

## HLTH1005 - Introduction to Medical Terminology

|                    |   |
|--------------------|---|
| Credits:           | 1 (1/0/0)   |
| Description:       | The course introduces the building of medically rooted words, including prefixes and suffixes. A foundation is created for the continued development of medical and health vocabulary for students desiring programs in health-related fields. The student learns to spell, pronounce, define, analyze and formulate terminology related to body structure, disease process, diagnosis and treatment. |
