

## Biology of Human Concerns

Credits:	3 (2/1/0)
Description:	Meets MnTC Goal Areas 2 and 3. This course explores issues related to human biology with reference to genetics, nutrition, health, disease or other contemporary issues. Elements of molecular, cell and organismal biology are introduced as needed to understand the topics studied. This course is intended for non-science majors and consists of lecture and laboratory components.
Prerequisites:	None
Corequisites:	None
Competencies:	<ol style="list-style-type: none"> <li>1. Compile information regarding issues related to human biology.</li> <li>2. Identify possible goals, biases, and assumptions in sources of information.</li> <li>3. Recognize social, personal and commercial values that may influence decisions, interpretations, analyses, and evaluations made by ourselves and others with respect to issues in human biology.</li> <li>4. Create possible alternative solutions or interpretations to given issues in human biology.</li> <li>5. Integrate information to topics under discussion in a clear, concise, comprehensive, relevant manner in an oral and/or written form.</li> <li>6. Demonstrate an understanding of scientific theories in human biology (e.g., homeostasis, cell theory, levels of organization).</li> <li>7. Identify the human body organ systems and their general function in homeostasis.</li> <li>8. Relate an understanding of the relationship between the environment and homeostasis.</li> <li>9. Evaluate societal issues related to human biology from a natural science perspective.</li> <li>10. Develop informed opinions about policies related to human biology.</li> <li>11. Use the scientific method to solve problems.</li> <li>12. Communicate results orally and/or in written format.</li> </ol>
MnTC goal areas:	<ol style="list-style-type: none"> <li>2. Critical Thinking</li> <li>3. Natural Sciences</li> </ol>
