

COSM1005 - Hair Reformation

Credits:	1 (1/0/0)
Description:	Hair reformation services allow operators to change the existing hair's texture. There are two broad categories of texture services: permanent hair reformation treatments that permanently straighten highly textured hair or soften curl, and semipermanent hair reformation treatments that eliminate frizz and smooth curly or wavy hair temporarily. In this course, students learn various types of sodium hydroxide and thio relaxers, allowing them to provide a wide range of hair reformation services on different hair textures.
Prerequisites:	
Corequisites:	
Pre/Corequisites*:	
Competencies:	<ol style="list-style-type: none">1. Describe hydroxide relaxers and the various types and strengths that are available to relax hair.2.
