

# ED2233 - Strategies for Working With Individuals With Autism Spectrum Disorder

|                    |  |
|--------------------|--|
| Credits:           | 4 (4/0/0)  |
| Description:       | This course will introduce students to evidence-based and research-focused intervention strategies commonly implemented when serving individuals with autism spectrum disorders (ASD). Team-based collaborative consultation for individuals diagnosed with ASD is also addressed. Topics include direct instruction, communication skills training, social and emotional skills training and general supportive strategies. This course is cross-listed with PSYC 2233.   |
| Prerequisites:     |  |
| Corequisites:      |  |
| Pre/Corequisites*: |  |
| Competencies:      | <ol style="list-style-type: none"> <li>1. Discuss the importance of early detection and intervention in the treatment of young children with ASD and the importance of family partnerships.</li> <li>2.
