

## DET1204 - Mechanical Drawing III

Credits:	4 (2/2/0)
Description:	The objective of this course is to develop students' use and knowledge of mechanical fasteners and welding symbols, their proper application on weldment drawings, and documentation of assemblies and sub-assemblies. Students also develop an understanding of tolerancing types and rules, including fundamental knowledge of geometric dimensioning and tolerancing symbols, datums and material conditions.
Prerequisites:	<ul style="list-style-type: none"> <li>• DET1104</li> <li>• DET1106</li> </ul>
Corequisites:	
Pre/Corequisites*:	
Competencies:	<ol style="list-style-type: none"> <li>1. Identify types of permanent fasteners, their properties and application.</li> <li>2. Identify types of temporary fasteners, their properties and application.</li> <li>3. Create and apply welding symbols to weldment drawings.</li> <li>4. Identify weld joint types and applications.</li> <li>5. Analyze fastener requirements for various types of assemblies and sub-assemblies.</li> <li>6. Generate and accurately document a bill of material for assemblies and sub-assemblies.</li> <li>7. Generate and accurately document engineering change orders.</li> <li>8. Understand and apply tolerancing applications for bilateral, unilateral, deviation and limits tolerances.</li> <li>9. Apply appropriate datums for surfaces, lines and points following geometric dimensioning and tolerancing standards.</li> <li>10. Explain primary, secondary and tertiary datums.</li> <li>11. Define and understand the application of maximum material condition, least material condition and the definition of regardless of feature size.</li> <li>12. Analyze and apply the principles of form, position, location, orientation and run-out tolerances.</li> </ol>
MnTC goal areas:	None

\*Can be taking as a Prerequisite or Corequisite.
