

## CVRI2146 - Cardiovascular Electrocardiography

Credits:	1 (1/0/0)
Description:	Students will learn electrocardiography (ECG) electrode placement, ECG measurements and rhythm interpretation for patients experiencing cardiac conditions treated in the cardiac catheterization laboratory.
Prerequisites:	<ul style="list-style-type: none"> <li>• CVRI1120</li> </ul>
Corequisites:	
Pre/Corequisites*:	
Competencies:	<ol style="list-style-type: none"> <li>1. Demonstrate correct ECG electrode placement.</li> <li>2. Interpret normal and abnormal cardiac rhythms.</li> <li>3. Calculate heart rate and intervals from ECG rhythm strips.</li> </ol>
MnTC goal areas:	None

\*Can be taking as a Prerequisite or Corequisite.
