Numbers Used In Calculation: Fall Spring
 * Number of Students on Campus - 97 29
 * Number of Residents in County 58,812 58,812
 * Number of Total Isolation Beds = 16

Transmission Level	Course Delivery Method	7-day infection increase on campus	14-day percent of on-campus student infection	Case management	% of isolation beds full	Test and PPE	14-day case rate per 10,000	Change in 7-day case rate per 10,000
Low	Majority of classes on Campus	No increase	<1% over 14 days	Contacts identifiable	< 50%	Good+A41; G41	< 10	7-day case rate steady or declining
Medium	Hybrid Majority on-line	Increasing	1% - 3% over	5%+ of cases with unknown links	50% - 75%	Test result delays; less than 10 day case	10 to 30	7-day case rate increasing
High	Limited classes on campus	Increasing over 2 week period	3%+ over 14 days	Student / employee noncompliance	75% +	Continued issues with testing or PPE	30+	Continued local case increases
Sustained	No Classes on Campus
