COSM1109 - Skin Analysis

Credits:	1 (1/0/0)
Description:	This course introduces students to the essential principles and practices of professional skin analysis, a critical component of facial treatments and cosmetic services. Students learn how to identify skin types, conditions and underlying concerns using visual, tactile and magnification techniques, including using a Woods lamp and other diagnostic tools.
Prerequisites:	
Corequisites:	
Pre/Corequisites*:	
Competencies:	1. Explain how to conduct a thorough skin analysis client consultation. 2. Recognize common skin conditions and disorders, and distinguish between treatable and referable conditions. 3. Observe proper steps in performing skin analysis. 4. Identify the main skin types and their characteristics. 5. Perform a proper skin analysis using various techniques. 6. Determine facial treatments and product recommendations based on skin analysis results.
MnTC goal areas:	None

**Can be taking as a Prerequisite or Corequisite.*
