Graduate and Transfer Outcomes

Using the IPEDS cohort, M State has had steady improvement in student completions from the 2011 to 2014 cohorts within 150 percent of expected time. Within the same period, the transfer out population has increased from 16 percent to 33 percent. Using Jenkin and Fink’s (2016) student, transfer-out and transfer-with-award rates were also compared to national and Minnesota averages.
