

## BUS2400 - Supply Chain Capstone

Credits:	1 (1/0/0)
Description:	This course integrates key concepts from previous coursework in supply chain management. Students use tools and techniques from inventory control, purchasing, logistics and project management to design and evaluate supply chain systems in dynamic environments.
Prerequisites:	
Corequisites:	
Pre/Corequisites*:	
Competencies:	<ol style="list-style-type: none"> <li>1. Synthesize supply chain knowledge to analyze and solve supply chain problems.</li> <li>2. Apply appropriate tools to support decision making in areas such as demand forecasting, inventory optimization and logistics routing.</li> <li>3. Evaluate supply chain performance metrics and recommend improvements based on data-driven insights.</li> <li>4. Design and implement a supply chain project, including planning, execution and performance evaluation.</li> </ol>
MnTC goal areas:	None

*\*Can be taking as a Prerequisite or Corequisite.*
