

## RADT1112 - Introduction to Radiologic Technology and Patient Care

| Credits:                        | 4 (3/1/0)  |
|---------------------------------|--|
| Description:                    | This course is designed to provide concepts of radiologic sciences and patient care. Included<br>in the course are discussions of professionalism, effective communication, patient physical<br>needs assessment, patient consent procedures, x-ray production characteristics, basic<br>radiation protection procedures, health information confidentiality, medical terminology,<br>principles of pharmacology and contrast media, quality management, ethical behaviors and<br>legal issues in health care. The student will also demonstrate competence in routine and<br>emergency patient care, patient transfer and safety procedures, infection control, aseptic and<br>sterile environment procedures, and radiographic equipment manipulation. |
| Prerequisites:                  | • RADT1102   |
| Corequisites:                   | • RADT1116<br>• RADT1124   |
| Pre/Corequisites <sup>*</sup> : |  |

## RADT1112

| Competencies:    | <ol> <li>Identify what professionalism is for the health care practitioner.</li> <li>Explain the importance of professional behaviors of the radiologic technologist.</li> <li>Select the appropriate method of communication (e.g. verbal, non-verbal, etc.) for various individuals in the health care environment.</li> <li>Discuss recognition of the physical needs of patients and their caregivers.</li> <li>Explain patient consent procedures.</li> <li>Discuss the properties of electromagnetic radiation.</li> <li>Explain how x-rays are produced.</li> <li>Explain procedures used for radiation protection.</li> <li>Identify confidentiality procedures set forth by the Health Insurance Portability and Accountability Act (HIPAA).</li> <li>Discuss the word-building process of medical terminology.</li> <li>Identify routes of drug and contrast media administration.</li> <li>Explain pharmacology and contrast media safety concerns and procedures.</li> <li>Discuss quality management procedures in health care.</li> <li>Explain entrical behavior and its role in health care.</li> <li>Explain entrical emergencies and traumatic injuries.</li> <li>Demonstrate enuice patient care techniques.</li> <li>Demonstrate energency patient care techniques.</li> <li>Demonstrate infection control procedures.</li> <li>Demonstrate energency patient care techniques.</li> <li>Demonstrate energency patient care techniques.</li> <li>Demonstrate energency patient care techniques.</li> <li>Demonstrate sterile, aseptic and non-aseptic procedures.</li> <li>Demonstrate sterile, aseptic and non-aseptic procedures.</li> <li>Manipulate equipment for radiographic procedures.</li> </ol> |
