

## BLDG1120 - Construction Estimating I

Credits:	2 (1/1/0)
Description:	This course covers the mathematical procedures used in material estimating and completing quantity takeoffs for building projects.
Prerequisites:	
Corequisites:	
Pre/Corequisites*:	
Competencies:	<ol style="list-style-type: none"><li>1. Calculate material quantities for residential concrete foundations.</li><li>2. Calculate material quantities for rough framing materials.</li><li>3. Calculate material quantities for exterior finishes.</li><li>4. Calculate material quantities for interior finishes.</li><li>5. Calculate labor rates and time for completing residential construction projects.</li><li>6. Demonstrate the ability to put together a professional proposal packet for a potential customer.</li></ol>
MnTC goal areas:	None

*\*Can be taking as a Prerequisite or Corequisite.*
