

## CPTR2242 - Java Programming

|                    |   |
|--------------------|---|
| Credits:           | 3 (2/1/0)   |
| Description:       | In this course the student utilizes the Java programming language to create both Internet applets and applications.   |
| Prerequisites:     |   |
| Corequisites:      |   |
| Pre/Corequisites*: |   |
| Competencies:      | <ol style="list-style-type: none"><li>1. Be aware of structured and object-oriented programming design methodologies.</li><li>2. Understand the basic components of a Java program, including methods, special symbols, and identifiers.</li><li>3. Examine how a program evaluates arithmetic expressions.</li><li>4. Explore how to properly structure a program, including using comments to document a program.</li><li>5. Demonstrate how to import packages.</li><li>6. Explain type casting.</li><li>7. Use object and reference variables.</li><li>8. Utilize the class String.</li><li>9. Demonstrate how to use input and output dialog boxes in a program.</li><li>10. Use predefined and user-defined methods in a program.</li><li>11. Code control structures.</li><li>12. Utilize relational and logical operators.</li><li>13. Define modifiers.</li><li>14. Explore variables as parameters.</li><li>15. Create packages.</li><li>16. Demonstrate knowledge of the abstract data type (ADT).</li><li>17. Create one-dimensional and multidimensional arrays.</li><li>18. Test and debug Java programs.</li></ol> |
| MnTC goal areas:   | None  |

\*Can be taking as a Prerequisite or Corequisite.
