BLDG1120 - Construction Estimating I

Credits:	2 (1/1/0)
Description:	This course covers the mathematical procedures used in material estimating and completing quantity takeoffs for building projects.
Prerequisites:	
Corequisites:	
Pre/Corequisites*:	
Competencies:	1. Calculate material quantities for residential concrete foundations. 2. Calculate material quantities for rough framing materials. 3. Calculate material quantities for exterior finishes. 4. Calculate material quantities for interior finishes. 5. Calculate labor rates and time for completing residential construction projects. 6. Demonstrate the ability to put together a professional proposal packet for a potential customer.
MnTC goal areas:	None

**Can be taking as a Prerequisite or Corequisite.*
