

## CSEC2210 - Security Breaches and Countermeasures

Credits:	3 (2/1/0)
Description:	This course introduces the student to the various methodologies for attacking a network. The student will be introduced to concepts, principles and techniques, supplemented by hands-on exercises for attacking and disabling a network. The course will emphasize network attack methodologies with the emphasis on student use of network attack techniques and tools.
Prerequisites:	<ul style="list-style-type: none"> <li>• CPTR2236</li> <li>OR</li> <li>• CSEC1110</li> </ul>
Corequisites:	
Pre/Corequisites*:	
Competencies:	<ol style="list-style-type: none"> <li>1. Describe threats to and vulnerabilities of systems.</li> <li>2. Perform risk management functions.</li> <li>3. Plan a security assessment using current practices.</li> <li>4. Perform a security assessment using current practices.</li> <li>5. Utilize current tools to assess network security.</li> <li>6. Conduct a penetration test using current practices.</li> <li>7. Employ information reconnaissance techniques.</li> <li>8. Conduct an IT audit using current best practices.</li> <li>9. Implement countermeasures for networks.</li> <li>10. Complete written documentation of threats.</li> <li>11. Evaluate methods of non-network methods to gain network access.</li> <li>12. Analyze methods used by attackers to avoid detection.</li> <li>13. Conduct attacks on a controlled network.</li> <li>14. Demonstrate ethical behavior.</li> </ol>
MnTC goal areas:	None

\*Can be taking as a Prerequisite or Corequisite.
