

MATH1000 - Technical Mathematics

| | |
|--------------------|--|
| Credits: | 3 (3/0/0) |
| Description: | This course presents basic mathematical topics as they are applied in a technical program. The course includes a review of basic mathematical operations and continues with the development of algebraic and trigonometric skills in a technical setting. Most concepts will be applied through course-specific problems. This course is not an MnTC Goal Area 4 mathematics course, nor does it prepare students for taking an MnTC Goal Area 4 mathematics course. |
| Prerequisites: | |
| Corequisites: | |
| Pre/Corequisites*: | |
| Competencies: | <ol style="list-style-type: none"> 1. Review basic mathematical operations involving whole numbers, decimals, fractions, signed numbers, percents and order of operations. 2. Perform metric system conversions and apply to program-specific problems. 3. Solve basic linear equations. 4. Manipulate formulas. 5. Solve and apply variation problems. 6. Demonstrate usage of a scientific calculator. 7. Identify appropriate geometric formulas to solve perimeter, area and volume applications. 8. Solve basic right triangle trigonometry application problems. 9. Formulate solutions to program-specific problems. |
| MnTC goal areas: | None |

*Can be taking as a Prerequisite or Corequisite.
