MOBILE WELDING TRAINING

10-station mobile welding trailer equipped with the following welding processes:

- **Gas Metal Arc Welding (MIG)**
 - Aluminum, steel and stainless steel
 - Trailer capacity is eight students
 - Short circuit, spray and pulsed spray metal transfers
- **Fluxed Cored Arc Welding**
 - Steel with gas shielded or self-shielded
- **Gas Tungsten Arc Welding (TIG)**
 - Aluminum, steel and stainless steel
 - Trailer capacity is 10 students
 - Standard and pulse
- **Shielded Metal Arc Welding (Stick)**
 - Steel and stainless steel
 - Trailer capacity is 10 students
- **Thermal Cutting Stations**
 - Oxygen fuel cutting
 - Manual and mechanized
 - Plasma arc cutting
 - Manual
- **Inspection/Testing Stations**
 - Visual inspection
 - Guided bend testing
- **Classroom Capabilities**
 - Process theory and application
 - Print reading
 - Weld symbols
 - Basic math
 - AWS standards

Power Requirements:
208-240 Volt 3 Phase
requires two 200 Amp
lines within 15'
from the left rear corner
of the trailer or 480 Volt 3
Phase requires one 150
Amp line within 35'
from the left rear corner
of the trailer

- Customized curriculum based on the needs of your company.
- Welder certifications in accordance with AWS, API or ASME Standards.
- Instructor is an AWS certified inspector, educator and welder.
