

ACCOUNTING CLERK

DIPLOMA - 32 CREDITS

About this program

This program provides the knowledge and skills necessary to perform routine calculating, journalizing, posting and verifying duties to maintain accounting records and prepare payroll reports and individual state and federal tax returns. Both manual and computerized accounting concepts and applications are included.

Program outcomes

1. Demonstrate application of a variety of software programs, including integrated accounting software.
2. Apply accounting theory to service and merchandising organizations.
3. Calculate payroll, maintain records and prepare reports in compliance with state and federal requirements.
4. Apply accounting theory to corporate organizations.
5. Demonstrate the ability to prepare financial statements.
6. Apply the Internal Revenue Code as it relates to individual income taxes.

- BUS1141 - Introduction to Business BUS2150 - Legal Environment of Business BUS2204 - Principles of Management BUS2206 - Principles of Marketing HRES1122 - Human Resource Management HRES1130 - Benefits Administration AGRI1170 - Introduction to Ag

Course summaries

ACCT1101 - Payroll (3 credits)

This course covers the various tax laws pertaining to the computation and payment of salaries and wages. Topics include preparation of employment records, payroll registers, time cards, employee earnings records and government payroll reports.

ACCT1124 - Spreadsheet Applications (3 credits)

This course provides students with in-depth coverage of a spreadsheet application as used in a business setting. Students should be familiar with Windows and word processing.

Prerequisites:

- BUS1100

ACCT2211 - Financial Accounting I (3 credits)

This course introduces students to the content and concepts underlying financial statements. Course content includes study of the accounting model, financial statements, merchandise accounting, internal controls and accounting for assets. The course focuses on using accounting information for decision making.

ACCT2212 - Financial Accounting II (3 credits)

This course continues the introduction to the content and concepts underlying basic financial statements. Major content includes income measurement, accrual accounting, accounting theory, time-value of money, accounting for current and long-term liabilities, owner's equity for sole proprietorships, partnerships and corporations, statement of cash flows and financial statement analysis.

Corequisites:

- ACCT2211

ACCT2218 - QuickBooks (2 credits)

This course is an introduction to computerized accounting applications and software used in the business environment. Topics may include general ledger accounting, payroll procedures, accounts receivable, accounts payable, inventory and depreciation.

Prerequisites:

- ACCT2211
- BUS1100

ACCT2255 - Income Tax-Individual (3 credits)

This course provides an explanation and interpretation of the Internal Revenue Code as applied to individual income tax returns. Topics covered include filing requirements, filing status, gross income and exclusions, business income and expenses, tax credits and tax estimates.

BUS1100 - Business Computers (3 credits)

Students will utilize business computer software applications including word processing, spreadsheets, databases and presentation software to solve business problems, emphasizing professional design and organization. Additional topics include basic computer hardware, computer security and ethics, privacy concerns and professional communication standards.

ACCT2210 - Managerial Accounting (4 credits)

This course focuses on providing financial information to management for strategic decision-making related to cost analysis and cost management.

ACCT2256 - Income Tax-Business (3 credits)

This course provides an explanation and interpretation of the Internal Revenue Code as applied to sole proprietorships, partnerships and corporations. Topics include business income, expenses, business tax credits, withholding and payment of established estate and trust tax issues.

AGRI1170 - Introduction to Agribusiness (3 credits)

This course is an introduction to the economic environment of the agribusiness sectors of our economy. The course examines the role agriculture plays in the U.S. and global economies. Concepts to be examined include but are not limited to management of agribusiness, marketing of agribusiness, finance of agribusiness and government involvement in agriculture and agribusiness.

BUS1141 - Introduction to Business (3 credits)

This course offers a broad overview of the business world for both business and non-business majors. It is an introduction to the business environment, business ownership, management, marketing, technology and information, human resources, accounting and legal studies. This course introduces students to the concepts and knowledge of key business functions within the context of the global economy. This class will provide a foundation for other business courses and help students discover their career path while learning the fundamentals of business.

BUS2150 - Legal Environment of Business (3 credits)

This course offers an overview of the American legal system and provides an introduction to what a business person should know about the law and the American legal system. Major content areas include the court system, trial process, alternative dispute resolution, business and the Constitution, the administrative process, torts and product liability, common law of contracts, employment law, employment discrimination, anti-trust law, international business and ethics.

BUS2204 - Principles of Management (3 credits)

This course examines the historical and philosophical foundations of management as well as current theory and practices. Managerial decisions as a planner, organizer, motivator, controller and leader of a diverse workforce in a competitive environment are identified and evaluated. The course is a study of the basic principles of business management, including the functional, scientific, behavioral and systems approaches along with the role of projects in contemporary organizations. Current literature, concepts, models and applications may be included as well as the use of case studies.

BUS2206 - Principles of Marketing (3 credits)

This course examines the business function of marketing and will enhance students' decision-making skills in a global market. The course focuses on how marketers create value by satisfying customer needs and wants by analyzing which target markets the organization can best serve, and the appropriate strategies to serve these markets. This course will also discuss the implications of environmental factors (including the digital environment) that can impact the marketing strategies of a business. Topics include business and consumer markets, branding and product strategies, marketing research, digital marketing concepts, pricing, promotion and supply chain management.

HRES1122 - Human Resource Management (3 credits)

This course is an introduction to the basic principles of human resource functions and services. It provides a background and understanding for further human resource courses.

HRES1130 - Benefits Administration (3 credits)

This course covers basic knowledge and information about the various types of benefits that are typically offered by employers for their employees.
