engagement strategies.
Prerequisite: MKTG1200 AND MKTG1116
Corequisite: None

SOMM 2220 Social Media Management 3 2/1/0
This course will instruct students on the basics of social media management, primarily from a business and marketing perspective. An emphasis will be placed on industry-established planning, management and measurement processes. Students will learn the tools necessary to manage a company’s social program at any point, from setting up a program from scratch to performing ongoing maintenance and assessment that will ensure continued success.
Prerequisite: MKTG1200
Corequisite: None

SOMM 2300 Social Media Campaigns 3 2/1/0
In this course, students will apply their accumulated knowledge and skills to produce integrated social media campaigns. Campaign projects will involve activities that are designed to imitate industry practices and processes, allowing students to experiment with the tools they’ll use on the job. Students will independently complete research and planning, produce original content and analyze the results of their campaign following its completion.
Prerequisite: MKTG1200 AND MKTG1116
Corequisite: None

SPAN 1111 Beginning Spanish I 4 4/0/0
This course provides basic instruction in the correct form and use of the Spanish language. Study concentrates on oral and written comprehension of simple Spanish, verbal expression of personal themes, pronunciation and grammar.
Prerequisite: None
Corequisite: None

SPAN 1112 Beginning Spanish II 4 4/0/0
This course provides continued basic instruction in the correct form and use of the Spanish language. Study concentrates on oral and written comprehension of simple Spanish, verbal expression of personal and extended themes, pronunciation and grammar.
Prerequisite: SPAN1111
Corequisite: None

<tr>
<td>SPAN 2211</td>
<td>Intermediate Spanish I</td>
<td>4</td>
<td>0/0/0</td>
<td>Meets MnTC Goal Area B. This course is the first semester of Intermediate Spanish. Students will develop reading, writing, listening and speaking through a focus on historical, political, cultural and artistic expressions of the Spanish-speaking world. Grammar from beginning Spanish courses is lightly reviewed. Students will learn new grammatical skills including the perfect tense of the indicative mood and simple tenses of the subjunctive mood. Prerequisite: SPAN1112 OR Instructor approval</td>
</tr>
<tr>
<td>SPAN 2212</td>
<td>Intermediate Spanish II</td>
<td>4</td>
<td>0/0/0</td>
<td>Meets MnTC Goal Area B. This course is the second semester of Intermediate Spanish. Students continue to hone their reading, writing, listening and speaking through a focus on historical, political, cultural and artistic expressions of the Spanish-speaking world. Grammar from Intermediate Spanish is further developed to include the simple and perfect tenses of the indicative and subjunctive moods. Students investigate the development of science and technology on various aspects of the Spanish-speaking world.</td>
</tr>
<tr>
<td>SURT 1215</td>
<td>Surgical Pharmacology</td>
<td>3</td>
<td>0/0/0</td>
<td>This course introduces the student to patient care in an operating room in the role of surgical technologist. Prerequisite: Successful completion of all SURT courses with a C or better. Corequisite: SURT1240</td>
</tr>
<tr>
<td>SW 2250</td>
<td>Introduction to Social Work/Social Welfare</td>
<td>3</td>
<td>0/0/0</td>
<td>This course introduces students to social welfare and social work, including fields of practice, institutions, populations served, and the history of social work methods and theories. A general historical and contemporary overview of the profession is provided, including its values, ethics, methods, multiple settings and a beginning use of system theory. Prerequisite: None</td>
</tr>
<tr>
<td>THPY 1110</td>
<td>Massage Techniques and Ethics</td>
<td>3</td>
<td>2/1/0</td>
<td>This course provides students with an in-depth knowledge of massage techniques. Emphasis will be on the application of the basic massage strokes and their variations. Students will learn proper draping and positioning techniques and recommended client protocol. In regards to ethics, a variety of topics will be discussed and explored in order to help the students form their own written code of ethics. Prerequisite: None</td>
</tr>
<tr>
<td>THPY 1118</td>
<td>Kinesiology</td>
<td>3</td>
<td>2/1/0</td>
<td>This course teaches students to identify the location and movements of skeletal muscles. Students will identify bones and landmark points as points of anatomical reference. They will learn directional terms and terms of movement. Students will learn to identify and describe the movement of each muscle. Prerequisite: None</td>
</tr>
<tr>
<td>THPY 1123</td>
<td>Integrative Massage</td>
<td>2</td>
<td>1/1/0</td>
<td>This course introduces students to a variety of specialized modalities of massage. This course will provide the student with an understanding of the benefits of massage in the medical field, as well as an understanding of the history and career opportunities in massage therapy. Prerequisite: None</td>
</tr>
<tr>
<td>THPY 1130</td>
<td>Advanced Massage</td>
<td>2</td>
<td>1/1/0</td>
<td>This course prepares massage students to execute advance massage techniques. Students will learn optional techniques available to clients including abdominal massage, facial massage and massage of the gluteals. Massage for special populations will be discussed, including massage for the elderly and chair massage. Prerequisite: THPY1110</td>
</tr>
<tr>
<td>THPY 1135</td>
<td>Deep Tissue Massage</td>
<td>2</td>
<td>1/1/0</td>
<td>This course prepares the massage student to apply deep muscular therapy techniques. Emphasis will be placed on the use of proper body mechanics and the use of proper techniques to deliver deep tissue massage safely. Trigger point therapy will be used extensively in this course. Students will learn the use of massage tools. Individual muscles will be isolated and massaged with parallel and cross fiber techniques. Prerequisite: THPY1110</td>
</tr>
<tr>
<td>THPY 1142</td>
<td>Practical Skills Clinic</td>
<td>3</td>
<td>0/3/0</td>
<td>This course provides students with an opportunity to develop the practical skills necessary to administer professional massage therapy treatments. In addition to performing massage treatments on the general public, students will also perform seated chair massage at scheduled on-site events as arranged by the instructor. This course provides students with an opportunity to develop the practical learned skills needed to work as a professional massage therapist. Prerequisite: THPY1110 AND Current certified CPR/First Aid card holder</td>
</tr>
<tr>
<td>THPY 1146</td>
<td>Certification Preparation</td>
<td>2</td>
<td>2/0/0</td>
<td>This course is designed to prepare the students to take the National Certification Examination (NCE) issued by the National Certification Board of Therapeutic Massage &amp; Bodywork (NCBTMB). Students will review anatomy, physiology, kinesiology, pathology, massage theory, massage assessment and practice, adjunct techniques and business practices. Students will be taught to identify the areas where they need the most review and use outside texts to help them maximize their learning potential. A study guide and sample test questions will be used to exemplify the National Certification Examination. Students will be encouraged to apply to take the National Certification Examination after they receive their diploma. Prerequisite: THPY1110</td>
</tr>
<tr>
<td>THPY 1148</td>
<td>Sports Massage and Hydrotherapy</td>
<td>2</td>
<td>1/1/0</td>
<td>This course covers the fundamentals of hydrotherapy and sports massage. Students will be taught to perform massage treatments specific to individual sports. The course addresses pre-, post- and event-sports massage techniques, as well as rehabilitative massage for injuries and maintenance massage. Students will also be instructed on the use of hydrotherapy techniques. Hydrotherapy will address the application of water as treatment in each of its three forms, hot and cold treatments, hydrocollators,</td>

COURSE DESCRIPTIONS

body wraps and salt glows. These green techniques can be implemented into Swedish massage treatments and sports massage.

Prerequisite: None
Corequisite: None

THPY 1150 Business Development 2 2/0/0
This course will introduce the massage therapist to the business aspects of operating a massage practice. Topics include client scheduling, budgeting, bookkeeping, marketing and massage-related business issues. The course will detail client/therapist business concerns and help prepare students to identify and solve these concerns in a professional manner. Students will learn to write and execute a detailed workable massage business plan.

Prerequisite: None
Corequisite: None

THPY 1156 Massage Pathophysiology 3 3/0/0
This course discusses common pathologies that massage therapists are likely to encounter in their professional practices. It also discusses whether these conditions are indicated or contraindicated for massage and describes how they may be treated.

Prerequisite: None
Corequisite: None

THPY 2102 Lymphatic and Hospice Massage 1 0/1/0
This course covers the protocol and techniques for a full-body one-hour lymphatic drainage massage. Students will learn massage techniques for anatomy and physiology of the lymph system. Students also will gain hands-on exposure to massage on medically frail clients of all ages.

Prerequisite: THPY1118 AND Diploma or Certificate in Massage Therapy
Corequisite: None

THPY 2106 Neuromuscular Therapy 2 0/2/0
Students will reinforce previously learned techniques. Students will consider various treatment protocols utilizing scientifically proven, outcome-based techniques including neuromuscular therapy, myofascial release, trigger point therapy, manual myofascial release, proprioceptive neuromuscular facilitated stretching, active isolated stretching and positional release technique. Students will perform thorough patient assessments utilizing medical histories and objective findings through palpation, functional muscle testing, range of motion testing, postural examination and gait examination.

Prerequisite: THPY1118 AND Diploma or Certificate in Massage Therapy
Corequisite: None

THTR 1100 Introduction to Theatre 3 3/0/0
Meet MnTC Goal Area 6. Coursework in this content area will develop a student's knowledge of the social and historic context of the theatre, including exploration of the history and evolution of theatre ritual performance and other cultural expression. Students will explore the elements of performance and of different theatre spaces and the roles and duties of different theatre artists involved in a production. Students will engage in a critical study and analysis of dramatic text and literature. Students also will develop knowledge of live theatre by experiencing the theatre arts in practice and engaging with theatre artists. Participation in class projects, production attendance and production work hours may be required.

Prerequisite: None
Corequisite: None

THTR 1105 Acting I 3 3/0/0
Meet MnTC Goal Area 6. Coursework will develop a student's knowledge of the skills needed to work in the elements of performance such as cooperation, respect, responsibility and collaboration. Students will use voice and body in performance, imagination and application of a specific approach to the art of acting, and apply performance skills and techniques.

Prerequisite: None
Corequisite: None

THTR 1120 Theatre Performance Practicum 2 0/2/0
Meet MnTC Goal Area 6. This course is intended for students who participate as performers in a main stage or approved theatrical production. May be repeated twice.

Prerequisite: None
Corequisite: None

THTR 1125 Theatre Technical Practicum 2 0/2/0
Meet MnTC Goal Area 6. Practical work in this content area will develop a student's knowledge of the roles and duties of different theatre artists and collaborators involved in a production, the elements of performance and of different theatre spaces and theatrical styles. Students will apply the communication skills needed to work in the elements of performance such as cooperation, collaboration, respect and responsibility. Students will implement theory and apply physical practice through performance, design or management of theatrical work. Students will also apply various production techniques. This course is intended for students who participate as a construction or crew member on a main stage or approved theatrical production. May be repeated twice.

Prerequisite: None
Corequisite: None

THTR 1130 Stage Make-up 3 2/1/0
Meet MnTC Goal Area 6. In this course, students will explore the fundamental design principles, materials and application techniques of stage make-up. Starting with the basic fundamentals and continuing through special effects, the student will use skills acquired to enhance character development. Students will apply theory through practical laboratory work in stage make-up applications.

Prerequisite: None
Corequisite: None

THTR 1140 Stagecraft 3 2/1/0
Meet MnTC Goal Area 6. Coursework in this content area will develop a student's knowledge of the safe use of common materials, fabrication tools and theatrical equipment. Students will explore common theatrical production techniques and the elements of theatrical design as they apply to the concepts and meanings of a script. Students will assume various roles in collaborative theatrical production and practice communicating effectively within these roles. Each student will be required to learn and observe safety rules in the scene shop and surrounding areas. Production hours are required.

Prerequisite: None
Corequisite: None

THTR 2120 Script Analysis 3 3/0/0
Meet MnTC Goal Area 6. Coursework in this content area will develop a student's knowledge of dramatic literature from varying eras and cultures and literary elements as they are used in drama, such as plot structure, genre, subtext, conflict, etc. Students will use analytical and critical approaches to drama as text and performance. Students will explore the cultural and historical context of selected dramatic literature and the role of drama as a cultural, historical, political or personal artifact. Students will engage in critical writing in response to drama and explore the elements of production for selected plays.

Prerequisite: None
Corequisite: None

THTR 2130 Design for the Stage 3 2/1/0
Meet MnTC Goal Area 6. This course introduces students to the concepts, processes and practices common to the design of stage scenery, lighting, sound and costumes. Students will learn to analyze and apply aesthetic principles and graphic skills involved in theatrical design. Students will develop research and rendering methods. This course will emphasize design skills as a communication tool in the collaborative process of theatrical production. Each student will be required to learn and observe safety rules in the scene shop, lighting and sound booth, and other relevant technical areas. Production work hours may be required.

Prerequisite: None
Corequisite: None

TRDR 1101 Commercial Driver's License I 1 1/0/0
Students will obtain the information necessary to complete MnDOT CDL written exam.

Prerequisite: None
Corequisite: None

TRDR 1103 Commercial Driver's License II 1 0/1/0
The students will obtain the knowledge and skills necessary to complete a pre-trip inspection, vehicle handling and on-road driving test needed to obtain the basic Commercial Driver’s License. Students must enter the CDL learner permit and have taken a MnDOT physical before registering for this course.

Prerequisite: Successful completion of MnDOT CDL learner permit.
Corequisite: None

TRNS 1001 Fuel Systems I 3 2/1/0
This course covers the basics in many types of fuel systems used on current two- and four-cycle off-road/marine products. Training will be on most realms of models from high-performance to standard output recreational equipment. The incorporation of fuel distribution systems is studied along with fuel make-up and its properties. Included in this course will be practices of pre-delivery, inspection and troubleshooting along with seasonal service requirements.

Prerequisite: None
Corequisite: None

TRNS 1003 Off-Road Literature and Computer Systems 2 1/1/0
This course is designed for proper identification of the equipment that students will be working on. Students will act upon service procedures and specifications in online manuals, proper operation of equipment through the use of electronic owners manuals and accurate parts identification through online sources of service literature.

Prerequisite: None
Corequisite: None

TRNS 1005 Off-Road Electrical Systems 2 1/1/0
This course introduces electrical systems used on powersports/marine equipment, focusing primarily on ignition and electrical components. Students will learn the theories of ignition, induction, AC and DC circuits, and electronic and computer controls. Emphasis will be on proper use of test equipment and system operation.

Prerequisite: None
Corequisite: None

TRNS 1006 Off-Road Vehicle Maintenance 4 2/2/0
This off-road maintenance course is designed to train the student on techniques of preventative maintenance of the off-road vehicle or boat. Students are encouraged to bring their personal recreational vehicle(s), use the up-to-date industry products that we offer or both. Trailer maintenance also will be covered. This is an excellent course for getting off-road equipment and boats ready for the coming winter or spring.

Prerequisite: None
Corequisite: None

</table>

These courses are designed to provide hands-on training in various fields of automotive and marine technology, including electrical systems, lighting, welding, and computer controls. Students will learn to apply theories of operation and troubleshooting to real-world scenarios.
WEBD 1040 Foundations of Web Development 3 1/2/0
In this course, students will be introduced to the foundational concepts necessary for a career in Web development. Students will review technical skills needed to succeed in the field. Students will explore the foundational components of development and programming as they apply to the Web development field.
Prerequisite: None
Corequisite: None

WEBD 1110 Cascading Style Sheets 3 1/2/0
This course focuses on the use of cascading style sheets (CSS) in the creation of Web pages. Students will create and utilize CSS to provide sophisticated page layout and design for Web pages and websites. The course emphasizes standards-based design with CSS and testing sites for maximum browser compatibility.
Prerequisite: WEBD1010
Corequisite: None

WEBD 1120 User Experience Design 3 1/2/0
In this course, students will gain a hands-on understanding of user experience (UX) design practices. Students will develop an overview of the thinking and how they can be utilized to improve project design. Students also will acquire a practical strategy for incorporating user experience techniques into the implementation of projects.
Prerequisite: WEBD1000
Corequisite: None

WEBD 1130 Electronic Commerce 3 1/2/0
This course introduces emerging online technologies and trends and their influence on the electronic commerce marketplace. Students will learn various revenue models and how to market on the Web. The course introduces online auctions and various legal and ethical issues. Students will learn about important security issues such as spam and phishing. Students will learn how to plan for electronic commerce and develop an online marketing plan.
Prerequisite: None
Corequisite: None

WEBD 1140 JavaScript 3 1/2/0
This course introduces client-side development with JavaScript and jQuery. Students will learn how to create dynamic Web pages using JavaScript to add functionality and interactivity. Basic JavaScript syntax and usage, jQuery and other JavaScript libraries, and client-side security issues will be examined.
Prerequisite: WEBD1010
Corequisite: None

WEBD 1150 PHP and MySQL 3 1/2/0
This course introduces server-side development with PHP and relational database concepts with MySQL. Students will learn how these technologies work together to develop dynamic, database-driven websites. Basic PHP syntax and usage, SQL queries, database connections and server-side security issues will be examined.
Prerequisite: WEBD1040
Corequisite: None

WEBD 2000 Web Projects I 3 1/2/0
In this class, students will utilize the knowledge learned in previous classes to create websites and applications with emphasis on client-side technologies. The focus of this course is a top-down approach whereby students are assigned a project, assess the needs of the project, develop a project plan, and then identify what it will take to complete that Web project. Students will participate in group-based development activities, learn traditional project management techniques and implement technologies as needed to create a working system.
Prerequisite: WEBD1100 AND WEBD1120
Corequisite: None

WEBD 2010 Content Management Systems 3 1/2/0
This course will introduce students to powerful Web-based content management systems (CMS) used to simplify the editing of content on websites through a wide variety of plugins and themes. Students will explore how to build dynamic websites using CMS, starting with installing the CMS and working all the way through customizing the CMS with themes, plugins and application programming interfaces (APIs).
Prerequisite: WEBD1110 AND WEBD1140
Corequisite: None

WEBD 2020 User Interface Design 3 1/2/0
Students will learn the concepts and skills necessary for designing the user interface (UI) of websites and applications for the targeted user. This course is focused on the UI design process, with emphasis on the important topics of visual design, writing for the Web and accessibility.
Prerequisite: WEBD1110 AND WEBD1100
Corequisite: None

WEBD 2030 Search Engine Optimization 3 1/2/0
In this course, students will learn the components needed to effectively create and employ search engine optimization (SEO). The importance of file and site structure, proper meta tagging and correctly composed content will be addressed. Students also will understand how to properly use analytics engines, targeted advertisements and various SEO tools to maximize their search engine results, as well as monitor and improve them over time.
Prerequisite: WEBD1010 AND WEBD1130
Corequisite: None

MINNESOTA STATE COMMUNITY AND TECHNICAL COLLEGE

Directions to Campuses

Detroit Lakes Campus
900 Highway 34 East

From the East on US Highway 10
At the first stoplight as you enter Detroit Lakes, turn right onto Kris Street. Cross over the railroad track and turn left onto Randolph Road. Travel approximately 1 mile to the stop sign on Roosevelt Avenue. Turn right and travel approximately a half mile to the stop light; turn right on State Highway 34. The campus is ahead on your left.

From the East on US Highway 34
Entering the city, the campus is on your right (across from the Cenex Station).
From the West on US Highway 10 East
Continue on Highway 10 to the stop light at the intersection of US Highways 10 and 59. Turn left and continue for approximately two blocks. Turn right onto State Highway 34. The campus is about 1 mile ahead on your left.

From the South on US Highway 59
Travel on Highway 59 to the stop light at the intersection of US Highways 59 and 10. Continue straight, passing over the bridge. Turn right onto State Highway 34; the campus is about 1 mile ahead on your left.
From the North on US Highway 59
Travel on Highway 59 to the intersection of US Highway 59 and State Highway 34. Turn left onto Highway 34; the campus is about 1 mile ahead on your left.

Fergus Falls Campus
1414 College Way

From the East on Interstate 94
Take Exit 54 and turn right onto Lincoln Avenue. Turn left onto College Way, and the campus is on your right.

From the West on Interstate 94
Take Exit 54 and turn left onto Lincoln Avenue. Turn left onto College Way, and the campus is on your right.

From the East on State Highway 210 West
Turn right onto Pebble Lake Road/Vernon Avenue and continue to Union Avenue. At the stop sign, turn right onto Vernon Avenue and then left onto Lincoln Avenue at the downtown intersection. Turn right onto College Way, and the campus is on your right.

From the North on State Highway 59
At the junction with Interstate 94, turn left onto County Road 88/Fir Avenue and continue to Tower Road. Turn right onto Tower Road and continue to Spartan Drive. Turn left at the north entrance to the campus.
MINNESOTA STATE COMMUNITY AND TECHNICAL COLLEGE

Directions to Campuses

Moorhead Campus
1900 28th Avenue South

From the West on Interstate 94
Take Exit 1B (20th Street) and turn left onto 20th Street. Cross over the interstate, and you will see the college on your left. Turn left at 28th Avenue South.

From the East on Interstate 94
Take Exit 1A and turn right onto Highway 75. Immediately after your turn, take another right at the Minnesota State Community and Technical College directional sign and follow the frontage road (28th Avenue) to the campus, which will be on your left.

From the East on Highway 10
Turn left at the 21st Street intersection, one stoplight beyond Highway 75 North. Follow 21st Street beneath the railroad bridge; the street angles to the right, but continue straight onto 20th Street South. Continue for approximately two miles to 28th Avenue South. The campus will be on your left.

North Moorhead Campus
1110 14th Street South

From the main campus, travel west on either 24th or 28th avenues (the main streets on the north or south sides of the campus). Turn right onto 14th Street South and continue to 12th Avenue South, where the campus is located.

Wadena Campus
405 Colfax Ave SW

From the North on US Highway 71
At Colfax Avenue/State Highway 29, turn right and continue on Colfax Avenue for five blocks.
From the South on US Highway 71
At Colfax Avenue/State Highway 29, turn left and continue on Colfax Avenue for five blocks. The campus is on your left.

From the East on US Highway 10 West
Turn left onto State Highway 71 and continue to Colfax Avenue/US Highway 29. Turn right onto Colfax Avenue and continue for five blocks. The campus is on your left.

From the West on US Highway 10 East
Turn right onto Highway 71 and continue to Colfax Avenue/Highway 29. Turn right onto Colfax Avenue and continue for five blocks. The campus is on your left.

From the South/West on State Highway 29
The campus will be on your right shortly after entering the city limits.
