

## ESTH1001 - Advanced Exfoliation

Credits:	2 (2/0/0)
Description:	This course provides practical knowledge and practice of exfoliation using advanced chemicals and devices, including but not limited to beta-hydroxy acid chemical peels, alpha-hydroxy acid chemical peels, trichloroacetic acid chemical peels, crystal and diamond microdermabrasion, hydrodermabrasion and dermaplaning. Students learn to recognize and treat skin conditions, conduct advanced consultations, and perform client charting and health screening. Students understand wound healing as it relates to advanced esthetics and proper pre- and post-surgical at-home care. This class covers training in advanced product chemistry and ingredients.
Prerequisites:	
Corequisites:
