

## ENGT1118 - Construction and Manufacturing Math

Credits:	3 (3/0/0)
Description:	This course covers the application of common geometric and trigonometric calculations related to the construction and manufacturing industries.
Prerequisites:	• MATH0055
Corequisites:	
Pre/Corequisites*:	
Competencies:	<ol> <li>Solve metric-standard conversions.</li> <li>Solve decimal-surveying angular conversions.</li> <li>Calculate material values from given unit quantities.</li> <li>Solve proportions containing one variable.</li> <li>Solve basic equations containing one variable.</li> <li>Calculate material quantities and costs from given conditions.</li> <li>Solve for unknowns of right triangles.</li> <li>Solve for unknowns of oblique triangles.</li> <li>Calculate area, volume and perimeter from given conditions.</li> </ol>
MnTC goal areas:	None

<sup>\*</sup>Can be taking as a Prerequisite or Corequisite.
